	TSS (\$/lb/mo)	35.80

¹ Includes BCC 6514 and 8800.

² Residential fee is calculated as follows:

Flow:	6.7	x	\$88.60	=	\$594
CODF:	7.9	x	16.10	=	127
TSS:	11.29	x	35.80	=	<u>404</u>
					\$1,125

³ Fee applied times the anticipated maximum monthly flow contributions. Capacity fees are based on the average wastewater strength measured for each classification of customer.

⁴ For non-residential customers with projected treatment revenues equal to or greater than 0.1% of the total District treatment revenue, the calculated capacity fee will be reduced by a Rate Stabilization Factor of 25%. Projected treatment revenue will be based on permit conditions at the time of application or on average wastewater strength measured for each classification of customer if a permit is not required for discharge. Total District treatment revenue will be based on the budgeted fiscal year amount at the time of application.

⁵ Total fee is a summation of the unit rates for flow, CODF, and TSS times permit conditions at the time of application.
