I. STATEMENT OF WORK

A. SCOPE OF PROJECT

It is the intent of these specifications, terms, and conditions to describe the construction management services required for the Chabot Dam Seismic Upgrade Project, and the USL Reservoir Tower Upgrade Project.

East Bay Municipal Utility District (District) intends to award a contract to the Proposer who best meets the District's requirements.

The purpose of the Chabot Dam Seismic Upgrade project is to reduce the possibility of damage to the earthen dam and reservoir outlet works due to a large earthquake on the adjacent Hayward Fault. The main components of the project include cement deep soil mixing (CDSM) to strengthen the soils within the downstream toe of the dam down to bedrock and install a new reservoir outlet pipeline and valves. This work is a result of a seismic stability report performed by the District that indicated that the dam could settle and laterally displace several feet, and the reservoir outlet works could suffer severe damage.

The Upper San Leandro Reservoir Outlet Tower Upgrade Project is to improve the structural integrity of the outlet tower and ensure safe operation of the tower and its components after a seismic event. The work includes the installation of concrete collar braces on the outlet tower anchored to the shore on two concrete pads with drilled piers, and the replacement of valves and ladders.

These two projects will be advertised as separate construction contracts in March and August 2016, and construction is expected to be performed during an 18 month period.

B. SCOPE OF CONSULTANT SERVICES

The District is requesting proposals from a qualified geotechnical/construction management consultant to support the District in the contract administration and inspection on the Chabot Dam and Seismic Upgrade and USL Reservoir Tower Retrofit project. The consultant shall provide construction support services augmenting the EBMUD construction management team. This shall include construction management, resident engineering, and inspection services. The required

services are described in more detail in Paragraph D - Specific Requirements. Consultants may include additional task items and details that will best serve the Project. The consultant selected under this RFP will be excluded from bidding on the construction contract

C. PROPOSER QUALIFICATIONS

1. Provide the following information to demonstrate the qualifications and experience of the Consultant, sub-consultants, and key personnel that would be assigned to the project.
 - a. A brief description of two (2) projects performed within the last 3 to 5 years that best demonstrates the Contract Manager's leadership, organizational, and communication skills and experience blending teams for construction projects with similar challenges.
 - b. A brief description of two (2) projects performed within the last 3 to 5 years that best demonstrates the Construction Manager/Resident Engineer's written communication skills and experience in managing construction projects with similar challenges. EBMUD desires that the Prime Consultant's proposed Construction Manager /Resident Engineer be registered and licensed to practice engineering in the State of California
 - c. A brief description of three (3) projects performed within the last 3 to 5 years that best demonstrates the Construction Inspectors' skills and experience in inspecting CDSM or similar projects.
 - d. A brief description of four (4) projects that best demonstrate the Consultant Team's ability to blend with District staff to successfully carry out this project. Include any projects that the Contract Manager and team members have worked on together in the last 3-5 years. Identify the project name, briefly describe what was done, start and completion dates, construction value, and value of Construction contract.

D. SPECIFIC REQUIREMENTS

- 1. The District Construction Manager (CM) will have overall responsibility for successful project implementation within the project budget and will ensure EBMUD standards and procedures are complied with. The District Design Engineer (DE) will have responsibility to ensure that the design intent of the project is accomplished. The CONSULTANT staff shall be responsible to ensure that the construction complies with the Contract Documents and District procedures. The District uses EADOC project management software and the CONSULTANT will be required to use this software as well.

The CONSULTANT shall provide construction management personnel to provide the services described below:

- b. Construction Manager/Resident Engineer (CM/RE) to work in the field office and respond to contractor correspondence and to trouble-shoot and resolve field problems. The CM/RE will oversee the field staff efforts to ensure quality construction, meet the design intent in a cost effective fashion, on schedule and with minimum practicable impact to the local environment and community. The CM/RE shall administer the construction contract and have the technical skills to interpret the drawings and specifications and resolve typical field problems.  - e. Clerical Support (CS) to provide field administrative and clerical support needed throughout the project, such as documentation management through EADOC, filing, answering phones, meeting minutes, etc.
 - f. Other Services: Consultants are encouraged to identify possible additional services as needed to effectively manage the construction contract.
2. The project will have the following challenges:
- a. Confirmation of In-Situ Strengthening: The work at the Chabot Dam involves extensive in-situ strengthening of a varying subsurface material. Quality control of the work process and verification via a robust sampling program will be needed to ensure that the completed work achieves the design objectives.
 - b. Blending of EBMUD/Consultant Staff: This construction management of these projects will include both EBMUD and Consultant staff working closely together to administer the contract. Consultant will need to understand the public agency process and procedures, and make sure roles and responsibilities are clear.

CHABOT RESERVOIR SEISMIC UPGRADE AND USL RESERVOIR TOWER UPGRADE REQUEST FOR CONSTRUCTION SUPPORT SERVICES

- c. Water Quality: At both locations work will take place within the raw water reservoirs and maintaining water quality while performing the required work will be a challenge.
- d. Underwater Construction: The work at the Chabot Reservoir site outlet works requires the removal and replacement of a pipeline underwater. Inspection to ensure quality of this work will be required.
- e. Work in Active Park: At Chabot Reservoir, the travel routes and the construction zone will be within the Lake Chabot Regional Park and trails. Maintaining park-visitor safety and a safe secure work area will be required.
- f. Work Restrictions: At Chabot Reservoir, work on the Outlet Tower can only be performed between the May to December time period requiring close planning and scheduling
- g. Environmental Protection: Work at Chabot and USL Reservoirs is located within biologically significant zones and construction impacts must be minimized.

III. DISTRICT PROCEDURES, TERMS, AND CONDITIONS

A. RFP ACCEPTANCE AND AWARD

1. RFP responses will be evaluated by a committee and will be scored/ranked in accordance with the RFP section entitled "Evaluation Criteria/Selection Committee."
2. The committee will recommend award to the Proposer who, in its opinion, has submitted the RFP response that best serves the overall interests of the District. Award may not necessarily be made to the Proposer with the lowest overall cost.
3. The District reserves the right to award to a single or to multiple General or Professional Service Providers, dependent upon what is in the best interest of the District.
4. The District has the right to decline to award this contract or any part of it for any reason.
5. Any specifications, terms, or conditions issued by the District, or those included in the Proposer's submission, in relation to this RFP, may be incorporated into any PO or contract that may be awarded as a result of this RFP.
6. Award of contract. The right is reserved to reject any or all proposals, to accept one part of a proposal and reject the other, unless the bidder stipulates to the contrary, and to waive technical defects, as the interest of the District may require. Award will be made or proposals rejected by the District as soon as possible after bids have been opened.

B. EVALUATION CRITERIA/SELECTION COMMITTEE

All proposals will be evaluated by a District Selection Committee (DSC). The DSC may be composed of District staff and other parties that may have expertise or experience in this type of procurement. The DSC will select a Proposer in accordance with the evaluation criteria set forth in this RFP. The evaluation of the RFP responses shall be within the sole judgment and discretion of the DSC.

The DSC will evaluate each RFP response meeting the qualification requirements set forth in this RFP. Proposer should bear in mind that any RFP response that is unrealistic in terms of the technical or schedule commitments, or unrealistically high or low in cost, will be deemed reflective of an inherent

CHABOT RESERVOIR SEISMIC UPGRADE AND USL RESERVOIR TOWER UPGRADE REQUEST FOR CONSTRUCTION SUPPORT SERVICES

lack of technical competence or indicative of a failure to comprehend the complexity and risk of the District's requirements as set forth in this RFP.

RFP responses will be evaluated and scored according to each Evaluation Criteria below, and scored according to a zero to five-point scale. The scores for all Evaluation Criteria will then be added to arrive at a weighted score for each RFP response. An RFP response with a high weighted total will be deemed of higher quality than one with a lesser-weighted total.

Each consultant must demonstrate its approach and experience in successfully performing other projects of similar scope and complexity. Key evaluations elements will include the Consultant's understanding of the project and its constraints, experience of the key team members and proposed approach and flexibility to staff the project in a cost effective manner. The ideal Consultant shall demonstrate at least five recent years of experience and strong organizational skills and leadership of Consultant Teams that provide:

1. A clear, concise, and creative project approach which demonstrates a thorough understanding of the project and contains well defined tasks for achieving the project's objectives, while providing the ability (and flexibility) to adjust and sequence inspection staff to meet the contractor's construction schedule.
 - a. The Project Approach shall clearly demonstrate your team's proposal to meet the challenges this project poses. Address your understanding of the project, including your approach to enforcing the construction requirements, providing effective work documentation, and ensuring compliance with environmental constraints and limitations. Indicate the likely types of construction crews and work activities that may be working at different times during the project, and how this may impact inspection staffing. Address how your team proposes to adjust to variable construction approaches and methodologies that a construction contractor may employ, and identify any other factors that should be given consideration regarding the proper level of contractor control, and inspection/documentation of the work. This shall include a complete discussion on your methodology and ability to provide inspection coverage (type and disciplines of inspectors), and documentation of construction activities in a manner that is: 1) adequate to insure conformance to meet intent of the bid documents, and 2) is a cost effective approach.

CHABOT RESERVOIR SEISMIC UPGRADE AND USL RESERVOIR TOWER UPGRADE
REQUEST FOR CONSTRUCTION SUPPORT SERVICES

- b. Additionally, discuss any UPGRADE or changes (deletions or additions) that you may propose to the tentative scope of services, and reasons for proposed changes. Highlight those changes that may result in a reduction of cost or time.
2. A comprehensive and logical work plan with well-defined roles that provides all services identified in Statement of Work Paragraph D Specific Requirements and a resource-loaded project schedule with labor estimates by task and position, including sub-consultant's proposed participation.
 - a. Include a clear statement of project team responsibilities and reporting relationships, inclusive of key staff proposed (by name) for key work tasks and responsibilities. The Prime Consultant shall employ the Contract Manager and the Resident Engineer/Construction Manager. Sub-consultants may fulfill Construction Inspector or other field/home office support roles. Provide an organizational chart illustrating how you would organize the team, indicating discipline, function, firm name, and reporting structure.
3. Experience working with blended staffing and similar workload schedules
 - a. Utilizing the tentative construction schedules provided in the Statement of Work as basis of project duration, provide a simple one page bar schedule indicating proposed blended staffing for the project. Include duration start and stop dates for each key member of the team, and if services are anticipated to be needed on a full time or part time basis. Include an estimate of the number, duration and type of inspectors that will be needed to provide adequate inspection coverage and contractor control. List assumptions on a separate sheet, and include a summary of labor hours proposed to accomplish the work for each member.
 - b. EBMUD understands that the number of inspectors required to inspect the work will be somewhat dependent on the Contractor's approach and scheduling of work. For purposes of this RFP, EBMUD requests that you provide an estimate of the maximum number of inspection hours your team would anticipate, based on your experience on similar projects, and on the flexibility your team will be able to provide to accommodate a contractor's scheduling and work crew methodology.

CHABOT RESERVOIR SEISMIC UPGRADE AND USL RESERVOIR TOWER UPGRADE
REQUEST FOR CONSTRUCTION SUPPORT SERVICES

4. Capability and experience of the team to develop creative alternatives to eliminate or mitigate potential risk of schedule delay and/or cost impacts on similar projects;
5. Experience and background of the Construction Manager/Resident Engineer demonstrating capabilities to resolve typical construction problems involving CDSM to strengthen soils, dam outlet piping replacement, and/or outlet tower seismic strengthening, or experience with other similar projects.
6. Experience of Resident Engineer/Construction Manager on similar construction administration assignments to draft clearly written and concise project correspondence, and address potential delay and claim issue in a timely manner (examples may be provided);
7. Experience and background of Construction Inspectors demonstrating capabilities in similar projects. [Note that not all inspectors are expected to have each of these skills, but the combined inspection team should effectively combine these areas of experience];
8. Relevant experience of the firms involved with similar projects;
9. Responses to the questions posed at the interview; and
10. Compliance with the Contracting Objectives of EBMUD's Contract Equity Programs
11. Proposer shall be eligible for SBE preference points if they are a certified small business entity, as described in the guidelines contained in Exhibit A-Contract Equity Program, and they check the appropriate box, requesting preference, in Exhibit A-Proposer Information and Acceptance.

CONTRACT EQUITY PROGRAM & EQUAL EMPLOYMENT OPPORTUNITY

The District's Board of Directors adopted the Contract Equity Program (CEP) to enhance equal opportunities for business owners of all races, ethnicities, and genders who are interested in doing business with the District. The program has contracting objectives, serving as the minimum level of expected contract participation for the three availability groups: white-men owned businesses, white-women owned businesses, and ethnic minority owned businesses. The contracting objectives apply to all contracts that are determined to have subcontracting opportunities and to all General or Professional Service Providers regardless of their race, gender, or ethnicity.

All Contractors and their subcontractors performing work for the District must be Equal Employment Opportunity (EEO) employers, and shall be bound by all laws prohibiting discrimination in employment. There shall be no discrimination against any person, or group of persons, on account of race, color, religion, creed, national origin, ancestry, gender including gender identity or expression, age, marital or domestic partnership status, mental disability, physical disability (including HIV and AIDS), medical condition (including genetic characteristics or cancer), genetic information, or sexual orientation.

Contractor and its subcontractors shall abide by the requirements of 41 CFR §§ 60-1.4(a), 60-300.5(a) and 60-741.5(a). These regulations prohibit discrimination against qualified individuals based on their status as protected veterans or individuals with disabilities, and prohibit discrimination against all individuals based on their race, color, religion, sex, sexual orientation, gender identity, or national origin in the performance of this contract. Moreover, these regulations require that covered prime contractors and subcontractors take affirmative action to employ and advance in employment individuals without regard to race, color, religion, sex, national origin, protected veteran status or disability.

All Contractors shall include the nondiscrimination provisions above in all subcontracts.

Please include the required completed forms with your proposal. Non-compliance with the Guidelines may deem a proposal non-responsive, and therefore, ineligible for contract award. Your firm is responsible for:

- 1) Reading and understanding the CEP guidelines.
- 2) Filling out and submitting with your bid the appropriate forms.

The CEP guidelines and forms can be found at the following direct link:

2.6 Budget Amounts

	<u>Contracted Services</u>	<u>Optional Services</u>	<u>Maximum Services*</u>
Cost Ceiling	\$(dollars)	\$(dollars)	\$(dollars)
Professional Fee Ceiling	(dollars)	(dollars)	(dollars)
Agreement Ceiling	(dollars)	(dollars)	(dollars)

**** (Maximum Services is the sum of Contracted and Optional Services. If your scope has no Optional Services, delete the Contracted and Optional Services columns.)***

Costs described above, comprising Direct Labor, Indirect Costs, Subconsultant Services, Other Direct Costs, and Professional Fee, shall be payable up to the Agreement Ceiling as specified herein.

2.7 Billing and Payment

A ceiling price is in effect for the entire Scope of Services. If the authorized Agreement Ceiling, including the authorized Professional Fee Ceiling, is reached, CONSULTANT shall complete the agreed-upon work for the authorized Agreement Ceiling. Labor hours may be reallocated within the tasks without renegotiation of the Agreement with written approval from the DISTRICT Project Manager in such a manner so as not to exceed the Agreement ceiling price. In no event shall the Cost Ceiling of the Agreement or the Professional Fee Ceiling be increased unless there is a written amendment of this Agreement.

2.8 Budget Status Reports

For the duration of this Agreement, the CONSULTANT shall provide DISTRICT with ("***bi-weekly" or "monthly" depending on duration of project***") budget status reports that include, in tabular or graphical format, for each report period: (1) the original cumulative projected cash flows for the duration of the project (prepared at the start of the project), (2) the actual cash flows for the work completed to date, (3) the current projected cash flows to complete the project, and (4) the earned value (the amount of work actually completed to date compared to the budget expended).
