SCHEDULE B – WASTEWATER DEPARTMENT WET WEATHER FACILITIES CHARGE

EFFECTIVE 07/01/24

Annual Charge Collected on Property Tax Bill¹

TYPE	RATE
Small Lot (0 - 5,000 sq. ft.)	\$147.38
Medium Lot (5,001 – 10,000 sq. ft.)	\$230.16
Large Lot (> 10,000 sq. ft.)	\$526.00

¹ The WWFC for entities that are exempt from property taxes (e.g., public agencies) is collected through the District's billing process.

RESOLUTION NO. _____

ADOPTING THE REPORT OF THE EAST BAY MUNICIPAL UTILITY DISTRICT WET WEATHER FACILITIES CHARGE AND DIRECTING THE SECRETARY TO FILE SAID REPORT WITH THE ALAMEDA COUNTY AUDITOR-CONTROLLER AND THE CONTRA COSTA COUNTY AUDITOR-CONTROLLER AND TO REQUEST THE AUDITOR-CONTROLLERS TO PLACE THE FISCAL YEAR 2025 WET WEATHER FACILITIES CHARGE ON THE PROPERTY TAX ROLLS

Introduced by Director _____ ; Seconded by Director _____

WHEREAS, on June 13, 2023, the Board of Directors adopted Resolution No. 35350-23 establishing the East Bay Municipal Utility District's (District) Wet Weather Facilities Charge (WWFC); and

WHEREAS, the WWFC was approved by at least two-thirds of the members of the Board (i.e., by five (5) Board members), in compliance with California Health & Safety Code (H&SC) section 5473; and

WHEREAS, the WWFC funds the capital expenses of the District's infiltration and inflow (I&I) facilities that are required to handle wet weather flows that enter the wastewater system; and

WHEREAS, the amount of wet weather flows that enter the wastewater system is generally proportional to the size of the collection system to serve each property, and accordingly, the WWFC is based on the customer's lot size to reflect the potential amount of I&I entering into the wastewater system from a customer's lot; and

WHEREAS, three categories of lot size are used to calculate the WWFC: 0-5,000 square feet (sq. ft.); 5,001-10,000 sq. ft.; and greater than 10,000 sq. ft. The applicable WWFC for each respective lot size is set forth in the District's Wastewater System Schedule B - Wet Weather Facilities Charge, attached hereto as Exhibit A; and

WHEREAS, because the WWFC is a fixed charge that is based on the size of the property and unrelated to water or wastewater usage at the property, the District collects the WWFC on the property tax rolls of Alameda and Contra Costa Counties, pursuant to its authority under H&SC section 5471, et seq., for all parcels that have connections to the local wastewater collection systems within the District's wastewater service area; and

WHEREAS, for entities that are exempt from property taxes, and in select circumstances when necessary to correct for issues in a property's billing files, the WWFC is collected through the District's billing process; and

WHEREAS, in accordance with H&SC section 5471(c), revenues from the WWFC will be used to fund capital expenses for District facilities required to handle wet weather flows that are in excess of normal discharges from wastewater customers; and

WHEREAS, a written report (Report) has been filed with, and may be obtained from, the Secretary of the District, describing each parcel of real property subject to the WWFC and the amount of the WWFC to be imposed thereon for Fiscal Year 2025; and

WHEREAS, the Secretary of the District has caused notice of the filing of the Report, and of the time and the date of the hearing to consider such Report and to consider the question of whether to collect the WWFC on the property tax roll, to be published in a newspaper of general circulation within the District's service area, all in accordance with H&SC section 5473.1; and

WHEREAS, on July 9, 2024, the Board conducted a public hearing, noticed in the manner and for the time required by law, at which time all interested persons were afforded an opportunity to be heard on matters pertaining to the collection of the WWFC on the property tax rolls, as well as to the Report, all in accordance with H&SC section 5473.2; and

WHEREAS, all comments, objections, and protests to the Report have been given full opportunity to be heard by the Board, and the Board has fully considered the Report; and

WHEREAS, the Board of Directors has determined to adopt the Report and collect the WWFC on the property tax roll, which WWFC shall constitute a lien against the parcel or parcels of land described in the Report in accordance with H&SC section 5471, et seq.; and

WHEREAS, Alameda and Contra Costa Counties have agreed to place the WWFC as direct assessments on property tax rolls which the Counties collect on the District's behalf;

NOW, THEREFORE, BE IT RESOLVED that the Board of Directors of the East Bay Municipal Utility District hereby finds and determines as follows:

1. The foregoing Recitals are true and correct, and by this reference are incorporated herein and made a part hereof.

BE IT FURTHER RESOLVED:

2. At the Hearing held on July 9, 2024 the Board of Directors heard and considered all objections and protests to the Report and has determined and hereby finds that protests have not been made by the owners of a majority of separate parcels or property described in the Report.

BE IT FURTHER RESOLVED:

3. The Board of Directors hereby adopts the Report and votes by at least two-thirds of the members of the Board (i.e., by at least five (5) Board members), as required by H&SC section 5473, to collect the WWFC on the property tax roll.
4. The Board of Directors hereby authorizes District staff to adjust the Fiscal Year 2025 WWFC for any affected parcels if and to the extent new information is provided which District staff deems to warrant an adjustment.

5. On or before August 10, 2024, the Secretary of the District is hereby directed to file a copy of the Report with the Alameda County Auditor-Controller and the Contra Costa County Auditor-Controller, together with a statement endorsed thereon over her signature that the Report has been adopted by the Board of Directors, and shall request that the WWFC be collected on the property tax rolls for the taxable parcels identified in the Report and that such WWFC shall be collected at the same time and in the same manner and by the same persons as, together with and not separately from, the property taxes for the Counties, and shall be delinquent at the same time and thereafter be subject to the same delinquency penalties to be levied on and collected from the owners of said parcels.

ADOPTED this 9th day of July, 2024 by the following vote:

EAST BAY MUNICIPAL UTILITY DISTRICT

DATE: July 9, 2024

MEMO TO: Board of Directors

FROM: Cindy R. Charan, Director of Human Resources *CRC*

SUBJECT: Appoint Ad Hoc Committee to Negotiate Amendments to Employment Agreement with General Manager and General Counsel

On July 9, 2024, the Board will meet in closed session to conduct performance evaluations for the General Manager and General Counsel. During the Board's regular meeting on July 9, 2024, it is recommended that, consistent with past practice, the Board appoint three members of the Board to serve on an ad hoc committee as the Board's representatives in negotiating any amendments to the employment agreements with the General Manager and General Counsel.

The Board can provide instructions to the ad hoc committee at the Board's next closed session meeting on August 13, 2024, in accordance with Government Code section 54957.6.

BOARD ACTION

Agenda Number:	20.	Meeting Date:	July 9, 2024

TITLE **AN ORDINANCE AMENDING ORDINANCE NO. 355-11, AS PREVIOUSLY AMENDED, WHICH IS THE WASTEWATER CONTROL ORDINANCE (FIRST READING)**

ACTION ☐ Motion: ☐ Resolution: ☒ Ordinance:

RECOMMENDED ACTION Conduct a first reading of an ordinance amending Ordinance No. 355-11, as previously amended, which is the Wastewater Control Ordinance (Ordinance), to incorporate changes to the local limits, clarify appellate procedures for enforcement orders, modify permit categories and permitting procedures, adopt modifications recommended by federal auditors, and make other clarifications to ensure consistency with federal regulations.

SUMMARY The Ordinance establishes regulations for the collection, treatment, and disposal of wastewater and industrial wastes within the District's Special District Number One service area. The Ordinance includes general prohibitions and specific numeric limits, known as local limits, for discharges to the collection system. The Ordinance was last amended in 2013. The District, with approval from the San Francisco Bay Regional Water Quality Control Board (Regional Board), is recommending changes to the local limits based on the findings from a 2023 local limits review. Additionally, changes are recommended to improve clarity, update terminology, and control introduction of non-wastewater materials. A presentation on the Ordinance amendments was provided at the June 11, 2024 Planning Committee meeting.

DISCUSSION The Ordinance provides the authority for the District to operate its Pretreatment Program as required by federal regulations and specified in the National Pollutant Discharge Elimination System permit for the Main Wastewater Treatment Plant. The Ordinance includes general and specific prohibitions on the discharge of wastewater, permit terms and requirements, administrative authority, enforcement procedures and penalties, and terms related specifically to trucked-in wastes as part of the Resource Recovery Program. The U.S. Environmental Protection Agency (US EPA) and the Regional Board conduct periodic audits of pretreatment programs. The most recent audit identified several minor modifications to the Ordinance, which are included in the proposed changes. The text of the proposed amendments is attached, and the key proposed changes, are summarized here.

Title I – General

- **Section 3 – Definitions.** Minor revisions have been made to clarify certain definitions, such as changing the definition of “side sewer” to “sewer lateral” to more accurately reflect modern industry terminology, or updating the definition of “chemical oxygen demand” to more closely reflect current analytical methods. Other definitions have

Originating Department: Wastewater	Department Director or Manager: Amit K. Mutsuddy	CEP Forms? N/A	Board Action Type: Ordinance
Funds Available: N/A	Budget Coding: N/A	Approved: 	
Attachment: Ordinance			

Title:	An Ordinance Amending Ordinance No. 355-11, As Previously Amended, Which Is the Wastewater Control Ordinance (First Reading)	Meeting Date:	July 9, 2024

been substantively altered to for accurate application in the body of the Ordinance, such as expanding the definition of “discharge” to encompass non-industrial discharges. Finally, new definitions have been added to effectuate the District’s administrative and enforcement needs, such as adding a definition for “material acceptance permit” to distinguish Resource Recovery Program permits from other categories of wastewater discharge permit.

- **Section 4 – Connection to Interceptor.** Section 4 has been revised to modernize the application process by which public agencies may request permission to make a direct connection to the District’s interceptors.
- **Section 5 – Stormwater, Drainage, Groundwater, and Bay Water Prohibition.** Section 5 has been revised to clarify the restriction on discharges of waters that are acceptable for discharge to storm sewers or receiving waters.

Title II – Regulation of the Wastewater Discharges

- **Section 1 – Permissible Discharges.** Section 1 has been revised to permit discharges of wastewater that do not exceed limitations on wastewater *concentration*, as opposed to wastewater *strength*. This change in terminology recurs throughout the Ordinance, and is intended to distinguish strength, which is a measure of the concentration of typical wastewater constituents that can be removed through treatment (e.g., suspended solids and organic loading), and the concentration of constituents more generally, which includes pollutants that must be limited (e.g., metals, oil and grease, and volatile organics).
- **Section 2 – Prohibited Discharges.** Former paragraph (c)(1), which prohibited discharges of waters suitable for discharges to storm drains or receiving waters, has been consolidated into Title 1, Section 5 to avoid redundancy and potential inconsistency. Paragraph (d) has been revised to clarify locations where discharges to the community sewer or District facilities are prohibited, as well as the process for obtaining exceptions to the prohibitions.
- **Section 3 – Limitations on Discharges.** The local limits, which specify the maximum concentration for constituents of concern, are evaluated every five years. In 2023, the local limits review identified changes to improve clarity and enhance control of discharges. The first change is to replace the limit for total identifiable chlorinated hydrocarbons, which is a grouping of chemicals more widely used in the 1970s, with a limit for total toxic organics, a more comprehensive and better-defined category of chemicals more commonly used today. The second change is to define the existing oil and grease limit of 100 milligrams per liter (mg/L) to pertain to only oil and grease of mineral origin and add a new limit of 300 mg/L for oil and grease from animal or vegetable sources, which are considered more biodegradable and less toxic.

Title:	An Ordinance Amending Ordinance No. 355-11, As Previously Amended, Which Is the Wastewater Control Ordinance (First Reading)	Meeting Date:	July 9, 2024

- **Section 6 – Permits for Federal Categorical Pretreatment Standards.** Section 6 has been deleted as duplicative of Title IV, Section 1.
- **Section 7 – Confidential Information.** Section 7 has been deleted as duplicative of Title V, Section 7, and its content has been consolidated with Title V, Section 7 to avoid redundancy.

Title III – Discharger Classification and Calculation of Wastewater Disposal Charges.

- **Section 2 – Calculation of Wastewater Disposal Charge.** Section 2 paragraph (b) has been modified to include permitted dischargers that are charged according to their assigned business classification code and paragraph (c) has been modified to clarify the circumstances in which a permitted discharger is subject to a wastewater disposal charge based on its unique wastewater strength.

Title IV – Wastewater Discharge Permits

- **Section 1 – Permit Requirement.** Section 1 has been substantively modified to more accurately reflect the varieties of discharge permits issued by the District. The District issues permits to certain commercial and industrial customers per federal regulations, such as metal plating facilities. In addition, the District issues permits to businesses that use materials that could harm the treatment process, collection system, or evade treatment. The District also issues permits for discharges of unmetered water (e.g., groundwater dewatering) for short-durations and ongoing projects. Requirements in these permits and the onsite inspections conducted by District staff ensure protection of the treatment plant and the environment and enable cost recovery. The proposed modifications to the Ordinance would provide increased clarity and specificity on the types of users that are required to obtain a permit, and which permit would be issued.
- **Section 2 – Application.** Section 2 has been revised to include additional application requirements, such as copies of the applicant's other environmental control permits, where applicable. Section 2 has also been revised to add a description of the process by which the Director reviews and approves permit applications, as well as an option to appeal the denial of a permit application.
- **Section 4 – Change of Permit Terms and Conditions.** Section 4 has been revised to clarify that the Director is empowered to change permit limits on wastewater constituents, as opposed to limits on the "elements of wastewater strength," to reflect terminological changes throughout the Ordinance. Section 4 has also been revised to clarify how and when permit modifications affect calculation of the permittee's wastewater disposal charge.
- **Section 5 – Transfer of Permit.** Section 5 has been revised to clarify that a permit may be transferred or assigned with the Director's prior approval.

Title:	An Ordinance Amending Ordinance No. 355-11, As Previously Amended, Which Is the Wastewater Control Ordinance (First Reading)	Meeting Date:	July 9, 2024

- **Section 6 – Termination and Modification for Violations.** Section 6 has been substantively modified to distinguish decisions to modify or terminate a permit for administrative, non-adjudicative reasons from modifications or termination based on the permittee’s violations of its permit or the Ordinance. In the latter instance, the modified Section 6 will provide the permittee an opportunity to appeal the Director’s decision to modify or terminate a permit, by reference to Title VI, Section (1)(e).

Title V—Administration

- **Section 2 – Wastewater Source Control Requirements.** Section 2 has been modified to clarify requirements for the biannual periodic report of continued compliance required for permittees. Other modifications include minor terminological changes for consistency throughout the Ordinance, and to reflect updated definitions.
- **Section 7 – Confidential Information.** Section 7 has been consolidated with Title II, Section 7 as described above.
- **Section 8 – District Inspection.** Section 8 has been revised to reflect terminological changes for consistency throughout the Ordinance.
- **Section 9 – New Connections.** Section 9 has been revised to reflect terminological changes for consistency throughout the Ordinance.

Title VI—Enforcement and Penalties

- **Section 1 – Director’s Orders.** Title VI specifies how the District enforces the Ordinance, including issuing enforcement orders, administrative civil liability, and criminal penalties. The proposed modifications would update the appeal procedures for enforcement orders issued by the Director of Wastewater to enable more efficient and effective enforcement, and to align the process for the Ordinance with the process used for the Private Sewer Lateral Ordinance. Specifically, the proposed modifications would provide more detailed requirements for submitting a written request for reconsideration of an enforcement order, add an additional layer of review by a manager designated by the Director of Wastewater, and clarify the circumstances in which a hearing may be held before the Director of Wastewater.
- **Section 2 – Director’s Enforcement Remedies and Penalties.** Section 2 has been modified to include 90-day statute of limitations for challenging the District’s final decision with respect to an administrative civil liability complaint in the superior court, in accordance with state law.

Title VII – Resource Recovery Program

- **Section 1 – Purpose.** Section 1 has been modified to clarify that the Resource Recovery Program allows for acceptance of materials transported by truck, rail, or other means “at designated receiving stations.”

Title:	An Ordinance Amending Ordinance No. 355-11, As Previously Amended, Which Is the Wastewater Control Ordinance (First Reading)	Meeting Date:	July 9, 2024

- **Section 2 – Regulation of Discharges.** Section 2 has been modified to incorporate the new definition of “material acceptance permit” created for Title VII, and to clarify the circumstances in which the District may accept wastes that deviate from the local limits established for discharges to the community sewer in accordance with federal regulatory requirements and guidance.
- **Section 3 – Permit Requirements.** Section 3 has been modified to clarify requirements and processes for obtaining a material acceptance permit, as well as conditions that may be included in a material acceptance permit.
- **Section 4 – Administration and Enforcement.** Section 4 has been modified to distinguish enforcement procedures for the Resource Recovery Program from the enforcement procedures described in Title VI, and to clarify the circumstances in which the District may terminate a material acceptance permit.

Additional Modifications

Various other minor modifications are proposed to clarify the language and intent of the Ordinance. For example, the term “his” has been replaced with the more inclusive, nonbinary “their.” Other terms have been updated to reflect modern usage or industry practices. Finally, feedback from the 2019 US EPA/Regional Board Audit has been incorporated to align the Ordinance more closely with regulatory requirements and US EPA guidance.

SUSTAINABILITY

Economic

No fiscal impact is anticipated. Adopting these amendments will not substantially affect the scope of the Pretreatment Program.

Social

Implementing these amendments will enhance clarity and transparency for permitted industrial customers.

Environmental

These amendments will enhance the District’s ability to effectively control pollutants at their source to protect treatment staff, maintain treatment processes, and prevent contaminants from being discharged to the San Francisco Bay. The changes will also ensure the District continues to operate within the federal pretreatment program requirements and maintains its ability to effectively enforce the provisions of the Ordinance.

ALTERNATIVES

Do not approve the proposed Ordinance amendments. This alternative is not recommended because the proposed amendments will provide clarity and enhanced oversight of discharges to the treatment plant.

Delay approval of the proposed Ordinance amendments. This alternative is not recommended because no objections to the local limits modifications were raised during the

Title:	An Ordinance Amending Ordinance No. 355-11, As Previously Amended, Which Is the Wastewater Control Ordinance (First Reading)	Meeting Date:	July 9, 2024

public notification period and the Regional Board has approved these changes. The new local limits cannot be incorporated into permits until the Ordinance amendments are adopted.

ORDINANCE NO. _____

AN ORDINANCE AMENDING ORDINANCE NO. 355-11, AS PREVIOUSLY AMENDED,
WHICH IS THE WASTEWATER CONTROL ORDINANCE

Introduced by Director ; Seconded by Director

BE IT ENACTED by the Board of Directors of the East Bay Municipal Utility District:

SECTION 1

The Board finds and declares:

1. The District maintains an ordinance regulating the interception, treatment, and disposal of wastewater and industrial wastes and the control of wastewater, providing for appropriate charges, and establishing penalties for violations (“Wastewater Control Ordinance”).

2. The District has amended the Wastewater Control Ordinance from time to time since its 1972 enactment. The Wastewater Control Ordinance was amended in 2003 to provide authority for the Resource Recovery program. It was further amended in 2010 to regulate private sewer laterals. The District then amended the Wastewater Control Ordinance in 2011 to modify the regional private sewer lateral certification program. The District most recently amended the Wastewater Control Ordinance in 2013 to repeal the portions concerned with the regional private sewer lateral certification program, and concurrently reenacted them in a separate, stand-alone Regional Ordinance.

3. The District is required by state and federal law, and by its main wastewater treatment plant National Pollutant Discharge Elimination System (NPDES) permit, to operate a pretreatment program regulating process wastewater discharges from industrial users in the District’s wastewater service area. The Wastewater Control Ordinance provides the necessary legal authority to implement and enforce this program.

4. In furtherance of the pretreatment program, and as required by state and federal law, the Wastewater Control Ordinance designates local limits which specify maximum concentrations for constituents of concern in discharges to the community sewer. The District’s main wastewater treatment plant NPDES permit requires that the District conduct a local limits review every five years to ensure that the local limits remain protective of District infrastructure and the environment. The District completed its most recent review in 2023 and identified changes to improve control of industrial discharges. The first change is to replace the limit on total identifiable chlorinated hydrocarbons, which is a grouping of chemicals more widely used in the 1970s, with a limit for the more commonly used and better-defined category, total toxic organics (TTO). The second change will define the oil and grease limit of 100 milligrams per liter (mg/L) to pertain to only oil and grease of mineral origin and add a new limit of 300 mg/L for oil and grease from animal or vegetable sources, which are considered more biodegradable and less toxic.

5. In the fall of 2023, the District initiated a public comment period with respect to the proposed changes to the local limits. Notifications were made via local newspaper publication, letters to the San Francisco Regional Water Quality Control Board (Regional Board), and letters to permitted industrial users. No objections were raised during the comment period. On March 28, 2024, the Regional Board approved the proposed changes and advised the District to proceed with modifying the Wastewater Control Ordinance.

6. The Board finds that these changes to the local limits will improve the District's ability to administer the pretreatment program and are protective of the environment and District infrastructure.

7. The pretreatment program is subject to routine audits by the United States Environmental Protection Agency (EPA) and by the Regional Board. The most recent audit was conducted in 2019 and included a review of the Wastewater Control Ordinance.

8. Following the audit, the auditors advised the District to amend the Wastewater Control Ordinance in several respects to ensure continued compliance with applicable regulatory requirements. These amendments include: (1) clarifying the District's authority to implement and administer an enforcement response plan; (2) clarifying the District's authority to issue monitoring waivers for given constituents that are not present in an industrial user's effluent; (3) adding express legal authority to issue notices of violation; (4) explicitly stating that effluent limits are included in permits; and (5) correcting or clarifying terminology and internal references.

9. In addition to the amendments recommended by the auditors, the District has identified further modifications to clarify and improve the Wastewater Control Ordinance. The Board finds that these changes will improve the District's ability to efficiently and effectively administer the Wastewater Control Ordinance, serve the public's interest in its fair, equitable, and consistent implementation, and provide for an appropriate degree of discretion and flexibility in light of the Wastewater Control Ordinance's stated purposes.

10. Federal regulations require that the District issue permits to certain categories of industrial users. In addition to permits required by federal law, the District issues other categories of permits to protect the main wastewater treatment plant and the environment, and to ensure equitable cost recovery. It is appropriate to specifically identify each category of permit issued by the District, as well as the circumstances under which they are issued, for the purposes of providing clarity and transparency for the District's wastewater customers.

11. To provide for the effective enforcement of the Wastewater Control Ordinance, it is necessary and appropriate to clarify the procedures associated with enforcement remedies provided for by applicable law. Amendments related to the appeal procedures for enforcement orders issued by the Director will enable more efficient enforcement proceedings, create a standardized process for reviewing appeals consistent with procedures used by the District in other contexts, and ensure that the review of appeals is conducted consistent with the requirements of state and federal law. The related amendments are intended to expand and

clarify the District's enforcement authority, and not to waive, diminish or abrogate any applicable enforcement authority in any way.

12. Additional clarifying or minor amendments to certain provisions of the Wastewater Control Ordinance not described above are necessary or desirable to improve the District's ability to administer the pretreatment program and regulate the discharge of wastewater more generally. Additional minor modifications include removing or updating outdated language, consistently using defined terms when possible and consolidating redundant provisions.

13. It is the Board's intent that this Wastewater Control Ordinance will continue to provide all necessary legal authority for the District's pretreatment and Resource Recovery programs.

14. It is necessary to amend the Wastewater Control Ordinance to ensure consistency with federal regulations by incorporating the changes advised by the regulatory agencies and their auditors, and to make the additional changes identified by the District.

15. These amendments to the Wastewater Control Ordinance are consistent with the District's legal obligations and with the purposes of the Wastewater Control Ordinance and the purposes of the pretreatment and Resource Recovery programs.

16. By adopting these amendments to the Wastewater Control Ordinance, the Board does not intend to relax the District's legal authorities or local limits, change the District's control mechanism or confidentiality procedures, decrease the frequency of self-monitoring, reporting, inspections, or sampling required of industrial users, or otherwise modify the Wastewater Control Ordinance in any manner that could significantly impact the pretreatment program's operation, increase pollutant loadings, or result in less stringent requirements being imposed on industrial users.

17. It is declared to be the intent of the Board that the phrases, clauses, sentences, paragraphs, and sections of this ordinance are severable, and if any phrase, clause, sentence, paragraph, or section of this ordinance is declared invalid by the judgment or decree of a court of competent jurisdiction, the invalidity shall not affect any of the remaining phrases, clauses, sentences, paragraphs, or section of this ordinance since the Board would have enacted them without the invalid portion.

SECTION 2

Ordinance No. 355-11 is hereby amended as follows:

1. Title I, Section 2 is amended to read as follows:

Section 2 - Purpose

Special District No. 1 of the EAST BAY MUNICIPAL UTILITY DISTRICT was formed and exists under the provisions of the Municipal Utility District Act (Public Utilities Code of the

State of California, Division 6) for ~~waste~~Wastewater disposal service within its boundaries. ~~Waste~~Wastewater disposal facilities have been constructed for the interception, treatment, and disposal of ~~waste~~Wastewater and industrial ~~waste~~Wastes originating within its boundaries. The purpose of this Ordinance is to regulate the interception of ~~waste~~Wastewater and industrial ~~waste~~Wastes and to control ~~waste~~Wastewater to provide the maximum public benefit of the ~~waste~~Wastewater disposal facilities of the District. The regulations shall include provisions for source control in order to monitor and control quantity, quality, and flow of ~~waste~~Wastewater and industrial ~~waste~~Waste. The regulations shall require charges for use of ~~waste~~Wastewater disposal facilities of the District which are designed to achieve an equitable recovery of the capital and operating costs of such facilities. The regulations shall include provisions for enforcement and penalties for violations.

2. Title I, Section 3 is amended to read as follows:

Section 3 – Definitions

For the purposes of this Ordinance, unless the context specifically indicates otherwise, the meaning of terms used shall be as follows:

(a) Best Management Practices (BMPs). Schedules of activities, prohibitions of practices, maintenance procedures, and other management practices to implement the prohibitions listed in Title II, Section 2 of this Ordinance. BMPs also include treatment requirements, operating procedures, and practices to control plant site runoff, spillage or leaks, sludge or ~~waste~~Waste disposal, or drainage from raw materials storage.

(b) Board. The Board of Directors of the District.

(c) Business Classification Code”~~(BCC)~~. A classification of Dischargers that is determined by the District based upon the principal activity conducted upon, or use of, a parcel of real property or portion thereof. ~~BCCs~~Business Classification Codes are based on the Standard Industrial Classification Manual published by the United States Office of Management and Budget in 1987.

(d) Bypass. The intentional diversion of wastestreams from any portion of a Discharger’s treatment facility.

(e) Categorical Industrial User (CIU). A Discharger subject to a Categorical Pretreatment Standard.

(f) Categorical Pretreatment Standards. The regulations containing pollutant ~~discharge~~Discharge limits that apply to specific categories of ~~industrial users~~Industrial Users, codified in Title 40 of the CFR, Chapter I, Subchapter N, ~~Parts~~Part 405-471 et seq.

(g) CFR. Code of Federal Regulations.

(h) Chemical Oxygen Demand, ~~Filtered. The amount of Chemical Oxygen Demand passing through a glass filter as measured in conformance with the District's approved method.~~ Chemical oxygen demand is the measure of the oxygen ~~equivalent of the consuming capacity of inorganic and~~ organic matter ~~of a sample that is susceptible to oxidation by a strong chemical oxidant~~present in Wastewater.

(i) Community Sewer ~~System~~. A sewer system owned and operated by a Public Agency within the boundaries of the District which is connected to a District Interceptor. ~~A "community sewer" is that portion of a Community Sewer System which and~~ receives ~~wastewater~~Wastewater from the ~~Side~~-Sewer Lateral of a Discharger.

(j) Contamination. An impairment of the quality of the waters of the State by ~~waste~~Waste to a degree which creates a hazard to the public health through poisoning or through the spread of disease. Contamination shall include any equivalent effect resulting from the disposal of ~~wastewater~~Wastewater, whether or not waters of the state are affected.

(k) Director. Director of the Wastewater Department of the East Bay Municipal Utility District, or ~~his or her~~their designated representative.

(l) Discharger. Any ~~person~~Person who ~~discharges~~Discharges, permits the ~~discharge~~Discharge of, or causes the ~~discharge~~Discharge of ~~wastewater~~Wastewater to a ~~community sewer~~Community Sewer system, or District facilities.

(m) District. Special District No. 1 of the East Bay Municipal Utility District.

(n) EPA. The United States Environmental Protection Agency.

(o) Federal Act, Clean Water Act, or Act. The Federal Water Pollution Control Act, also known as the Clean Water Act, as amended (33 U.S.C. § 1251 et seq.) ~~).~~

(p) General Manager. The General Manager of the East Bay Municipal Utility District.

(q) General Permits. ~~General control mechanisms for IUs~~Wastewater Discharge Permits for a group of Industrial Users that

- (1) have the same or substantially similar types of operations,
- (2) ~~discharge~~Discharge the same types of ~~wastes~~Wastes,
- (3) require the same effluent limitations,
- (4) require the same or similar monitoring, and
- (5) in the opinion of the District are more appropriately controlled under a general control mechanism than under individual control mechanisms.

(r) General Pretreatment Regulations. Any regulations promulgated by the EPA in accordance with Sections 307(b) and (c), and 402(b)(8) of the Act (33 U.S.C. § 1317) for the implementation, administration and enforcement of pretreatment standards, including the regulations codified at 40 CFR Part 403.

~~_____~~(s) Indirect Discharge or Discharge. The introduction of ~~pollutants~~Wastewater into a Community Sewer or District facilities.

~~_____~~(t) Industrial User (IU). ~~POTWA~~A source of any Industrial Wastewater from any non-domestic source regulated under section 307(b), (c) or (d) of the Clean Water Act.

~~_____~~(t) ~~Industrial User (IU). A source of Indirect Discharge.~~

(u) Industrial WasteWastewater. Includes any nondomestic liquid or semisolid ~~wastes~~Wastes from any producing, manufacturing, or processing operation of whatever nature.

(v) Interceptor. An intercepting sewer ~~found and determined by the Board of Directors of the District to be such and~~ owned and operated by the District that conveys Wastewater from the Community Sewer to the POTW (Publicly Owned Treatment Works).

(w) Interference. A ~~discharge~~Discharge which, alone or in conjunction with ~~discharges~~Discharges from other sources, both:

- (1) inhibits or disrupts the POTW, its treatment processes or operations, or its sludge processes, use or disposal; and
- (2) therefore is a cause of a violation of any requirement of the POTW's National Pollutant Discharge Elimination System (NPDES) permit (including an increase in the magnitude or duration of a violation) or of the prevention of ~~sewage~~Sewage sludge use or disposal in compliance with the following statutory provisions and regulations or

permits issued thereunder (or more stringent state or local regulations): Section 405 of the Clean Water Act, the Solid Waste Disposal Act (SWDA) (including Title II, more commonly referred to as the Resource Conservation and Recovery Act, and including state regulations contained in any state sludge management plan prepared pursuant to subtitle D of the SWDA), the Clean Air Act, the Toxic Substances Control Act, and the Marine Protection, Research and Sanctuaries Act.

(x) Local Limits. ~~The limitations on wastewater discharges~~Discharge limits and BMPs developed and enforced by the District to implement the general and specific Discharge prohibitions listed in 40 CFR 403.5(a)(1) and (b), as set forth in Title II, Section 3(a) of this Ordinance.

~~(y)~~(y) Material Acceptance Permit. A Permit issued by the District under the Resource Recovery Program authorizing the Discharge of hauled Waste of a specific nature, as defined in the permit, at designated receiving stations of the POTW.

(z) Middle Tier Categorical Industrial User. A Categorical Industrial User may be designated by the District as a Middle Tier CIU upon a finding by the Director that it complies with all of the following:

(1) Its ~~discharge~~Discharge of categorical ~~wastewater~~Wastewater does not exceed any of the following:

(A) 0.01 percent of the design dry weather hydraulic capacity of the POTW, or 5,000 gpd, whichever is smaller;

(B) 0.01 percent of the design dry weather organic treatment capacity of the POTW;

(C) 0.01 percent of the maximum allowable headworks loading for any pollutant listed in the Local Limits;

(2) It has not been in Significant Noncompliance at any time in the past two years; and

(3) It does not have daily flow rates, production levels, or pollutant levels that vary so significantly that decreasing its reporting requirement would result in data that is not representative of conditions occurring during the reporting period.

~~(z)~~
(aa) National Pretreatment Standard, Pretreatment Standard, or Standard. Any regulation containing pollutant ~~discharge~~Discharge limits promulgated by the EPA in accordance

with section 307 (b) and (c) of the Act, which applies to ~~industrial users~~Industrial Users. This term includes prohibitive ~~discharge~~Discharge limits established pursuant to 40 CFR 403.5.

(~~aabb~~) New Source.

(1) A New Source is any building, structure, facility, or installation from which there is or may be a ~~discharge~~Discharge of pollutants, the construction of which commenced after the publication of proposed pretreatment standards which will be applicable to such source if such standards are thereafter promulgated, provided that:

(A) The building, structure, facility or installation is constructed at a site at which no other source is located; or

(B) The building, structure, facility or installation totally replaces the process or production equipment that causes the ~~discharge~~Discharge of pollutants at an existing source; or

(C) The production or ~~wastewater~~Wastewater generating processes of the building, structure, facility or installation are substantially independent of an existing source at the same site. In determining whether these are substantially independent, factors such as the extent to which the new facility is integrated with the existing plant, and the extent to which the new facility is engaged in the same general type of activity as the existing source should be considered.

(2) Construction on a site at which an existing source is located results in a modification rather than a New Source if the construction does not create a new building, structure, facility or installation meeting the criteria of paragraphs (~~aabb~~)(1)(B) or (~~aabb~~)(1)(C) of this Section, but otherwise alters, replaces, or adds to existing process or production equipment.

(3) Construction of a New Source has “commenced” if the owner or operator has:

(A) Begun, or caused to begin as part of a continuous onsite construction program:

(i) Any placement, assembly, or installation of facilities or equipment; or

(ii) Significant site preparation work including clearing, excavation, or removal of existing buildings, structures, or facilities which

is necessary for the placement, assembly, or installation of new source facilities or equipment; or

(B) Entered into a binding contractual obligation for the purchase of facilities or equipment which are intended to be used in its operation within a reasonable time. Options to purchase or contracts which can be terminated or modified without substantial loss, and contracts for feasibility, engineering, and design studies do not constitute a contractual obligation under this paragraph.

(~~b~~bcc) Non-Significant Categorical Industrial User (NSCIU). A Categorical Industrial User may be designated by the District as a Non-Significant Categorical Industrial User, subject to annual reevaluation by the District, upon a finding by the Director that it meets the following criteria:

(1) Never ~~discharges~~Discharges more than 100 gallons per day of total categorical ~~wastewater~~Wastewater (excluding sanitary, non-contact cooling and boiler blowdown ~~wastewater~~Wastewater, unless specifically included in the applicable Categorical Pretreatment Standard);

(2) Has consistently complied with all applicable categorical pretreatment standards and requirements;

(3) Annually submits the certification statement required in 40 CFR 403.12(q); and

(4) Never ~~discharges~~Discharges any untreated concentrated ~~wastewater~~Wastewater.

(~~e~~edd) Nuisance. A ~~discharge~~Discharge of ~~wastewater~~Wastewater in violation of District regulations or ~~orders~~Orders, or which is or could be harmful to or unreasonably affect the ~~wastewater~~Wastewater disposal facilities of the District, or which impairs or unreasonably affects the operation and maintenance of such facilities, or which violates quantity, quality, or flow standards adopted by the District, and all ~~wastewater-discharges~~Wastewater Discharges which unreasonably affect the quality of the District's treatment plant effluent in such a manner that receiving water quality requirements established by law cannot be met by the District.

(~~d~~dce) Order. For purposes of this Ordinance, an Order is either:

(1) A mechanism to control the contribution to the POTW by each
~~discharger~~Discharger or Resource Recovery Program ~~permit~~

~~holderparticipant~~ to ensure compliance with applicable pretreatment standards and ~~requirements and other wastewater discharge requirements.~~ ~~Includes but is not limited to~~ Wastewater Discharge Permits, Pollution Prevention Permits, Cease and Desist Orders, Administrative or other ~~orders, requirements.~~

(1) —

(2) ~~(ee)~~ An Order issued under Title VI of this Ordinance for purposes of enforcement.

(ff) Ordinance. This Wastewater Control Ordinance, as amended.

~~(ff)~~

(gg) Pass Through. A ~~discharge~~ Discharge which exits the POTW into waters of the State in quantities or concentrations which, alone or in conjunction with a ~~discharge~~ Discharge or ~~discharges~~ Discharges from other sources, is a cause of a violation of any requirement of the POTW's NPDES permit (including an increase in the magnitude or duration of a violation).

(~~ggh~~) Person. Any individual, partnership, firm, association, corporation, or ~~public agency~~ Public Agency, including the State of California and the United States of America.

(~~hh~~) Pollution. An alteration of the quality of the waters of the ~~State~~ state by ~~waste~~ Waste to a degree which unreasonably affects (1) such waters for beneficial use or (2) facilities which serve such beneficial uses.

(~~hij~~) Premises. A parcel of real property, or portion thereof, including any improvements thereon, which is determined by the District to be a single unit for purposes of receiving, using, and paying for ~~wastewater~~ Wastewater disposal service. In making this determination, the District shall take into consideration such factors as whether the unit could reasonably be subdivided, number and location of ~~side sewers~~ Sewer Laterals, and whether the unit is being used for a single activity and, if not, what is the principal activity for ~~wastewater~~ Wastewater disposal services, and whether the unit is divided by a public or a private street, but in any case the District determination shall be final.

(~~jkk~~) Pretreatment Requirement. Any substantive or procedural pretreatment requirement other than a national pretreatment standard.

(ll) Process Wastewater. Any water which, during manufacturing or processing, comes into direct contact with, or results from the production or use of any raw material, intermediate product, finished product, byproduct, or Waste product.

~~(mm)–(kk)~~ Public Agency. A city or a sanitary district or other public entity located within the boundaries of ~~a special district~~the District.

~~(hnn)~~ Publicly Owned Treatment Works–(POTW). A treatment works as defined by Section 212 of the Clean Water Act, which is owned by the District. This definition includes any District-owned devices and systems used in the storage, treatment, recycling and reclamation of municipal ~~sewage~~Sewage or industrial ~~wastes~~Wastes of a liquid nature. It also includes District-owned sewers, pipes, pump stations, and other ~~conveyances~~facilities that convey ~~wastewater~~Wastewater to that portion of the POTW which is designed to provide treatment (including recycling and reclamation) of municipal ~~sewage~~Sewage and industrial ~~waste~~Waste. Where indicated by context, “POTW” may also refer to the District itself.

(oo) Receiving Water Quality Requirements. Requirements for the District's treatment plant effluent established by law or by State or Federal regulatory agencies for the protection of receiving water quality. “Requirements” shall include effluent limitations, and ~~waste discharge~~Waste Discharge standards, requirements, limitations, or prohibitions which may be established or adopted from time to time by State or Federal laws or regulatory agencies.

~~(napp)~~ Representative Data. Data obtained through analysis of representative samples using approved analytical methods and procedures.

~~(oqqq)~~ Representative Sample. Samples of ~~discharges~~Discharges that are obtained using approved sampling methods, that are representative of the quantity and quality of the ~~discharge~~Discharge, and the conditions occurring during the time the ~~discharge~~Discharge was sampled or measured.

~~(pprr)~~ Severe Property Damage. Substantial physical damage to property, damage to the treatment facilities which causes them to become inoperable, or substantial and permanent loss of natural resources which can reasonably be expected to occur in the absence of a ~~bypass~~Bypass. Severe property damage does not mean economic loss caused by delays in production.

~~(qqss)~~ Sewage. The water-borne ~~wastes~~Wastes derived from human habitation and use of buildings for residential, business, commercial, institutional, and industrial purposes.

~~——(rr)——~~ Side–(tt) Sewer–A Lateral. The sewer ~~conveying the wastewater of a discharger~~pipe that conveys Wastewater from a Discharger at a residence, commercial, industrial, or institutional building, or other structure, to a ~~community sewer, including direct connections to a community sewer where permitted by the public agency~~Community Sewer.

~~(ssuu)~~ Significant Industrial User.

(1) A Categorical Industrial User other than a Non-Significant Categorical Industrial User; or

(2) A user that:

(A) Discharges an average of twenty-five thousand (25,000) gallons per day or more of process ~~wastewater~~Wastewater to the POTW (excluding sanitary, noncontact cooling, and boiler blowdown ~~wastewater~~Wastewater);

(B) Contributes a process wastestream which makes up five (5) percent or more of the average dry weather hydraulic or organic capacity of the POTW treatment plant; or

(C) Is designated as such by the District on the basis that it has a reasonable potential for adversely affecting the POTW's operation or for violating any pretreatment standard or requirement.

(3) Upon a finding that a user meeting the criteria in Subsection (2) above has no reasonable potential for adversely affecting the POTW's operation or for violating any pretreatment standard or requirement, the District may at any time, on its own initiative or in response to a petition received from a user, determine that such user should not be considered a Significant Industrial User.

(~~tvv~~) Significant Noncompliance. A ~~significant industrial user~~Significant Industrial User (or any IU which violates paragraphs 3, 4, or 8 below) is in ~~significant noncompliance~~Significant Noncompliance with applicable pretreatment requirements if any violation meets one or more of the following criteria:

(1) Chronic violations of ~~wastewater discharge~~Wastewater Discharge limits, defined here as those in which sixty-six percent or more of all of the measurements taken during a six month period exceed (by any magnitude) a numeric pretreatment standard or requirement, including instantaneous limits, as defined by 40 CFR 403.3(l).

(2) Technical Review Criteria (TRC) violations, defined here as those in which thirty-three percent or more of all of the measurements for each pollutant parameter taken during a six-month period are equal to or exceed the product of the numeric pretreatment standard or requirement including instantaneous limits, as defined by 40 CFR 403.3(l) multiplied by the applicable TRC (TRC = 1.4 for BOD, TSS, fats, oil and grease and 1.2 for all other pollutants except pH.)

(3) Any other violation of a pretreatment standard or requirement as defined by 40 CFR 403.3(l) (daily maximum, long-term average, instantaneous limit, or narrative standard) that the District determines has caused, alone or in combination with other ~~discharges, interference or pass-through~~Discharges, Interference or Pass Through (including endangering the health of POTW personnel or the general public).

(4) Any ~~discharge~~Discharge of a pollutant that has caused imminent endangerment to human health, welfare or to the environment or has resulted in the POTW's exercise of its emergency authority to halt or prevent such a ~~discharge~~Discharge.

(5) Failure to meet, within 90 days after the due date, a compliance schedule milestone contained in a local control mechanism or enforcement ~~order~~Order for starting construction, completing construction or attaining final compliance.

(6) Failure to provide, within 45 days after the due date, required reports such as baseline monitoring reports, 90-day compliance reports, periodic self-monitoring reports and reports on compliance with compliance schedules.

(7) Failure to accurately report noncompliance.

(8) Any other violation or group of violations which the District determines will adversely affect the operation or implementation of the local pretreatment program.

~~(uuww)~~ Slug Load or Slug Discharge. Any ~~discharge~~Discharge at a flow rate or concentration, which could cause a violation of the prohibited ~~discharge~~Discharge standards in Title II, Section 2.2 of this Ordinance. A slug ~~discharge~~Discharge is any ~~discharge~~Discharge of a non-routine, episodic nature, including but not limited to an accidental spill or non-customary batch ~~discharge~~Discharge which has a reasonable potential to cause ~~interference~~Interference or ~~pass-through~~Pass Through, or in any other way violate the District's regulations, Local Limits or permit conditions.

~~(vvxx)~~ Suspended Solids. The concentration of nonfilterable residue dried at 103° to 105°C on a filter in conformance with the District's approved method.

~~(wwyy)~~ User. Same meaning as "Discharger" and is used interchangeably with that term.

(zz) Unmetered Water. Water that is not supplied by East Bay Municipal Utility District through an East Bay Municipal Utility District meter, including but not limited to stormwater, drainage water, groundwater, or Bay water.

(aaa—(xx) Waste. Includes ~~sewage~~Sewage and any and all other ~~waste~~Waste substances, liquid, solid, gaseous, or radioactive, associated with human habitation, or of human or animal origin, or from any producing, manufacturing, or processing operation of whatever nature.

(yybbb) Wastewater. All ~~sewage, industrial~~Sewage, Industrial Wastewater, and other ~~wastes~~Wastes and waters, whether treated or untreated, ~~discharged into or permitted to enter a community sewer system connected to a District interceptor,~~Discharged for treatment in ~~wastewater~~Wastewater disposal facilities of ~~a special district. As used in this Ordinance, unless the context specifically indicates otherwise, "wastewater" shall mean sewage, industrial, and other wastes discharged to a community sewer by any person~~District.

(zzccc) Wastewater Capacity Fee. A charge to each new customer, or ~~existing~~ customer who increases ~~his or her~~their demand for capacity for ~~wastewater~~Wastewater treatment measured by flow and strength, which reasonably reflects the District cost for providing ~~wastewater~~Wastewater treatment capacity.

(ddd

——(aaa) Wastewater Disposal Purposes. The acquisition, construction, enlargement, operation,~~Discharge Permit. A written document that contains general and maintenance~~specific requirements governing onsite management, pretreatment, and Discharge of ~~intercepting~~Wastewater to the Community Sewer. A Wastewater Discharge Permit is issued by the Director and grants revocable permission to Discharge Wastewater to the Community Sewer.

(eee) Wastewater Disposal Facilities. Intercepting sewers, ~~wastewater~~Wastewater treatment works, pumping plants, outfall sewers, and ~~appurtenances by a special district.~~

——(bbb) ~~Wastewater Disposal Facilities. Includes intercepting sewers, wastewater treatment works, pumping plants, outfall sewers, other facilities~~ and appurtenances constructed, operated, and maintained by a special district created for ~~wastewater~~Wastewater disposal purposes. As used in this Ordinance, unless the context specifically indicates otherwise, "District Facilities" shall mean ~~wastewater~~Wastewater disposal facilities of ~~a special district~~the District.

(eeefff) Wastewater Strength. ~~The quality~~A measurement of ~~wastewater discharged as measured by its elements, including the concentration of the constituents in Wastewater requiring treatment, including suspended solids and characteristics~~organic loading (measured as chemical oxygen demand).

(ggg) Zero Discharger. Persons engaged in an industrial process that poses a risk of Discharge, as determined by the Director, and who the Director has further determined should be subjected to permit requirements, but who are not permitted to Discharge to the Community Sewer.

3. Title I, Section 4 is amended to read as follows:

Section 4 – Connection to Interceptor

The District will not permit direct connections of or accept direct contributions of ~~wastewater~~Wastewater from sewers other than ~~community sewers~~Community Sewers. Before any connection of a ~~community sewer~~Community Sewer is made to an ~~interceptor, there shall be filed with the District, in duplicate~~Interceptor, an application signed by the ~~public agency~~Public Agency owning the ~~community sewer~~Community Sewer to be connected shall be filed with the District. The application shall be in a form approved and supplied by the District, and shall contain such information and data as may be required from time to time by the District. The connecting of ~~community sewers~~Community Sewers will be performed by the ~~public agency~~Public Agency at its expense in accordance with District requirements and subject to approval and inspection by the District.

4. Title I, Section 5 is amended to read as follows:

Section 5 – Stormwater, Drainage, ~~And~~ Groundwater, aAnd Bay Water Prohibition

(a) The District's Wastewater Disposal Facilities are not intended to dispose of waters that are acceptable for Discharge to storm sewers or to receiving waters of the State. No user shall Discharge stormwater, drainage, ~~or groundwater,~~ or Bay water to the Community Sewer unless expressly authorized by the Director. In the event of the ~~discharge~~Discharge of such ~~water~~waters from a Community Sewer ~~System~~ into an Interceptor, the District may determine the amount of such ~~discharge~~Discharge and charge the owner of the Community Sewer ~~System~~ the cost to the District of disposing and treating such water.

(b) ~~Notwithstanding the foregoing, the~~The Director may approve the ~~discharge~~Discharge of stormwater ~~by a Public Agency, drainage, groundwater, or Bay water~~ into the District's Wastewater Disposal Facilities on such terms and conditions as the Director may require. No ~~discharge of stormwater~~such Discharge will be approved unless the Director finds that:

- (1) sufficient capacity exists to convey and treat the additional ~~stormwater~~ flows; and

(2) the ~~stormwater-discharge~~Discharge will not adversely affect the POTW or its ability to comply with all applicable legal requirements.

5. Title I, Section 6 is amended to read as follows:

Section 6 - Unusual Conditions

Notwithstanding any provision of this Ordinance to the contrary, ~~the~~ District and any ~~discharger~~Discharger or ~~public agency~~Public Agency may enter into an agreement where unusual conditions compel special terms and conditions and charges for the interception, treatment, and disposal of the ~~wastewater~~Wastewater by the District. However, this Section does not ~~pertain to~~authorize the waiver of Federal or State standards or requirements.

6. Title II, Section 1 is amended to read as follows:

Section 1 - Permissible Discharges

Wastewater may be ~~discharged~~Discharged into ~~community sewers~~Community Sewers for interception, treatment, and disposal by the District provided that such ~~wastewater~~Wastewater does not contain substances prohibited by this Ordinance, or exceed limitations of ~~wastewater strength~~Wastewater concentration as set forth in this Ordinance; and provided further that the ~~discharger~~Discharger pays all District ~~wastewater~~Wastewater disposal charges and is in compliance with all terms of this Ordinance, including ~~the~~ permit provisions if applicable.

7. Title II, Section 2 is amended to read as follows:

Section 2 – Prohibited Discharges

(a) General Prohibition. No ~~person~~Person shall ~~discharge wastewater~~Discharge Wastewater into a ~~community sewer~~Community Sewer which will result in ~~contamination, pollution~~Contamination, Pollution, or a ~~nuisance~~Nuisance.

(b) Prohibited Effects. No ~~person~~Person shall ~~discharge wastewater~~Discharge Wastewater into a ~~community sewer~~Community Sewer if it contains substances or has characteristics which, either alone or by interaction with other ~~wastewaters~~Wastewaters, cause or threaten to cause:

(1) Damage to District facilities.

(2) Interference with or impairment of the operation or maintenance of District facilities.

(3) Obstruction of flow in sewers or ~~interceptors~~Interceptors caused by solid or viscous materials.

(4) Danger to life or safety of any ~~person~~Person.

(5) Interference with, or overloading of, treatment or disposal processes.

(6) Flammable or explosive conditions at or near District facilities.

(7) Wastewater or any other by-products of the treatment process to be unsuitable for reclamation and reuse, or interfere with any processes for reclamation or reuse.

(8) Noxious or malodorous gases or odors at or near District facilities.

(9) Discoloration or any other condition in the quality of the District's treatment plant effluent in such a manner that receiving water quality requirements established by law cannot be met by the District.

(10) Conditions at or near District facilities which violate any statute or any rule, regulation, or ordinance of any ~~public agency~~Public Agency or State or Federal regulatory body, including the general prohibitions contained in Federal General Pretreatment Regulations.

(11) The presence of toxic gases, fumes, or vapors in quantities injurious to the health and safety of District personnel.

(12) Pass-through of the District's treatment plant, causing a violation of any requirement of the District's NPDES permit.

(c) Prohibited Substances. No ~~person~~Person shall ~~discharge~~Discharge the following to a ~~community sewer~~Community Sewer:

(1) Wastewater which ~~is not polluted and meets requirements for and is acceptable for discharge to storm sewers or to receiving waters of the State; provided that~~

~~the Director may grant permission for the discharge of unpolluted wastewaters which comply with regulations of the public agency owning the community sewer.~~

(2) ~~Wastewater which~~ creates a fire or explosion hazard including, but not limited to, ~~discharges~~Discharges with a closed cup flashpoint of less than 140° F (60° C) using the test methods specified in 40 CFR 261.21.

(32) Garbage, except ground ~~garbage~~food scraps from residential and commercial ~~premises~~Premises where food is prepared and consumed.

(3) Wastewater which is subject to a Wastewater Discharge Permit except in compliance with such permit.

(d) Prohibited Locations. ~~Except for sewer construction and maintenance by public agencies and contractors, no person~~No Person shall ~~discharge~~Discharge any ~~wastewater~~Waste or Wastewater directly into a ~~manhole~~maintenance hole or other opening in a ~~community sewer system~~Community Sewer other than through ~~side sewers~~Sewer Laterals approved by the ~~public agency~~Public Agency owning the system; provided that a Public Agency may Discharge Wastewater directly into its system for sewer construction or maintenance and the Director may grant permission for ~~such~~ direct ~~discharges~~Discharges to the Community Sewer, upon written application, at locations approved by the ~~public agency~~Public Agency and ~~upon~~with payment of applicable ~~sewage~~Wastewater disposal charges to the District. No Person shall Discharge any Waste, Wastewater, or any other material directly into District facilities, including Interceptor maintenance holes, unless authorized by the Director.

(e) Prohibition on Use of Dilution. Except where expressly authorized to do so by an applicable pretreatment standard or requirement, no user shall increase the use of process water, or in any other way attempt to dilute a ~~discharge~~Discharge as a partial or complete substitute for adequate pretreatment to achieve compliance with a pretreatment standard, requirement or ~~discharge~~Discharge limitation. The District may impose mass limitations on the users which are using dilution to meet applicable Pretreatment Standards or requirements, or in other cases where the imposition of mass limitations is appropriate.

(f) Prohibition on Slug Discharges. No user shall ~~discharge~~Discharge any pollutant, including oxygen-demanding pollutants, at a flow rate and/or pollutant concentration which causes or threatens to cause ~~interference~~Interference with the ~~wastewater~~Wastewater treatment process. For the purposes of this section, any ~~discharge~~Discharge at a flow rate or concentration which could cause a violation of the prohibited ~~discharge~~Discharge standards or limitations in Title II, Sections 2 and 3 of this ordinance shall be deemed a slug ~~discharge~~Discharge.

(g) Bypass Prohibited.

(1) Bypass of pretreatment equipment and/or ~~discharge~~Discharge points is prohibited and the District may take enforcement action against any user for ~~bypass~~Bypass unless:

(i) ~~bypass~~Bypass was unavoidable to prevent loss of life, personal injury, or severe property damage;

(ii) there were no feasible alternatives to the ~~bypass~~Bypass, as described in 40 CFR 403.17(d) and the ~~industrial-user~~Industrial User submits the notifications required in 40 CFR 403.17(c).

(2) The District may approve an anticipated ~~bypass~~Bypass, after considering its adverse effects, if the District determines that it will meet the conditions specified in part ~~(g)(1)~~(1) of this prohibition.

(h) Discharge of Petroleum or Mineral Oil Causing Pass-through or Interference Prohibited. Notwithstanding the provisions of Section 3-~~(a-)~~, no user may ~~discharge~~Discharge petroleum oil, non-biodegradable cutting oil or other products of mineral origin in any amount that causes ~~interference~~Interference or pass-through.

(i) Discharge of Trucked or Hauled Wastes Prohibited. No user shall ~~discharge~~Discharge any trucked or otherwise hauled ~~wastes~~Wastes to the ~~community sewer~~Community Sewer or to any District facilities unless a ~~permit~~Material Acceptance Permit has been issued by the District.

8. Title II, Section 3 is amended to read as follows:

Section 3 – Limitations on Discharges

(a) Wastewater-StrengthLocal Limits. No ~~person~~Person shall ~~discharge wastewater~~Discharge Wastewater from a ~~side-sewer~~Sewer Lateral into a ~~community-sewer~~Community Sewer if the ~~strength~~concentration of any of the ~~wastewater~~following constituents in the Wastewater exceeds the following limitations:

Arsenic	2	mg/L
Cadmium	1	mg/L
~~Chlorinated Hydrocarbons- (total identifiable)~~	~~0.5~~	~~mg/L~~
Chromium (total)	2	mg/L
Copper	5	mg/L
Cyanide	5	mg/L
Iron	100	mg/L
Lead	2	mg/L
Mercury	0.05	mg/L
Nickel	5	mg/L
<u>Oil and Grease</u> <u>(animal/vegetable)</u>	<u>300</u>	<u>mg/L</u>
Oil and Grease <u>(mineral)</u>	100	mg/L

pH	not less than 5.5	S.U.
Phenolic compounds	100	mg/L
Silver	1	mg/L
Temperature	150 ⁽¹⁾	°F
<u>Total Toxic Organics (TTOs) ⁽²⁾</u>	<u>2.1</u>	<u>mg/L</u>
Zinc	5	mg/L

⁽¹⁾ 150°F (65.5°C), or any thermal discharge which as a result of temperature and/or volume causes the influent of the wastewater treatment plant to exceed 104°F (40°C).

⁽²⁾ TTO is the summation of compounds defined as “TTO” in 40 CFR 413.02(i), excluding 2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) - “dioxin”.

(b) Additional Wastewater StrengthConcentration Limits. Wastewater ~~strengthconcentration~~ limits for constituents not listed in Section ~~3a3(a)~~ may be established in a ~~wastewater discharge permit~~ Wastewater Discharge Permit based on available treatment technology, existing ~~wastewater~~ Wastewater conditions in the District's facilities or other factors as determined by the Director. The Director may also establish ~~wastewater strength~~ Wastewater concentration limits ~~on in the wastewater discharge permits~~ Wastewater Discharge Permits at locations within a ~~premises~~ Premises whenever non-process ~~water~~ Wastewater may dilute the ~~wastewater~~ Wastewater discharging from ~~side sewers~~ Sewer Laterals.

(c) Best Management Practices. The District may require best management practices (BMPs) as an alternative to numeric limits that are developed to protect the POTW, water quality, and ~~sewage~~ Sewage sludge.

(d) Quantity and Rate of Flow Limits. No ~~person~~ Person shall ~~discharge~~ Discharge ~~wastewater~~ Wastewater into a ~~community sewer~~ Community Sewer in quantities or at rates of flow which may have an adverse or harmful effect on or overload District facilities or cause excessive or additional District treatment costs. The Director may establish mass ~~discharge~~ Discharge limits in ~~wastewater discharge permits~~ Wastewater Discharge Permits to control the quantity and rate of flow of ~~wastewater discharges~~ Wastewater Discharges.

(e) Radioactive Limits. No ~~person~~ Person shall ~~discharge~~ Discharge or cause to be ~~discharged~~ Discharged any radioactive ~~wastewater~~ Wastewater into a ~~community sewer~~ Community Sewer except when the ~~person~~ Person is authorized to use radioactive material by the Nuclear

Regulatory Commission or other governmental agency empowered to regulate the use of radioactive materials and when the ~~wastewater~~Wastewater is ~~discharged~~Discharged in strict conformity with current Nuclear Regulatory Commission regulations and recommendations for safe, disposal and in compliance with all rules and regulations of State and local regulatory agencies.

(f) Deny or Condition New or Increased Contributions. The Director may deny or condition new or increased contributions of pollutants, or changes in ~~the~~ nature of pollutants, to the District's ~~wastewater~~Wastewater treatment facility by Industrial Users where such contributions do not meet applicable Pretreatment Standards and Requirements or where such contributions would cause the District to violate its NPDES permit.

9. Title II, Section 4 is amended to read as follows:

Section 4 – Federal Pretreatment Standards

The General Pretreatment Regulations and Categorical Pretreatment Standards are hereby incorporated into this Ordinance and, if more stringent than limitations imposed under the Ordinance for Dischargers, shall supersede the limitations imposed under this Ordinance. The Director shall notify all affected Dischargers of the applicable standards and other requirements. Effluent limitations promulgated under the authority of the Clean Water Act shall apply in any instance where they are more stringent than those in ~~these regulations~~this Ordinance.

10. Title II, Section 6 is deleted.

11. Title II, Section 7 is deleted.

12. Title III, Section 1 is amended to read as follows:

Section 1 – Classification

All ~~dischargers~~Dischargers shall be classified for ~~wastewater~~Wastewater disposal purposes in accordance with the principal activity conducted upon the ~~premises~~Premises, or in accordance with the use of the ~~premises~~Premises, for purposes of ~~wastewater~~Wastewater treatment, as determined by the District in case multiple tenants or activities are on the ~~premises~~Premises. The purpose of classification is to facilitate the regulation of ~~wastewater~~Dischargers based on quality, quantity and flow, to provide an effective means of industrial ~~waste~~Waste source control, and to establish a system of ~~wastewater~~Wastewater disposal service charges ~~based upon flow and waste strength~~, which will insure an equitable recovery of District capital and operating costs.

13. Title III, Section 2 is amended to read as follows:

Section 2 – Calculation of Wastewater Disposal Charge

All ~~dischargers~~Dischargers shall pay a use charge for District ~~wastewater~~Wastewater disposal services. The charges will reflect the quantity, quality, and flow of the ~~wastewater of the dischargers~~Dischargers' Wastewater and will be based on District capital and operating costs to intercept, ~~and treat and dispose of wastewater.~~ Wastewater. All ~~dischargers~~Dischargers shall also pay all other charges, fees, tolls, rentals or taxes as from time to time established or adopted by the District. Flat charges, unit charges and classification charges shall be established from time to time and set forth in a schedule of rates and charges. Unit charges will be established for each element of ~~wastewater~~Wastewater strength which incurs District costs of interception, treatment and disposal. The total ~~wastewater~~Wastewater disposal charge for each ~~discharger~~Discharger shall be calculated as set forth herein:

(a) Dischargers from Residential Premises with Four or Less Dwelling Units. Dischargers ~~of wastewater in this class~~from residential premises with four or less dwelling units shall pay a total ~~wastewater~~Wastewater disposal charge, regardless of the source of water, which shall be the sum of a uniform flat monthly charge per dwelling unit for ~~wastewater~~Wastewater strength and the unit charge for volume multiplied by the volume of water used, subject to a maximum volume established by the District from time to time and set forth in a schedule of rates and charges.

(b) Dischargers from Residential Premises with Five or More Dwelling Units and Dischargers from Nonresidential Premises. ~~All dischargers including Permitted Dischargers.~~ Dischargers of wastewater in this class~~Wastewater from residential Premises with five or more dwelling units, and Dischargers from nonresidential Premises, including Dischargers who have obtained a Wastewater Discharge Permit,~~ will be assigned a ~~business classification code~~Business Classification Code depending on the principal activity conducted on the ~~premises~~Premises or the use of the ~~premises~~Premises for purposes of ~~wastewater~~Wastewater treatment, as determined by the District in case multiple tenants or activities are on the ~~premises~~Premises. All ~~dischargers~~Dischargers conducting the same principal activity will receive the same ~~business classification code.~~Business Classification Code. The Director shall determine the typical ~~wastewater~~Wastewater strength for each ~~business classification code~~Business Classification Code, and each ~~discharger~~Discharger within that classification will be assumed, for ~~wastewater~~Wastewater disposal charge purposes, to have the same typical ~~wastewater~~Wastewater strength. The Director shall also subclassify within each ~~business classification code~~Business Classification Code those ~~dischargers~~Dischargers who ~~discharge~~Discharge primarily segregated domestic ~~wastes~~Wastes, or ~~wastes~~Wastes from sanitary conveniences. A classification charge shall

be established by the District for each ~~business-classification-code~~Business Classification Code and subclassification, which will be based on unit charges for the elements of ~~wastewater~~Wastewater strength, ~~including volume,~~ as applied to the typical ~~wastewater~~Wastewater strength of the particular classification. The ~~wastewater~~Wastewater disposal charge applied to a ~~discharger~~Discharger in this class will be calculated by multiplying the classification charge by the volume of water used by the ~~discharger.~~ Any discharger in this class who is issued a wastewater discharge permit will thereafter pay a wastewater disposal charge as a permitted discharger.Discharger.

(c) Permitted Dischargers: with Unique Strength. Dischargers whose average Wastewater strength cannot be established on a business classification basis, or whose Wastewater strength exceeds the normal range of wastewater who areWastewater strength for the Business Classification Code to which the Discharger is assigned, shall be required to obtain a permit ~~under the provisions of this Ordinance, excluding permits issued solely for flow estimation, shall and shall~~ pay a ~~wastewater~~Wastewater disposal charge which shall be~~calculated as~~ the sum of the products of the following: The unit charge for each element of ~~wastewater~~Wastewater strength multiplied by the ~~allowable limits~~average concentration of each element set forth in the permit multiplied by the volume of water used; and the unit charge for volume multiplied by the volume of water used as determined herein. The ~~wastewater~~Wastewater disposal charge for ~~these~~ permitted ~~dischargers~~Dischargers, including both ~~wastewater~~Wastewater strength and water use, shall be calculated by an apportionment by the Director of strength and use to each ~~side sewer~~Sewer Lateral at the ~~discharger's premises.~~ Dischargers requiring permits who have seasonal variations in operations shall have the capital cost element adjusted in the calculation of wastewater disposal charges to ensure equitable recovery of capital costs of design capacity from such dischargers.Discharger's Premises. Dischargers requiring permits solely for flow estimation shall pay a ~~wastewater~~Wastewater disposal charge calculated by multiplying the classification charge by the volume of water determined by the estimation. In addition to a ~~wastewater~~Wastewater disposal charge, the permitted ~~discharger~~Discharger shall pay all applicable District permit charges. ~~Commencing on the effective date of this Ordinance, all dischargers~~All Dischargers required to obtain a permit shall pay a ~~wastewater~~Wastewater disposal charge in accordance with their ~~business-classification-code~~Business Classification Code until a permit is issued.

(d) Capacity fee. A ~~wastewater~~Wastewater capacity fee shall be paid as established from time to time by the District and which ~~reasonably~~ reflects the ~~cost~~reasonable costs of providing ~~wastewater~~Wastewater treatment capacity. The ~~wastewater~~Wastewater capacity fee shall be payable prior to the time a new ~~discharger~~Discharger commences a use of the ~~community sewer system, or connection to the District interceptor system.~~Community Sewer.. The District will calculate the ~~wastewater~~Wastewater capacity fee based on the best available estimated information for the proposed ~~business~~Discharger, based on the flow, strength, and other pertinent design information at the time the new ~~discharger~~Discharger applies for the District's service.

Once the ~~business~~new Discharger is fully established, within 24 months from commencement of ~~discharge~~Discharge, the District may review the actual flow and/or strength to verify the estimated demand for ~~wastewater~~Wastewater treatment capacity. If the review indicates that the actual measured flow or strength of the ~~business~~Discharge is greater than the initially estimated information, the District will collect an additional ~~wastewater~~Wastewater capacity fee. The ~~wastewater~~Wastewater capacity fee was made effective September 11, 1984 and the ~~wastewater~~Wastewater capacity fee shall apply to all ~~dischargers~~Dischargers who increased demand for ~~wastewater~~Wastewater treatment capacity on or after July 1, 1984.

An existing ~~discharger pays~~Discharger shall pay a capacity fee when the District determines that the ~~discharger~~Discharger has increased their demand for ~~wastewater~~Wastewater treatment capacity. An increased demand for ~~wastewater~~Wastewater treatment capacity may also be reviewed when an existing ~~business~~Discharger significantly increases their ~~wastewater~~Wastewater treatment capacity demand or changes the nature of ~~business (e.g., BCC, ownership), their operation.~~ An increased demand for ~~wastewater~~Wastewater treatment capacity can occur even if estimating parameters (e.g., square footage, fixtures) for the ~~business~~Discharger may not have changed.

14. Title III, Section 3 is amended to read as follows:

Section 3 – Determination of Water Used

The applicable volume of water upon which ~~wastewater~~Wastewater disposal charges shall be based will be determined as follows:

(a) Water Discharged to Community Sewer. For ~~premises~~Premises where no portion of the water received from any source is consumed in the principal activity of the ~~discharger~~Discharger or is removed from the ~~premises~~Premises by means other than ~~community sewers~~Community Sewers, the ~~wastewater~~Wastewater disposal charge shall be applied against the total amount of water ~~used,~~ from all sources, discharged to the Community Sewer. The amount of East Bay Municipal Utility District water received will be determined by registration on an East Bay Municipal Utility District meter. The amount of water used from other sources will be determined by means of a meter installed at the expense of the ~~discharger~~Discharger and approved by the District or by an estimate prepared by the District, after the ~~discharger~~Discharger obtains a permit in accordance with this Ordinance. The ~~discharger~~Discharger shall report to the District the sources of all water used at ~~his premises~~their Premises other than that supplied by the East Bay Municipal Utility District and shall notify the District of any changes in such sources.

(b) Water Not Discharged to Community Sewer. For ~~premises~~Premises where a portion of the water received from any source does not flow into ~~community sewers~~Community Sewers, because of the principal activity of the ~~discharger~~Discharger or removal by other means, the charge

for ~~wastewater~~Wastewater disposal service will be applied against the volume of water discharging from such ~~premises~~Premises into ~~community sewers~~Community Sewers. Written notification and proof of the diversion of water must be provided by the ~~discharger~~Discharger if ~~he is~~they are to avoid application of the ~~wastewater~~Wastewater disposal charge against the total amount of water used from all sources. ~~He~~They may be required to install a meter, of a type and at a location approved by the District and at ~~his~~their own expense, to determine the quantity of water flowing into ~~community sewers~~Community Sewers. However, where it is impractical to install meters and where a significant amount of the metered water consumption is not being ~~discharged~~Discharged to a ~~community sewer~~Community Sewer, then the charge for ~~wastewater~~Wastewater disposal service may be based upon an estimate prepared by the District, after the ~~discharger~~Discharger obtains a permit in accordance with this Ordinance.

15. Title IV, Section 1 is amended to read as follows:

Section 1 – Permit Requirement

All ~~dischargers, other than residential,~~Dischargers whose ~~wastewater~~Wastewater requires special regulation or contains industrial ~~wastes~~Wastes requiring source control shall secure a ~~wastewater discharge~~Wastewater Discharge Permit. ~~No such Discharger shall connect, Discharge, cause, allow or permit—~~

~~—(any Discharge to the Community Sewer, either directly or indirectly, except in accordance with a)—~~ Wastewater Discharge Permit issued by the Director.

(a) Mandatory Permits. All ~~dischargers~~Dischargers in the following categories must obtain a ~~wastewater discharge permit:~~Wastewater Discharge Permit in accordance with this Title.

(1) ———(1)—— Significant Industrial Users, as defined in Title I, ~~Section.~~

(2) Industrial Users not otherwise specified in this section who are determined by the Director to warrant a control mechanism for purposes of preventing Pass Through or Interference, to protect the quality of the San Francisco Bay, to protect worker health or safety, to facilitate sludge management or disposal, or protect against damage to the POTW, which may include Non-Significant Categorical Industrial Users, as defined in Title I, and Zero Dischargers.

~~(3 of this Ordinance.~~

~~_____ (2) _____~~ Dischargers determined by the Director to require a permit to establish ~~wastewater~~Wastewater disposal charges based on flow and ~~waste~~Wastewater strength. These may include:

(i) Dischargers whose average ~~wastewater~~Wastewater strength cannot be established on a business classification basis, ~~because of seasonal or other variations in operations.~~

(ii) Dischargers whose ~~wastewater~~Wastewater strength exceeds the normal range of ~~wastewater~~Wastewater strength for the ~~business classification code~~Business Classification Code to which the ~~discharger~~Discharger is assigned.

(iii) Dischargers ~~using an unmetered source~~disposing of water.

~~_____ (3) _____~~ ~~Other dischargers determined by the Director to require individual or general Unmetered Water, to whom the District may issue the following types of permits as necessary to carry out the purposes of this Ordinance.:~~

~~A. —~~

~~A. — (b) — Optional~~Limited-Term Permits. ~~The Director may issue wastewater discharge permits to any Discharger who~~
~~Permits for Users who request a permit for temporary~~
~~Discharges of Unmetered Water during a specified term;~~

~~B. Groundwater Permits. Permits for Users who request a permit~~
~~to Discharge groundwater on an ongoing basis; or~~

~~C. Industrial User Permit. Permits for any other User that requests~~
~~a District estimation of wastewater flow because~~permit to
Discharge Unmetered Water.

(b) Estimation Permits. Estimation Permits may be issued to a Discharger which demonstrates a significant amount of the Discharger's metered water consumption is not being dischargedDischarged to a ~~community sewer~~Community Sewer. For the purposes of this Ordinance, any diversion from the Community Sewer shown to be more than 20 percent of the metered water consumption shall qualify for an ~~optional permit~~Estimation Permit. Other Dischargers who can demonstrate a significant diversion may request a permit, which shall be subject to approval by the Director.

16. Title IV, Section 2 is amended to read as follows:

Section 2 – Application

Dischargers seeking a ~~wastewater discharge permit~~Wastewater Discharge Permit shall complete and file with the Director a District application form, accompanied by ~~the any~~ applicable District fees. New ~~dischargers~~Dischargers shall file applications 60 days prior to commencement of ~~discharges and existing dischargers shall file applications within 30 days of notification by the Director~~Discharges, unless such time is extended for good cause. The application may require the following information:

- (a) name, site address, and mailing address (if different than site address) of business;
- (b) estimated ~~wastewater~~Wastewater strength;

- (c) estimated ~~wastewater~~concentration of each constituent for which a Local Limit has been established as stated in Title II Section 3 and any other constituents that could result in Prohibited Discharges as described in Title II Section 2.

- (d) environmental control permits held by or for the facility;
- (e) estimated Wastewater flow, average and peak ~~wastewater discharge~~Wastewater Discharge flow for each ~~side sewer~~Sewer Lateral;
- (f) locations of ~~side sewers~~Sewer Laterals, sampling points, and pretreatment facilities;
- (g) description of activity, facilities, and plant process on the ~~premises~~Premises, including raw materials, processes and types of materials which are or could be ~~discharged~~Discharged;
- (h) total product produced, by type;
- (i) number and type of employees;
- (j) days and hours of operation and days and hours of ~~discharge~~Discharge;
- (k) slug control plan which outlines ~~discharge~~Discharge practices (including non-routine batch ~~discharges~~Discharges), describes stored chemicals, and contains procedures both to notify the ~~district~~District immediately of slug ~~discharges~~Discharges and to prevent adverse impacts from any accidental spill; and
- (l) any other information the Director shall deem necessary to evaluate the permit application.

The Director shall evaluate the application in light of this Ordinance's stated purposes and approve, conditionally approve, or deny the application as appropriate under the circumstances. Any Discharger aggrieved by the Director's decision to deny an application may appeal that decision by utilizing the procedures described in Title VI, Section 1(f) of this Ordinance.

17. Title IV, Section 3 is amended to read as follows:

Section 3 – Terms and Conditions of Permit

(a) Terms. All ~~wastewater discharge permits~~Wastewater Discharge Permits shall ~~be subject to~~require the permittee to comply with all provisions of this Ordinance and all rates and charges established by the District. ~~A wastewater discharge permit~~A Wastewater Discharge Permit may contain terms, conditions or other provisions that are more stringent than the requirements of this Ordinance. A Discharger must comply with ~~such terms~~all Wastewater Discharge permit terms and conditions, and failure to do so is a violation of this Ordinance. A permit issued to a Significant Industrial User shall be valid for a specified time period, not to exceed five years; ~~or the maximum time allowed by law.~~ The Director may renew a permit issued to a Significant Industrial User for any period not to exceed five years; ~~or the maximum time allowed by law.~~ The period of validity for all other permits shall be as determined by the Director, and may include permits with no expiration date, provided that the Director may revise or terminate any permit; ~~at any time in the manner provided by this Ordinance.~~ Permit renewal applications shall be submitted to the District at least 60 days before the permit expires. A permit issued to a Significant Industrial User shall require the permittee to notify the District immediately of any changes at its facility affecting the potential for a Slug Discharge.

(b) Conditions. Wastewater ~~discharge permits~~Discharge Permits may contain any or all of the following —
~~Conditions~~conditions:

(1) ~~_____~~ (1) Effluent limits, including categorical pretreatment standards and Local Limits.

(2) ~~_____~~ Limits on rate and time of ~~discharge~~Discharge or requirements for flow regulation and equalization.

(23) Requirements for inspection and sampling facilities, including District access to such facilities.

~~_____~~ (3)

(4) Monitoring program which may include: Sampling locations; frequency and method of sampling; number, types and standard of tests; and establishing a reporting

schedule. The ~~discharger~~Discharger assigned a monitoring program in conformance with this Ordinance shall pay all applicable District charges.

(~~45~~) Submission of technical reports or ~~discharge~~Discharge reports, including, but not limited to, reports described in Title V, Section 2~~7~~ of this Ordinance, or any report required by 40 CFR 403.12.

(~~56~~) Maintenance of ~~plant~~-records relating to ~~wastewater discharges~~Wastewater Discharges, as specified by the Director, and affording District access thereto.

(~~67~~) A statement of applicable penalties for violation of pretreatment standards and requirements, and any applicable compliance schedule.

(~~78~~) Requirements for the development and implementation of pollution prevention plans to reduce the amount of pollutants ~~discharged~~Discharged to the District's treatment plant.

(~~89~~) Notification requirements including immediate notification of any changes that affect the potential for a slug ~~discharge~~Discharge.

(~~910~~) Requirements for the development and implementation of spill control plans or other special conditions including management practices necessary to adequately prevent accidental, unanticipated, or nonroutine ~~discharges~~Discharges.

(~~1011~~) Installation of technology, as specified by the Director.

(~~1112~~) Requirements to implement best management practices.

(13) Other conditions as deemed appropriate by the Director to ensure compliance with this Ordinance or the terms and conditions of the ~~permit~~Wastewater Discharge Permit.

18. Title IV, Section 4 is amended to read as follows:

Section 4 – Change of Permit Terms and Conditions

Once issued, the Director may change the terms and conditions of a ~~wastewater discharge permit~~Wastewater Discharge Permit, including changing the ~~average~~-limits on ~~the elements of wastewater strength~~Wastewater constituents, from time to time as circumstances may require. The District shall allow a ~~discharger~~Discharger reasonable time to comply with any District required

changes in the permit except that a change ~~in average limits of wastewater strength~~that affects billing shall immediately affect calculation of the ~~wastewater~~Wastewater disposal charge.

19. Title IV, Section 5 is amended to read as follows:

Section 5 – Transfer of Permit ~~Prohibited~~

—A ~~wastewater discharge permit~~Wastewater Discharge Permit shall not be assigned or transferred without prior notice to and approval from the Director.

20. Title IV, Section 6 is amended to read as follows:

Section 6 – Termination and Modification for Violations

The Director may terminate or modify any ~~wastewater discharge permit~~Wastewater Discharge Permit for violation of the terms and conditions of the permit or the provisions of this Ordinance. ~~A discharger~~Any Person aggrieved by the Director's decision to terminate or modify a Wastewater Discharge Permit based on such violations may appeal that decision using the procedures described in Title VI, Section (1)(f). A Discharger whose permit has been terminated based on such violations, and who desires to resume Discharging, shall apply for a new permit within 30 days of issuance of the notice of termination. ~~Any discharger whose permit has been terminated shall pay wastewater disposal charges based upon his former permit or on his assigned business classification code, whichever is higher, until a new permit has been applied for, approved, and issued.~~

21. Title V, Section 1 is amended to read as follows:

Section 1 – Authority of Director

The Director is charged with responsibility for District's ~~wastewater~~Wastewater control program and the administration and enforcement of the provisions of this Ordinance.

22. Title V, Section 2 is amended to read as follows:

Section 2 – Wastewater Source Control Requirements

In order to effectively administer and enforce the provisions of these regulations, the Director may require any ~~discharger~~Discharger to comply with any or all the following requirements:

(a) Discharge Reports. The Director may require ~~discharge~~Discharge reports, including but not limited to questionnaires, technical reports, sampling reports, and test analyses, and

periodic reports of ~~wastewater discharge~~Wastewater Discharge. When a report filed by a ~~person~~Person pursuant to this section is not adequate in the judgment of the Director, ~~he~~the Director may require such ~~person~~Person to supply such additional information as the Director deems necessary. The ~~discharge~~Discharge report may include, but not be limited to, nature of the process, volume and rates of ~~wastewater~~Wastewater flow, elements, constituents, and characteristics of the ~~wastewater~~Wastewater, together with any information required in an application for ~~wastewater discharge permit~~Wastewater Discharge Permit.

(b) Baseline Monitoring Report. Each ~~categorical industrial user~~Categorical Industrial User shall submit a baseline monitoring report (BMR). The requirements for a BMR, as described in 40 CFR 403.12(b) are hereby incorporated into ~~these regulations~~this Ordinance. A BMR, if required, shall be reviewed by an authorized representative of the user, and certified to by a qualified professional, indicating whether pretreatment standards are being met on a consistent basis, and if not, whether additional operation and maintenance and/or additional pretreatment is required for the user to meet the pretreatment standards and requirements.

(c) Periodic Report of Continued Compliance.

(1) Each Categorical Industrial User, other than a Non-Significant Categorical Industrial User or Middle Tier Categorical Industrial User, shall submit to the District twice per year a report describing the nature and concentration of the pollutants which are regulated by the Categorical Pretreatment Standards and Local Limits applicable to the CIU. The User's report must be based on sampling and analysis performed during the six-month reporting period and in accordance with the techniques described in 40 CFR Part 136 and amendments thereto. At the District's discretion, this sampling and analysis may be performed by the District. If a Categorical Pretreatment Standard requires compliance with a Best Management Practice or Pollution prevention alternative, the User must submit all documentation necessary for the District to determine the User's compliance status. The report shall include the average and maximum daily flows. The District may determine during which months the CIU shall submit these reports.

~~(2) Each Middle Tier Categorical Industrial User must submit to the District the report described in subparagraph (1) once per year, provided that it~~

(2) Each Middle Tier Categorical Industrial User must submit to the District once per year a report describing the nature and concentration of the pollutants which are regulated by the Categorical Pretreatment Standards and Local Limits applicable to the CIU. The User's report must be based on sampling and analysis performed during the six-month reporting period and in accordance with the techniques described in 40 CFR Part 136 and amendments thereto. At the District's discretion, this sampling and analysis may be performed by the District. If a Categorical Pretreatment Standard requires compliance with a Best Management Practice or Pollution prevention alternative, the

User must submit all documentation necessary for the District to determine the User's compliance status. The report shall include the average and maximum daily flows. The User must immediately notify the District of any changes at its facility causing it to no longer meet all conditions required for the District to designate it as a Middle Tier Categorical Industrial User and, upon giving such notification, must immediately begin submitting the report described in subparagraph (1) twice per year until further notice from the District.

(3) Each Significant Industrial User other than a Categorical Industrial User must submit to the District twice per year a report ~~indicating~~describing the nature and concentration of the pollutants which are regulated by this Ordinance. The report shall include the average and maximum daily flows. The District may determine during which months the SIU shall submit these reports. If a Local Limit requires compliance with a Best Management Practice or ~~pollution~~Pollution prevention alternative, the User must submit all documentation necessary for the District to determine the User's compliance status. The User's report must be based on sampling and analysis performed during the six-month reporting period and in accordance with the techniques described in 40 CFR Part 136 and amendments thereto. At the District's discretion, this sampling and analysis may be performed by the District.

(4) Each Non-Significant Categorical Industrial User must submit to the District annually a certification statement stating that the facility never Discharged more than 100 gallons of total categorical Wastewater on any given day during the reporting period.

(5) Zero Dischargers must submit an annual certification statement to the District stating no Discharge of Process Wastewater occurred during the reporting period.

(d) Compliance Schedule for the Installation of Technology. The District may require ~~each user a Discharger~~ to develop a compliance schedule for the installation of technology to meet applicable pretreatment ~~standard~~standards or ~~requirement.~~Requirements. Requiring a compliance schedule for the installation of technology is not conditioned on thea determination that a violation of violations. Progress the Discharger's Wastewater Discharge Permit or this Ordinance has occurred. The compliance schedule for installation of technology shall require a Discharger to submit periodic progress reports ~~for the compliance schedule shall be considered a requirement.~~

(e) Report on Compliance with Categorical Deadline. Each ~~categorical user~~Categorical Industrial User shall submit a report within 90 days after the final date for compliance, or upon commencement of ~~discharge~~Discharge, whichever comes later, which contains flow and pollutant

measurements, a certification of whether pretreatment standards are being met consistently, and if not, a description of needed additional operations and maintenance or pretreatment. The report on compliance with categorical deadline, if required, shall be reviewed by an authorized representative of the ~~user~~User, and certified to by a qualified professional, indicating whether pretreatment standards are being met on a consistent basis, and, if not, whether additional operation and maintenance and/or additional pretreatment is required for the user to meet the pretreatment standards and requirements.

(f) Notice of Violation/Resampling Report. If sampling by a ~~user~~User indicates a violation, ~~of the user's Wastewater Discharge Permit, this Ordinance, or a pretreatment standard or requirement, the User~~ shall notify the District within 24 hours of becoming aware of the violation. The ~~user~~User shall also repeat the sampling and analysis and submit the results of the repeat analysis to the District within 30 days of becoming aware of the violation, unless the District samples the user between the time of the initial sampling and the time when the user receives the results of this sampling. Within five (5) days of detecting such violation, the user shall, unless waived by the District, submit a detailed written report describing the cause(s) of the ~~discharge~~Discharge and the measures to be taken by the user to prevent similar future occurrences. Such notification shall not relieve the ~~user~~User of any expense, loss, damage, or other liability which may be incurred as a result of damage to the POTW, natural resources, or any other damage to person or property; nor shall such notification relieve the user of any fines, penalties, or other liability which may be imposed pursuant to this ordinance.

(g) Slug Control Plan. The District may require a plan which outlines ~~discharge~~Discharge practices, including non-routine batch ~~discharges~~Discharges, describes stored chemicals, and contains procedures both to notify the District immediately of slug ~~discharges~~Discharges and to prevent adverse impacts from any accidental spill.

(h) Notice of Potential Problems. ~~All categorical and non-categorical industrial users~~Each Industrial User shall notify the District immediately of all ~~discharges~~Discharges that could cause problems to its ~~wastewater~~Wastewater treatment facility, including any slug loadings, as defined by 40 CFR 403.5-(b), by the ~~industrial user~~Industrial User.

(i) Notification of Changed Conditions. ~~All industrial users~~Each Industrial User shall promptly notify the District in advance of any substantial change in the volume or character of pollutants in their ~~discharge~~Discharge, including the listed or characteristic hazardous wastes for which the ~~industrial user~~Industrial User has submitted initial notification under 40 CFR 403.12 (p), and immediate notification of any changes that affect the potential for a slug ~~discharge~~Discharge.

(j) Notification of Hazardous Waste Discharge.

(1) All ~~industrial-users~~Industrial Users discharging any substance which, if otherwise disposed of, would be a hazardous or acutely hazardous waste under 40 CFR 261, must comply with the reporting requirements of 40 CFR 403.12(p)(1) and (3) unless exempted under the provisions of 40 CFR 403.12(p)(2).

(2) In the case of any notification made under section (1) above, the ~~industrial user~~Industrial User shall certify that it has a program in place to reduce the volume and toxicity of hazardous wastes generated to the degree it has determined to be economically practical. The District may accept a copy of a hazardous waste reduction or minimization plan otherwise required by law, as compliance with this requirement.

(k) Monitoring Programs. The Director may require of Dischargers such technical or monitoring programs, including the submission of periodic reports, as ~~he or she~~the Director deems necessary, provided that the burden, including costs, of such programs and reports shall bear a reasonable relationship to the need for the report and the benefits to be obtained therefrom. The Discharger shall pay the applicable District charge for the monitoring program, in addition to the ~~wastewater~~Wastewater disposal charge and other charges established by the District. The monitoring program may require the Discharger to conduct a sampling and analysis program of a frequency and type specified by the Director or as required by the General Pretreatment Regulations to demonstrate compliance with prescribed ~~wastewater-discharge~~Wastewater Discharge limits. The Discharger may ~~either~~:

(1) Conduct ~~his or her~~their own sampling and analysis program provided ~~he or she~~the Discharger demonstrates to the Director that ~~he or she~~they have the necessary qualifications and facilities to perform the work; or

~~(2)~~ (2) Engage a private consulting firm or laboratory, certified by the State of California, Department of Public Health under the Environmental Laboratory Accreditation Program.

~~(3)~~ The Director may authorize a waiver where a pollutant is neither present nor expected to be present in the Discharge as specified in 40 CFR 403.12(e)(2).

(l) Additional Monitoring Report. If a ~~significant industrial user~~Significant Industrial User monitors any regulated pollutant at the appropriate sampling location more frequently than required by the District, using approved sampling and analytical methods, the results of this monitoring shall be ~~included in the subsequent self-monitoring report~~reported to the District.

(m) Inspection Facilities. The Director may require any non-residential ~~discharger~~Discharger to construct, at ~~his~~their own expense, a sampling facility or inspection ~~manhole~~maintenance hole together with necessary related measuring and sampling equipment, in accordance with construction standards and specifications of the ~~public agency~~Public Agency owning the ~~community sewer~~Community Sewer. The sampling facility or inspection ~~manhole~~maintenance hole shall be constructed on the ~~side sewer~~Sewer Lateral of the ~~discharger~~Discharger and within the public right of way at a location approved by the District and the ~~public agency~~Public Agency owning the ~~community sewer~~Community Sewer, provided that the Director may permit the installation of such facilities on the ~~premises~~Premises of the ~~discharger~~Discharger at a location which will permit District access to the facility at all times. Construction shall be completed within 60 days of written notification from the Director, unless such time is extended by the Director for good cause. The Director may require the ~~discharger~~Discharger to install such sampling facilities or inspection ~~manholes~~maintenance holes on each side sewer.

(n) Pretreatment. Pretreatment systems or devices may be required by the Director to treat ~~wastewater~~Wastewater prior to ~~discharge~~Discharge to the ~~community sewer~~Community Sewer when it is necessary to restrict or prevent the ~~discharge~~Discharge to the ~~community sewer~~Community Sewer of ~~wastewater~~Wastewater having ~~strength~~constituents in violation of the prohibitions or exceeding the limits established by this Ordinance, or to distribute ~~wastewater discharges~~Wastewater Discharges over a period of time. All pretreatment systems or devices shall be approved by the Director but such approval shall not relieve a ~~discharger~~Discharger of the responsibility for taking all steps necessary to comply with ~~wastewater~~Wastewater limitations established by the District. -All required pretreatment equipment shall be installed and operated at the ~~discharger's~~Discharger's expense. Any subsequent changes in the pretreatment facilities or method of operation shall be reported to and be acceptable to the District.

(o) Protection From Accidental or Slug Discharge. Each ~~discharger~~Discharger shall provide protection from accidental or slug ~~discharge~~Discharge of prohibited materials or other ~~wastes~~Wastes regulated by this Ordinance. Such facilities shall be provided and maintained at the ~~discharger's~~Discharger's expense. These facilities shall be approved by the Director but such approval shall not relieve the ~~discharger~~Discharger from the responsibility of modifying the facilities to provide the protection necessary to meet the requirements of this section.

(p) Representative Data. All data submitted in reports or applications shall be representative of conditions during the reporting period.

(q) ~~Any~~The Director may require the submission of any other reports not specified in this section, as deemed necessary by the District, to determine a ~~user's~~User's compliance status with local, state and federal limits or requirements.

23. Title V, Section 3 is amended to read as follows:

Section 3 – Signature Requirement

(a) All reports and permit applications received or required under these regulations, including BMR, reports on compliance with Categorical Pretreatment Standard deadlines (90-day compliance reports), and periodic reports on continued compliance, shall be signed:

(1) by a responsible corporate officer, if the user submitting the reports is a corporation. For ~~the purpose~~purposes of this paragraph, a responsible corporate officer means:

(A) a president, secretary, treasurer, or vice president of the corporation in charge of a principal business function, or any other person who performs similar policy or decision-making functions for the corporation; or

(B) the manager of one or more manufacturing, production, or operating facilities, if authority to sign documents has been assigned or delegated to the manager in accordance with corporate procedures and the manager is authorized to make management decisions which govern the operation of the regulated facility, including having the explicit or implicit duty to

(i) make major capital investment recommendations;

(ii) initiate and direct other comprehensive measures to assure long-term compliance with environmental laws and regulations; and

(iii) ensure that the necessary systems are established or actions taken to gather complete and accurate information for control mechanism requirements.

(2) by a general partner or proprietor if the user submitting the reports is a partnership or sole proprietorship, respectively; or

(3) by a duly authorized representative of the individual designated in paragraph (1) or (2) of this section if:

(A) The authorization is made in writing by the individual designated in paragraph (1) or (2);

(B) The authorization specifies either an individual or a position having responsibility for the overall operation of the facility from which the industrial ~~discharge~~Discharge originates, such as the position of plant manager, operator of a well, or well field superintendent, or a position of equivalent responsibility, or having overall responsibility for environmental matters for the company; and

(C) The written authorization is submitted to the District.

(4) If an authorization under paragraph (a)(3) of this section is no longer ~~accurate~~valid because a different individual or position has responsibility for the overall operation of the facility, or overall responsibility for environmental matters for the company, a new authorization satisfying the requirements of paragraph (a)(3) of this section must be submitted to the District prior to or together with any reports to be signed by an authorized representative.

(b) Reports and applications must include the following certification statement:

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

24. Title V, Section 4 is amended to read as follows:

Section 4 – Retention of Records

All records, including but not limited to all information resulting from any monitoring activities, ~~discharge~~Discharge reports, permits, self-monitoring data, pretreatment system process control logs, documentation of compliance with BMP requirements, and relevant correspondence (whether or not required by these regulations) must be maintained by the user for a period of not less than three years. Monitoring records shall be included for all samples as specified in 40 CFR 403.12-(o)-(u)(1). All such records shall be made available for inspection and copying by a duly authorized representative of the District or any other governmental entity having jurisdiction.

The retention period may be extended in the case of unresolved litigation or at any time at the ~~request~~direction of the District, the State or U.S. EPA.

25. Title V, Section 5 is amended to read as follows:

Section 5 – Analytical and Sampling Methodology and Procedures

(a) The method and procedures utilized for all analyses which are reported under the requirements of these regulations shall be as specified by the provisions of 40 CFR Part 136.

(b) The methods and procedures utilized for all sampling performed and/or reported under the requirements of this regulation shall be as specified by the provisions of 40 CFR Part 136.

(c) If 40 CFR Part 136 does not contain sampling or analytical techniques for the pollutant in question, sampling and analyses must be performed in accordance with procedures approved by ~~U.S.~~EPA.

26. Title V, Section 7 is amended to read as follows:

Section 7 – Confidential Information

All information and data obtained from a Discharger in connection with Federal Pretreatment Standards or Local Limits shall be available to the public or other governmental agencies without restriction. Dischargers may request that information provided to the District in a report or, permit application or, questionnaire, the portions of or in the report, or other document, which might disclose trade secrets or secret processes shall not be made available for course of an inspection by the public but be treated as confidential. In all such cases, confidential information shall be made available to governmental agencies including the U.S. EPA, the State, and the District in for use in pending or potential judicial review or enforcement proceedings involving the person furnishing the report. All confidential information in connection with Federal Pretreatment Standards Discharger providing the information, and may be disclosed to the public where required by the California Public Records Act or other applicable law, in which case the Discharger shall comply with Title II, Section 7 be solely responsible for taking any action necessary to prevent the release of such information. Wastewater constituents and characteristics will not be recognized as confidential information.

27. Title V, Section 8 is amended to read as follows:

Section 8 – District Inspection

The District may inspect the facilities of any ~~discharger~~Discharger to ascertain whether the provisions of this Ordinance are being met and the ~~wastewater discharge~~Wastewater Discharge limits are being complied with. Dischargers shall allow the District or its representatives ready access at all reasonable times to all parts of the ~~premises~~Premises for the purposes of inspection or sampling or in the performance of any of their duties. Where a ~~discharger~~Discharger has security measures which would require proper identification and clearance before entry into their ~~premises~~Premises, the user shall make arrangements with their security personnel so that, upon presentation of proper identification, District personnel will be permitted to enter without delay for the purposes of performing their specific responsibilities. Such inspection shall be made with the consent of the owner or possessor of such facilities. If the District has been refused access to any part of a ~~discharger's~~Discharger's facility, and is able to demonstrate probable cause to believe that there may be a violation of this Ordinance, or that there is a need to inspect and/or sample as part of the routine inspection and sampling program of the District, then the Director may seek issuance of an inspection warrant or a search warrant, duly issued pursuant to the procedures set forth in Title 13 (commencing with Section 1822.~~550~~) of Part 3 of the Code of Civil Procedure; provided, however, that in the event of an emergency affecting the public health or safety such inspection may be made without consent or the issuance of a warrant. To verify the ~~wastewater~~Wastewater flows, characteristics, constituents, and strengths reported by ~~dischargers~~Dischargers, or to determine compliance with this Ordinance, inspection, measurement, and sampling may be conducted from time to time by the District. The District shall have the right to install, maintain, and operate necessary sampling and measuring equipment on the ~~premises~~Premises of ~~discharger~~Discharger.

28. Title V, Section 9 is amended to read as follows:

Section 9 – New Connections

Dischargers will be assigned a ~~business classification code~~Business Classification Code and informed of the applicable prohibitions, limits or conditions, and the applicable rates and charges, governing ~~wastewater~~Wastewater disposal service at the time of application for water service from East Bay Municipal Utility District. All nonresidential ~~dischargers~~Dischargers seeking a new ~~side-sewer~~Sewer Lateral connection to a ~~community-sewer~~Community Sewer and any new ~~discharger~~Discharger requiring information prior to applying for water service should contact the Director. The Director will inform the ~~discharger~~Discharger of the regulations governing ~~wastewater~~Wastewater disposal service and the applicability of requirements for inspection, sampling, or pretreatment facilities.

29. Title VI, Section 1 is amended to read as follows:

Section 1 – Director’s Orders

The Director may adopt procedures and rules for the implementation and administration of this Ordinance, including an enforcement response plan. The Director shall enforce the provisions of this Ordinance, including requirements established or permits issued hereunder, as provided herein.

~~(a)~~ (a) Issuance of Notices of Violations. When the Director finds that a ~~Discharger~~ Discharger has violated, or continues to violate, any provision of this ordinance, a ~~Wastewater Discharge Permit~~, a General Permit, an Order issued hereunder, or any other Pretreatment Standard or Requirement, the Director may serve upon that ~~Discharger~~ Discharger a written notice of violation. Within five days of the receipt of such notice, an explanation of the violation and a plan for the satisfactory correction and prevention thereof, to include specific required actions, shall be submitted by the ~~User~~ User to the Director. Submission of such a plan in no way relieves the ~~Discharger~~ Discharger of liability for any violations occurring before or after receipt of the notice of violation. Nothing in this Section shall limit the authority of the Director to take any action, including emergency actions or any other enforcement action, without first issuing a notice of violation.

(b) Requiring Discharger to Submit Schedule of Remedial or Preventive Measures. When the Director finds that a ~~discharge~~ Discharge of ~~wastewater~~ Wastewater is taking place or threatening to take place that violates or will violate prohibitions or limits prescribed by this Ordinance or ~~wastewater~~ Wastewater source control requirements or the provisions of a ~~wastewater discharge permit~~ Wastewater Discharge Permit, the Director may require the ~~discharger~~ Discharger to submit for approval of the Director, with such modifications as ~~he~~ the Director deems necessary, a detailed time schedule of specific actions the ~~discharger~~ Discharger shall take in order to correct or prevent a violation of requirements.

~~(b)~~ (c) Issuance of Cease and Desist Orders. When the Director finds that a ~~discharge~~ Discharge of ~~wastewater~~ Wastewater is taking place or threatening to take place in violation of prohibitions or limits of this Ordinance or ~~wastewater~~ Wastewater source control requirements or the provisions of a ~~wastewater discharge permit~~ Wastewater Discharge Permit, the Director may issue an ~~order~~ Order to cease and desist and direct that those ~~persons~~ Persons not complying with such prohibitions, limits, requirements, or provisions (1) comply forthwith, (2) comply in accordance with a time schedule set by the Director, or (3) in the event of a threatened violation, take appropriate remedial or preventative action.

~~(e)~~ ~~Damage to Facilities~~ (d) Cost Recovery. When the ~~discharge~~ Discharge of ~~wastewater~~ Wastewater causes an obstruction, damage, or other impairment to ~~Distriet~~ Wastewater disposal facilities, the Director may recover costs from the ~~discharger~~ Discharger to correct the problem caused by the ~~discharger~~ Discharger.

(de) Termination of Service. The District may terminate ~~or cause to be terminated wastewater~~ Wastewater Discharge Permit, Wastewater disposal service, or water service to any ~~premises~~ Premises if a violation of any provision of this Ordinance pertaining to control of ~~wastewater~~ Wastewater is found to exist or if a ~~discharge~~ Discharge of ~~wastewater~~ Wastewater causes or threatens to cause a condition of ~~contamination, pollution~~ Contamination, Pollution, or ~~nuisance~~ Nuisance, as defined in this Ordinance. This provision is in addition to other statutes, rules, or regulations authorizing termination of service for delinquency in payment, or for any other reason.

(ef) Appeal Procedures for Director's Orders.

(1) Any ~~permit~~ Wastewater Discharge Permit holder, Wastewater Discharge Permit applicant, ~~permit holder,~~ or Discharger ~~affected~~ aggrieved by ~~any action denying a permit application, modifying a permit, an Order issued pursuant to this Section, or issuing a cease and desist order or any other order made by the Director in implementing the provisions of a decision that this Ordinance,~~ otherwise specifies is subject to Title VI, Section 1(f), may ~~file with the Director~~ seek relief by filing a written request for reconsideration in accordance with this section.

(2) A request for reconsideration must be filed ~~with the Director~~ no later than 15 days from the ~~District's mailing of~~ date notice of the ~~action sought to be reconsidered~~ decision was given.

(3) The Person seeking reconsideration must submit a written statement with the request for reconsideration, signed under penalty of perjury, and containing (i) a description of the Order, or portion of the Order, that is the subject of the request for reconsideration, (ii) a description of the specific relief requested, (iii) a detailed statement of facts which the appellant believes entitles the appellant to the relief requested, and (iv) copies of all supporting documentation or other written evidence the appellant wishes the District to consider. The District may require a request for reconsideration to be submitted on a District form.

(4) The Director shall designate a District officer or employee with supervisory or managerial authority who will consider the request for reconsideration and decide whether to grant relief. The Director's designee may request additional information and the appellant shall provide such requested information within fifteen (15) business days or such other time period authorized in writing by the Director's designee. The evidence before the Director's designee shall consist of the written statement and documentation provided by the appellant in support of the request for reconsideration, relevant information in the District's files pertaining to the matter, and any other relevant

evidence which, in the judgment of the Director's designee, should be considered. The Director's designee shall consider the available evidence in light of this Ordinance's stated purposes and the public's interest in the fair, equitable, and consistent implementation of this Ordinance.

~~(5) (3) — The request shall set forth in detail the facts and any legal arguments supporting the request.~~

~~(4) — If the~~ The Director's designee may decide the matter within fifteen (15) business days from the receipt of the complete request for reconsideration, except if the Director's designee requests additional information the matter may be decided within fifteen (15) business days from the deadline to provide such additional information. If the Director's designee does not decide the matter within the above-stated time period, the request for reconsideration shall be deemed denied on the first day following that time period. Notice of any decision will be mailed to the Person requesting relief.

(6) Within 30 days after the date of mailing of written notice of any decision granting or denying relief under subsection (5) of this Section, or within 30 days after the date the request for reconsideration is deemed denied, the Person aggrieved by the Order that was the subject of the request for reconsideration may submit to the Director a written appeal. The appeal must set forth in detail the facts and rationale supporting the request under penalty of perjury. The Director shall either personally consider the appeal, designate another senior manager or officer of the District to consider the appeal, or designate an independent hearing officer to consider the appeal as the circumstances may require.

~~(7) The Director chooses to reconsider the action, he or she shall so notify the party requesting reconsideration in writing. The Director may perform such reconsideration~~ may act on the appeal with or without an oral hearing in any manner the Director deems reasonable ~~and under the circumstances, except where the Order at issue has the effect of terminating Wastewater service, terminating water service, or revoking the appellant's Wastewater Discharge Permit, in which case an oral hearing shall be held at the appellant's request. Any request for a hearing shall accompany the written appeal described in subsection (6). Failure to submit a request for a hearing in conjunction with the written appeal shall be deemed a waiver of the right to a hearing.~~

(8) The Director, or the other designated officer if applicable, shall thereafter issue a final written determination concerning the ~~action denying the permit application, modifying the permit, or issuing a cease and desist order or appeal.~~ The Director may consider the written request for reconsideration made pursuant to subsection (3); the

~~decision rendered by their designee pursuant to subsections (4) and (5); the appeal submitted pursuant to subsection (6); evidence and argument offered at hearing, if held; relevant information in the District's files pertaining to the matter, and any other order made by the Director in implementing the provisions of this Ordinance.~~

~~relevant evidence which, in the judgment of-~~

~~(5) — If the Director fails to reconsider the matter within 10 days from the date the Director receives such request, the request shall, should be deemed denied.~~

~~(6) — The Director's action denying the permit application, modifying the permit, or issuing a cease and desist order or considered, including any other order made additional information requested by the Director in implementing the provisions of this Ordinance. The Director's decision shall become final and binding at the time the Director denies a request for reconsideration or fails to reconsider the matter within the time specified by paragraph (e)(5) of this Section, acts on the appeal, except to the extent the action is the subject of an administrative complaint for penalties as provided in Section 2 of this Title. Notice of the Director's action will be mailed to the appellant within five (5) business days after the action.~~

~~(7) — Any permit applicant, permit holder, or Discharger affected by any action denying a permit application, modifying a permit, or issuing a cease and desist order or any other order made by (9) Unless the Director orders otherwise, any appealed Order or action shall remain in implementing effect and binding upon the provisions of appellant while the appeal, including any reconsideration thereof, remains pending.~~

~~(10) Any Person aggrieved by an Order issued pursuant to this Section, or a decision that this Ordinance otherwise specifies is subject to Title VI, Section 1(f), and who wishes to appeal or challenge such action must use the process provided by paragraph (e) of this Section. This the Order or decision, or receive other relief from a requirement is jurisdictional. The thereof, must seek review by utilizing all procedures available under this Section, and the failure to seek reconsideration do so shall be deemed a failure of the person Person subject to the permit action or order Order to exhaust administrative remedies.~~

30. Title VI, Section 2 is amended to read as follows:

Section 2 – Director's Enforcement Remedies and Penalties

(a) Civil Liability Penalties. Civil liability may be imposed by the Director, a hearing officer designated by the District, or the Board in the manner provided in this Section as follows:

(1) In an amount which does not exceed one thousand dollars (\$1,000) for each day for knowingly or willfully failing or refusing to furnish technical or monitoring reports.

(2) In an amount which does not exceed five thousand dollars (\$5,000) for each day of intentionally or negligently discharging hazardous waste, as defined in Section 25117 of the Health and Safety Code, knowingly falsifying any information provided in any furnished technical or monitoring report.

(3) In an amount which does not exceed ten dollars (\$10) per gallon for ~~discharges~~Discharges in violation of any of the ~~District's~~District's cease and desist or other ~~orders~~Orders, or prohibitions issued, reissued, or adopted by the District.

(b) Issuance of Complaints.

(1) The Director may issue a complaint to any ~~person~~Person on whom civil liability may be imposed pursuant to this Ordinance. The complaint shall allege the act or failure to act that constitutes a violation of law, the provision of law authorizing civil liability to be imposed pursuant to this Ordinance, and the proposed civil liability.

(2) The complaint shall be served by personal notice or certified mail on the ~~person~~Person subject to the District's ~~discharge~~Discharge and reporting requirements, and shall inform the party served that a hearing shall be conducted before a hearing officer appointed by the Director, at a specified date and time, no later than 60 calendar days after the party has been served.

(3) The ~~person~~Person who has been issued a complaint may waive the right to a hearing in writing no later than 10 calendar days following service of notice thereof, in which case the District shall not conduct a hearing and the ~~person~~Person will be deemed to have waived any further right of appeal or hearing and of all subsequent administrative remedies provided in this Title. If the right to a hearing is not timely waived and the ~~person~~Person fails to appear at such hearing, the District shall not conduct the hearing, and the ~~person~~Person failing to appear will be deemed to have waived ~~his or her~~their right to a hearing and any further right of appeal and of all subsequent administrative remedies provided in this Title. If the right to a hearing is timely waived, or if a party fails to appear at the hearing, the Director may issue a final ~~order~~Order imposing civil liability in the amount proposed in the complaint and serve such final ~~order~~Order by personal notice or certified mail. The Under these circumstances the Director's ~~order~~Order shall become effective and final upon issuance thereof and not subject to further review or appeal or any subsequent administrative remedies provided in this Title, and payment shall be made no later than 30 calendar days following the date of issuance.

(c) Proceeding Before Hearing Officer.

(1) The hearing officer shall be designated by the District. If after the hearing the hearing officer finds that the ~~person~~Person has violated reporting or ~~discharge~~Discharge requirements, the hearing officer may assess a fine against that ~~person~~Person. In determining the amount of the fine, the hearing officer shall take into consideration all relevant circumstances, including, but not limited to, the extent of harm caused by the violation, the nature and persistence of the violation, the length of time over which the violation occurs and corrective action, if any, attempted or taken by the Discharger.

(2) The hearing officer shall serve the written decision or ~~order~~Order by personal notice or certified mail. Unless appealed as set forth in this Section, the hearing officer's decision or ~~order~~Order setting administrative civil liability shall become effective and final upon issuance thereof, and payment shall be made no later than 30 calendar days from the date the party is served notice of the hearing officer's decision or ~~order~~Order.

(d) Appeal to Board.

(1) Any party dissatisfied with the hearing officer's decision or ~~order~~Order following a complaint issued under subsection (b) of this Section may appeal that decision or ~~order~~Order to the Board by filing a written appeal setting forth each ground on which the appeal is based. The appeal shall be filed with the Secretary of the District no later than 30 calendar days from the date of personal service or certified mailing of the hearing officer's decision or ~~order~~Order. The failure to timely file an appeal with the Secretary of the District is jurisdictional and shall be deemed a failure to exhaust administrative remedies.

(2) The Board may grant or deny review of the hearing officer's decision or ~~order~~Order upon receipt of a timely appeal.

(3) If the Board denies review of the hearing officer's decision or ~~order~~Order, the hearing officer's decision or ~~order~~Order shall immediately become effective and final. Unless the hearing officer's decision or ~~order~~Order is appealed as set forth in this paragraph, payment shall be made no later than 30 calendar days from the date the party is served notice of the decision by the Board to deny review. Upon denial of review by the Board, any party dissatisfied with the hearing officer's decision or ~~order~~Order may obtain review of the hearing officer's decision or ~~order~~Order in the superior court by

filing in the court a petition for writ of mandate ~~no later than 30 calendar days from the date the party is served notice~~in accordance with subsection (6) of the decision by the Board to deny reviewthis Section.

(4) If the Board grants review of the hearing officer's decision or ~~order~~Order, the Board has discretion to do any of the following:

(A) Adopt the hearing officer's decision or ~~order~~Order in its entirety;

(B) Reduce or otherwise mitigate the penalty imposed by the hearing officer's decision or ~~order~~Order and adopt the balance of the proposed decision or ~~order~~Order;

(C) Make technical or other minor changes to the hearing officer's decision or ~~order~~Order (limited to clarifying or similar changes not affecting the factual or legal basis of the hearing officer's decision) and adopt it in its modified form;

(D) Reject the hearing officer's decision or ~~order~~Order and refer the case back to the hearing officer to take further evidence and prepare a revised proposed decision; or

(E) Reject the hearing officer's decision or ~~order~~Order and decide the case itself on the record, with or without taking additional evidence and after affording the parties an opportunity to provide written or oral argument before the Board. If the Board chooses to decide the case itself on the record and finds, after reviewing the record before the hearing officer and any additional evidence and argument accepted, that the ~~person~~Person has violated reporting or ~~discharge~~Discharge requirements, the Board may assess a fine against that ~~person~~Person. In determining the amount of the fine, the Board shall take into consideration all relevant circumstances, including, but not limited to, the extent of harm caused by the violation, the nature and persistence of the violation, the length of time over which the violation occurs and corrective action, if any, attempted or taken by the Discharger.

(5) The Board shall serve notice of any ~~order~~Order or decision made under Section 2(d) of this Title by personal notice or certified mail. An ~~order~~Order issued by the Board setting administrative civil liability shall become effective and final upon issuance thereof, and payment shall be made no later than 30 calendar days from the date the party is served notice of the ~~order~~Order or decision.

(6) ~~Any party dissatisfied with a~~The decision shall be deemed final order
~~issued by the Board under Section 2(d)(4) of this Title may obtain review of the order of~~
~~the Board in the superior court by filing in the court a petition for writ of mandate no later~~
~~than 30 calendar days from~~on the date of mailing by certified mail or personal delivery of
the decision by the Board. Judicial review of any decision subject to the provisions of this
section may be had only if the petition for writ of mandate is filed within 90 days after
the decision becomes final, in accordance with California Code of Civil Procedure
Section 1094.6.

31. Title VI, Section 3 is amended to read as follows:

Section 3 – Criminal Penalties

(a) Any ~~person~~Person who intentionally ~~discharges wastewater~~Discharges Wastewater
in any manner, in violation of any ~~order~~Order issued by the Director, which results in
~~contamination, pollution~~Contamination, Pollution, or a ~~nuisance~~Nuisance, as defined in this
Ordinance, is guilty of a misdemeanor and may be subject to criminal penalties of not more than
\$1,000 per day for each such violation, including, but not limited to, any violation of pretreatment
standards or requirements.

(b) Any ~~person~~Person who knowingly makes any false statement or representation in
any record, report, plan, or other document filed with the District, or who falsifies, tampers with, or
knowingly renders inaccurate any monitoring device or method required by the District, shall be
punished by a fine of not more than twenty-five thousand dollars (\$25,000) or by imprisonment in
the county jail for not more than six months, or by both.

32. Title VI, Section 4 is amended to read as follows:

Section 4 – Civil Enforcement Remedies and Penalties

The District may pursue any of the alternative civil remedies herein against any
~~discharger~~Discharger who violates the provisions of this Ordinance.

(a) Civil Enforcement Penalties.

(1) Any ~~person~~Person who fails to comply with any ~~order~~Order issued by the
District, including ~~orders~~Orders related to pretreatment standards or requirements, shall be
subject to a civil penalty not to exceed ten thousand dollars (\$10,000) for each day in which
the ~~discharge~~Discharge, violation, or refusal occurs.

(2) Any ~~person~~Person who intentionally or negligently violates any ~~order~~Order issued by the District for violation of rules regulating or prohibiting ~~discharge~~Discharge of ~~wastewater~~Wastewater which causes or threatens to cause a condition of ~~contamination, pollution~~Contamination, Pollution or ~~nuisance~~Nuisance, as defined in this article, may be liable civilly in a sum not to exceed twenty-five thousand dollars (\$25,000) for each day in which the violation occurs. The attorney of the District, upon request of the Board of Directors of the District, shall petition the Superior Court to impose, assess, and recover such sums.

(b) Injunction. Whenever a ~~discharge~~Discharge of ~~wastewater~~Wastewater is in violation of the provisions of this Ordinance, including but not limited to violation of a pretreatment standard or requirement, or otherwise causes or threatens to cause a condition of ~~contamination, pollution~~Contamination, Pollution, or ~~nuisance~~Nuisance, or whenever non-~~discharge~~Discharge violations occur including failure to submit a required report or failure to allow the District's inspectors access to an industrial facility, the District may petition the Superior Court for the issuance of a preliminary or permanent injunction, or both, as may be appropriate, restraining the continuance of such violations.

33. Title VII, Section 1 is amended to read as follows:

Section 1 – Purpose

The Resource Recovery Program was established under the authority of the Municipal Utility District Act to utilize excess capacity at the District's Main Wastewater Treatment Plant by accepting materials transported by truck, rail, or other means- at designated receiving stations. The provisions of this ~~title~~Title apply to the Discharge of hauled or trucked waste at designated receiving stations, and do not apply to or regulate ~~discharges~~Discharges to ~~community sewers~~Community Sewers.

34. Title VII, Section 2 is amended to read as follows:

Section 2 – Regulation of Discharges

Permitted materials may be ~~discharged~~Discharged into ~~identified~~designated receiving stations at District ~~wastewater~~Wastewater facilities provided that such material has been deemed acceptable by the District under Resource Recovery acceptance procedures and has been permitted by the District. Under no circumstances may any Person discharge hazardous waste, as defined under State and Federal regulations, into the designated receiving stations. It is entirely within the District's discretion to accept or reject any material, permittee, generator, or ~~any~~

hauler. The District maintains full discretion on the issuance, terms and conditions, and revocation of permits.

No ~~person~~Person shall ~~discharge~~Discharge materials through the Resource Recovery Program ~~without first obtaining a Material Acceptance Permit~~ as described in ~~title II Prohibited Discharges, Section 2b Prohibited Effects except through~~3 of this Title. The District in its discretion may accept Wastes or Wastewater that exceed a Local Limit via the ~~permitting process where~~Resource Recovery Program if approved by the District in advance. The District may accept Waste or Wastewater with pH less than 5.5 at designated receiving stations specifically designed to accommodate low pH Waste.

Material determined by the District to be subject to Categorical Pretreatment Standards will ensure that there is no discharge resulting in adverse effects be required to meet all applicable rules and the Waste generator will be classified as a Categorical Industrial User.

35. Title VII, Section 3 is amended to read as follows:

Section 3 – Permit Requirements

All ~~participants in the~~ Resource Recovery ~~dischargers~~Program shall secure a ~~permit~~Material Acceptance Permit. The permitting process may include collection of information about the ~~waste~~Waste stream and generator; collection of information from the Waste generator, if not the permittee, by District; collection and ~~laboratory~~ analysis of samples by generator, permittee, or District; and an evaluation of potential impacts including worker health and safety, plant process impacts, and regulatory impacts to air, liquid and solid ~~waste~~Waste permits. Persons seeking a ~~permit~~Material Acceptance Permit shall complete and file a District application form accompanied by the applicable District ~~Permit~~permit fee. The application requires information on ~~waste~~Waste characterization including, but not limited to, origin of the ~~waste~~Waste, estimated ~~waste~~Waste quantity, ~~waste~~Waste characteristics including pH, organic analysis, and analysis for other potential pollutants including metals. The application also includes certification of insurance. All permitting decisions shall rest with the Director.

All ~~permits~~Material Acceptance Permits shall be subject to all provisions of this title and all applicable rates and charges established by the District. Material Acceptance Permit conditions may contain any and all of the following: Limits on ~~rate~~Waste characteristics, rate, volume, number of loads, time, and location of ~~discharge~~Discharge; Monitoring and audit program which may include random and unannounced inspections and sampling; Other conditions as deemed appropriate by the Director to ~~insure~~ensure compliance with this Ordinance and/or terms and conditions of the permit. Dischargers are prohibited from

discharging materials except as expressly provided in the ~~discharge permit~~Material Acceptance Permit.

36. Title VII, Section 4 is amended to read as follows:

Section 4 – Administration and Enforcement

The Director is charged with responsibility for District's ~~wastewater~~Wastewater control program and the administration and enforcement of the provisions of this ~~ordinance~~Ordinance. In order to effectively administer and enforce the provisions of these regulations, the Director may require any ~~Resource Recovery Program permit~~Material Acceptance Permit holder to comply with any or all of the requirements described in Title V Administration, ~~section~~Section 2 ~~Wastewater Source Control Requirements~~.

_____ The Director may adopt procedures and rules for the implementation and administration of this Title. The Director shall enforce the provisions of this Title, including requirements established or ~~permits~~Material Acceptance Permits issued hereunder as provided herein.

~~(a) — Requiring Permittee to Submit Schedule of Remedial or Preventive Measures. Permittees shall be subject to Title VI Enforcement and Penalties, section 1a of this Ordinance.~~

~~(a) Requiring Permittee to Submit Schedule of Remedial or Preventive Measures. When the Director finds that a Resource Recovery Program participant has violated or will violate prohibitions or limits prescribed by this Ordinance, Wastewater source control requirements, or the provisions of a Material Acceptance Permit, the Director may require the Resource Recovery Program participant to submit for approval of the Director, with such modifications as the Director deems necessary, a detailed time schedule of specific actions the Resource Recovery Program participant shall take in Order to correct or prevent a violation of requirements.~~

~~(b) Discharge in Violation of Without a Permit. No person~~Person shall ~~discharge~~Discharge any substance into a District facility under the Resource Recovery Program ~~into a District facility~~ without a Material Acceptance Permit.

~~(c) Violation of Permit Terms and Conditions. When the Director finds that a~~dischargeDischarge of materials is taking place or about to take place in violation of prohibitions or limits of this Ordinance or a ~~permit~~Material Acceptance Permit, the Director may direct those ~~persons~~Persons not complying with such prohibitions, limits, requirements, or provisions to

(1) comply forthwith,

(2) comply in accordance with a time schedule set by the Director, or

(3) in the event of a threatened violation, take appropriate remedial or preventative action. Discharges in violation of a permit may be fined an amount not to exceed \$10/gallon in addition to direct and indirect costs associated with the ~~discharge~~Discharge.

~~(d) — Damage to facilities. Permittees shall be subject to Title VI Enforcement and Penalties, section 1e of this Ordinance.~~

~~(d) Cost Recovery. When the Discharge under the Resource Recovery Program causes an obstruction, damage, or other impairment to Wastewater disposal facilities, the Director may recover costs from the Resource Recovery Program participant to correct the problem caused by the Resource Recovery Program participant.~~

~~(e) Termination of Material Acceptance Permit. The District may terminate or cause a Material Acceptance Permit at will. Grounds for termination of a Material Acceptance Permit include, but are not limited to be terminated discharge to any facility if, discharging material that deviates from the material described in the Material Acceptance Permit, a violation of this Ordinance pertaining to control of wastewater is found to exist Wastewater, or if a discharge~~Discharge ~~of materials that causes or threatens to cause a condition of contamination, pollution~~Contamination, Pollution, or ~~nuisance~~Nuisance, as defined in this Ordinance. This provision is in addition to other statutes, rules, or regulations authorizing termination of service for delinquency in payment, or for any other reason.

~~(f) Civil Liability Penalties. Civil~~Resource Recovery Program participants may be subject to civil liability ~~may be imposed by the Director as described in Title VI Enforcement and Penalties, Section 2b Civil Liability Penalties2.~~

~~(g) Criminal Penalties. Resource Recovery Program~~ ~~dischargers~~participants may be subject to criminal liability as described in Title VI ~~Enforcement and Penalties, Section 3a & 3b Criminal Penalties3.~~

~~(h) Civil Enforcement Remedies and Penalties. The District may pursue any of the alternative civil remedies herein against any~~ ~~discharger~~Resource Recovery Program participant who violates the provisions of this Ordinance as described in Title VI ~~Enforcement and Penalties, Section 4a Civil Enforcement Penalties4.~~

37. Title VII is amended to read as follows:

Title VII – Severability

If any provision of this Ordinance, or the application thereof to any ~~person~~Person or circumstance, is held invalid, the remainder of the Ordinance, or the application of such provision to other ~~persons~~Persons or circumstances, shall not be affected thereby.

SECTION 3

The General Manager, the Director of Wastewater, and their designees are hereby authorized to publicly distribute the attached document entitled "Consolidated Wastewater Control Ordinance" (hereinafter, the "Consolidated Ordinance"). The Board of Directors finds and declares the following: (i) the Consolidated Ordinance's sole intended purpose is to restate within a single document for the convenience of the public the text of Ordinance No. 355-11 as subsequently amended by Ordinance No. 358-13 and this Ordinance; (ii) the Consolidated Ordinance, as a reference document prepared solely for public convenience, is not part of this Ordinance and is not intended to have any legal effect separate or apart from Ordinance No. 358-11 as subsequently amended by Ordinance No. 358-13 and this Ordinance; and (iii) to the extent the Consolidated Ordinance, or any portion of it, may be inconsistent with or conflict with Ordinance No. 355-11 as subsequently amended by Ordinance No. 358-13 and this Ordinance, it is the express intention of the Board of Directors that full legal effect be given to the provisions of Ordinance No. 355-11 as subsequently amended by Ordinance No. 358-13 and this Ordinance, and not to the Consolidated Ordinance nor any portion thereof.

SECTION 4

Except as expressly set forth in this Ordinance, all provisions of Ordinance No. 355-11 as previously amended by Ordinance No. 358-13 shall remain in full force and effect.

SECTION 5

If any provision of this Ordinance, or the application thereof to any person or circumstance, is held invalid, the remainder of the Ordinance, or the application of such provision to other persons or circumstances, shall not be affected thereby.

|

SECTION 6

This Ordinance shall become effective on September 13, 2024.

President

I HEREBY CERTIFY that the foregoing Ordinance was duly and regularly introduced at a regular meeting of the Board of Directors of East Bay Municipal Utility District held on July 9, 2024 at the offices of said District, 375 – 11th Street, Oakland, California, and thereupon, after being read, further action was scheduled for the regular meeting of said Board of Directors held at the same place on August 13, 2024 at which time the same was finally adopted by the following vote:

AYES:

NOES:

ABSENT:

ABSTAIN:

TITLE I – GENERAL

SECTION 1

SHORT TITLE

This Ordinance shall be known as the “WASTEWATER CONTROL ORDINANCE”.

(Ord. No. 355-11, 7-12-2011)

SECTION 2

PURPOSE

Special District No. 1 of the EAST BAY MUNICIPAL UTILITY DISTRICT was formed and exists under the provisions of the Municipal Utility District Act (Public Utilities Code of the State of California, Division 6) for Wastewater disposal service within its boundaries. Wastewater disposal facilities have been constructed for the interception, treatment, and disposal of Wastewater and industrial Wastes originating within its boundaries. The purpose of this Ordinance is to regulate the interception of Wastewater and industrial Wastes and to control Wastewater to provide the maximum public benefit of the Wastewater disposal facilities of the District. The regulations shall include provisions for source control in order to monitor and control quantity, quality, and flow of Wastewater and industrial Waste. The regulations shall require charges for use of Wastewater disposal facilities of the District which are designed to achieve an equitable recovery of the capital and operating costs of such facilities. The regulations shall include provisions for enforcement and penalties for violations.

(Ord. No. 355-11, 7-12-2011; Ord. No. XXX-24 § 2, XX-XX-2024)

SECTION 3

DEFINITIONS

For the purposes of this Ordinance, unless the context specifically indicates otherwise, the meaning of terms used shall be as follows:

(a) Best Management Practices (BMPs). Schedules of activities, prohibitions of practices, maintenance procedures, and other management practices to implement the prohibitions listed in Title II, Section 2 of this Ordinance. BMPs also include treatment requirements, operating procedures, and practices to control plant site runoff, spillage or leaks, sludge or Waste disposal, or drainage from raw materials storage.

(b) Board. The Board of Directors of the District.

(c) Business Classification Code. A classification of Dischargers that is determined by the District based upon the principal activity conducted upon, or use of, a parcel of real property or portion thereof. Business Classification Codes are based on the Standard Industrial Classification Manual published by the United States Office of Management and Budget in 1987.

(d) Bypass. The intentional diversion of wastestreams from any portion of a Discharger's treatment facility.

(e) Categorical Industrial User (CIU). A Discharger subject to a Categorical Pretreatment Standard.

(f) Categorical Pretreatment Standards. The regulations containing pollutant Discharge limits that apply to specific categories of Industrial Users, codified in Title 40 of the CFR, Chapter I, Subchapter N, Part 405 *et seq.*

(g) CFR. Code of Federal Regulations.

(h) Chemical Oxygen Demand. Chemical oxygen demand is the measure of the oxygen-consuming capacity of inorganic and organic matter present in Wastewater.

(i) Community Sewer. A sewer system owned and operated by a Public Agency within the boundaries of the District which is connected to a District Interceptor and receives Wastewater from the Sewer Lateral of a Discharger.

(j) Contamination. An impairment of the quality of the waters of the State by Waste to a degree which creates a hazard to the public health through poisoning or through the spread of disease. Contamination shall include any equivalent effect resulting from the disposal of Wastewater, whether or not waters of the state are affected.

(k) Director. Director of the Wastewater Department of the East Bay Municipal Utility District, or their designated representative.

(l) Discharger. Any Person who Discharges, permits the Discharge of, or causes the Discharge of Wastewater to a Community Sewer system or District facilities.

(m) District. Special District No. 1 of the East Bay Municipal Utility District.

(n) EPA. The United States Environmental Protection Agency.

(o) Federal Act, Clean Water Act, or Act. The Federal Water Pollution Control Act, also known as the Clean Water Act, as amended (33 U.S.C. § 1251 et seq.).

(p) General Manager. The General Manager of the East Bay Municipal Utility District.

(q) General Permits. Wastewater Discharge Permits for a group of Industrial Users that

- (1) have the same or substantially similar types of operations,
- (2) Discharge the same types of Wastes,
- (3) require the same effluent limitations,
- (4) require the same or similar monitoring, and
- (5) in the opinion of the District are more appropriately controlled under a general control mechanism than under individual control mechanisms.

(r) General Pretreatment Regulations. Any regulations promulgated by EPA in accordance with Sections 307(b) and (c), and 402(b)(8) of the Act (33 U.S.C. § 1317) for the implementation, administration and enforcement of pretreatment standards, including the regulations codified at 40 CFR Part 403.

(s) Indirect Discharge or Discharge. The introduction of Wastewater into a Community Sewer or District facilities.

(t) Industrial User (IU). A source of any Industrial Wastewater from any non-domestic source regulated under section 307(b), (c) or (d) of the Clean Water Act.

(u) Industrial Wastewater. Includes any nondomestic liquid or semisolid Wastes from any producing, manufacturing, or processing operation of whatever nature.

(v) Interceptor. An intercepting sewer owned and operated by the District that conveys Wastewater from the Community Sewer to the POTW.

(w) Interference. A Discharge which, alone or in conjunction with Discharges from other sources, both:

(1) inhibits or disrupts the POTW, its treatment processes or operations, or its sludge processes, use or disposal; and

(2) therefore is a cause of a violation of any requirement of the POTW's National Pollutant Discharge Elimination System (NPDES) permit (including an increase in the magnitude or duration of a violation) or of the prevention of Sewage sludge use or disposal in compliance with the following statutory provisions and regulations or permits issued thereunder (or more stringent state or local regulations): Section 405 of the Clean Water Act, the Solid Waste Disposal Act (SWDA) (including Title II, more commonly referred to as the Resource Conservation and Recovery Act (RCRA), and including state regulations contained in any state sludge management plan prepared pursuant to subtitle D of the SWDA), the Clean Air Act, the Toxic Substances Control Act, and the Marine Protection, Research and Sanctuaries Act.

(x) Local Limits. Discharge limits and BMPs developed and enforced by the District to implement the general and specific Discharge prohibitions listed in 40 CFR 403.5(a)(1) and (b), as set forth in Title II, Section 3(a) of this Ordinance.

(y) Material Acceptance Permit (MAP). Permit issued by the District under the Resource Recovery Program authorizing the Discharge of hauled Waste of a specific nature, as defined in the permit, at designated receiving stations of the POTW.

(z) Middle Tier Categorical Industrial User. A Categorical Industrial User may be designated by the District as a Middle Tier CIU upon a finding by the Director that it complies with all of the following:

(1) Its Discharge of categorical Wastewater does not exceed any of the following:

(A) 0.01 percent of the design dry weather hydraulic capacity of the POTW, or 5,000 gpd, whichever is smaller;

(B) 0.01 percent of the design dry weather organic treatment capacity of the POTW;

(C) 0.01 percent of the maximum allowable headworks loading for any pollutant listed in the Local Limits;

(2) It has not been in Significant Noncompliance at any time in the past two years; and

(3) It does not have daily flow rates, production levels, or pollutant levels that vary so significantly that decreasing its reporting requirement would result in data that is not representative of conditions occurring during the reporting period.

(aa) National Pretreatment Standard, Pretreatment Standard, or Standard. Any regulation containing pollutant Discharge limits promulgated by the EPA in accordance with section 307 (b) and (c) of the Act, which applies to Industrial Users. This term includes prohibitive Discharge limits established pursuant to 40 CFR 403.5.

(bb) New Source.

(1) A New Source is any building, structure, facility, or installation from which there is or may be a Discharge of pollutants, the construction of which commenced after the publication of proposed pretreatment standards which will be applicable to such source if such standards are thereafter promulgated, provided that:

(A) The building, structure, facility or installation is constructed at a site at which no other source is located; or

(B) The building, structure, facility or installation totally replaces the process or production equipment that causes the Discharge of pollutants at an existing source; or

(C) The production or Wastewater generating processes of the building, structure, facility or installation are substantially independent of an existing source at the same site. In determining whether these are substantially independent, factors such as the extent to which the new facility is integrated with the existing plant, and the extent to which the new facility is engaged in the same general type of activity as the existing source should be considered.

(2) Construction on a site at which an existing source is located results in a modification rather than a New Source if the construction does not create a new building, structure, facility or installation meeting the criteria of paragraphs (bb)(1)(B) or (bb)(1)(C) of this Section, but otherwise alters, replaces, or adds to existing process or production equipment.

(3) Construction of a New Source has “commenced” if the owner or operator has:

(A) Begun, or caused to begin as part of a continuous onsite construction program:

(i) Any placement, assembly, or installation of facilities or equipment; or

(ii) Significant site preparation work including clearing, excavation, or removal of existing buildings, structures, or facilities which is necessary for the placement, assembly, or installation of new source facilities or equipment; or

(B) Entered into a binding contractual obligation for the purchase of facilities or equipment which are intended to be used in its operation within a reasonable time. Options to purchase or contracts which can be terminated or modified without substantial loss, and contracts for feasibility, engineering, and design studies do not constitute a contractual obligation under this paragraph.

(cc) Non-Significant Categorical Industrial User (NSCIU). A Categorical Industrial User may be designated by the District as a Non-Significant Categorical Industrial User, subject to annual reevaluation by the District, upon a finding by the Director that it meets the following criteria:

(1) Never Discharges more than 100 gallons per day of total categorical Wastewater (excluding sanitary, non-contact cooling and boiler blowdown Wastewater, unless specifically included in the applicable Categorical Pretreatment Standard);

(2) Has consistently complied with all applicable categorical pretreatment standards and requirements;

(3) Annually submits the certification statement required in 40 CFR 403.12(q); and

(4) Never Discharges any untreated concentrated Wastewater.

(dd) Nuisance. A Discharge of Wastewater in violation of District regulations or Orders, or which is or could be harmful to or unreasonably affect the Wastewater disposal facilities of the District, or which impairs or unreasonably affects the operation and maintenance of such facilities, or which violates quantity, quality, or flow standards adopted by the District, and all Wastewater Discharges which unreasonably affect the quality of the District's treatment plant effluent in such a manner that receiving water quality requirements established by law cannot be met by the District.

(ee) Order. For purposes of this Ordinance, an Order is either:

- (1) A mechanism to control the contribution to the POTW by each Discharger or Resource Recovery Program participant to ensure compliance with applicable pretreatment standards and other Wastewater Discharge requirements.
- (2) An Order issued under Title VI of this Ordinance for purposes of enforcement.

(ff) Ordinance. This Wastewater Control Ordinance, as amended.

(gg) Pass Through. A Discharge which exits the POTW into waters of the State in quantities or concentrations which, alone or in conjunction with a Discharge or Discharges from other sources, is a cause of a violation of any requirement of the POTW's NPDES permit (including an increase in the magnitude or duration of a violation).

(hh) Person. Any individual, partnership, firm, association, corporation, or Public Agency, including the State of California and the United States of America.

(ii) Pollution. An alteration of the quality of the waters of the state by Waste to a degree which unreasonably affects (1) such waters for beneficial use or (2) facilities which serve such beneficial uses.

(jj) Premises. A parcel of real property, or portion thereof, including any improvements thereon, which is determined by the District to be a single unit for purposes of receiving, using, and paying for Wastewater disposal service. In making this determination, the District shall take into consideration such factors as whether the unit could reasonably be subdivided, number and location of Sewer Laterals, and whether the unit is being used for a single activity and, if not, what is the principal activity for Wastewater disposal services, and whether the unit is divided by a public or a private street, but in any case the District determination shall be final.

(kk) Pretreatment Requirement. Any substantive or procedural pretreatment requirement other than a national pretreatment standard.

(ll) Process Wastewater. Any water which, during manufacturing or processing, comes into direct contact with, or results from the production or use of any raw material, intermediate product, finished product, byproduct, or Waste product.

(mm) Public Agency. A city or a sanitary district or other public entity located within the boundaries of the District.

(nn) Publicly Owned Treatment Works. A treatment works as defined by Section 212 of the Clean Water Act, which is owned by the District. This definition includes any District-owned devices and systems used in the storage, treatment, recycling and reclamation of municipal Sewage or industrial Wastes of a liquid nature. It also includes District-owned sewers, pipes, pump stations, and other facilities that convey Wastewater to that portion of the POTW which is designed to provide treatment (including recycling and reclamation) of municipal Sewage and industrial Waste. Where indicated by context, "POTW" may also refer to the District itself.

(oo) Receiving Water Quality Requirements. Requirements for the District's treatment plant effluent established by law or by State or Federal regulatory agencies for the protection of receiving water quality. "Requirements" shall include effluent limitations, and Waste Discharge standards, requirements, limitations, or prohibitions which may be established or adopted from time to time by State or Federal laws or regulatory agencies.

(pp) Representative Data. Data obtained through analysis of representative samples using approved analytical methods and procedures.

(qq) Representative Sample. Samples of Discharges that are obtained using approved sampling methods, that are representative of the quantity and quality of the Discharge, and the conditions occurring during the time the Discharge was sampled or measured.

(rr) Severe Property Damage. Substantial physical damage to property, damage to the treatment facilities which causes them to become inoperable, or substantial and permanent loss of natural resources which can reasonably be expected to occur in the absence of a Bypass. Severe property damage does not mean economic loss caused by delays in production.

(ss) Sewage. The water-borne Wastes derived from human habitation and use of buildings for residential, business, commercial, institutional, and industrial purposes.

(tt) Sewer Lateral. The sewer pipe that conveys Wastewater from a Discharger at a residence, commercial, industrial, or institutional building, or other structure, to a Community Sewer.

(uu) Significant Industrial User.

(1) A Categorical Industrial User other than a Non-Significant Categorical Industrial User; or

(2) A user that:

(A) Discharges an average of twenty-five thousand (25,000) gallons per day or more of process Wastewater to the POTW (excluding sanitary, noncontact cooling, and boiler blowdown Wastewater);

(B) Contributes a process wastestream which makes up five (5) percent or more of the average dry weather hydraulic or organic capacity of the POTW treatment plant; or

(C) Is designated as such by the District on the basis that it has a reasonable potential for adversely affecting the POTW's operation or for violating any pretreatment standard or requirement.

(3) Upon a finding that a user meeting the criteria in Subsection (2) above has no reasonable potential for adversely affecting the POTW's operation or for violating any pretreatment standard or requirement, the District may at any

time, on its own initiative or in response to a petition received from a user, determine that such user should not be considered a Significant Industrial User.

(vv) Significant Noncompliance. A Significant Industrial User (or any IU which violates paragraphs 3, 4, or 8 below) is in Significant Noncompliance with applicable pretreatment requirements if any violation meets one or more of the following criteria:

(1) Chronic violations of Wastewater Discharge limits, defined here as those in which sixty-six percent or more of all of the measurements taken during a six month period exceed (by any magnitude) a numeric pretreatment standard or requirement, including instantaneous limits, as defined by 40 CFR 403.3(l).

(2) Technical Review Criteria (TRC) violations, defined here as those in which thirty-three percent or more of all of the measurements for each pollutant parameter taken during a six-month period are equal to or exceed the product of the numeric pretreatment standard or requirement including instantaneous limits, as defined by 40 CFR 403.3(l) multiplied by the applicable TRC (TRC = 1.4 for BOD, TSS, fats, oil and grease and 1.2 for all other pollutants except pH.)

(3) Any other violation of a pretreatment standard or requirement as defined by 40 CFR 403.3(l) (daily maximum, long-term average, instantaneous limit, or narrative standard) that the District determines has caused, alone or in combination with other Discharges, Interference or Pass Through (including endangering the health of POTW personnel or the general public).

(4) Any Discharge of a pollutant that has caused imminent endangerment to human health, welfare or to the environment or has resulted in the POTW's exercise of its emergency authority to halt or prevent such a Discharge.

(5) Failure to meet, within 90 days after the due date, a compliance schedule milestone contained in a local control mechanism or enforcement Order for starting construction, completing construction or attaining final compliance.

(6) Failure to provide, within 45 days after the due date, required reports such as baseline monitoring reports, 90-day compliance reports, periodic self-monitoring reports and reports on compliance with compliance schedules.

(7) Failure to accurately report noncompliance.

(8) Any other violation or group of violations which the District determines will adversely affect the operation or implementation of the local pretreatment program.

(ww) Slug Load or Slug Discharge. Any Discharge at a flow rate or concentration, which could cause a violation of the prohibited Discharge standards in Title II, Section 2 of this Ordinance. A slug Discharge is any Discharge of a non-routine, episodic nature, including but not limited to an accidental spill or non-customary batch Discharge which has a reasonable potential to cause Interference or Pass Through, or in any other way violate the District's regulations, Local Limits or permit conditions.

(xx) Suspended Solids. The concentration of nonfilterable residue dried at 103° to 105°C on a filter in conformance with the District's approved method.

(yy) User. Same meaning as “Discharger” and is used interchangeably with that term.

(zz) Unmetered Water. Water that is not supplied by East Bay Municipal Utility District through an East Bay Municipal Utility District meter, including but not limited to stormwater, drainage water, groundwater, or Bay water.

(aaa) Waste. Includes Sewage and any and all other Waste substances, liquid, solid, gaseous, or radioactive, associated with human habitation, or of human or animal origin, or from any producing, manufacturing, or processing operation of whatever nature.

(bbb) Wastewater. All Sewage, Industrial Wastewater, and other Wastes and waters, whether treated or untreated, Discharged for treatment in Wastewater disposal facilities of the District.

(ccc) Wastewater Capacity Fee. A charge to each new customer, or existing customer who increases their demand for capacity for Wastewater treatment measured by flow and strength, which reasonably reflects the District cost for providing Wastewater treatment capacity.

(ddd) Wastewater Discharge Permit. A written document that contains general and specific requirements governing onsite management, pretreatment, and Discharge of Wastewater to the Community Sewer. A Wastewater Discharge Permit is issued by the Director and grants revocable permission to Discharge Wastewater to the Community Sewer.

(eee) Wastewater Disposal Facilities. Intercepting sewers, Wastewater treatment works, pumping plants, outfall sewers, and other facilities and appurtenances constructed, operated, and maintained by a special district created for Wastewater disposal purposes. As used in this Ordinance, unless the context specifically indicates otherwise, "District Facilities" shall mean Wastewater disposal facilities of the District.

(fff) Wastewater Strength. A measurement of the concentration of the constituents in Wastewater requiring treatment, including suspended solids and organic loading (measured as chemical oxygen demand).

(ggg) Zero Discharger. Persons engaged in an industrial process that poses a risk of Discharge, as determined by the Director, and who the Director has further determined should be subjected to permit requirements, but who are not permitted to Discharge to the Community Sewer.

(Ord. No. 355-11, 7-12-2011; Ord. No. 358-13 § 2, 7-23-2013; Ord. No. XXX-24 § 2, XX-XX-2024)

SECTION 4

CONNECTION TO INTERCEPTOR

The District will not permit direct connections of or accept direct contributions of Wastewater from sewers other than Community Sewers. Before any connection of a Community Sewer is made to an Interceptor, an application signed by the Public Agency owning the Community Sewer to be connected shall be filed with the District. The application shall be in a form approved and supplied by the District, and shall contain such information and data as may be required from time to time by the District. The connecting of Community Sewers will be performed by the Public Agency at its expense in accordance with District requirements and subject to approval and inspection by the District.

(Ord. No. 355-11, 7-12-2011; Ord. No. XXX-24 § 2, XX-XX-2024)

SECTION 5

STORMWATER, DRAINAGE, GROUNDWATER, AND BAY WATER PROHIBITION

(a) The District's Wastewater Disposal Facilities are not intended to dispose of waters that are acceptable for Discharge to storm sewers or to receiving waters of the State. No user shall Discharge stormwater, drainage, groundwater, or Bay water to the Community Sewer unless expressly authorized by the Director. In the event of the

Discharge of such waters from a Community Sewer into an Interceptor, the District may determine the amount of such Discharge and charge the owner of the Community Sewer the cost to the District of disposing and treating such water.

(b) The Director may approve the Discharge of stormwater, drainage, groundwater, or Bay water into the District's Wastewater Disposal Facilities on such terms and conditions as the Director may require. No such Discharge will be approved unless the Director finds that:

(1) sufficient capacity exists to convey and treat the additional flows;
and

(2) the Discharge will not adversely affect the POTW or its ability to comply with all applicable legal requirements.

(Ord. No. 355-11, 7-12-2011; Ord. No. 358-13 § 2, 7-23-2013; Ord. No. XXX-24 § 2, XX-XX-2024)

SECTION 6

UNUSUAL CONDITIONS

Notwithstanding any provision of this Ordinance to the contrary, the District and any Discharger or Public Agency may enter into an agreement where unusual conditions compel special terms and conditions and charges for the interception, treatment, and disposal of the Wastewater by the District. However, this Section does not authorize the waiver of Federal or State standards or requirements.

(Ord. No. 355-11, 7-12-2011; Ord. No. XXX-24 § 2, XX-XX-2024)

TITLE II – REGULATION OF THE WASTEWATER DISCHARGES

SECTION 1

PERMISSIBLE DISCHARGES

Wastewater may be Discharged into Community Sewers for interception, treatment, and disposal by the District provided that such Wastewater does not contain substances prohibited by this Ordinance, or exceed limitations of Wastewater concentration as set forth in this Ordinance; and provided further that the Discharger pays all District Wastewater disposal charges and is in compliance with all terms of this Ordinance, including permit provisions if applicable.

(Ord. No. 355-11, 7-12-2011; Ord. No. XXX-24 § 2, XX-XX-2024)

SECTION 2

PROHIBITED DISCHARGES

(a) General Prohibition. No Person shall Discharge Wastewater into a Community Sewer which will result in Contamination, Pollution, or a Nuisance.

(b) Prohibited Effects. No Person shall Discharge Wastewater into a Community Sewer if it contains substances or has characteristics which, either alone or by interaction with other Wastewaters, cause or threaten to cause:

- (1) Damage to District facilities.
- (2) Interference with or impairment of the operation or maintenance of District facilities.
- (3) Obstruction of flow in sewers or Interceptors caused by solid or viscous materials.
- (4) Danger to life or safety of any Person.
- (5) Interference with, or overloading of, treatment or disposal processes.
- (6) Flammable or explosive conditions at or near District facilities.

(7) Wastewater or any other by-products of the treatment process to be unsuitable for reclamation and reuse, or interfere with any processes for reclamation or reuse.

(8) Noxious or malodorous gases or odors at or near District facilities.

(9) Discoloration or any other condition in the quality of the District's treatment plant effluent in such a manner that receiving water quality requirements established by law cannot be met by the District.

(10) Conditions at or near District facilities which violate any statute or any rule, regulation, or ordinance of any Public Agency or State or Federal regulatory body, including the general prohibitions contained in Federal General Pretreatment Regulations.

(11) The presence of toxic gases, fumes, or vapors in quantities injurious to the health and safety of District personnel.

(12) Pass-through of the District's treatment plant, causing a violation of any requirement of the District's NPDES permit.

(c) Prohibited Substances. No Person shall Discharge the following to a Community Sewer:

(1) Wastewater which creates a fire or explosion hazard including, but not limited to, Discharges with a closed cup flashpoint of less than 140° F (60° C) using the test methods specified in 40 CFR 261.21.

(2) Garbage, except ground food scraps from residential and commercial Premises where food is prepared and consumed.

(3) Wastewater which is subject to a Wastewater Discharge Permit except in compliance with such permit.

(d) Prohibited Locations. No Person shall Discharge any Waste or Wastewater directly into a maintenance hole or other opening in a Community Sewer other than through Sewer Laterals approved by the Public Agency owning the system; provided that a Public Agency may Discharge Wastewater directly into its system for sewer construction or maintenance and the Director may grant permission for direct Discharges to the Community Sewer, upon written application, at locations approved by the Public Agency and with payment of applicable Wastewater disposal charges to the District. No Person

shall Discharge any Waste, Wastewater, or any other material directly into District facilities, including Interceptor maintenance holes, unless authorized by the Director.

(e) Prohibition on Use of Dilution. Except where expressly authorized to do so by an applicable pretreatment standard or requirement, no user shall increase the use of process water, or in any other way attempt to dilute a Discharge as a partial or complete substitute for adequate pretreatment to achieve compliance with a pretreatment standard, requirement or Discharge limitation. The District may impose mass limitations on the users which are using dilution to meet applicable Pretreatment Standards or requirements, or in other cases where the imposition of mass limitations is appropriate.

(f) Prohibition on Slug Discharges. No user shall Discharge any pollutant, including oxygen-demanding pollutants, at a flow rate and/or pollutant concentration which causes or threatens to cause Interference with the Wastewater treatment process. For the purposes of this section, any Discharge at a flow rate or concentration which could cause a violation of the prohibited Discharge standards or limitations in Title II, Sections 2 and 3 of this ordinance shall be deemed a slug Discharge.

(g) Bypass Prohibited.

(1) Bypass of pretreatment equipment and/or Discharge points is prohibited and the District may take enforcement action against any user for Bypass unless:

(i) Bypass was unavoidable to prevent loss of life, personal injury, or severe property damage;

(ii) there were no feasible alternatives to the Bypass, as described in 40 CFR 403.17(d) and the Industrial User submits the notifications required in 40 CFR 403.17(c).

(2) The District may approve an anticipated Bypass, after considering its adverse effects, if the District determines that it will meet the conditions specified in part (g)(1) of this prohibition.

(h) Discharge of Petroleum or Mineral Oil Causing Pass-through or Interference Prohibited. Notwithstanding the provisions of Section 3(a), no user may Discharge petroleum oil, non-biodegradable cutting oil or other products of mineral origin in any amount that causes Interference or pass-through.

(i) Discharge of Trucked or Hauled Wastes Prohibited. No user shall Discharge any trucked or otherwise hauled Wastes to the Community Sewer or to any District facilities unless a Material Acceptance Permit has been issued by the District.

(Ord. No. 355-11, 7-12-2011; Ord. No. XXX-24 § 2, XX-XX-2024)

SECTION 3

LIMITATIONS ON DISCHARGES

(a) Local Limits. No Person shall Discharge Wastewater from a Sewer Lateral into a Community Sewer if the concentration of any of the following constituents in the Wastewater exceeds the following limitations:

Arsenic	2	mg/L
Cadmium	1	mg/L
Chromium (total)	2	mg/L
Copper	5	mg/L
Cyanide	5	mg/L
Iron	100	mg/L
Lead	2	mg/L
Mercury	0.05	mg/L
Nickel	5	mg/L
Oil and Grease (animal/vegetable)	300	mg/L
Oil and Grease (mineral)	100	mg/L
pH	not less than 5.5	S.U.
Phenolic compounds	100	mg/L
Silver	1	mg/L
Temperature	150 ⁽¹⁾	°F
Total Toxic Organics (TTOs) ⁽²⁾	2.1	mg/L
Zinc	5	mg/L

- (1) 150°F (65.5°C), or any thermal Discharge which as a result of temperature and/or volume causes the influent of the Wastewater treatment plant to exceed 104°F (40°C)

- (2) TTO is the summation of compounds defined as “TTO” in 40 CFR 413.02(i), excluding 2,3,7,8-Tetrachlorodibenzo-p-dioxin (TCDD) - “dioxin”.

(b) Additional Wastewater Concentration Limits. Wastewater concentration limits for constituents not listed in Section 3(a) may be established in a Wastewater Discharge Permit based on available treatment technology, existing Wastewater conditions in the District's facilities or other factors as determined by the Director. The Director may also establish Wastewater concentration limits in the Wastewater Discharge Permits at locations within a Premises whenever non-process Wastewater may dilute the Wastewater discharging from Sewer Laterals.

(c) Best Management Practices. The District may require best management practices (BMPs) as an alternative to numeric limits that are developed to protect the POTW, water quality, and Sewage sludge.

(d) Quantity and Rate of Flow Limits. No Person shall Discharge Wastewater into a Community Sewer in quantities or at rates of flow which may have an adverse or harmful effect on or overload District facilities or cause excessive or additional District treatment costs. The Director may establish mass Discharge limits in Wastewater Discharge Permits to control the quantity and rate of flow of Wastewater Discharges.

(e) Radioactive Limits. No Person shall Discharge or cause to be Discharged any radioactive Wastewater into a Community Sewer except when the Person is authorized to use radioactive material by the Nuclear Regulatory Commission or other governmental agency empowered to regulate the use of radioactive materials and when the Wastewater is Discharged in strict conformity with current Nuclear Regulatory Commission regulations and recommendations for safe, disposal and in compliance with all rules and regulations of State and local regulatory agencies.

(f) Deny or Condition New or Increased Contributions. The Director may deny or condition new or increased contributions of pollutants, or changes in the nature of pollutants, to the District's Wastewater treatment facility by Industrial Users where such contributions do not meet applicable Pretreatment Standards and Requirements or where such contributions would cause the District to violate its NPDES permit.

(Ord. No. 355-11, 7-12-2011; Ord. No. XXX-24 § 2, XX-XX-2024)

SECTION 4

FEDERAL PRETREATMENT STANDARDS

The General Pretreatment Regulations and Categorical Pretreatment Standards are hereby incorporated into this Ordinance and, if more stringent than limitations imposed under the Ordinance for Dischargers, shall supersede the limitations imposed under this Ordinance. The Director shall notify all affected Dischargers of the applicable standards and other requirements. Effluent limitations promulgated under the authority of the Clean Water Act shall apply in any instance where they are more stringent than those in this Ordinance.

(Ord. No. 355-11, 7-12-2011; Ord. No. 358-13 § 2, 7-23-2013; Ord. No. ~~XXX~~-24 § 2, ~~XX-XX~~-2024)

SECTION 5

DISTRICT PRETREATMENT PROGRAM

The Director shall implement a pretreatment program in accordance with General Pretreatment Regulations adopted by EPA and in accordance with this Ordinance.

(Ord. No. 355-11, 7-12-2011)

TITLE III – DISCHARGER CLASSIFICATION AND CALCULATION OF WASTEWATER DISPOSAL CHARGES

SECTION 1

CLASSIFICATION

All Dischargers shall be classified for Wastewater disposal purposes in accordance with the principal activity conducted upon the Premises, or in accordance with the use of the Premises, for purposes of Wastewater treatment, as determined by the District in case multiple tenants or activities are on the Premises. The purpose of classification is to facilitate the regulation of Wastewater Dischargers based on quality, quantity and flow, to provide an effective means of industrial Waste source control, and to establish a system of Wastewater disposal service charges, which will insure an equitable recovery of District capital and operating costs.

(Ord. No. 355-11, 7-12-2011; Ord. No. XXX-24 § 2, XX-XX-2024)

SECTION 2

CALCULATION OF WASTEWATER DISPOSAL CHARGE

All Dischargers shall pay a use charge for District Wastewater disposal services. The charges will reflect the quantity, quality, and flow of the Dischargers' Wastewater and will be based on District capital and operating costs to intercept and treat Wastewater. All Dischargers shall also pay all other charges, fees, tolls, rentals or taxes as from time to time established or adopted by the District. Flat charges, unit charges and classification charges shall be established from time to time and set forth in a schedule of rates and charges. Unit charges will be established for each element of Wastewater strength which incurs District costs of interception, treatment and disposal. The total Wastewater disposal charge for each Discharger shall be calculated as set forth herein:

(a) Dischargers from Residential Premises with Four or Less Dwelling Units. Dischargers from residential premises with four or less dwelling units shall pay a total Wastewater disposal charge, regardless of the source of water, which shall be the sum of a uniform flat monthly charge per dwelling unit for Wastewater strength and the unit charge for volume multiplied by the volume of water used, subject to a maximum volume established by the District from time to time and set forth in a schedule of rates and charges.

(b) Dischargers from Residential Premises with Five or More Dwelling Units and Dischargers from Nonresidential Premises including Permitted Dischargers. Dischargers of Wastewater from residential Premises with five or more dwelling units, and Dischargers from nonresidential Premises, including Dischargers who have obtained a Wastewater Discharge Permit, will be assigned a Business Classification Code depending on the principal activity conducted on the Premises or the use of the Premises for purposes of Wastewater treatment, as determined by the District in case multiple tenants or activities are on the Premises. All Dischargers conducting the same principal activity will receive the same Business Classification Code. The Director shall determine the typical Wastewater strength for each Business Classification Code, and each Discharger within that classification will be assumed, for Wastewater disposal charge purposes, to have the same typical Wastewater strength. The Director shall also subclassify within each Business Classification Code those Dischargers who Discharge primarily segregated domestic Wastes, or Wastes from sanitary conveniences. A classification charge shall be established by the District for each Business Classification Code and subclassification, which will be based on unit charges for the elements of Wastewater strength, as applied to the typical Wastewater strength of the particular classification. The Wastewater disposal charge applied to a Discharger in this class will be calculated by multiplying the classification charge by the volume of water used by the Discharger.

(c) Permitted Dischargers with Unique Strength. Dischargers whose average Wastewater strength cannot be established on a business classification basis, or whose Wastewater strength exceeds the normal range of Wastewater strength for the Business Classification Code to which the Discharger is assigned, shall be required to obtain a permit and shall pay a Wastewater disposal charge calculated as the sum of the products of the following: The unit charge for each element of Wastewater strength multiplied by the average concentration of each element set forth in the permit multiplied by the volume of water used; and the unit charge for volume multiplied by the volume of water used as determined herein. The Wastewater disposal charge for these permitted Dischargers, including both Wastewater strength and water use, shall be calculated by an apportionment by the Director of strength and use to each Sewer Lateral at the Discharger's Premises. Dischargers requiring permits solely for flow estimation shall pay a Wastewater disposal charge calculated by multiplying the classification charge by the volume of water determined by the estimation. In addition to a Wastewater disposal charge, the permitted Discharger shall pay all applicable District permit charges. All Dischargers required to obtain a permit shall pay a Wastewater disposal charge in accordance with their Business Classification Code until a permit is issued.

(d) Capacity fee. A Wastewater capacity fee shall be paid as established from time to time by the District and which reflects the reasonable costs of providing Wastewater treatment capacity. The Wastewater capacity fee shall be payable prior to the

time a new Discharger commences a use of the Community Sewer.. The District will calculate the Wastewater capacity fee based on the best available estimated information for the proposed Discharger, based on the flow, strength, and other pertinent design information at the time the new Discharger applies for the District's service. Once the new Discharger is fully established, within 24 months from commencement of Discharge, the District may review the actual flow and/or strength to verify the estimated demand for Wastewater treatment capacity. If the review indicates that the actual measured flow or strength of the Discharge is greater than the initially estimated information, the District will collect an additional Wastewater capacity fee. The Wastewater capacity fee was made effective September 11, 1984 and the Wastewater capacity fee shall apply to all Dischargers who increased demand for Wastewater treatment capacity on or after July 1, 1984.

An existing Discharger shall pay a capacity fee when the District determines that the Discharger has increased their demand for Wastewater treatment capacity. An increased demand for Wastewater treatment capacity may also be reviewed when an existing Discharger significantly increases their Wastewater treatment capacity demand or changes the nature of their operation. An increased demand for Wastewater treatment capacity can occur even if estimating parameters (e.g., square footage, fixtures) for the Discharger may not have changed.

(Ord. No. 355-11, 7-12-2011; Ord. No. 358-13 § 2, 7-23-2013; Ord. No. XXX-24 § 2, XX-XX-2024)

SECTION 3

DETERMINATION OF WATER USED

The applicable volume of water upon which Wastewater disposal charges shall be based will be determined as follows:

(a) Water Discharged to Community Sewer. For Premises where no portion of the water received from any source is consumed in the principal activity of the Discharger or is removed from the Premises by means other than Community Sewers, the Wastewater disposal charge shall be applied against the total amount of water, from all sources, discharged to the Community Sewer. The amount of East Bay Municipal Utility District water received will be determined by registration on an East Bay Municipal Utility District meter. The amount of water used from other sources will be determined by means of a meter installed at the expense of the Discharger and approved by the District or by an estimate prepared by the District, after the Discharger obtains a permit in accordance with this Ordinance. The Discharger shall report to the District the sources of all water used at

their Premises other than that supplied by the East Bay Municipal Utility District and shall notify the District of any changes in such sources.

(b) Water Not Discharged to Community Sewer. For Premises where a portion of the water received from any source does not flow into Community Sewers, because of the principal activity of the Discharger or removal by other means, the charge for Wastewater disposal service will be applied against the volume of water discharging from such Premises into Community Sewers. Written notification and proof of the diversion of water must be provided by the Discharger if they are to avoid application of the Wastewater disposal charge against the total amount of water used from all sources. They may be required to install a meter, of a type and at a location approved by the District and at their own expense, to determine the quantity of water flowing into Community Sewers. However, where it is impractical to install meters and where a significant amount of the metered water consumption is not being Discharged to a Community Sewer, then the charge for Wastewater disposal service may be based upon an estimate prepared by the District, after the Discharger obtains a permit in accordance with this Ordinance.

(Ord. No. 355-11, 7-12-2011; Ord. No. XXX-24 § 2, XX-XX-2024)

TITLE IV – WASTEWATER DISCHARGE PERMITS

SECTION 1

PERMIT REQUIREMENT

All Dischargers whose Wastewater requires special regulation or contains industrial Wastes requiring source control shall secure a Wastewater Discharge Permit. No such Discharger shall connect, Discharge, cause, allow or permit any Discharge to the Community Sewer, either directly or indirectly, except in accordance with a Wastewater Discharge Permit issued by the Director.

(a) Mandatory Permits. All Dischargers in the following categories must obtain a Wastewater Discharge Permit in accordance with this Title.

- (1) Significant Industrial Users, as defined in Title I.
- (2) Industrial Users not otherwise specified in this section who are determined by the Director to warrant a control mechanism for purposes of preventing Pass Through or Interference, to protect the quality of the San Francisco Bay, to protect worker health or safety, to facilitate sludge management or disposal, or protect against damage to the POTW, which may include Non-Significant Categorical Industrial Users, as defined in Title I, and Zero Dischargers.
- (3) Dischargers determined by the Director to require a permit to establish Wastewater disposal charges based on flow and Wastewater strength. These may include:
 - (i) Dischargers whose average Wastewater strength cannot be established on a business classification basis,
 - (ii) Dischargers whose Wastewater strength exceeds the normal range of Wastewater strength for the Business Classification Code to which the Discharger is assigned.
 - (iii) Dischargers disposing of Unmetered Water, to whom the District may issue the following types of permits:

- A. Limited-Term Permits. Permits for Users who request a permit for temporary Discharges of Unmetered Water during a specified term;
- B. Groundwater Permits. Permits for Users who request a permit to Discharge groundwater on an ongoing basis; or
- C. Industrial User Permit. Permits for any other User that requests a permit to Discharge Unmetered Water.

(b) Estimation Permits. Estimation Permits may be issued to a Discharger which demonstrates a significant amount of the Discharger's metered water consumption is not being Discharged to a Community Sewer. For the purposes of this Ordinance, any diversion from the Community Sewer shown to be more than 20 percent of the metered water consumption shall qualify for an Estimation Permit. Other Dischargers who can demonstrate a significant diversion may request a permit, which shall be subject to approval by the Director.

*(Ord. No. 355-11, 7-12-2011; Ord. No. 358-13 § 2, 7-23-2013;
Ord. No. XXX-24 § 2, XX-XX-2024)*

SECTION 2

APPLICATION

Dischargers seeking a Wastewater Discharge Permit shall complete and file with the Director a District application form, accompanied by any applicable District fees. New Dischargers shall file applications 60 days prior to commencement of Discharges, unless such time is extended for good cause. The application may require the following information:

- (a) name, site address, and mailing address (if different than site address) of business;
- (b) estimated Wastewater strength;
- (c) estimated concentration of each constituent for which a Local Limit has been established as stated in Title II Section 3 and any other constituents that could result in Prohibited Discharges as described in Title II Section 2.
- (d) environmental control permits held by or for the facility;

- (e) estimated Wastewater flow, average and peak Wastewater Discharge flow for each Sewer Lateral;
- (f) locations of Sewer Laterals, sampling points, and pretreatment facilities;
- (g) description of activity, facilities, and plant process on the Premises, including raw materials, processes and types of materials which are or could be Discharged;
- (h) total product produced, by type;
- (i) number and type of employees;
- (j) days and hours of operation and days and hours of Discharge;
- (k) slug control plan which outlines Discharge practices (including non-routine batch Discharges), describes stored chemicals, and contains procedures both to notify the District immediately of slug Discharges and to prevent adverse impacts from any accidental spill; and
- (l) any other information the Director shall deem necessary to evaluate the permit application.

The Director shall evaluate the application in light of this Ordinance's stated purposes and approve, conditionally approve, or deny the application as appropriate under the circumstances. Any Discharger aggrieved by the Director's decision to deny an application may appeal that decision by utilizing the procedures described in Title VI, Section 1(f) of this Ordinance.

(Ord. No. 355-11, 7-12-2011; Ord. No. XXX-24 § 2, XX-XX-2024)

SECTION 3

TERMS AND CONDITIONS OF PERMIT

(a) Terms. All Wastewater Discharge Permits shall require the permittee to comply with all provisions of this Ordinance and all rates and charges established by the District. A Wastewater Discharge Permit may contain terms, conditions or other provisions that are more stringent than the requirements of this Ordinance. A Discharger must comply with all Wastewater Discharge permit terms and conditions, and failure to do so is a violation of this Ordinance. A permit issued to a Significant Industrial User shall be valid for a specified time period, not to exceed five years or the maximum time

allowed by law. The Director may renew a permit issued to a Significant Industrial User for any period not to exceed five years or the maximum time allowed by law. The period of validity for all other permits shall be as determined by the Director, and may include permits with no expiration date, provided that the Director may revise or terminate any permit at any time in the manner provided by this Ordinance. Permit renewal applications shall be submitted to the District at least 60 days before the permit expires. A permit issued to a Significant Industrial User shall require the permittee to notify the District immediately of any changes at its facility affecting the potential for a Slug Discharge.

(b) Conditions. Wastewater Discharge Permits may contain any or all of the following conditions:

- (1) Effluent limits, including categorical pretreatment standards and Local Limits.
- (2) Limits on rate and time of Discharge or requirements for flow regulation and equalization.
- (3) Requirements for inspection and sampling facilities, including District access to such facilities.
- (4) Monitoring program which may include: Sampling locations; frequency and method of sampling; number, types and standard of tests; and establishing a reporting schedule. The Discharger assigned a monitoring program in conformance with this Ordinance shall pay all applicable District charges.
- (5) Submission of technical reports or Discharge reports, including, but not limited to, reports described in Title V, Section 2 of this Ordinance, or any report required by 40 CFR 403.12.
- (6) Maintenance of records relating to Wastewater Discharges, as specified by the Director, and affording District access thereto.
- (7) A statement of applicable penalties for violation of pretreatment standards and requirements, and any applicable compliance schedule.
- (8) Requirements for the development and implementation of pollution prevention plans to reduce the amount of pollutants Discharged to the District's treatment plant.

(9) Notification requirements including immediate notification of any changes that affect the potential for a slug Discharge.

(10) Requirements for the development and implementation of spill control plans or other special conditions including management practices necessary to adequately prevent accidental, unanticipated, or nonroutine Discharges.

(11) Installation of technology, as specified by the Director.

(12) Requirements to implement best management practices.

(13) Other conditions as deemed appropriate by the Director to ensure compliance with this Ordinance or the terms and conditions of the Wastewater Discharge Permit.

(Ord. No. 355-11, 7-12-2011; Ord. No. 358-13 § 2, 7-23-2013; Ord. No. XXX-24 § 2, XX-XX-2024)

SECTION 4

CHANGE OF PERMIT TERMS AND CONDITIONS

Once issued, the Director may change the terms and conditions of a Wastewater Discharge Permit, including changing the limits on Wastewater constituents, from time to time as circumstances may require. The District shall allow a Discharger reasonable time to comply with any District required changes in the permit except that a change that affects billing shall immediately affect calculation of the Wastewater disposal charge.

(Ord. No. 355-11, 7-12-2011; Ord. No. XXX-24 § 2, XX-XX-2024)

SECTION 5

TRANSFER OF PERMIT

A Wastewater Discharge Permit shall not be assigned or transferred without prior notice to and approval from the Director.

(Ord. No. 355-11, 7-12-2011; Ord. No. XXX-24 § 2, XX-XX-2024)

SECTION 6

TERMINATION AND MODIFICATION FOR VIOLATIONS

The Director may terminate or modify any Wastewater Discharge Permit for violation of the terms and conditions of the permit or the provisions of this Ordinance. Any Person aggrieved by the Director's decision to terminate or modify a Wastewater Discharge Permit based on such violations may appeal that decision using the procedures described in Title VI, Section (1)(f). A Discharger whose permit has been terminated based on such violations, and who desires to resume Discharging, shall apply for a new permit within 30 days of issuance of the notice of termination.

(Ord. No. 355-11, 7-12-2011; Ord. No. XXX-24 § 2, XX-XX-2024)

TITLE V – ADMINISTRATION

SECTION 1

AUTHORITY OF DIRECTOR

The Director is charged with responsibility for District's Wastewater control program and the administration and enforcement of the provisions of this Ordinance.

(Ord. No. 355-11, 7-12-2011; Ord. No. XXX-24 § 2, XX-XX-2024)

SECTION 2

WASTEWATER SOURCE CONTROL REQUIREMENTS

In order to effectively administer and enforce the provisions of these regulations, the Director may require any Discharger to comply with any or all the following requirements:

(a) Discharge Reports. The Director may require Discharge reports, including but not limited to questionnaires, technical reports, sampling reports, and test analyses, and periodic reports of Wastewater Discharge. When a report filed by a Person pursuant to this section is not adequate in the judgment of the Director, the Director may require such Person to supply such additional information as the Director deems necessary. The Discharge report may include, but not be limited to, nature of the process, volume and rates of Wastewater flow, elements, constituents, and characteristics of the Wastewater, together with any information required in an application for Wastewater Discharge Permit.

(b) Baseline Monitoring Report. Each Categorical Industrial User shall submit a baseline monitoring report (BMR). The requirements for a BMR, as described in 40 CFR 403.12(b) are hereby incorporated into this Ordinance. A BMR, if required, shall be reviewed by an authorized representative of the user, and certified to by a qualified professional, indicating whether pretreatment standards are being met on a consistent basis, and if not, whether additional operation and maintenance and/or additional pretreatment is required for the user to meet the pretreatment standards and requirements.

(c) Periodic Report of Continued Compliance.

(1) Each Categorical Industrial User, other than a Non-Significant Categorical Industrial User or Middle Tier Categorical Industrial User, shall submit to the District twice per year a report describing the nature and

concentration of the pollutants which are regulated by the Categorical Pretreatment Standards and Local Limits applicable to the CIU. The User's report must be based on sampling and analysis performed during the six-month reporting period and in accordance with the techniques described in 40 CFR Part 136 and amendments thereto. At the District's discretion, this sampling and analysis may be performed by the District. If a Categorical Pretreatment Standard requires compliance with a Best Management Practice or Pollution prevention alternative, the User must submit all documentation necessary for the District to determine the User's compliance status. The report shall include the average and maximum daily flows. The District may determine during which months the CIU shall submit these reports.

(2) Each Middle Tier Categorical Industrial User must submit to the District once per year a report describing the nature and concentration of the pollutants which are regulated by the Categorical Pretreatment Standards and Local Limits applicable to the CIU. The User's report must be based on sampling and analysis performed during the six-month reporting period and in accordance with the techniques described in 40 CFR Part 136 and amendments thereto. At the District's discretion, this sampling and analysis may be performed by the District. If a Categorical Pretreatment Standard requires compliance with a Best Management Practice or Pollution prevention alternative, the User must submit all documentation necessary for the District to determine the User's compliance status. The report shall include the average and maximum daily flows. The User must immediately notify the District of any changes at its facility causing it to no longer meet all conditions required for the District to designate it as a Middle Tier Categorical Industrial User and, upon giving such notification, must immediately begin submitting the report described twice per year until further notice from the District.

(3) Each Significant Industrial User other than a Categorical Industrial User must submit to the District twice per year a report describing the nature and concentration of the pollutants which are regulated by this Ordinance. The report shall include the average and maximum daily flows. The District may determine during which months the SIU shall submit these reports. If a Local Limit requires compliance with a Best Management Practice or Pollution prevention alternative, the User must submit all documentation necessary for the District to determine the User's compliance status. The User's report must be based on sampling and analysis performed during the six-month reporting period and in accordance with the techniques described in 40 CFR Part 136 and amendments thereto. At the District's discretion, this sampling and analysis may be performed by the District.

(4) Each Non-Significant Categorical Industrial User must submit to the District annually a certification statement stating that the facility never Discharged more than 100 gallons of total categorical Wastewater on any given day during the reporting period.

(5) Zero Dischargers must submit an annual certification statement to the District stating no Discharge of Process Wastewater occurred during the reporting period.

(d) Compliance Schedule for the Installation of Technology. The District may require a Discharger to develop a compliance schedule for the installation of technology to meet applicable pretreatment standards or requirements. Requiring a compliance schedule for the installation of technology is not conditioned on a determination that a violation of the Discharger's Wastewater Discharge Permit or this Ordinance has occurred. The compliance schedule for installation of technology shall require a Discharger to submit periodic progress reports.

(e) Report on Compliance with Categorical Deadline. Each Categorical Industrial User shall submit a report within 90 days after the final date for compliance, or upon commencement of Discharge, whichever comes later, which contains flow and pollutant measurements, a certification of whether pretreatment standards are being met consistently, and if not, a description of needed additional operations and maintenance or pretreatment. The report on compliance with categorical deadline, if required, shall be reviewed by an authorized representative of the User, and certified to by a qualified professional, indicating whether pretreatment standards are being met on a consistent basis, and, if not, whether additional operation and maintenance and/or additional pretreatment is required for the user to meet the pretreatment standards and requirements.

(f) Notice of Violation/Resampling Report. If sampling by a User indicates a violation of the User's Wastewater Discharge Permit, this Ordinance, or a pretreatment standard or requirement, the User shall notify the District within 24 hours of becoming aware of the violation. The User shall also repeat the sampling and analysis and submit the results of the repeat analysis to the District within 30 days of becoming aware of the violation, unless the District samples the user between the time of the initial sampling and the time when the user receives the results of this sampling. Within five (5) days of detecting such violation, the user shall, unless waived by the District, submit a detailed written report describing the cause(s) of the Discharge and the measures to be taken by the user to prevent similar future occurrences. Such notification shall not relieve the User of any expense, loss, damage, or other liability which may be incurred as a result of damage to the POTW, natural resources, or any other damage to person or property, nor

shall such notification relieve the user of any fines, penalties, or other liability which may be imposed pursuant to this ordinance.

(g) Slug Control Plan. The District may require a plan which outlines Discharge practices, including non-routine batch Discharges, describes stored chemicals, and contains procedures both to notify the District immediately of slug Discharges and to prevent adverse impacts from any accidental spill.

(h) Notice of Potential Problems. Each Industrial User shall notify the District immediately of all Discharges that could cause problems to its Wastewater treatment facility, including any slug loadings, as defined by 40 CFR 403.5(b), by the Industrial User.

(i) Notification of Changed Conditions. Each Industrial User shall promptly notify the District in advance of any substantial change in the volume or character of pollutants in their Discharge, including the listed or characteristic hazardous wastes for which the Industrial User has submitted initial notification under 40 CFR 403.12(p), and immediate notification of any changes that affect the potential for a slug Discharge.

(j) Notification of Hazardous Waste Discharge.

(1) All Industrial Users discharging any substance which, if otherwise disposed of, would be a hazardous or acutely hazardous waste under 40 CFR 261, must comply with the reporting requirements of 40 CFR 403.12(p)(1) and (3) unless exempted under the provisions of 40 CFR 403.12(p)(2).

(2) In the case of any notification made under section (1) above, the Industrial User shall certify that it has a program in place to reduce the volume and toxicity of hazardous wastes generated to the degree it has determined to be economically practical. The District may accept a copy of a hazardous waste reduction or minimization plan otherwise required by law, as compliance with this requirement.

(k) Monitoring Programs. The Director may require of Dischargers such technical or monitoring programs, including the submission of periodic reports, as the Director deems necessary, provided that the burden, including costs, of such programs and reports shall bear a reasonable relationship to the need for the report and the benefits to be obtained therefrom. The Discharger shall pay the applicable District charge for the monitoring program, in addition to the Wastewater disposal charge and other charges established by the District. The monitoring program may require the Discharger to conduct a sampling and analysis program of a frequency and type specified by the Director or as

required by the General Pretreatment Regulations to demonstrate compliance with prescribed Wastewater Discharge limits. The Discharger may:

(1) Conduct their own sampling and analysis program provided the Discharger demonstrates to the Director that they have the necessary qualifications and facilities to perform the work; or

(2) Engage a private consulting firm or laboratory, certified under the Environmental Laboratory Accreditation Program.

(3) The Director may authorize a waiver where a pollutant is neither present nor expected to be present in the Discharge as specified in 40 CFR 403.12(e)(2).

(l) Additional Monitoring Report. If a Significant Industrial User monitors any regulated pollutant at the appropriate sampling location more frequently than required by the District, using approved sampling and analytical methods, the results of this monitoring shall be reported to the District.

(m) Inspection Facilities. The Director may require any non-residential Discharger to construct, at their own expense, a sampling facility or inspection maintenance hole together with necessary related measuring and sampling equipment, in accordance with construction standards and specifications of the Public Agency owning the Community Sewer. The sampling facility or inspection maintenance hole shall be constructed on the Sewer Lateral of the Discharger and within the public right of way at a location approved by the District and the Public Agency owning the Community Sewer, provided that the Director may permit the installation of such facilities on the Premises of the Discharger at a location which will permit District access to the facility at all times. Construction shall be completed within 60 days of written notification from the Director, unless such time is extended by the Director for good cause. The Director may require the Discharger to install such sampling facilities or inspection maintenance holes on each side sewer.

(n) Pretreatment. Pretreatment systems or devices may be required by the Director to treat Wastewater prior to Discharge to the Community Sewer when it is necessary to restrict or prevent the Discharge to the Community Sewer of Wastewater having constituents in violation of the prohibitions or exceeding the limits established by this Ordinance, or to distribute Wastewater Discharges over a period of time. All pretreatment systems or devices shall be approved by the Director but such approval shall not relieve a Discharger of the responsibility for taking all steps necessary to comply with Wastewater limitations established by the District. All required pretreatment equipment

shall be installed and operated at the Discharger's expense. Any subsequent changes in the pretreatment facilities or method of operation shall be reported to and be acceptable to the District.

(o) Protection From Accidental or Slug Discharge. Each Discharger shall provide protection from accidental or slug Discharge of prohibited materials or other Wastes regulated by this Ordinance. Such facilities shall be provided and maintained at the Discharger's expense. These facilities shall be approved by the Director but such approval shall not relieve the Discharger from the responsibility of modifying the facilities to provide the protection necessary to meet the requirements of this section.

(p) Representative Data. All data submitted in reports or applications shall be representative of conditions during the reporting period.

(q) The Director may require the submission of any other reports not specified in this section, as deemed necessary by the District to determine a User's compliance status with local, state and federal limits or requirements.

(Ord. No. 355-11, 7-12-2011; Ord. No. 358-13 § 2, 7-23-2013; Ord. No. XXX-24 § 2, XX-XX-2024)

SECTION 3

SIGNATURE REQUIREMENT

(a) All reports and permit applications received or required under these regulations, including BMR, reports on compliance with Categorical Pretreatment Standard deadlines (90-day compliance reports), and periodic reports on continued compliance, shall be signed:

(1) by a responsible corporate officer, if the user submitting the reports is a corporation. For purposes of this paragraph, a responsible corporate officer means:

(A) a president, secretary, treasurer, or vice president of the corporation in charge of a principal business function, or any other person who performs similar policy or decision-making functions for the corporation; or

(B) the manager of one or more manufacturing, production, or operating facilities, if authority to sign documents has been assigned or delegated to the manager in accordance with corporate procedures and the manager is authorized to make management decisions which govern the

operation of the regulated facility, including having the explicit or implicit duty to

(i) make major capital investment recommendations;

(ii) initiate and direct other comprehensive measures to assure long-term compliance with environmental laws and regulations; and

(iii) ensure that the necessary systems are established or actions taken to gather complete and accurate information for control mechanism requirements.

(2) by a general partner or proprietor if the user submitting the reports is a partnership or sole proprietorship, respectively; or

(3) by a duly authorized representative of the individual designated in paragraph (1) or (2) of this section if:

(A) The authorization is made in writing by the individual designated in paragraph (1) or (2);

(B) The authorization specifies either an individual or a position having responsibility for the overall operation of the facility from which the industrial Discharge originates, such as the position of plant manager, operator of a well, or well field superintendent, or a position of equivalent responsibility, or having overall responsibility for environmental matters for the company; and

(C) The written authorization is submitted to the District.

(4) If an authorization under paragraph (a)(3) of this section is no longer valid because a different individual or position has responsibility for the overall operation of the facility, or overall responsibility for environmental matters for the company, a new authorization satisfying the requirements of paragraph (a)(3) of this section must be submitted to the District prior to or together with any reports to be signed by an authorized representative.

(b) Reports and applications must include the following certification statement:

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure

that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

(Ord. No. 355-11, 7-12-2011; Ord. No. 358-13 § 2, 7-23-2013; Ord. No. XXX-24 § 2, XX-XX-2024)

SECTION 4

RETENTION OF RECORDS

All records, including but not limited to all information resulting from any monitoring activities, Discharge reports, permits, self-monitoring data, pretreatment system process control logs, documentation of compliance with BMP requirements, and relevant correspondence (whether or not required by these regulations) must be maintained by the user for a period of not less than three years. Monitoring records shall be included for all samples as specified in 40 CFR 403.12(o)(1). All such records shall be made available for inspection and copying by a duly authorized representative of the District or any other governmental entity having jurisdiction. The retention period may be extended in the case of unresolved litigation or at any time at the direction of the District, the State or U.S. EPA.

(Ord. No. 355-11, 7-12-2011; Ord. No. XXX-24 § 2, XX-XX-2024)

SECTION 5

ANALYTICAL AND SAMPLING METHODOLOGY AND PROCEDURES

(a) The method and procedures utilized for all analyses which are reported under the requirements of these regulations shall be as specified by the provisions of 40 CFR Part 136.

(b) The methods and procedures utilized for all sampling performed and/or reported under the requirements of this regulation shall be as specified by the provisions of 40 CFR Part 136.

(c) If 40 CFR Part 136 does not contain sampling or analytical techniques for the pollutant in question, sampling and analyses must be performed in accordance with procedures approved by EPA.

(Ord. No. 355-11, 7-12-2011; Ord. No. XXX-24 § 2, XX-XX-2024)

SECTION 6

PUBLIC NOTIFICATION OF DISCHARGERS FOUND TO BE IN SIGNIFICANT NONCOMPLIANCE

At least once per year, the District will publish the identities of any Dischargers found to be in Significant Noncompliance. The publication shall occur in a newspaper of general circulation that provides meaningful public notice within the service area of the District.

(Ord. No. 355-11, 7-12-2011; Ord. No. 358-13 § 2, 7-23-2013)

SECTION 7

CONFIDENTIAL INFORMATION

All information and data obtained from a Discharger in connection with Federal Pretreatment Standards or Local Limits shall be available to the public or other governmental agencies without restriction. Dischargers may request that information provided to the District in a report, permit application, questionnaire, or in the course of an inspection be treated as confidential. In all such cases, confidential information shall be made available to governmental agencies including the U.S. EPA, the State, and the District for use in pending or potential judicial review or enforcement proceedings involving the Discharger providing the information, and may be disclosed to the public where required by the California Public Records Act or other applicable law, in which case the Discharger shall be solely responsible for taking any action necessary to prevent the release of such information. Wastewater constituents and characteristics will not be recognized as confidential information.

(Ord. No. 355-11, 7-12-2011; Ord. No. 358-13 § 2, 7-23-2013; Ord. No. XXX-24 § 2, XX-XX-2024)

SECTION 8

DISTRICT INSPECTION

The District may inspect the facilities of any Discharger to ascertain whether the provisions of this Ordinance are being met and the Wastewater Discharge limits are being complied with. Dischargers shall allow the District or its representatives ready access at all reasonable times to all parts of the Premises for the purposes of inspection or sampling or in the performance of any of their duties. Where a Discharger has security measures which would require proper identification and clearance before entry into their Premises, the user shall make arrangements with their security personnel so that, upon presentation of proper identification, District personnel will be permitted to enter without delay for the purposes of performing their specific responsibilities. Such inspection shall be made with the consent of the owner or possessor of such facilities. If the District has been refused access to any part of a Discharger's facility, and is able to demonstrate probable cause to believe that there may be a violation of this Ordinance, or that there is a need to inspect and/or sample as part of the routine inspection and sampling program of the District, then the Director may seek issuance of an inspection warrant or a search warrant, duly issued pursuant to the procedures set forth in Title 13 (commencing with Section 1822.50) of Part 3 of the Code of Civil Procedure; provided, however, that in the event of an emergency affecting the public health or safety such inspection may be made without consent or the issuance of a warrant. To verify the Wastewater flows, characteristics, constituents, and strengths reported by Dischargers, or to determine compliance with this Ordinance, inspection, measurement, and sampling may be conducted from time to time by the District. The District shall have the right to install, maintain, and operate necessary sampling and measuring equipment on the Premises of Discharger.

(Ord. No. 355-11, 7-12-2011; Ord. No. XXX-24 § 2, XX-XX-2024)

SECTION 9

NEW CONNECTIONS

Dischargers will be assigned a Business Classification Code and informed of the applicable prohibitions, limits or conditions, and the applicable rates and charges, governing Wastewater disposal service at the time of application for water service from East Bay Municipal Utility District. All nonresidential Dischargers seeking a new Sewer Lateral connection to a Community Sewer and any new Discharger requiring information prior to applying for water service should contact the Director. The Director will inform the Discharger of the regulations governing Wastewater disposal service and the applicability

of requirements for inspection, sampling, or pretreatment facilities.

(Ord. No. 355-11, 7-12-2011; Ord. No. XXX-24 § 2, XX-XX-2024)

TITLE VI – ENFORCEMENT AND PENALTIES

SECTION 1

DIRECTOR’S ORDERS

The Director may adopt procedures and rules for the implementation and administration of this Ordinance, including an enforcement response plan. The Director shall enforce the provisions of this Ordinance, including requirements established or permits issued hereunder, as provided herein.

(a) Issuance of Notices of Violations. When the Director finds that a Discharger has violated, or continues to violate, any provision of this ordinance, a Wastewater Discharge Permit, a General Permit, an Order issued hereunder, or any other Pretreatment Standard or Requirement, the Director may serve upon that Discharger a written notice of violation. Within five days of the receipt of such notice, an explanation of the violation and a plan for the satisfactory correction and prevention thereof, to include specific required actions, shall be submitted by the User to the Director. Submission of such a plan in no way relieves the Discharger of liability for any violations occurring before or after receipt of the notice of violation. Nothing in this Section shall limit the authority of the Director to take any action, including emergency actions or any other enforcement action, without first issuing a notice of violation.

(b) Requiring Discharger to Submit Schedule of Remedial or Preventive Measures. When the Director finds that a Discharge of Wastewater is taking place or threatening to take place that violates or will violate prohibitions or limits prescribed by this Ordinance or Wastewater source control requirements or the provisions of a Wastewater Discharge Permit, the Director may require the Discharger to submit for approval of the Director, with such modifications as the Director deems necessary, a detailed time schedule of specific actions the Discharger shall take in order to correct or prevent a violation of requirements.

(c) Issuance of Cease and Desist Orders. When the Director finds that a Discharge of Wastewater is taking place or threatening to take place in violation of prohibitions or limits of this Ordinance or Wastewater source control requirements or the provisions of a Wastewater Discharge Permit, the Director may issue an Order to cease and desist and direct that those Persons not complying with such prohibitions, limits, requirements, or provisions (1) comply forthwith, (2) comply in accordance with a time schedule set by the Director, or (3) in the event of a threatened violation, take appropriate remedial or preventative action.

(d) Cost Recovery. When the Discharge of Wastewater causes an obstruction, damage, or other impairment to Wastewater disposal facilities, the Director may recover costs from the Discharger to correct the problem caused by the Discharger.

(e) Termination of Service. The District may terminate a Wastewater Discharge Permit, Wastewater disposal service, or water service to any Premises if a violation of any provision of this Ordinance pertaining to control of Wastewater is found to exist or if a Discharge of Wastewater causes or threatens to cause a condition of Contamination, Pollution, or Nuisance, as defined in this Ordinance. This provision is in addition to other statutes, rules, or regulations authorizing termination of service for delinquency in payment, or for any other reason.

(f) Appeal Procedures for Director's Orders.

(1) Any Wastewater Discharge Permit holder, Wastewater Discharge Permit applicant, or Discharger aggrieved by an Order issued pursuant to this Section, or a decision that this Ordinance otherwise specifies is subject to Title VI, Section 1(f), may seek relief by filing a written request for reconsideration in accordance with this section.

(2) A request for reconsideration must be filed no later than 15 days from the date notice of the decision was given.

(3) The Person seeking reconsideration must submit a written statement with the request for reconsideration, signed under penalty of perjury, and containing (i) a description of the Order, or portion of the Order, that is the subject of the request for reconsideration, (ii) a description of the specific relief requested, (iii) a detailed statement of facts which the appellant believes entitles the appellant to the relief requested, and (iv) copies of all supporting documentation or other written evidence the appellant wishes the District to consider. The District may require a request for reconsideration to be submitted on a District form.

(4) The Director shall designate a District officer or employee with supervisory or managerial authority who will consider the request for reconsideration and decide whether to grant relief. The Director's designee may request additional information and the appellant shall provide such requested information within fifteen (15) business days or such other time period authorized in writing by the Director's designee. The evidence before the Director's designee shall consist of the written statement and documentation provided by the appellant in support of the request for reconsideration, relevant information in the District's

files pertaining to the matter, and any other relevant evidence which, in the judgment of the Director's designee, should be considered. The Director's designee shall consider the available evidence in light of this Ordinance's stated purposes and the public's interest in the fair, equitable, and consistent implementation of this Ordinance.

(5) The Director's designee may decide the matter within fifteen (15) business days from the receipt of the complete request for reconsideration, except if the Director's designee requests additional information the matter may be decided within fifteen (15) business days from the deadline to provide such additional information. If the Director's designee does not decide the matter within the above-stated time period, the request for reconsideration shall be deemed denied on the first day following that time period. Notice of any decision will be mailed to the Person requesting relief.

(6) Within 30 days after the date of mailing of written notice of any decision granting or denying relief under subsection (5) of this Section, or within 30 days after the date the request for reconsideration is deemed denied, the Person aggrieved by the Order that was the subject of the request for reconsideration may submit to the Director a written appeal. The appeal must set forth in detail the facts and rationale supporting the request under penalty of perjury. The Director shall either personally consider the appeal, designate another senior manager or officer of the District to consider the appeal, or designate an independent hearing officer to consider the appeal as the circumstances may require.

(7) The Director may act on the appeal with or without an oral hearing in any manner the Director deems reasonable under the circumstances, except where the Order at issue has the effect of terminating Wastewater service, terminating water service, or revoking the appellant's Wastewater Discharge Permit, in which case an oral hearing shall be held at the appellant's request. Any request for a hearing shall accompany the written appeal described in subsection (6). Failure to submit a request for a hearing in conjunction with the written appeal shall be deemed a waiver of the right to a hearing.

(8) The Director, or the other designated officer if applicable, shall thereafter issue a final written determination concerning the appeal. The Director may consider the written request for reconsideration made pursuant to subsection (3); the decision rendered by their designee pursuant to subsections (4) and (5); the appeal submitted pursuant to subsection (6); evidence and argument offered at hearing, if held; relevant information in the District's files pertaining to the matter, and any other relevant evidence which, in the judgment of the Director,

should be considered, including any additional information requested by the Director. The Director's decision shall become final and binding at the time the Director acts on the appeal, except to the extent the action is the subject of an administrative complaint for penalties as provided in Section 2 of this Title. Notice of the Director's action will be mailed to the appellant within five (5) business days after the action.

(9) Unless the Director orders otherwise, any appealed Order or action shall remain in effect and binding upon the appellant while the appeal, including any reconsideration thereof, remains pending.

(10) Any Person aggrieved by an Order issued pursuant to this Section, or a decision that this Ordinance otherwise specifies is subject to Title VI, Section 1(f), and who wishes to appeal or challenge the Order or decision, or receive other relief from a requirement thereof, must seek review by utilizing all procedures available under this Section, and the failure to do so shall be deemed a failure of the Person subject to the Order to exhaust administrative remedies.

(Ord. No. 355-11, 7-12-2011; Ord. No. 358-13 § 2, 7-23-2013; Ord. No. XXX-24 § 2, XX-XX-2024)

SECTION 2

DIRECTOR'S ENFORCEMENT REMEDIES AND PENALTIES

(a) Civil Liability Penalties. Civil liability may be imposed by the Director, a hearing officer designated by the District, or the Board in the manner provided in this Section as follows:

(1) In an amount which does not exceed one thousand dollars (\$1,000) for each day for knowingly or willfully failing or refusing to furnish technical or monitoring reports.

(2) In an amount which does not exceed five thousand dollars (\$5,000) for each day of intentionally or negligently discharging hazardous waste, as defined in Section 25117 of the Health and Safety Code, knowingly falsifying any information provided in any furnished technical or monitoring report.

(3) In an amount which does not exceed ten dollars (\$10) per gallon for Discharges in violation of any of the District's cease and desist or other Orders, or prohibitions issued, reissued, or adopted by the District.

(b) Issuance of Complaints.

(1) The Director may issue a complaint to any Person on whom civil liability may be imposed pursuant to this Ordinance. The complaint shall allege the act or failure to act that constitutes a violation of law, the provision of law authorizing civil liability to be imposed pursuant to this Ordinance, and the proposed civil liability.

(2) The complaint shall be served by personal notice or certified mail on the Person subject to the District's Discharge and reporting requirements, and shall inform the party served that a hearing shall be conducted before a hearing officer appointed by the Director, at a specified date and time, no later than 60 calendar days after the party has been served.

(3) The Person who has been issued a complaint may waive the right to a hearing in writing no later than 10 calendar days following service of notice thereof, in which case the District shall not conduct a hearing and the Person will be deemed to have waived any further right of appeal or hearing and of all subsequent administrative remedies provided in this Title. If the right to a hearing is not timely waived and the Person fails to appear at such hearing, the District shall not conduct the hearing, and the Person failing to appear will be deemed to have waived their right to a hearing and any further right of appeal and of all subsequent administrative remedies provided in this Title. If the right to a hearing is timely waived, or if a party fails to appear at the hearing, the Director may issue a final Order imposing civil liability in the amount proposed in the complaint and serve such final Order by personal notice or certified mail. Under these circumstances the Director's Order shall become effective and final upon issuance thereof and not subject to further review or appeal or any subsequent administrative remedies provided in this Title, and payment shall be made no later than 30 calendar days following the date of issuance.

(c) Proceeding Before Hearing Officer.

(1) The hearing officer shall be designated by the District. If after the hearing the hearing officer finds that the Person has violated reporting or Discharge requirements, the hearing officer may assess a fine against that Person. In determining the amount of the fine, the hearing officer shall take into consideration all relevant circumstances, including, but not limited to, the extent of harm caused by the violation, the nature and persistence of the violation, the length of time over which the violation occurs and corrective action, if any, attempted or taken by the Discharger.

(2) The hearing officer shall serve the written decision or Order by personal notice or certified mail. Unless appealed as set forth in this Section, the hearing officer's decision or Order setting administrative civil liability shall become effective and final upon issuance thereof, and payment shall be made no later than 30 calendar days from the date the party is served notice of the hearing officer's decision or Order.

(d) Appeal to Board.

(1) Any party dissatisfied with the hearing officer's decision or Order following a complaint issued under subsection (b) of this Section may appeal that decision or Order to the Board by filing a written appeal setting forth each ground on which the appeal is based. The appeal shall be filed with the Secretary of the District no later than 30 calendar days from the date of personal service or certified mailing of the hearing officer's decision or Order. The failure to timely file an appeal with the Secretary of the District is jurisdictional and shall be deemed a failure to exhaust administrative remedies.

(2) The Board may grant or deny review of the hearing officer's decision or Order upon receipt of a timely appeal.

(3) If the Board denies review of the hearing officer's decision or Order, the hearing officer's decision or Order shall immediately become effective and final. Unless the hearing officer's decision or Order is appealed as set forth in this paragraph, payment shall be made no later than 30 calendar days from the date the party is served notice of the decision by the Board to deny review. Upon denial of review by the Board, any party dissatisfied with the hearing officer's decision or Order may obtain review of the hearing officer's decision or Order in the superior court by filing in the court a petition for writ of mandate in accordance with subsection (6) of this Section.

(4) If the Board grants review of the hearing officer's decision or Order, the Board has discretion to do any of the following:

(A) Adopt the hearing officer's decision or Order in its entirety;

(B) Reduce or otherwise mitigate the penalty imposed by the hearing officer's decision or Order and adopt the balance of the proposed decision or Order;

(C) Make technical or other minor changes to the hearing officer's decision or Order (limited to clarifying or similar changes not affecting the factual or legal basis of the hearing officer's decision) and adopt it in its modified form;

(D) Reject the hearing officer's decision or Order and refer the case back to the hearing officer to take further evidence and prepare a revised proposed decision; or

(E) Reject the hearing officer's decision or Order and decide the case itself on the record, with or without taking additional evidence and after affording the parties an opportunity to provide written or oral argument before the Board. If the Board chooses to decide the case itself on the record and finds, after reviewing the record before the hearing officer and any additional evidence and argument accepted, that the Person has violated reporting or Discharge requirements, the Board may assess a fine against that Person. In determining the amount of the fine, the Board shall take into consideration all relevant circumstances, including, but not limited to, the extent of harm caused by the violation, the nature and persistence of the violation, the length of time over which the violation occurs and corrective action, if any, attempted or taken by the Discharger.

(5) The Board shall serve notice of any Order or decision made under Section 2(d) of this Title by personal notice or certified mail. An Order issued by the Board setting administrative civil liability shall become effective and final upon issuance thereof, and payment shall be made no later than 30 calendar days from the date the party is served notice of the Order or decision.

(6) The decision shall be deemed final on the date of mailing by certified mail or personal delivery of the decision by the Board. Judicial review of any decision subject to the provisions of this section may be had only if the petition for writ of mandate is filed within 90 days after the decision becomes final, in accordance with California Code of Civil Procedure Section 1094.6.

(Ord. No. 355-11, 7-12-2011; Ord. No. 358-13 § 2, 7-23-2013; Ord. No. XXX-24 § 2, XX-XX-2024)

SECTION 3

CRIMINAL PENALTIES

(a) Any Person who intentionally Discharges Wastewater in any manner, in violation of any Order issued by the Director, which results in Contamination, Pollution, or a Nuisance, as defined in this Ordinance, is guilty of a misdemeanor and may be subject to criminal penalties of not more than \$1,000 per day for each such violation, including, but not limited to, any violation of pretreatment standards or requirements.

(b) Any Person who knowingly makes any false statement or representation in any record, report, plan, or other document filed with the District, or who falsifies, tampers with, or knowingly renders inaccurate any monitoring device or method required by the District, shall be punished by a fine of not more than twenty-five thousand dollars (\$25,000) or by imprisonment in the county jail for not more than six months, or by both.

(Ord. No. 355-11, 7-12-2011; Ord. No. XXX-24 § 2, XX-XX-2024)

SECTION 4

CIVIL ENFORCEMENT REMEDIES AND PENALTIES

The District may pursue any of the alternative civil remedies herein against any Discharger who violates the provisions of this Ordinance.

(a) Civil Enforcement Penalties.

(1) Any Person who fails to comply with any Order issued by the District, including Orders related to pretreatment standards or requirements, shall be subject to a civil penalty not to exceed ten thousand dollars (\$10,000) for each day in which the Discharge, violation, or refusal occurs.

(2) Any Person who intentionally or negligently violates any Order issued by the District for violation of rules regulating or prohibiting Discharge of Wastewater which causes or threatens to cause a condition of Contamination, Pollution or Nuisance, as defined in this article, may be liable civilly in a sum not to exceed twenty-five thousand dollars (\$25,000) for each day in which the violation occurs. The attorney of the District, upon request of the Board of Directors of the District, shall petition the Superior Court to impose, assess, and recover such sums.

(b) Injunction. Whenever a Discharge of Wastewater is in violation of the provisions of this Ordinance, including but not limited to violation of a pretreatment standard or requirement, or otherwise causes or threatens to cause a condition of Contamination, Pollution, or Nuisance, or whenever non-Discharge violations occur including failure to submit a required report or failure to allow the District's inspectors access to an industrial facility, the District may petition the Superior Court for the issuance of a preliminary or permanent injunction, or both, as may be appropriate, restraining the continuance of such violations.

(Ord. No. 355-11, 7-12-2011; Ord. No. XXX-24 § 2, XX-XX-2024)

TITLE VII – RESOURCE RECOVERY PROGRAM

SECTION 1

PURPOSE

The Resource Recovery Program was established under the authority of the Municipal Utility District Act to utilize excess capacity at the District’s Main Wastewater Treatment Plant by accepting materials transported by truck, rail, or other means at designated receiving stations. The provisions of this Title apply to the Discharge of hauled or trucked waste at designated receiving stations, and do not apply to or regulate Discharges to Community Sewers.

(Ord. No. 355-11, 7-12-2011; Ord. No. XXX-24 § 2, XX-XX-2024)

SECTION 2

REGULATION OF DISCHARGES

Permitted materials may be Discharged into designated receiving stations at District Wastewater facilities provided that such material has been deemed acceptable by the District under Resource Recovery acceptance procedures and has been permitted by the District. Under no circumstances may any Person discharge hazardous waste, as defined under State and Federal regulations, into the designated receiving stations. It is entirely within the District’s discretion to accept or reject any material, permittee, generator, or hauler. The District maintains full discretion on the issuance, terms and conditions, and revocation of permits.

No Person shall Discharge materials through the Resource Recovery Program without first obtaining a Material Acceptance Permit as described in Section 3 of this Title. The District in its discretion may accept Wastes or Wastewater that exceed a Local Limit via the Resource Recovery Program if approved by the District in advance. The District may accept Waste or Wastewater with pH less than 5.5 at designated receiving stations specifically designed to accommodate low pH Waste.

Material determined by the District to be subject to Categorical Pretreatment Standards will be required to meet all applicable rules and the Waste generator will be classified as a Categorical Industrial User.

(Ord. No. 355-11, 7-12-2011; Ord. No. XXX-24 § 2, XX-XX-2024)

SECTION 3

PERMIT REQUIREMENTS

All participants in the Resource Recovery Program shall secure a Material Acceptance Permit. The permitting process may include collection of information about the Waste stream and generator; collection of information from the Waste generator, if not the permittee, by District; collection and analysis of samples by generator, permittee, or District; and an evaluation of potential impacts including worker health and safety, plant process impacts, and regulatory impacts to air, liquid and solid Waste permits. Persons seeking a Material Acceptance Permit shall complete and file a District application form accompanied by the applicable District permit fee. The application requires information on Waste characterization including, but not limited to, origin of the Waste, estimated Waste quantity, Waste characteristics including pH, organic analysis, and analysis for other potential pollutants including metals. The application also includes certification of insurance. All permitting decisions shall rest with the Director.

All Material Acceptance Permits shall be subject to all provisions of this title and all applicable rates and charges established by the District. Material Acceptance Permit conditions may contain any and all of the following: Limits on Waste characteristics, rate, volume, number of loads, time, and location of Discharge; Monitoring and audit program which may include random and unannounced inspections and sampling; Other conditions as deemed appropriate by the Director to ensure compliance with this Ordinance and/or terms and conditions of the permit. Dischargers are prohibited from discharging materials except as expressly provided in the Material Acceptance Permit.

(Ord. No. 355-11, 7-12-2011; Ord. No. XXX-24 § 2, XX-XX-2024)

SECTION 4

ADMINISTRATION AND ENFORCEMENT

The Director is charged with responsibility for District's Wastewater control program and the administration and enforcement of the provisions of this Ordinance. In order to effectively administer and enforce the provisions of these regulations, the Director may require any Material Acceptance Permit holder to comply with any or all of the requirements described in Title V Administration, Section 2.

The Director may adopt procedures and rules for the implementation and administration of this Title. The Director shall enforce the provisions of this Title, including requirements established or Material Acceptance Permits issued hereunder as provided herein.

(a) Requiring Permittee to Submit Schedule of Remedial or Preventive Measures. When the Director finds that a Resource Recovery Program participant has violated or will violate prohibitions or limits prescribed by this Ordinance, Wastewater source control requirements, or the provisions of a Material Acceptance Permit, the Director may require the Resource Recovery Program participant to submit for approval of the Director, with such modifications as the Director deems necessary, a detailed time schedule of specific actions the Resource Recovery Program participant shall take in Order to correct or prevent a violation of requirements.

(b) Discharge Without a Permit. No Person shall Discharge any substance into a District facility under the Resource Recovery Program without a Material Acceptance Permit.

(c) Violation of Permit Terms and Conditions. When the Director finds that a Discharge of materials is taking place or about to take place in violation of prohibitions or limits of this Ordinance or a Material Acceptance Permit, the Director may direct those Persons not complying with such prohibitions, limits, requirements, or provisions to

(1) comply forthwith,

(2) comply in accordance with a time schedule set by the Director, or

(3) in the event of a threatened violation, take appropriate remedial or preventative action. Discharges in violation of a permit may be fined an amount not to exceed \$10/gallon in addition to direct and indirect costs associated with the Discharge.

(d) Cost Recovery. When the Discharge under the Resource Recovery Program causes an obstruction, damage, or other impairment to Wastewater disposal facilities, the Director may recover costs from the Resource Recovery Program participant to correct the problem caused by the Resource Recovery Program participant.

(e) Termination of Material Acceptance Permit. The District may terminate a Material Acceptance Permit at will. Grounds for termination of a Material Acceptance Permit include, but are not limited to, discharging material that deviates from the material described in the Material Acceptance Permit, a violation of this Ordinance pertaining to control of Wastewater, or a Discharge of materials that causes or threatens to cause a condition of Contamination, Pollution, or Nuisance, as defined in this Ordinance. This provision is in addition to other statutes, rules, or regulations authorizing termination of service for delinquency in payment, or for any other reason.

(f) Civil Liability Penalties. Resource Recovery Program participants may be subject to civil liability as described in Title VI Section 2.

(g) Criminal Penalties. Resource Recovery Program participants may be subject to criminal liability as described in Title VI Section 3.

(h) Civil Enforcement Remedies and Penalties. The District may pursue any of the alternative civil remedies herein against any Resource Recovery Program participant who violates the provisions of this Ordinance as described in Title VI Section 4.

(Ord. No. 355-11, 7-12-2011; Ord. No. XXX-24 § 2, XX-XX-2024)

TITLE VIII - SEVERABILITY

If any provision of this Ordinance, or the application thereof to any Person or circumstance, is held invalid, the remainder of the Ordinance, or the application of such provision to other Persons or circumstances, shall not be affected thereby.

(Ord. No. 355-11, 7-12-2011; Ord. No. 358-13 § 2, 7-23-2013; Ord. No. XXX-24 § 2, XX-XX-2024)

TITLE IX- EFFECTIVE DATE

This Ordinance shall become effective on _____.

(Ord. No. 355-11, 7-12-2011; Ord. No. 358-13 § 2, 7-23-2013; Ord. No. XXX-24 § 2, XX-XX-2024)

BOARD ACTION

Agenda Number:	21.	Meeting Date:	July 9, 2024

TITLE	DISCUSS AND CONSIDER GOVERNANCE POLICIES FOR THE BOARD OF DIRECTORS

ACTION	☒ Motion:	☐ Resolution:	☐ Ordinance:

RECOMMENDED ACTION	Provide input and direction to the Office of General Counsel and Office of the Secretary on the development of Governance Policies for the Board of Directors (Board).

SUMMARY	At the November 3, 2023 Board Retreat, the Board requested staff prepare Board Governance Policies (Policies) based on past Board resolutions and directives, Board practices, policies and administrative ordinances, and the Municipal Utility District Act. During the Retreat, the Board requested that the Policies address such areas as conduct during Board meetings and with staff, and the handling of confidential information. Subsequent to the Retreat, individual Board members requested new additions to the Policies for the Board to consider. The proposed draft Policies were presented at the June 11, 2024 Legislative/Human Resources Committee meeting. The Committee recognized the goal to finalize the policies by mid-July but commented on the significant amount of work to be done by the Board to review and finalize the draft Policies. The Committee asked staff to provide paper and editable electronic copies of the draft Policies to all Board members to make edits or provide written comments. Draft Policies were submitted to the Board on June 13, 2024, with edits and comments due by June 28, 2024. The Board will be asked to discuss the draft Policies and provide further direction to the General Counsel and Secretary of the District during the July 9, 2024 Regular Board meeting.

DISCUSSION	A brief summary of each draft Policy is listed below. The attached draft Policies are annotated to highlight those parts of the policies that are the general policy statement and language derived from existing documentation. • <u>Role of the Board of Directors.</u> Describes the role and purpose of the Board. Though it is largely reflective of existing practices, only the general policy statement and those parts of the Policy derived from existing documentation are highlighted in green. • <u>Board Member Code of Conduct.</u> Provides principles of Board member conduct. The provisions of this policy are not included in existing Board documentation and are entirely new. • <u>Board Meetings.</u> States how Board meetings are agendized and conducted. Much of it reflects the requirements of the Brown Act and is comprised of existing Board practices and, highlighted in green. New provisions include the manner in which items are added to

Originating Department: Office of General Counsel	Department Director or Manager: Derek McDonald	CEP Forms? N/A	Board Action Type: Administrative
Funds Available: N/A	Budget Coding: N/A		Approved: 
Attachment(s): Draft Board of Directors Governance Policies			

Title:	Discuss and Consider Governance Policies for the Board of Directors	Meeting Date:	July 9, 2024

meeting agendas and the manner in which documents from members of the public must be submitted for approval for public display at a Board meeting. The Policy also states the Brown Act procedure for addressing disruptions of Board meetings.

- **Election of Board Officers and Committee Assignments.** Describes the existing process for electing Board officers (President and Vice President), as well as other existing aspects of holding office, highlighted in green. It also states the qualifications for holding Board officer positions and states a formalized process for removal of a Board officer.
- **Board Member Orientation and Training.** Formalizes the required onboarding and training for newly elected or appointed Board members, and consequences for a Board member's failure to complete required training. It also states the legally required ongoing training requirements for Board members, highlighted in green.
- **Role of Board Committees.** With the exception of two bulleted policy items on the limits of Committee authority, this Policy describes existing Board practices, highlighted in green.
- **Ethics of the Board of Directors.** Replaces existing District Policy 6.04 – Ethics of the EBMUD Board of Directors. In lieu of any highlighting, changes to Policy 6.04 are shown in redline and largely reflect the removal of some provisions of the Policy to separate, new policies.
- **Protection of Whistleblowers.** Portions of this policy were taken from Policy 6.04 and are highlighted in green.
- **Board Member Compensation and Benefits.** Provides the requirements for Board member receipt of compensation, describes the process for adjusting the Board's compensation, and describes Board member benefits. Existing practices and MUD Act requirements are highlighted in green. The Policy includes clarifying details on excused absences and late arrivals at Board meetings.
- **Reimbursement of Director Expenses.** Replaces existing District Policy 4.14 – Reimbursement of Director Expenses. In lieu of any highlighting, changes to Policy 4.14 are shown in redline.

SUSTAINABILITY

Economic

The Policies to be discussed are intended to minimize the economic impact on the District.

Social

The intent of the Policies is to ensure that all business conducted by the Board complies with District Policies and state law.

Environmental

The Policies will not have an environmental impact.

ROLE OF THE BOARD OF DIRECTORS

SUPERSEDES

N/A

Purpose and Scope	The Board of Directors is the legislative body of the East Bay Municipal Utility District (EBMUD). It sets policy for EBMUD and operates in accordance with the Municipal Utility District Act and all other applicable laws. This Governance Policy describes the purpose of the Board, specific job duties of Board members, and the working relationship between Board members and the General Manager.
Purpose of the Board	The Purpose of the Board is to: • Identify and implement the mission, values and vision of EBMUD in the form of EBMUD policy. • Identify the quantitative and qualitative results that reflect the policy set by the Board. • Monitor EBMUD's performance against the results the Board has set for EBMUD. • Make those operational decisions designated by law. • Hire, evaluate and, when necessary, discharge the General Manager, the General Counsel and the Secretary of the District.
Board Member Job Description	The specific job duties of Board members are to: • Adopt and regularly update a Strategic Plan for the District that reflects the mission, values and vision of EBMUD. • Adopt written policies that further the Strategic Plan and mission of the District, while ensuring a high-quality of governance and clear roles in decision-making between the Board and EBMUD staff. • Regularly evaluate the performance of the General Manager and General Counsel. • Communicate with EBMUD customers and community stakeholders to understand their concerns, values and viewpoints. • Adopt a budget for EBMUD. • Serve as ambassadors for EBMUD and build relationships throughout EBMUD's service area and in those areas of the state impacted by EBMUD's policies and activities. • Utilize an external auditor to audit EBMUD's finances at least annually. • Adopt rates, rules and regulations for the services and commodities provided by EBMUD. • Take such actions as are required by law.
Board Member-General Manager Relationship	The Board sets District policy and the General Manager is responsible for execution of policy. • The Board provides policy direction and instructions to the General Manager on matters within the authority of the Board. • Members of the Board deal with matters within the authority of the General Manager through the General Manager, except when they pertain to the functions of the General Counsel.

Role of Board Officers

Role of the Board President

The role of the President is to:

- Administer regular Board meetings in accordance with Governance Policy GP.XX.
- Serve as presiding officer at all Board meetings;
- Maintain proper conduct of Board meetings;
- Run effective and efficient meetings, including but not limited to ensuring appropriate opportunities for public participation and managing the time;
- Keep the Board focused on the discussion at hand and true to its proper role and responsibility;
- Avoid diversions from the agenda or disruptions in the conduct of District business;
- Maintain proper and appropriate parliamentary procedure and agenda management (e.g. ensure that actions are taken with proper motions and seconds);
- Sign resolutions, ordinances and other various Board-approved documents on behalf of the Board;
- Recommend appointments to Standing Board Committees, Ad Hoc Committees, Joint Powers Authorities (JPAs), and representatives to outside agencies; and
- Act as an official representative of EBMUD for ceremonial purposes.

Role of the Board Vice President

The Role of the Vice President is to:

- Perform the duties of the President in the President's absence.
- If both the President and Vice President are absent, the Board member with seniority among the Board members present shall serve as president pro tem until such time as the President or Vice President is present.

Role of Committee Chairs

The role of a committee Chair is to:

- Administer committee meetings in accordance with Governance Policy GP.XX;
- Maintain proper conduct of committee meetings;
- Run effective and efficient meetings, including but not limited to ensuring appropriate opportunities for public participation and managing the time;
- Keep the committee focused on the discussion at hand and true to its proper role and responsibility;
- Avoid diversions from the agenda or disruptions in the conduct of District business;
- Maintain proper and appropriate parliamentary procedure and agenda management (e.g. ensure that actions are taken with proper motions and seconds);
- Report to the Board at the next regular Board meeting following a committee meeting any discussions held at the committee meeting and any recommendations by the committee on actions to be taken by the Board.

Role of Board Joint Powers Authority (JPA) Representatives

The role of a Board member representative on a JPA is to:

- Represent the District at meetings of the JPA.
- Vote on behalf of the District on matters before the JPA in accordance with the directives of the Board or policies of the District.
- Report to the Board at the next regular Board meeting following a JPA meeting the actions taken by the JPA.

BOARD MEMBER CODE OF CONDUCT

SUPERSEDES

N/A

Purpose and Scope The East Bay Municipal Utility District (EBMUD) Board of Directors is committed to acting in the best interests of the District's ratepayers and the public and to protect the environment and the natural resources with which the District is entrusted, providing excellence in leadership and prioritizing the District's mission over personal or other interests. This Governance Policy states a code of conduct to be followed by Board members to assist in the proper governance of the District in accordance with these principles.

General Principles of Conduct The following principles shall apply to all conduct by members of the Board.

- The Board is responsible for monitoring the District's progress in attaining the policy objectives set by the Board.
- Board members shall uphold the highest standards of integrity, honesty, and ethical behavior in all EBMUD-related activities.
- Board members shall avoid impropriety or the appearance of impropriety in their activities.
- Board members shall always demonstrate loyalty to the District and act in the best interest of the District its ratepayers and the public.
 - Board members shall never allow their actions to be dictated by personal interests.
 - Board members shall maintain the interests of the District and its ratepayers above all else.
- Board members will demonstrate the District's values of Stewardship, Integrity, Respect, and Teamwork.
- Board members shall conduct themselves with civility, respect, and professionalism with each other, District staff, and the public.
- Board members shall recognize that they are not vested with individual authority on behalf of the District.
- Each Board member shall respect the decision-making authority of the Board and shall abide by Board-adopted policies and District-adopted procedures.
- Board members shall familiarize themselves with and comply with all applicable laws and regulations governing EBMUD operations, about which Board members can seek advice from the General Manager or Secretary of the District, or legal advice from the General Counsel, when necessary.

Conduct Between Board Members The following principles shall apply to all conduct between Board members when interacting with each other.

- Each Board member shall respect the dignity, values and opinions of other Board members, focusing on policy issues and not personalities.
- The Board shall work as a team, striving to reach consensus on policy decisions to the extent possible, recognizing that each Board member may have a unique perspective on a policy issue.
- No Board member shall put the personal interests of any other Board member above the interests of the District.
- Board members shall be prepared for any Board meeting deliberations in which they are required to or wish to take part.

**Conduct When
Representing the
District in Public**

-
- Board members shall not communicate with each other outside of publicly-noticed meetings in a manner that violates the Brown Act.
-

The following principles shall apply to all conduct by Board members when interacting with constituents or representing the District in public settings.

- When responding to constituent requests and concerns, Board members shall be courteous, responding to individuals promptly and in a positive manner and directing their questions to the General Manager and the Community Affairs Representative for the Board member's ward.
 - Board members shall be open and transparent in their actions and decisions, ensuring that all discussions, deliberations and documents subject to open meeting and public disclosure laws are readily accessible to the public.
 - In communicating with the governing bodies of other agencies, the press, or other members of the public:
 - Board members shall not speak on behalf of the District or the Board except when discussing adopted District policies or stated Board decisions.
 - In all other circumstances, Board members shall make it clear that their opinions and representations are their own and do not reflect the opinions or policies of the District or the Board as a whole.
 - Board members are encouraged to notify the General Manager in advance if they plan to speak publicly in opposition to a District decision or policy.
 - Board members shall at all times endeavor to express their individual opinions in a responsible manner that is not detrimental to the District or other Board members and staff.
-

**Conduct Towards
District Staff**

The following principles shall apply to all conduct by Board members towards District staff.

- The primary responsibility of the Board is the development, evaluation and adoption of District policies. All matters concerning the day-to-day operations of the District are the responsibility of the General Manager.
 - Each Board member should develop a working relationship with the General Manager in which issues of policy and procedure can be discussed .
 - No Board member shall attempt to exercise individual authority over any District staff member except as explicitly set forth in District policies and procedures.
 - Board members shall respect the role and authority of the General Manager and the District's senior management team and employees in the day-to-day management and operations of the District.
 - If a Board member has a concern about or criticism of the actions of a District staff member or members, the Board member shall address the concern or criticism to the General Manager and shall not state the concern or criticism in a public forum, in order to respect the privacy of and avoid embarrassment of the staff member or members.
 - All Board members' requests for information or clarification regarding District policies, procedures or operations, especially those involving personnel decisions, District operations and District finances, should be referred directly to the General Manager.
-

- When requesting the creation of memoranda, reports, plans, or other documents or materials, Board members shall be mindful of the impact of their request on the use of staff time and resources.

Acknowledgement of Code of Conduct Each Board member shall execute a copy of this Governance Policy provided by the Secretary of the District in acknowledgment of its contents within 30 days of the adoption or amendment of this Governance Policy, or within 30 days of taking the Oath of Office for newly-elected or newly-appointed Board members.

BOARD MEETINGS

SUPERSEDES

N/A

Purpose and Scope	The East Bay Municipal Utility District (EBMUD) Board of Directors strives to be fully transparent in the conduct of the District's business and to conduct Board meetings in full compliance with the Ralph M. Brown Act (Brown Act) to allow for public access and participation. This Governance Policy discusses the timing of Board meetings and the manner in which they will be held.
Time and Place of Meetings	<u>Regular Board Meetings</u> - Regular Board meetings are held on the second and fourth Tuesday of each month. - The regular meeting is divided into two segments: closed session at 11:00 a.m. and the regular business meeting at 1:15 p.m. <u>Planning Committee</u> Meetings of the Planning Committee will be held at 9:15 a.m. on the second Tuesday of each month. <u>Legislative/Human Resources Committee</u> Meetings of the Legislative/Human Resources Committee will be held at 10:15 a.m. on the second Tuesday of each month. <u>Finance/Administration Committee</u> Meetings of the Finance/Administration Committee will be held at 10:00 a.m. on the fourth Tuesday of each month. <u>Sustainability Committee</u> Meetings of the Sustainability Committee will be held at a time to be determined on the fourth Tuesday, on a quarterly basis. <u>Board Workshops</u> Board Workshops are special meetings under the Brown Act that will be held at a time to be determined on either the second or fourth Tuesday of the month or on a date and time to be determined by the General Manager in consultation with the Board President. <u>Retirement Board</u> The EBMUD Retirement Board meets bi-monthly at 9:00 a.m. on the third Thursday of January, March, May, July, September, and November, respectively. The Retirement Board may change the meeting date from a third Thursday to either a second or fourth Thursday if the third Thursday in the month is in the same week as a regular Board meeting. <u>Date, Time, and Place Considerations for All Meetings</u> - All Board meetings shall be held in the Boardroom of EBMUD's Main Administration Building located at 375 11th Street, Second Floor, Oakland, California. - The meeting dates above are subject to cancellation. - The start times of Board committee meetings stated above may be adjusted to accommodate the agenda for a committee meeting. - A special meeting of the Board, Retirement Board, or Board committee may be called by the presiding officer, committee chair, or a majority of members of the legislative body of the Board, Retirement Board, or Board committee.

Setting Meeting AgendasRegular Board Meeting Agendas

- The Secretary's Office, in coordination with the General Manager, shall draft the regular Board meeting agenda. The General Manager shall review it with the Board President.
- The Board President may add or delete items for consideration from the regular meeting agenda as the President feels appropriate.
- The Board President shall not remove items for consideration from the regular meeting agenda that are required by law or necessary for the District to conduct its business.

Committee Meeting Agendas

- The Secretary's Office, in coordination with the General Manager, shall draft all committee meeting agendas. The General Manager shall review committee meeting agendas with committee Chairs.
- Committee Chairs may add or delete items to committee meeting agendas and may approve the final agenda. However, it is the preference of the Board that committee Chairs direct that items for consideration be placed on a committee meeting agenda in advance rather than review and approve committee meeting agendas, so as to allow staff time to prepare necessary committee reports in advance of consideration of an item.

Workshop or other Special Meeting Agendas

- The Secretary's Office in coordination with the General Manager shall draft workshop or other special meeting agendas. The General Manager shall review these agendas with the Board President.
- The Board President may add or delete items for consideration from the workshop or special meeting agendas as the President feels appropriate. The Board President shall not remove items for consideration from the special meeting or workshop agendas that are required by law or for the District to conduct business.

Agenda Items Originating from a Board Member

Board Members may request that an item be placed on a future Board agenda by making a request during the Board meeting, most often under "Other Items for Future Consideration." If a majority of Board Members concur with the request, staff will place it on the list of upcoming agenda items and track it for an appropriate meeting.

The Public's Role in Setting Meeting Agendas

Members of the public may request that items of concern be placed on a future regular or committee meeting agenda during a meeting's public comment period. EBMUD shall have the sole discretion to add any requested item for consideration to an agenda.

Urgency Agenda Items

In rare cases, a legitimate urgent need may arise that must be acted upon by the Board even though the item was not on the posted agenda. The Board may discuss and take action on an urgency item under the following circumstances:

- A majority of the Board determines that an emergency, as defined by Government Code section 54956.5, exists; or
 - Pursuant to a two-thirds vote of the Board Members present at a meeting (or all Board Members if less than five are present), the Board determines that there is an immediate need to take action, and the need arose after the agenda posting deadline.
-

	The General Counsel shall be consulted on the addition of any urgency item to a meeting agenda.
Posting Meeting Agendas	All Board meeting agendas shall be posted in accordance with the Brown Act in the front window of the lobby of EBMUD's Main Administration Building and on EBMUD's website.
Application of the Sturgis Standard Code of Parliamentary Procedure	The Board shall follow the Sturgis Standard Code of Parliamentary Procedure (Sturgis) for all aspects of the conduct of Board meetings not otherwise required by law, to the extent reasonably practicable. Deviation from Sturgis in the conduct of Board meetings shall not be grounds for the invalidation of any lawful action taken by the Board.
Public Comment at Board Meetings	<u>Opportunity for Public Comment</u> Members of the public shall have the opportunity to address the Board at all regular meetings and committee meetings on matters within the jurisdiction of the Board. • Comments on non-agenda items will be heard during the general public comment period at the beginning of the meeting. • Comments on agenda items will be heard when the item is up for consideration. • Members of the public are encouraged but shall not be required to identify themselves by name in order to make a public comment. The Board is limited by the Brown Act to providing a brief response, asking questions for clarification, or referring a matter to staff when responding to public comment on items that are not listed on the meeting agenda. <u>Management of Public Comment</u> • Each member of the public who wishes to address the Board shall be allotted three minutes to speak. This time shall be doubled if the speaker requires a translator. • The Board President shall have the discretion to amend this time for any or all speakers, taking into consideration such factors as the number of speakers or whether a single speaker is representing a group of interested persons. • The Secretary will call each speaker in the order in which a speaker card was received or, in the case of remote appearances, a hand was raised. • The Secretary will track time and inform each speaker when the allotted time has concluded. <u>Manner of Public Comment</u> <i>In Person</i> Members of the public who are present in the Boardroom who wish to address the Board may fill out and submit to the Secretary of the District a speaker card, which shall be available in the foyer of the Boardroom. <i>Via Online Platform (e.g., Zoom)</i> • Members of the public who participate in a Board meeting via an online platform and wish to address the Board may use the "raise hand" or other available feature to indicate they wish to make a public comment. • When prompted by the Secretary, members of the public participating via an online platform should state their name, affiliation if applicable, and the topic they wish to

address, without revealing any personal information such as home addresses or phone numbers.

- To provide for the orderly conduct of meetings, neither screen sharing nor the chat feature shall be enabled for public commenters over online platforms. If a member of the public wishes to display materials during a Board meeting, they must submit materials to the Secretary's Office for approval by the Board President at least 72 hours before said meeting. If approved, the Secretary will display the materials during the meeting on behalf of the requestor.

Submitting Written Comments or Materials to the Board

- Members of the public who wish to provide written comments or other written materials to the Board should email them to the Office of the Secretary at SecOffice@ebmud.com.
- The email submitting the written comments or documents should state the meeting date and agenda item number or non-agenda item in the subject line of the email.
- To have written comments and emails filed in the record for a Board meeting, emails should be received by the Office of the Secretary by 4 p.m. the day prior to the scheduled meeting.

Disruption of Board Meetings

- Any person who engages in behavior that disrupts, disturbs, impedes, or renders infeasible the orderly conduct of a Board meeting, including, but not limited to, failing to comply with the procedures of this Governance Policy, may be warned by the presiding officer and, if the behavior continues following the warning, removed from the meeting at the direction of the presiding officer.
- Any person who engages in behavior that constitutes use of force or a true threat of force may be removed from a Board meeting at the direction of the presiding officer without warning.
- The presiding officer may suspend a Board meeting and order the clearing of the Board room in order to stop disruption of the meeting and/or facilitate removal of disruptive persons.

Updates to Online Board Meeting Participation Procedures

Specific procedures for participating in Board meetings via an online platform and for submitting written comments and documents to the Board will be updated from time to time on EBMUD's website.

Policy GP.XX, Board Member Compensation and Benefits

ELECTION OF BOARD OFFICERS AND COMMITTEE ASSIGNMENTS

Purpose and Scope	The Officers of the Board of Directors of the East Bay Municipal Utility District (EBMUD) are the President and the Vice President. This Governance Policy describes the manner of electing and removing Board Officers, qualifications of Board Officers, and the assignment of Board members to Board committees, Joint Powers Authorities (JPAs), and other Board assignments.
Election of Board Officers	<u>Time of Election</u> Board Officers shall be elected as the first order of business during the first regular Board meeting of the calendar year. <u>Nomination of Officers</u> • Each Board member has the right to nominate a Board member, including themselves for the role of President or Vice President. • Each nomination must be seconded by a Board member. • If more than one Board member is nominated to an Officer position, each nominee must be put to vote in the order the nomination was made. <u>Vote for Board Officers</u> The positions of President and Vice President shall be elected by a majority vote of the Board (four of seven Board members).
Qualifications of Board Officers	It is important that any Board member being considered for election to an Officer position have the qualifications and experience necessary for effective governance. Therefore, a Board member shall fulfil the following prerequisites prior to being eligible to serve as President or Vice President: • Service on the Board for at least one year prior to the date of the Officer election; • Completion of all required Orientation and Training under Policy GP.XX; and • Attendance of at least one [specify conference or conferences]. In addition to the requirements above, a Board member shall have served as Vice President for a minimum of one year in order to be eligible to serve as President. In the event that no Board member meets these requirements to serve as President or Vice President, a majority of the Board may vote to waive the requirements.
Term of Board Officers	The term of each Board Officer shall begin immediately following the vote by the Board and shall continue until a new Board Officer is elected. Each Board Officer may serve for no more than two consecutive one-year terms in each Board Officer position, unless a situation arises in which the majority of the Board votes to allow an Officer to hold three or more consecutive terms. During the absence of the President from any Board meeting, the Vice President shall preside. If both the President and Vice President are absent, the Board member with seniority among the Board members present shall serve as president pro tem until such time as the President or Vice President is present.
Removal of Board Officers	A vote to remove a Board Officer may be initiated following a motion by any Board member and seconded by another Board member. A Board Officer shall be removed by a majority vote of the Board (four of seven Board members).

Committee
Assignments

The President shall recommend Board members to serve on standing Board committees, the Retirement Board, and the boards of JPAs (each a “committee”).

- Board members shall submit their request for committee assignments to the Secretary of the District by the close of business on the Friday following the first Board meeting in January of each year.
- The President of the Board shall prepare a proposed list of assignments, including the chair of each District committee, to be considered by the Board at the second Board meeting in January of each year.
- The Board shall vote to approve the proposed assignment list by a majority vote of the Board (four of seven Board members) at its second Board meeting in January.
- New committee assignments shall be in effect starting the next meeting following the approval of the assignments.
- Board members shall have completed all orientation and training under Policy GP.XX to be eligible to serve as Chair of a committee. The Board President may waive this requirement in special circumstances.
- The President may recommend members of an ad hoc committee or members may self-nominate for committee membership. The Board shall vote to approve the membership of an ad hoc committee by a majority vote of the Board (four of seven Board members).

BOARD MEMBER ORIENTATION AND TRAINING

SUPERSEDES

N/A

Purpose and Scope Newly elected or appointed Board members will complete an onboarding orientation so that they may engage in informed and effective deliberation and decision-making. Board members will also complete all other required District and statutorily-required training. This Governance Policy states the onboarding and training requirements for all Board members.

Onboarding and Training of Newly Elected or Appointed Board Members

In order to effectively govern, it is important for new Board members to be familiar with the policies, procedures, and operations of the District. During the first three months following election or appointment, the Board member will participate in the following onboarding presentations and tours:

- Organization Overview, Public Affairs, Administrative Support, Legislative Programs;
- Water Quality and Environmental Protection;
- Long-Term Infrastructure Investment and Local Water System Tour;
- Long-Term Water Supply, East Bay Watershed Master Plan, and East Bay Watershed Tour;
- Upcountry Facilities Tour;
- Wastewater System and Lab Tour;
- Long-Term Financial Stability and Cybersecurity/Information Systems Overview;
- Customer and Community Services;
- Workforce Planning and Development; and
- Personal Benefits Orientation and Selection.

New Board members shall also complete California Special Districts Association training for new Board members.

Ethics and Litigation Presentation

Board members must conduct themselves in an ethical and transparent manner in the governance of the District. In the first month following election or appointment, each Board member will receive a presentation from the Office of General Counsel on:

- The Municipal Utility District Act;
- Open meeting requirements under the Ralph M. Brown Act;
- Board governance and Ethics of the EBMUD Board of Directors;
- California Conflict of Interest Laws; and
- The Public Records Act.

Required Ongoing Training

All Board members, as public officials, shall be required to complete the following trainings, as required by law:

- In accordance with Assembly Bill (AB) 1661, at least two hours of preventing harassment training within six months of assuming office and every two years following the initial training.
- In accordance with AB 1234, at least two hours of ethics training no later than one year from the date the Board member assumes office and every two years thereafter.

Board members' ethics and preventing harassment training certificates will be posted on the District's website.

**Failure to Complete
Required Ongoing
Training**

Any Board member who fails to complete the onboarding process, ethics and required ongoing training above shall:

- Be ineligible to serve as a Board Officer (President or Vice President), chair a standing Board committee, serve on an ad hoc committee, serve on the Retirement Board or serve on the boards of Joint Powers Authorities;
 - Be ineligible for approval of travel on behalf of the District or reimbursement of travel expenses; and
 - Have information posted on the Board of Directors' District web page identifying incomplete training until such time as the required training has been completed.
-

Authority

Resolution No. xxx, (date).

ROLE OF BOARD COMMITTEES

SUPERSEDES

N/A

Purpose and Scope

The purpose of Board committees is to assist the Board of Directors in its work and activities by becoming educated on topics within the purview of the committee and making recommendations to the Board on actions to be taken. This Governance Policy describes the role of Board committees, Board member service on Joint Powers Authority boards, and the role of the Retirement Board. Committee members are assigned as set forth in Policy GP.XX.

Role of Standing Committees

The following are the roles and responsibilities for all standing committees:

- With the exception of the Retirement Board, each committee shall consist of three Board members assigned in accordance with Policy GP.XX, Election of Board Officers and Committee Assignments.
- Each committee shall receive staff updates on topics within the purview of the committee, as stated below, and shall work with the General Manager and provide direction on preparing policy alternatives.
- For any action to be taken by the Board that was first presented to a committee for consideration, the committee shall inform the Board on its discussions regarding the action, including any relevant policy alternatives, and make a recommendation to the Board on the action to take.
- Though committees may recommend a preferred action or policy decision to the full Board, committees do not have the authority to direct staff to exclude any reasonable action or policy alternative from consideration by the full Board.
- Committees shall not speak for nor act on behalf of the full Board except when expressly so authorized by the Board for a specific and time-limited purpose.
- The committee Chair or in the absence of the Chair, a representative, should report on the discussions of the standing committee at the Board meeting following the committee meeting.

The following are the roles and responsibilities for each standing committee:

- *Finance/Administration Committee*. Reviews District investments, debt service, and related policies, fees and charges, audits, contracts and grants, and policies for acquisition of equipment or services. Conducts interviews and recommends an external auditor for approval by the full Board.
- *Planning Committee*. Reviews planning of facilities, capital projects, operational standards, and the acquisition, development and disposition of real property.
- *Legislative/Human Resources Committee*. Discusses legislative goals and programs, employee relations-related issues, personnel policies, affirmative action issues, District training and development, and EBMUD's Contract Equity Program.
- *Sustainability Committee*. Discusses matters related to energy, sustainability, natural resources and the environment.

Creation and Role of Ad Hoc Committees

The Board may appoint ad hoc committees to serve for a limited duration to address a specific topic of interest to the Board.

- Ad hoc committees may consist of two or three Board members and shall consist of less than a quorum of the Board and shall not be comprised of a quorum of a standing committee.
- An appointment of an ad hoc committee is considered during a regular, public meeting, and the full Board votes on the recommended committee members.

	• Ad hoc committees may set their own meeting schedule. Meetings of an ad hoc committee are not required to be publicly noticed or made open to the public under the Brown Act. • Each ad hoc committee shall report its activities to the full Board at a publicly noticed regularly scheduled Board meeting as necessary, with the exception of an ad hoc committee appointed to negotiate contracts or contract amendments with the General Manager and General Counsel, in which case the ad hoc committee may receive direction from the Board in closed session.
Board Member Service on Joint Powers and Other Authorities	From time to time, the Board may appoint one or more Board members or EBMUD staff to serve as an EBMUD representative on a Joint Powers Authority (JPA), trade association or liaison committee. • Service on a JPA, association or liaison committee shall be in accordance with Policy GP.XX, Board Member Code of Conduct and Policy GP.XX, Ethics of the EBMUD Board of Directors. • At the next regularly scheduled Board meeting following a meeting of a JPA, trade association or liaison committee, the Board member representative shall report on activities of the JPA, trade association or committee.
Board Member Service on Retirement Board	The Retirement Board is a separate governing body from the EBMUD Board of Directors. It is publicly charged with responsibility to administer the Retirement System and the Retirement Fund for the benefit of its members, and to secure the payment retirement allowances and other post-retirement benefits authorized by the Retirement Ordinance. It consists of three members (two (2) EBMUD Board members and the General Manager) appointed by the EBMUD Board of Directors, two members elected by and from the membership of the Retirement System (current employees), and one non-voting Retired Member elected by retired members.
Authority	Resolution No. xxx, (date).

ETHICS OF THE EBMUD BOARD OF DIRECTORS

SUPERSEDES

~~28-26 SEP 23~~**FEB 19**
(Pol. 6.04)

~~IT IS THE POLICY OF THE EAST BAY MUNICIPAL UTILITY DISTRICT BOARD OF DIRECTORS TO:~~

~~Promote ethical behavior in the conduct of District business.~~

Purpose and Scope

It is the policy of the East Bay Municipal Utility District Board of Directors to promote ethical behavior in the conduct of District business. The proper operation of EBMUD requires that Board members remain objective and responsive to the needs of the public, make decisions within the proper channels of governmental structure, and not use public office for personal gain. To further these objectives, certain ethical principles govern the conduct of each member of the EBMUD Board of Directors.

This policy promotes awareness of ethics, integrity and fidelity as critical elements in Board members' conduct and in achievement of the EBMUD mission. It references relevant policies, practices, and procedures that provide the legal framework and operational guidelines for addressing ethical issues.

Responsibilities of Public Office

EBMUD Board members are dedicated to the concepts of effective and democratic government by responsible elected officials. Board members:

- Uphold the Constitution of the United States and the Constitution of the State of California, and carry out the laws of the nation, the state and local governmental agencies;
- Comply with applicable laws regulating their conduct, including open government, conflict of interest, and financial disclosure laws;
- Fulfill all applicable training requirements, ~~including attending two (2) hours of ethics training (AB 1234) and two (2) hours of sexual harassment prevention training and education (AB 1664) every two (2) years in accordance with Governance Policy GP.XX;~~ and
- Work in full cooperation with other public officials, ~~unless~~ they are legally prohibited from doing so.

[California Government Code Section 1360; California Government Code 53235; California Government Code Section 87200; California Government Code Section 53237; Article 20, Section 3 of the California Constitution.]

Fair and Open Processes Involving the Public

EBMUD Board members promote fair and open public processes. Board members, and persons elected but who have not yet assumed office as members of the Board, must ~~fully~~ comply with California's open meeting law for public agencies (the Brown Act).

Disclosure of Communications

- Board members shall publicly disclose any oral or written communications they have had with persons, including, but not limited to, employees, legislators, legislative staff, public officials, developers, contractors, vendors, and consultants, that relate to matters at a Board meeting or Committee meeting in which the Board is performing an adjudicatory or quasi-judicial function.
- The disclosure may be made orally or in ~~writing~~ten-form and may be made at the start of the meeting or may be made prior to consideration of the agenda item at the meeting.

Ethics of the
EBMUD Board of Directors

NUMBER GP XX

PAGE NO.: 2

EFFECTIVE DATE: DD MON YY

- The Board shall make a good faith effort to comply with these Disclosure provisions of this Policy. A good faith failure to comply with these provisions shall not be construed to be a violation of this Policy.

[California Government Code Section 54950 and following; California Government Code Section 54952.1; California Government Code Section 54959.]

**Fair and Equal
Treatment**

EBMUD Board members promote diversity, equity, inclusion, and equality in personnel matters and in contracting, consistent with state and federal laws.

- Board members, in performance of their official duties and responsibilities, will not discriminate against or harass any person on the basis of race, color, religion, creed, sex, gender (including breastfeeding), gender identity (including transgender status), gender expression, marital or registered domestic partnership status, age for individuals forty or older, national origin, ancestry, disability (mental and physical), medical condition (cancer and genetic characteristics), genetic information, sexual orientation, military and veterans status, family or medical leave status, pregnancy (including childbirth or related medical condition), pregnancy disability leave status, or any other status protected by federal, state and/or local laws.
- Upon receiving notice of a violation of District Policy 6.06, Equal Employment Opportunity (EEO), a Board member will immediately report the alleged violation to the General Manager. If a complaint is made against the General Manager, the Board member will report the violation to the General Counsel.
- Board members will not grant any special consideration, treatment, or advantage to any person or group beyond that available to every other person or group in similar circumstances.
- Board members will cooperate in achieving the equal opportunity objectives of EBMUD.

[See, e.g., Article 1, Section 31 of the California Constitution; Age Discrimination in Employment Act of 1967; Americans with Disabilities Act Amendments Act of 2008; Fair Employment and Housing Act; Rehabilitation Act of 1973; Title VII of the Civil Rights Act of 1964; California Labor Code Section 1102. See also EBMUD's Policy 6.06, Equal Employment Opportunity (EEO); Policy 6.08, Contract Equity Program; Policy 6.07, Prevention of Workplace Harassment; and Policy 2.02, Accommodation for Individuals with Disabilities in the Workplace.]

**Proper Use and
Safeguarding of
EBMUD Property
and Resources**

EBMUD Board members exercise responsible management of District property and resources in the conduct of District business.

- Board members will safeguard EBMUD property, equipment, moneys, and assets against unauthorized use or removal, as well as from loss including criminal acts or breach of trust.
- A Board member will not ask or require an EBMUD employee to perform services for the personal benefit or profit of a Board member or employee.
- Each Board member will protect and properly use any EBMUD asset within his or her control, including information recorded on paper or in electronic form.
- Board members will maintain written records, including expense accounts, in sufficient detail to reflect accurately and completely all transactions and expenditures made on EBMUD's behalf.
- Board members will adhere to District policies.

[Article 16, Section 6 of the California Constitution; Penal Code Section 424. See also EBMUD Policy 7.04, Access to District Property for Tours; Policy 7.06, Pardee Conference and Lodging Facility Use; Policy 7.11, Use of District Bay Area Facilities; Policy ~~4.44~~GP XX, Reimbursement of Director Expenses; Policy 4.20, Use of District Technology Resources]

**Use of Confidential
Information**

Board members will safeguard confidential information.

Board members will not disclose information that legally qualifies as confidential to unauthorized persons without approval of a quorum of the Board. This includes information that:

(1) has been received for, or during, a closed session Board meeting, either in writing or as part of a discussion,

(2) is protected from disclosure under the attorney/client or other evidentiary privilege, or

(3) is not disclosable under the California Public Records Act.

A Board member may make a confidential inquiry or complaint to a district attorney or grand jury concerning a perceived violation of law, including disclosing facts to a district attorney or grand jury necessary to establish the alleged illegality of a District action. Prior to disclosing confidential information, however, a Board member will first bring the matter to the attention of either the President of the Board or the full Board, in a lawful and appropriate manner, to provide an opportunity to cure an alleged violation.

[California Government Code Section 54963; California Government Code Section 1098]

**Conflicts of
Interest**

Board members avoid both actual conflicts of interest and the appearance of conflicts of interest with the District.

- A Board member will not have a financial interest in a contract with the District, or be a purchaser at a sale by the District or a vendor at a purchase made by the District, unless his or her participation is legally authorized.
- A Board member will not participate in the discussion, deliberation or vote on a matter before the Board, or in any way attempt to use his or her official position to influence a decision of the Board, if he or she has a prohibited interest with respect to the matter under California law.
- A Board member will not accept any honoraria.
- A Board member will not accept gifts that exceed the limitations specified in California law. Board members will report all gifts, campaign contributions, income

	and financial information as required under the District's Conflict of Interest Code and the provisions of the Fair Political Practices Act and Regulations. A Board member will not recommend the employment of a relative to the District or to any person known by the Board member to be bidding for or negotiating a contract with the District. <i>[California Government Code Section 87100 and following; California Government Code Section 1090 and following; California Government Code Section 81000 and following; California Government Code Section 87105; California Government Code Section 89502; Penal Code Sections 68 and 70, and EBMUD Conflict of Interest Code.]</i>
Soliciting Political Contributions	Board members will not solicit political funds or contributions of in-kind services at EBMUD facilities or use EBMUD equipment. - A Board member will not solicit or direct a political contribution or in-kind services from District officers, employees, consultants or contractors, or from vendors or consultants that have a material financial interest in a contract or other matter while that matter is pending before EBMUD. - A Board member will not use EBMUD's seal, trademark, stationary, or other indicia of EBMUD's identity or facsimile thereof in any solicitation for political contributions. <i>[California Government Code Section 3205 and EBMUD Campaign Finance Reform Ordinance.]</i>
Incompatible Offices	Except as expressly permitted by law, Board members appointed or elected to another public office, the duties of which may legally require action contradictory or inconsistent with the interests of the first entity, will resign from the first entity. <i>(See, generally, California Government Code Section 109973 Cal. Op. Atty. Gen. 357 (1999). See also California Government Code Section 53227, under which a special district employee may not be sworn into office as an elected or appointed member of the same special district unless he or she resigns as an employee.)</i>
Board Member-General Manager Relationship	~~The Board sets District policy and the General Manager is responsible for execution of policy.~~ ~~The Board provides policy direction and instructions to the General Manager on matters within the authority of the Board by majority vote of the Board during duly convened Board and Board committee meetings.~~ ~~Members of the Board deal with matters within the authority of the General Manager through the General Manager, except when it pertains to the functions of the General Counsel.~~ <i>[Municipal Utility District Act (MUD Act) Sections 11883, 11937 and 11939.]</i>
Exercise Responsible Financial Management	The Board ensures the District exercises responsible financial management. - The Board ensures that EBMUD maintains a system of auditing and accounting that completely and at all times shows the financial condition of the District in accordance with generally accepted accounting principles and legal requirements. - The Finance/Administration Committee will interview and recommend <u>to the Board</u> an independent auditor to conduct an annual audit of the District's books, records, financial affairs, and periodic single audits of federal funds received by the District. - The independent auditor will provide reports and present the results of their audits, <u>including recommendations made to the Board's Finance/Administration</u>

Ethics of the EBMUD Board of Directors

NUMBER: GP XX
PAGE NO.: 5
EFFECTIVE DATE: DD MON YY

Improper Activities and the Reporting of Such Activities; Protection of Whistleblowers

Committee. Reports from the auditor will be provided to the Board upon completion as part of the next Board mailing.

- Staff will respond to audit recommendations and provide periodic updates to the Board on the status of the responses to the recommendations.

[MUD Act Section 11889.]

The Board ensures that EBMUD maintains a healthy and transparent work environment.

- The General Manager has primary responsibility for ensuring compliance with the District's personnel policies and procedures, and ensuring that District employees do not engage in improper activities, for investigating allegations of improper activities, and for taking appropriate corrective and disciplinary actions. The Board ensures that the General Manager is operating the District according to law and the policies approved by the Board.
- Board members will disclose to the General Manager, to the extent not expressly prohibited by law, improper activities within their knowledge. Board members will not interfere with the General Manager's responsibilities in identifying, investigating and correcting improper activities, unless the Board determines the General Manager is not properly carrying out these responsibilities.
- A Board member will not directly or indirectly use or attempt to use the authority or influence of his or her position to intimidate, threaten, coerce, command or influence any other person for the purpose of preventing such person from acting in good faith to bring to the attention of the General Manager or the Board any information that, if true, would constitute a work-related violation by a Board member or District employee of any law or regulation, gross waste of District funds, gross abuse of authority, a specified and substantial danger to public health or safety due to an act or omission of a District official or employee, use of a District office or position or of District resources for personal gain, or a conflict of interest of a District Board member or District employee.

[Labor Code Section 1102.5 and following; California Government Code Section 53298 and 53298.5; and EBMUD Equal Employment Opportunity (EEO) Policy 6.06.]

Directors' Compensation and Expense Reimbursement

EBMUD Board members receive a monthly stipend for their public service and the amount of that stipend is reviewed annually. EBMUD reimburses Board members for actual reasonable and necessary expenses incurred in the performance of duties authorized or requested by the Board.

- EBMUD Board members receive monthly compensation in an amount set at a public meeting of the Board of Directors. Board members must attend a minimum of 50% of their assigned meetings. Meetings include regular business meetings, standing committee meetings, special meetings, joint powers authority meetings, retirement board meetings, and closed session meetings. Salary shall not be paid to a Board member for any month in which he or she has not attended the minimum number of meetings unless the Board President excuses the absence(s) for good cause. Good cause includes, but is not limited to, a Board member's illness, family emergency, or schedule conflict directly related to the business and interests of the District.

- Any Board member arriving 15 or more minutes late for a Board or Committee meeting will be considered absent from that meeting. Such absences will be taken into account when determining the minimum number of meetings attended for compensation during that period. Committee chairs or presiding

Ethics of the EBMUD Board of Directors

NUMBER: GP XX
PAGE NO.: 6
EFFECTIVE DATE: DD MON YY

	officers may excuse late arrivals, at their discretion, due to unforeseen circumstances. - Each Board member is encouraged to participate in outside activities and organizations that further the interests of the District. Board members do not receive compensation for attendance at non-District activities. Expenses incurred by Board members in connection with such activities are reimbursable, where authorized in advance or subsequently ratified by the Board President. No personal gain or loss to a Board member is intended. The following rules apply: - All expenses must be incurred in compliance with Policy 4.14, <i>Reimbursement of Director Expenses</i>. Any expense that is not specified in Policy 4.14 must be approved in a public meeting by the Board, before it is incurred. - All expenses must be reasonable and necessary and Board members will exercise prudence in all expenditures, including transportation, food, lodging, telephone, and technology related charges. - Each Board member must use government and group rates offered by a transportation or lodging provider when available. - EBMUD does not provide credit cards to Board members. Upon incurring expenses, Board members will submit a reimbursement request, accompanied by evidence of payment of such expenses that will meet the District's requirements. - At the next Board meeting, each official shall briefly report on meetings attended at District expense. If multiple officials attended, a joint report may be made. [MUD Act Sections 11908 and 11908.1; Resolution No. 35000-16, August 9, 2016; Policy 4.14, <i>Reimbursement of Director Expenses</i>; California Government Code Section 53232.2.]
Candidate's Statement	A Board member will not include false or misleading information in a candidate's statement for a general District election filed pursuant to Section 13307 of the Elections Code. [Elections Code Sections 13307 and 13313; EBMUD Campaign Finance Reform Ordinance.]
Violation of Ethics Policy	A perceived violation of EBMUD's ethics policy by a Board member should be referred to the Board President for investigation and consideration of any appropriate action warranted. In the case of a perceived violation by the Board President, the matter should be referred to the Board Vice President. <u>Nothing in this Governance Policy shall be construed to limit the right of any Board member to request that the perceived violation be placed on the agenda for determination and discussion.</u> A violation of this policy may be addressed by remedies available by law, including but not limited to: - Adopting a resolution expressing disapproval of the conduct of the Board member who has violated this policy, - Injunctive relief, or - Referral of the violation to the California Fair Political Practices Commission, District Attorney and/or the Grand Jury.

PROTECTION OF WHISTLEBLOWERS

SUPERSEDES

N/A

Purpose and Scope	The District strives to maintain a healthy and transparent work environment, free from discrimination, harassment, or retaliation based on the reporting of improper activities in the workplace. This Governance Policy describes the roles and responsibilities of the Board of Directors and the General Manager in protecting District whistleblowers.
Improper Activities	For the purposes of this Governance Policy, “improper activities” includes any violation of state or federal statute; a violation of or noncompliance with a local, state, or federal rule or regulation; or unsafe working conditions or work practices in an employee’s place of employment.
Role of the General Manager	The General Manager has primary responsibility for ensuring compliance with the District’s personnel policies and procedures, ensuring District employees do not engage in improper activities, investigating allegations of improper activities, and taking appropriate corrective and disciplinary actions.
Role of the Board of Directors	The Board ensures that the General Manager is operating the District according to law and the policies approved by the Board. Board members will disclose to the General Manager, to the extent not expressly prohibited by law, improper activities within their knowledge. Board members will not interfere with the General Manager’s responsibilities in identifying, investigating and correcting improper activities, unless the Board determines the General Manager is not properly carrying out these responsibilities. A Board member will not directly or indirectly use or attempt to use the authority or influence of their position to intimidate, threaten, coerce, command or influence any other person for the purpose of preventing such person from acting in good faith to bring to the attention of the General Manager or the Board any information that, if true, would constitute: a work-related violation by a Board member or District employee of any law or regulation, gross waste of District funds, gross abuse of authority, a specified and substantial danger to public health or safety due to an act or omission of a District official or employee, use of a District office or position or of District resources for personal gain, or a conflict of interest of a District Board member or District employee.
Claims Against the General Manager or General Counsel	The Board will be notified if, in the initial intake interview for any formal complaint that the General Manager or General Counsel has engaged in an improper activity, the complainant has alleged a prima facie case of an improper activity.
Authority	Resolution No. xxx, (date)

BOARD OF DIRECTORS COMPENSATION AND BENEFITS

SUPERSEDES

N/A

Purpose and Scope	The East Bay Municipal Utility District (EBMUD) Board of Directors fairly compensates Board members for their public service as authorized by the Municipal Utility District Act and Public Utilities Code Section 11908.1. This Governance Policy sets forth the benefits available to Board members, the manner in which the Board is to determine its compensation and the prerequisites for obtaining that compensation.
Determination of Compensation	EBMUD Board members receive monthly compensation in an amount set at a public meeting of the Board of Directors. • To receive their compensation for any given month, Board members must attend a minimum of 50% of their assigned meetings. Meetings include regular business meetings, standing committee meetings, special meetings, joint powers authority meetings, retirement board meetings, and closed session meetings. • Compensation shall not be paid to a Board member for any month in which he or she has not attended at least 50% of their assigned meetings unless the Board President or committee chair excuses the absence(s) for good cause. Good cause includes, but is not limited to, a Board member's illness, family emergency, or schedule conflict directly related to the business of EBMUD. • A Board member shall not have excused absences for more than three meeting days per calendar year for personal reasons (i.e., vacations) or attending conferences (even if the conference is directly related to the business of EBMUD). Each meeting day on which a Board member receives an excused absence for either a regular Board meeting, a standing committee meeting, a special meeting, or a combination of these meetings, shall be counted as a day for the purposes of this limit. • Any Board member arriving 15 or more minutes after roll call for a regular Board meeting, closed session, committee meeting, or special meeting will be considered absent from that meeting for the purposes of determining eligibility for compensation. The Secretary of the District will call roll no later than five minutes after the noticed start time of a meeting unless special circumstances require a later start for the meeting. • Committee chairs or presiding officers may excuse late arrivals, at their discretion, due to unforeseen circumstances. • Board members receive compensation based only on attendance at assigned meetings as described above, and do not receive compensation for attendance at non-EBMUD activities.
Annual Review of Compensation	Any adjustment to Board member compensation shall be set annually by the Board at a public Board meeting. • The Board may adjust its compensation by providing an increase or a decrease in compensation. • The Board may increase its compensation by not more than five percent (5%) annually. • If the Board has elected not to increase its compensation in any calendar year, the next time the Board considers an adjustment it may vote to increase its compensation by up to five percent (5%) for each calendar year following the operative date of the last compensation increase.

- Any Board motion to adjust its compensation shall state the effective date of the compensation adjustment.
- The Board may not apply any increase in compensation retroactively nor award itself retroactive pay in any circumstances.
- No Board action adjusting its compensation shall provide for an automatic increase to that compensation.
- The calculation of Board member compensation shall be rounded down to the nearest cent.

Board Member Benefits

- Board members shall be entitled to the following benefits from EBMUD:
- EBMUD shall provide health care benefits to Board members under the same terms and conditions as benefits are provided to EBMUD employees.
 - Board members may participate in EBMUD’s Employee Retirement System as provided in the District’s Retirement Ordinance.
 - Board members may participate in EBMUD’s deferred compensation plans under the same rules as eligible EBMUD employees.
 - Board members may participate in the Utility District Employee Association and the Utility District Credit Union under the same rules as eligible EBMUD employees.

REIMBURSEMENT OF DIRECTOR EXPENSES

SUPERSEDES

22 NOV 22(Pol. 4.14)

~~IT IS THE POLICY OF THE EAST BAY MUNICIPAL UTILITY DISTRICT BOARD OF DIRECTORS TO:~~

~~Reimburse Directors as provided in the Municipal Utility District Act, Public Utilities Code Section 11908.1, for reasonable, actual and necessary expenses that are incurred in the performance of duties authorized or requested by the Board.~~

Purpose and Scope

It is the policy of the East Bay Municipal Utility District (EBMUD) that no member of the Board of Directors experiences personal financial gain or loss as a result of service as a Director. As provided in Public Utilities Code Section 11908.1, the purpose of this Governance Policy is to state how EBMUD reimburses Directors for reasonable, actual and necessary expenses incurred in the performance of duties authorized or requested by the Board. Each Director is encouraged to participate in outside activities and organizations that further the interests of the District. Expenses incurred by Directors in connection with such activities are reimbursable, where authorized in advance or subsequently ratified-approved by the Board President. No personal gain or loss to a Director is intended.

Reimbursable Expenses

Directors are eligible for the reimbursement of expenses they incur in connection with attendance as a representative of the District at such events such as conferences and association meetings. Reimbursable expenses include:

- Travel;
- Lodging;
- Meals;
- Technology Expenses; and
- Other related expenses incurred in the performance of official District business in accordance with the Guidelines for Reimbursement of Board of Director Expenses, attached to this Policy.

Authorization of Reimbursement

Reimbursement of Director expenses must be approved as follows:

- The President of the Board of Directors will approve Reimbursable Expenses incurred by fellow Directors.
- The Vice President of the Board of Directors will approve expenses incurred by the Board President, and in the President's absence, may approve expenses incurred by fellow Directors.
- In the absence of both the President and Vice President, the Immediate Past President may also approve expenses of fellow Directors, including the President and Vice President.
- Any expense that is not specified in this Policy must be approved by the Board in a public meeting before it is incurred.
- Under no circumstance may any Director be authorized to approve their own expenses.

Rules Applicable to Reimbursable Expenses

The following rules apply to Reimbursable Expenses:

- Directors will exercise responsible fiscal management in incurring expenses as required by Policy GP6.XX04, Ethics of the EBMUD Board of Directors. All expenses must be reasonable and necessary, and Directors will exercise prudence in all expenditures.

Reimbursement of Director Expenses	NUMBER: <u>GP XX</u>	
	PAGE NO.: 2	
	EFFECTIVE DATE:	DD MON YY

	- Reimbursable Expenses will be incurred and reimbursed in accordance with the <i>Guidelines for Reimbursement of Board of Director Expenses</i>, attached to this Policy. - Each Director must use government and group rates offered by a transportation or lodging provider, when available. - EBMUD does not provide credit cards to Directors. Upon incurring expenses, Directors will submit a reimbursement request, accompanied by evidence of payment of such expenses that will meet the District's requirements. - Upon return from any conference attended on behalf of the District, a Director shall file with the Secretary of the District a written report on the Director's activities at the conference (e.g., ~~and what was learned at the conference that may be helpful to the Board or the District and what meetings or sessions the Board member attended~~). - The Secretary shall send a copy of the report to the Board President. - A Director shall not be eligible for reimbursement until they have filed the report with the Secretary. At the next Board meeting, following attendance at a conference or meeting for which a Director has received expense reimbursement, the Director ~~each official~~ shall briefly report on ~~the meetings attended at District expense~~. If multiple ~~officials~~ Directors attended, a joint report may be made.

GUIDELINES FOR REIMBURSEMENT OF BOARD OF DIRECTOR EXPENSES

PURPOSE – These guidelines are used to reimburse Board of Directors (Director) for actual, reasonable and necessary expenses while engaged in official District business, as provided in MUD Act Section 11908.1, pursuant to Policy X.XX.

Internal Revenue Service (IRS) Requirement

The District operates under an Accountable Plan, as defined in Internal Revenue Service Regulations 1.62.2. An Accountable Plan is one in which expense reimbursements are not taxable income, not wages, and not included as income. To be an Accountable Plan (according to the IRS), your employer's reimbursement or allowance arrangement must include the following rules:

- Your expenses must have a business connection - that is, you must have been paid or incurred deductible expenses while performing services as a 'Director of the District'.
- You must adequately account to your employer for these expenses within a reasonable period of time.
- You must return any excess reimbursement or allowance within a reasonable period of time.

Reasonable Period of Time: The definition of reasonable period of time depends on the facts and circumstances of your situation. However, regardless of the facts and circumstances of your situation, actions that take place within the times specified in the following list will be treated as taking place within a reasonable period of time.

- You receive an advance within 30 days of the time you have an expense.
- You adequately account for your expenses within 60 days after they were paid or incurred.
- You return any excess reimbursement within 120 days after the expense was paid or incurred.

You are given a periodic statement (at least quarterly) that asks you to either return or adequately account for outstanding advances and you comply within 120 days of the statement.

Authorization

Reimbursable Expenses That Require Prior Authorization

- Conferences, seminars, or similar training courses requiring either a registration fee or overnight lodging costing \$100 or more.
- Travel to destinations in excess of 150 miles from the Director's normal place of work or for overnight lodging of more than one night related to business travel.
- Travel advances and/or prepayment of business expenses that require submission to the Office of the Secretary.

Note: The Board President approves all prior authorization requests from Directors. The Board Vice President approves all prior authorization requests from the Board President, and in the President's absence, may approve below Director's authorization requests. In the absence of the President and/or the Vice President, the Immediate Past President may also approve authorization requests including requests from the President or Vice President. Any expenses incurred without prior written approval will not be reimbursed unless it is an emergency related to District business.

	Reimbursable Expenses That Do Not Require Prior Authorization • Conference, seminar, or similar training registration fees costing less than \$100. • One day travel less than 150 miles from the Director's normal place of work. • Training with no registration fee or overnight stay. • Business meetings or District sponsored events: ◦ Regular, adjourned regular, and special meetings of the Board. ◦ Board committee meetings (as a member or alternate at the request of the committee chairperson) whether standing or ad hoc. ◦ Seminars, and non-District meetings or functions when attending as a representative of the Board. ◦ Other services rendered as a Director. • Typical reimbursed monthly expenses: ◦ Meals – Refer to meals section. ◦ Mileage – Refer to use of private owned vehicles section. ◦ Tolls – No receipt required. ◦ Parking – Receipt required. ◦ Monthly internet charges – Reviewed and approved by Chief Information Officer. Expenses must be submitted within six months of being incurred or expense payment being made.
Qualifications	Director business expenses are reimbursed or paid directly by the District provided they are ordinary, necessary, reasonable, and within the scope of District business for the individual requesting reimbursement. Expenses must meet the following general qualifications: • Expenses incurred must comply with the provisions of this policy and all expenses must be properly authorized. • Expenses and business purpose to the District must be adequately documented and explained. Reimbursement of actual expenses requires submission of receipts for all expenses except per diem reimbursement for luggage handling and housekeeping tipping, or reimbursement of bridge tolls.
Allowable Expenses	Registration Fees Registration fees incurred to participate in conferences, training courses or other similar activities directly related to District business or interests are reimbursable. Meals Reimbursement for meals requires an itemized receipt and is limited to the IRS approved per diem rate for the area of travel. Per diem rates are subject to change at any time. The IRS approved per diem rate will be disbursed in whole dollar amounts to approximate 20 percent for breakfast, 30 percent for lunch, and 50 percent for dinner. Current per diem rates can be reviewed at the U.S. General Services Administration website, GSA Home. Click the link to "Per Diem Lookup". Meal expenses (breakfast, lunch, or dinner) are reimbursable for Directors under these specified conditions: • For one-day training, conferences, seminars, meetings, and trips.

- Business meal costs incurred must be reasonable, necessary and at appropriate locations. You must include the names of participants (if being claimed for reimbursement), and the specific business purpose of the meal. Food may be provided at on-site gatherings such as ward events.

It is the Director's responsibility to make necessary arrangements with the host for special dietary requirements. If the Director's special dietary needs request is denied by the host, the Director should receive a meal reimbursement for that meal. The Director is required to provide written details from the host indicating the special dietary needs request cannot be fulfilled.

Car Rentals

Car rentals are only approved if public transportation is not reasonably available in the area of travel. Car rentals should be for compact or mid-sized models without upgrades for one or two persons sharing transportation. For three or more persons, or as required to meet District business needs, a larger model may be rented.

The District may contract with a vehicle rental company as a preferred provider. Such a preferred provider will offer governmental rates to Directors for all travel and will not offer liability or collision insurance to Directors on District business because the District is self-insured.

Use of Privately Owned Vehicles

Reimbursement for mileage expenses incurred shall be determined as follows:

- Local and long-distance travel shall be reimbursed at the authorized IRS rate per mile.
- Long distance travel - Mileage expenses shall be based upon direct mileage between destinations as determined from established tables of highway distances.
- Directors are personally responsible to pay all traffic citations, parking tickets and any resulting towing or impound charges.
- Mileage to and from the airport and parking at the airport. A receipt is required for cabs, ride-sharing, shuttle service or airport parking.

Note: The mileage reimbursement, plus related en-route expenses per Director, shall not exceed the corresponding lowest quoted round-trip airfare plus an allowance of \$50 covering avoided costs from Oakland, San Francisco, Sacramento or San Jose to the terminal point nearest the point of destination. Lowest quoted round-trip airfare must be documented through services such as Expedia, Travelocity and Orbitz. Questions regarding "in lieu" fare levels can be verified with the Secretary of the District in advance of travel.

Lodging

Lodging expenses must be reasonable. When possible, rates should not exceed the maximum group rates published for the conference. Lodging expenses will be reimbursed only when overnight absence from the Director's home is required. An itemized receipt must be attached to the Expense Report. Overnight lodging is not authorized for conferences or seminars that are within the service area without specific advance written approval from the Board President.

Note: If double, deluxe, suite, or other premium-cost accommodations are requested, reimbursement will be at the standard rate for single room occupancy. The receipt should be annotated to show the "standard single" rate if the cost of the accommodations exceeds that rate.

Government, corporate or conference rates must be requested, when available,

and used if these rates are less than otherwise posted rates.

Transient Occupancy Tax (TOT)

When reserving a hotel reservation for a stay in City of Rancho Mirage, San Francisco and Sacramento cities and counties, complete the TOT exemption form. When you check in, show the hotel staff the form, show them your District ID and sign the TOT exemption form. Exemption forms are found on the Travel and Expense (T&E) Splashpad page

https://splashpad.ebmud.com/Travel&Expense/Transient_Occupancy_Tax.pdf.

Airline Fares

Each airline ticket purchased must be at the lowest fare consistent with the business purpose. The District does not reimburse the costs of travel agent fees incurred for the purpose of purchasing airlines tickets. Directors traveling by air for business have the option to reserve and purchase airline tickets on the Internet using their personal credit card and documenting the available fare options that reasonably meet the business purpose.

The following travel service websites are available to research and book reservations:

- Expedia.com
- Travelocity.com
- Orbitz.com
- Travelzoo.com
- Kayak.com

Not all airlines are affiliated with these travel service websites, including Southwest, Jet Blue, ATA, etc. Therefore, those airline websites should also be reviewed for cost comparisons for available flights.

After locating the lowest airfare consistent with the business purpose of the trip, if the airfare is greater than \$250 the Director must provide the information from the website(s) (travel service website and, where used, specific airline website) indicating the alternative options available, in addition to the option ticketed. That documentation must show the lowest fare available for the business trip and must accompany the Expense Report for reimbursement or payment to the District.

Miscellaneous

- Internet Access at the hotel or conference center for business use and access to District Information systems.
- Limits on gratuities are described below:
 - Business meals – 15 percent of the total cost of the meal for an individual or as automatically charged by the restaurant for a group business meal when substantiated by an itemized receipt.
 - Taxi – 10 percent of the cost of taxi fares.
 - Luggage handling and housekeeping – limited to the IRS per diem rate for the area.
 - Laundry services are only reimbursed when travel extends beyond five business days.
- Minor purchases are reimbursable up to \$500 for non-stock/non-repetitive supplies, or materials that cannot be procured economically through normal

	channels due to time or the value of the purchase.
Unauthorized Expenses	<u>Meals</u> - Meal allowances are not paid for meals en route by air when food is provided by the airline, included with the conference registration, or otherwise provided. (Snacks and continental breakfasts such as rolls, juice and coffee shall not be considered meals.) - Business discussions during mealtime between Directors, and a Director and employees do not constitute a business meal eligible for reimbursement. - Alcoholic beverages are not reimbursed except for specific events with prior written approval of the Board President. <u>Car Rental Insurance and Citations</u> Directors should not purchase, nor shall the District reimburse the cost of liability or collision insurance as the District is self-insured. Insurance authorized by the Director at the time of rental will not be reimbursed. In the event of an accident while using a rental car, refer the car rental agency to the District's Risk Management Division. Directors are personally responsible for paying all traffic citations, parking tickets and resulting towing or impound charges in a timely manner. <u>Airline Fares</u> Directors will not be reimbursed for the following airline fees: - Upgraded seating such as first-class, business class, or economy plus - When a Director prefers to use a higher class than the economy ticket for reimbursement, the Director must pay the incremental cost of the airfare and provide documentation that shows the incremental cost. - Early Bird check-in - Frequent flyer miles or rewards programs - Cancellation protection or insurance - Additional travel insurance or premiums Any requests for a particular airline or routing which results in higher fares will not be reimbursed. The additional costs of airline fares will be the responsibility of the Director. <u>Miscellaneous</u> The District provides a cell phone allowance or District cell phones for business related telephone expenses. The District does not provide any additional reimbursement for business or non-business related telephone expenses.
Travel and Expense Authorization	Travel and Expense Authorizations: - Must be completed in Elsie for reimbursement of expenses before the expense is incurred unless these guidelines specifically state otherwise. - Must be completed by each Director for all travel and approved by the Board President. - Travel and Expense Authorizations become a public record upon submission to the District for payment.

Guidelines for Reimbursement
of Board of Director Expenses
Page 6

Processing Travel and Expense Authorizations	<u>Director</u> • Requests Secretary of the District to complete Travel and Expense Authorization in Elsie before expenses are incurred. • Provides copies of the conference, seminar or training course schedule/agenda to include with the Travel and Expense Authorization. • Provides written justification stating business purpose for the expense to include with the Travel and Expense Authorization. • Completes the local TOT exemption form for lodging in California at time of check in if available in that city. <u>Office of the Secretary</u> • Prepares Travel and Expense Authorization in Elsie, attaches the required documentation and written request from the Director and obtains approval from the Board President. • Reviews and approves use of the District Purchase Card for travel and <u>business related</u> expenses and direct travel-related expense payments for up to the total approval amounts shown on Travel and Expense Authorization for transactions requiring payment via purchase/credit card. • Determines the "reasonableness" of expenses eligible for reimbursement based on time and location of travel, duration of trip and purpose of travel. • Enters Travel and Expense Authorization with supporting documentation and approvals in Elsie for processing by the Accounting Division. <u>Board President</u> • Reviews and approves Travel and Expense Authorization for reasonableness and forwards it to the Office of the Secretary. <u>Board Vice President</u> • Reviews and approves, for the Board President and all other Directors in the President's absence, Travel and Expense Authorization for reasonableness and forwards it to the Office of the Secretary. <u>Immediate Past President</u> • In the absence of the Board President and/or the Vice President, reviews and approves for the President, Vice President or other Director's Travel and Expense Authorization for reasonableness and forwards it to the Office of the Secretary. <u>Accounting Division</u> • Accounts Payable (AP) staff, under the direction of the Controller, audits Travel and Expense Authorizations submitted for compliance with procedures. • Prepares direct travel-related expense payments for up to the total approval amounts shown on the Travel and Expense Authorization for transactions requiring payment by check.
Expense Report	Expense Reports must always be completed by each Director for reimbursement of any business expense after the expense is incurred unless these guidelines specifically state otherwise. All Expense Reports must include adequate documented explanations of the business purpose of the expenses. Expense Reports become a public record upon submission to the District for payment.

Processing Expense Report	<u>Director</u> • Submits Expense Report and supporting receipts to the Office of the Secretary. Do not include any personal information such as personal credit card information, bank account information, home address or personal phone numbers. • Always check the Forms Shop for the current form. This form is updated to include current mileage reimbursement rates, regulatory and processing changes. • The Director incurring the expense cannot approve their own Expense Report. • Information in the Expense Report must be authorized in writing (e.g., via email) by <u>the Director</u> incurring the expense <u>Office of the Secretary</u> • Reviews Expense Report and attachments. • Sends Expense Report to the Board President for approval. • Enters Expense Report with supporting documentation and approvals in Elsie for processing by the Accounting Division. <u>Board President</u> • Reviews Expense Report for approval after expenses are incurred to determine the need, appropriateness, and reasonableness of each item of expense. • Sends approved Expense Report to Office of the Secretary for final review before Office of the Secretary enters Expense Report with supporting documentation and approvals into Elsie. <u>Board Vice President</u> • Reviews and approves Expense Report for the Board President and all other Directors in the President's absence after expenses are incurred to determine the need, appropriateness, and reasonableness of each item of expense. • Sends approved Expense Report to Office of the Secretary for final review before entering in Elsie. <u>Immediate Past President</u> • In the Board President and/or Vice President's absence, reviews and approves Expense Report of the President, Vice President or other Directors after expenses are incurred to determine the need, appropriateness, and reasonableness of each item of expense. • Sends approved Expense Report to Office of the Secretary for final review before entering in Elsie. <u>Accounting Division</u> • Audits all Expense Reports for compliance with procedures. • Returns incomplete Expense Reports to the Office of the Secretary with a request for adjustment or explanation. • Advises Office of the Secretary when reimbursement is available for distribution to Director.
Prepayment of	Directors requesting prepayment of expenses for a business trip are required to

Expenses	submit their requests to the Secretary of the District at least ten (10) working days prior to their scheduled departure date or event. If the District issued a prepayment of expenses, a copy of the Travel and Expense Authorization must be attached to the request. In order to account for prepaid expenses, Expense Reports must be submitted within 15 working days of completion of the business trip. For periodic expenses when a Travel and Expense Authorization is not required (tolls, BART fares, personal car mileage, etc.) an Expense Report should be submitted within six months. If the Director chooses not to purchase an airline ticket, the information regarding the ticket selection should be sent to the Secretary of the District who will purchase the ticket at the request of the Director. The charge for the amount of the ticket will be recorded as a prepaid expense to be cleared by a subsequent approved Expense Report. <u>Cancellations</u> When traveling on District business, the Director must be reasonably certain that they will be able to complete the trip. Canceling a trip for personal reasons must be approved by the Board President and may result in the Director being responsible for any non-refundable costs. Where possible, another Director may be substituted with the approval of the Board President. If a substitution needs to be made, notify the Secretary's Office and copy the Board President. <u>Business and Personal Combined</u> Any Director who wishes to combine personal and business travel should consult with the Secretary of the District who in consultation with the Controller will determine a reasonable allocation of costs. Any cost variance in airfare, car rental, or lodging must be clearly identified on the Travel and Expense Authorization. Charges to accommodate personal preferences will not be reimbursed. Use of frequent flyer miles will not be reimbursed. All other expense reimbursement rules apply.
Public Report to the Board	~~At the next Board Meeting, the Director will make an oral or written presentation to the Board regarding any authorized events attended after business travel outside of the District service area or meetings attended at the District's expense are completed. If multiple Directors attended, a joint report may be made.~~
Substantiation of Travel Expenses	Travel expenses shall be substantiated by any of the following sources: • Board meeting <u>minutes</u> • Certification of committee attendance signed by the committee <u>chair</u> • Verification of attendance at authorized meetings and functions signed by the Board President

BOARD ACTION

Agenda Number:	22a.-22e.	Meeting Date:	July 9, 2024

TITLE	WALNUT CREEK WATER TREATMENT PLANT PRETREATMENT PROJECT – CERTIFY THE FINAL ENVIRONMENTAL IMPACT REPORT AND PROJECT APPROVAL

ACTION	☐ Motion:	☒ Resolution:	☐ Ordinance:

RECOMMENDED ACTION

- Certify the Final Environmental Impact Report (EIR) for the Walnut Creek Water Treatment Plant (WTP) Pretreatment Project (Project).
- Make findings in accordance with the California Environmental Quality Act (CEQA), including a Statement of Overriding Considerations.
- Adopt the Mitigation Monitoring and Reporting Program in accordance with CEQA.
- Adopt the Practices and Procedures Monitoring and Reporting Plan.
- Approve the Project.

SUMMARY

The Project includes construction of pretreatment facilities on District property at the Walnut Creek WTP at 2201 Larkey Lane in Walnut Creek and Lafayette WTP at 3848 Mt. Diablo Boulevard in Lafayette, as shown on the attached Project Location Maps. The Project includes construction of staging areas; removal of vegetation/trees; grading; construction of new pretreatment and ozone facilities, consolidated maintenance building, buried pipelines, outdoor lighting, stormwater facilities, security fencing, and retaining walls; paving; demolition of existing facilities and maintenance facilities; and site restoration, including new trees, at the Walnut Creek WTP. The Project also includes construction of new weir structures, buried pipelines, retaining walls and paving; demolition of an existing weir structure; removal of vegetation/trees; grading; and site restoration, including new trees, at the Lafayette WTP. The pretreatment facilities at Walnut Creek and Lafayette WTPs are shown on the attached Site Plans. The proposed Project will be designed and constructed in two separate phases. Phase 1 and Phase 2 improvements include new pretreatment and ozone facilities to more reliably treat a broader range of untreated water quality and increase the capacity at the Walnut Creek WTP. Presentation on this Project were provided to the Planning Committee on September 12, 2023 and June 11, 2024, and the Board of Directors on June 11, 2024.

On June 11, 2024 under Motion No. 112-24 the Board approved postponing the vote to certify the Final EIR and approve the Project and directed staff to continue communicating with neighbors of the Project and seek to understand their issues and concerns with the Project. Staff held two follow up meetings on June 21 and June 27, 2024 with the neighbors to continue conversations and engage in a meaningful dialogue about their issues and concerns with the Project. Key comments focused on construction-related traffic, noise, and dust; long-term operational traffic; chemical safety; seismic safety; wildfire potential; emergency

evacuation; and Project alternatives. Staff responded to questions and all comments are addressed in the Final EIR.

DISCUSSION

Construction of the Walnut Creek WTP was completed in 1967. The WTP serves approximately 225,000 customers in the District's East-of-Hills service area, which includes portions of Pleasant Hill and Walnut Creek, Alamo, Lafayette, Danville, Blackhawk, and San Ramon Valley communities. The Walnut Creek WTP treats water from Pardee Reservoir and water stored locally in Briones Reservoir. The Walnut Creek WTP lacks pretreatment and ozone facilities that limit its ability to treat water from the Sacramento River or other water transfers via the Freeport facility and from neighboring water agencies via interties during planned and unplanned outages, and during droughts.

The Project will add pretreatment facilities to reliably treat a broader range of untreated Pardee and Briones Reservoir water impacted by high rainfall runoff, wildfires, algal blooms, climate change and emerging contaminants; improve the ability to treat supplemental supplies from Freeport or the interties; and improve treated water taste and odor by removing organics and adding ozone treatment. The Project will increase the Walnut Creek WTP reliable capacity to meet planned future demands; improve water system reliability and operational flexibility; and allow for the potential decommissioning of the aging Lafayette WTP, which would require significant capital investment to ensure reliability and regulatory compliance. This Project supports the District's Water Quality and Environmental Protection and Long-Term Infrastructure Investment Strategic Plan goals.

Environmental Review Process/Public Outreach

Outreach meetings with staff from the City of Walnut Creek, City of Lafayette, East Bay Regional Park District, Temple Isaiah, Contra Costa Christian School, and Buena Vista Elementary School were held throughout 2021 and 2023. A Notice of Preparation was published on February 28, 2022 and a community outreach and scoping meeting was held in March 2022 to present the conceptual site and landscape plans, discuss the potential environmental factors to be addressed in the Draft EIR, and receive community feedback. Postcards about the community meeting were sent to approximately 510 residents near the Project site, agencies and special interest stakeholders, and posted on NextDoor and the District's website. A Project briefing was provided to the Walnut Creek City Council in March 2023. The City of Walnut Creek, Native American Heritage Commission, and eight Walnut Creek residents provided written comments.

The Draft EIR was published for a 45-day public review period from September 29 to November 13, 2023. Notices of Availability were mailed to approximately 750 adjacent residents and 63 agencies and special interest stakeholders; posted at local park trailheads, the Contra Costa County Clerk Office and District's Administration Offices, and on Nextdoor; published in the East Bay Times Newspaper; emailed to all customers and residents registered in the District's Customer Management System in the cities of Lafayette and Walnut Creek totaling over 16,000; and provided two hard copies of the Draft EIR at two local libraries. Staff held a public meeting on October 19, 2023 to present findings of the Draft EIR and receive

Title:	Walnut Creek Water Treatment Plant Pretreatment Project – Certify the Final Environmental Impact Report and Project Approval	Meeting Date:	July 9, 2024

public comments. The District received 12 comment letters and emails containing 65 individual comments from the Contra Costa County Flood Control and Water Conservation District, East Bay Regional Park District, and Walnut Creek residents. In addition, staff recorded 21 verbal comments during the public meeting. After completion of the 45-day Draft EIR public review comment period, seven follow up meetings were held with the neighbors to clarify their comments and concerns to be addressed in the Final EIR. Key comments focused on construction-related traffic, noise, dust, air quality, parking, staging area activities, and temporary sound barriers; potential impacts of construction traffic crossing the East Bay Regional Park trail; long-term operational traffic; chemical safety; seismic safety; wildfire potential; emergency evacuation; visibility of new facilities from the Briones to Mt. Diablo Regional Trail; and Project alternatives. All comments are addressed in the Final EIR.

Draft EIR Analysis and Mitigation Measures

The Draft EIR analysis concluded that there are potential impacts from construction noise that may exceed the City of Walnut Creek’s nighttime (i.e., early morning) noise standards during extended days for concrete pours when ambient noise levels from haul truck traffic would be in excess of applicable standards along San Luis Road. Based on the duration of the concrete pours, noise levels would exceed the City of Walnut Creek’s noise standard for approximately 40 days during Phase 1 construction and 15 days during Phase 2 construction. The noise impacts are significant and unavoidable and require the District to approve a Statement of Overriding Considerations when approving the Project. The remaining potential impacts are either less than significant or would be less than significant with mitigation. Key mitigation measures include:

- Requiring that the Project Noise Control and Monitoring Plan include sound barriers and planting of shrubs at specific sites within the Walnut Creek WTP to reduce on-site construction noise.
- Restricting soil and demolition off-haul and large equipment delivery trucks to the hours of 9:00 a.m. to 3:30 p.m. to and from the Walnut Creek WTP.
- Requiring radar speed feedback signs on Larkey Lane and San Luis Road for the entire Project duration to deter speeding by heavy construction vehicles.
- Requiring video documentation of pavement conditions along the haul route within the City of Walnut Creek pre- and post-construction.
- Providing traffic control flaggers on extended workdays with concrete pours and soil off-hauling at the intersections of Larkey Lane with Alvarado Avenue and San Luis Road during school start and dismissal times, including contractor coordination with local elementary schools.

The District will also incorporate its standard construction specifications, District Procedures, Design Guides, and Engineering Standard Practices into the Project. These standard practices and procedures are designed to address typical characteristics of District construction projects and reflect generally applicable District standard operating procedures.

Title:	Walnut Creek Water Treatment Plant Pretreatment Project – Certify the Final Environmental Impact Report and Project Approval	Meeting Date:	July 9, 2024

Public Notice

Pursuant to Section 21092.5 of the Public Resources Code, the District mailed a Notice of Availability of the Final EIR (Draft EIR and Response to Comments) to all commenting individuals, organizations, and agencies and posted the Final EIR on the District’s website. Notice of the June 11, 2024 Board of Directors meeting was also included in the Notice of Availability. Notice was subsequently sent via email to interested parties regarding the July 9, 2024 Board of Directors meeting.

Project Schedule

Design of Phase 1 of the Project will occur from 2024 through 2027, followed by construction from 2027 through 2030. Design and construction of Phase 2 would depend on future untreated water quality conditions and the timing of future water demands.

SUSTAINABILITY**Economic**

The estimated construction cost is \$315,000,000 for Phase 1 and \$105,000,000 for Phase 2, for a total of \$420,000,000. Funding for the planning and pre-design phase is available in the FY 2024 adopted capital budget for Treatment Plant Upgrades. Funding for the design and construction phases will be considered as part of the associated budget development process.

Social

The District conducted outreach meetings with local agencies and the community while preparing the EIR to discuss the Project and solicit input. As part of the Project, the District will implement mitigation measures to reduce disruptions to residents. These mitigation measures include a noise mitigation measure to install temporary sound barriers and two transportation mitigation measures requiring construction traffic control measures, including pavement condition documentation and flaggers. The District’s website features a Project page with information including the proposed schedule and Project-related documents and will be updated throughout construction.

Environmental

The EIR identified and evaluated the potential environmental effects of the Project and included mitigation measures to lessen or eliminate adverse impacts to the environment. With the exception of noise, environmental impacts are either less than significant or would be less than significant with mitigation. Noise impacts will still be significant, but feasible measures will be implemented to reduce impacts.

ALTERNATIVES

Do not certify the Final EIR or approve the Project. This alternative is not recommended because the Final EIR meets CEQA requirements, and the Project was evaluated against several alternatives that either had equal or greater environmental impacts or failed to achieve Project objectives in a cost-effective manner.

Title:	Walnut Creek Water Treatment Plant Pretreatment Project – Certify the Final Environmental Impact Report and Project Approval	Meeting Date:	July 9, 2024

Do not proceed with the Project. This alternative is not recommended because this alternative does not satisfy the Project objectives.

RESOLUTION NO. _____

CERTIFYING THE FINAL ENVIRONMENTAL IMPACT REPORT FOR THE WALNUT CREEK WATER TREATMENT PLANT PRETREATMENT PROJECT, MAKING FINDINGS, ADOPTING THE MITIGATION MONITORING AND REPORTING PROGRAM, ADOPTING THE PRACTICES AND PROCEDURES MONITORING AND REPORTING PLAN, AND APPROVING THE PROJECT

Introduced by Director

; Seconded by Director

WHEREAS, the East Bay Municipal Utility District (EBMUD) Walnut Creek Water Treatment Plant (WTP), constructed in 1967, has capacity to treat 115 million gallons per day of Mokelumne River water from the Pardee and Briones Reservoirs and is the primary water supply for approximately 225,000 customers within EBMUD's East-of-Hills service area located in portions of Pleasant Hill, Walnut Creek, and Lafayette, as well as the Alamo, Danville, Blackhawk and San Ramon Valley communities; and

WHEREAS, the Walnut Creek WTP lacks pretreatment and ozone facilities, which limits its ability to treat water from the Sacramento River or other water transfers via the Freeport Regional Water Project (Freeport) facility and from neighboring water agencies via interties during planned and unplanned outages and during droughts; and

WHEREAS, the Walnut Creek WTP needs to be able to treat a broader range of untreated water quality more reliably from various sources resulting from high rainfall runoff, wildfire, algae blooms, climate change and emerging contaminants and to improve the ability to treat supplemental supplies from Freeport or interties during planned and unplanned outages and future droughts; and

WHEREAS, to maintain water treatment capacity at the Walnut Creek WTP when untreated water quality is diminished, increase flexibility to treat a broader range of water quality from supplemental water supplies, increase water treatment capacity to meet planned future demands and support planned and unplanned outages and rate restrictions at other water treatment plants, and continue to meet drinking water and environmental regulations and achieve EBMUD's long-term water quality goals, EBMUD is proposing the Walnut Creek Water Treatment Plant Pretreatment Project (Project), which includes construction of staging areas, removal of vegetation including tree removal, grading, construction of new pretreatment facilities, ozone facilities, a consolidated maintenance building, buried pipelines, outdoor lighting, stormwater facilities, security fencing, and paving, relocation of informal hiking trails, demolition of existing facilities and maintenance facilities, and site restoration including new trees at the Walnut Creek WTP and removal of vegetation including tree removal, grading, construction of new weir structures, buried pipelines, and paving, demolition of an existing weir structure, and site restoration including new trees at the Lafayette WTP; and

WHEREAS, EBMUD has incorporated into the Project requirements from its Standard Construction Specifications, Procedures, and Engineering Standard Practices (EBMUD Practices

and Procedures), which are described throughout the Environmental Impact Report (EIR) when applicable; and

WHEREAS, these EBMUD Practices and Procedures are standardized practices and procedures applicable to all EBMUD projects, are not tailored to address specific impacts of the Project, reflect generally applicable EBMUD standard operating procedures, and as such have been properly incorporated into the Project rather than being imposed as mitigation measures under the California Environmental Quality Act (CEQA); and

WHEREAS, to ensure their implementation and to streamline monitoring thereof, the EBMUD Practices and Procedures have been incorporated into a Practices and Procedures Monitoring and Reporting Plan (PPMRP) for the Project; and

WHEREAS, on February 28, 2022, a Notice of Preparation (NOP) of an EIR for the Project was prepared and circulated by EBMUD as the lead agency in accordance with CEQA and applicable laws and regulations; and

WHEREAS, EBMUD mailed public notices regarding the NOP to approximately 510 residents and property owners and 31 agencies and special interest stakeholders; and

WHEREAS, EBMUD conducted a public outreach and scoping meeting on March 16, 2022, to discuss the Project and to solicit public input; and

WHEREAS, by close of the NOP comment period on March 30, 2022, a total of ten written responses were submitted, including eight from residents, and one each from the City of Walnut Creek and Native American Heritage Commission; and

WHEREAS, EBMUD considered the input provided during the scoping period in preparing a Draft EIR, and the Draft EIR on the Project was completed by EBMUD and circulated for review and comment on September 28, 2023, providing a 45-day comment period ending on November 13, 2023, in accordance with the requirements of CEQA; and

WHEREAS, over 750 postcards were mailed to notify nearby residents and homeowners and 63 letters were sent to interested parties, state, local and regional agencies of the availability of the Draft EIR; and

WHEREAS, public notice of the availability of the Draft EIR was also provided by posting at two City of Walnut Creek trailhead kiosks located at Camino Verde Circle and Sousa Drive, publication in the Contra Costa Times newspaper, posting at the Contra Costa County Clerk's office, posting on NextDoor, and emailing all property owner and resident contacts in the cities of Lafayette and Walnut Creek with emails registered through EBMUD's Customer Relationship Management System totaling over 16,000 contacts; and

WHEREAS, EBMUD also provided internet access to the Draft EIR on the EBMUD website, and access to the Draft EIR at EBMUD administrative offices in downtown Oakland and at the Walnut Creek and Lafayette Public Libraries; and

WHEREAS, on October 19, 2023, as part of EBMUD's public information efforts on the Project and Draft EIR, EBMUD held a public meeting during the Draft EIR comment period to present the Draft EIR and receive verbal and written comments from the public; and EBMUD also presented the Project to the Walnut Creek City Council at its regular meeting on March 21, 2023; and

WHEREAS, EBMUD considered and responded to 12 comment letters and e-mails received prior to the close of the Draft EIR comment period, as well as public comments received at the public meeting on the Draft EIR and Project, and subsequently modified portions of the Draft EIR to further clarify and to address public concerns; and

WHEREAS, after the Draft EIR comment period concluded, EBMUD conducted additional meetings on November 27, 2023, March 28, 2024, and April 2, 2024 with members of the Quail Ridge Homeowners Association and on December 15, 2023 and March 22, 2024 with neighbors adjacent to the entrance to the Walnut Creek WTP to clarify their comments on the site plan and mitigation measure refinements, and EBMUD considered this information and subsequently modified portions of the Draft EIR to further clarify and address public concerns; and

WHEREAS, modifications made to address comments regarding the visibility of the new facilities from the East Bay Regional Park District's Briones to the Mt. Diablo regional trail include the planting of additional 24-inch box trees east of the Pre-Ozone Pumping Plants and north of the Consolidated Maintenance Building and Electrical Building and clarification regarding an aesthetic treatment (i.e. decorative concrete architectural finish) on the proposed retaining wall below the gravity thickeners to be determined during design to blend in with the surrounding open space environment; and

WHEREAS, modifications were also made to proposed noise measures in response to concerns raised during the Draft EIR comment period and in subsequent meetings after the Draft EIR comment period ended about the appearance of a temporary sound barrier in front of a construction staging area that was proposed as a mitigation measure; and

WHEREAS, modifications were also made to address concerns raised during the Draft EIR comment period and in subsequent meetings after the Draft EIR comment period ended about pedestrian safety on Larkey Lane during construction, and EBMUD refined a mitigation measure requiring a flagger at Larkey Lane and Alvarado Avenue on extended workdays with large concrete pours and days with soil off-hauling and a flagger at San Luis Road and Larkey Lane to ensure pedestrian safety while crossing the street; and

WHEREAS, EBMUD prepared a Final EIR, which includes responses to all comments received during the public comment period and clarifications to the EIR made in response to public concerns; and

WHEREAS, EBMUD sent a Notice of Availability to all commenting public agencies at least ten days before action by the EBMUD Board of Directors to adopt the EIR, in accordance with the requirements of CEQA, and sent notice to residents and affected agencies on May 31, 2024 allowing an opportunity to review the Final EIR; and

WHEREAS, the EBMUD Board of Directors received a presentation on the Final EIR and heard comments on the Project at the June 11, 2024 Board of Directors meeting, and EBMUD subsequently conducted two additional meetings with neighbors adjacent to the Walnut Creek WTP; and

WHEREAS, EBMUD has prepared a detailed Mitigation Monitoring and Reporting Program (MMRP) and PPMRP, attached hereto as Exhibits B and C, respectively, and incorporated herein by this reference into the Resolution;

NOW, THEREFORE, BE IT RESOLVED that the Board of Directors of the East Bay Municipal Utility District (Board) does hereby find, determine, and certify that:

1. The above recitals are incorporated as if set forth herein.
2. The Final EIR, which includes the Draft EIR, has been presented to the Board. The Board has reviewed and considered the information contained therein prior to approving the Project, and the Final EIR reflects the Board's independent judgment and analysis.
3. All proceedings of the environmental review process, including the Draft and Final EIR and all required notices, have been conducted and completed in accordance with CEQA, the CEQA Guidelines, and all other applicable laws, regulations, and procedures.
4. The potential environmental impacts of the Project are fully disclosed in the Draft EIR and Final EIR, and the Draft EIR and Final EIR are adequate for use by EBMUD for approval, design, and construction of the Project.
5. The documents and materials constituting the record of the proceeding are located at EBMUD's Administrative Offices, 375-11th Street, Oakland, CA 94607. The custodian of these records is the Secretary of the District.
6. No substantial change in circumstances has occurred since preparation of the Draft EIR and Final EIR which would require substantial revisions to the Draft EIR and Final EIR due to the discovery or disclosure of new, significant impacts not covered in the Draft EIR and Final EIR, and there is no requirement to recirculate the Draft and Final EIRs.
7. Public consultation conducted prior to completing the Draft EIR has been a valuable component of the planning process. Efforts to encourage early public participation in the process included extensive community outreach. These efforts allowed for consideration of public input throughout the planning process.
8. The Board makes the findings and determinations regarding the Project set forth in the Findings, attached hereto as Exhibit A, including a statement of overriding considerations. Exhibit A is hereby incorporated into this Resolution by this reference.

9. The Board hereby approves, adopts, and imposes the MMRP, attached hereto as Exhibit B and incorporated herein by this reference. The mitigation measures set forth in the MMRP and adopted by the Board are hereby imposed as conditions of Project approval.
10. The Board hereby approves, adopts, and imposes the PPMRP, attached hereto as Exhibit C and incorporated herein by this reference. The EBMUD Practices and Procedures set forth in Exhibit C and adopted by the Board are hereby imposed as conditions of Project approval.

BE IT FURTHER RESOLVED that the Final EIR is hereby certified as having been completed in compliance with CEQA.

BE IT FURTHER RESOLVED that the Project as described in Exhibit A hereto, is hereby approved.

BE IT FURTHER RESOLVED that the General Manager is hereby directed to take such actions as shall be necessary to implement the Project as described in the Final EIR, subject to compliance with all mitigation measures and EBMUD Practices and Procedures set forth in the MMRP included in Exhibit B and PPMRP included in Exhibit C attached hereto.

BE IT FURTHER RESOLVED that the Secretary of the District is hereby directed to file a Notice of Determination, in accordance with the law, with the County Clerk of Contra Costa County and with the State Clearinghouse.

ADOPTED this 9th day of July, 2024 by the following vote:

EXHIBIT A

EBMUD Board of Directors Findings Regarding the Walnut Creek Water Treatment Plant Pretreatment Project

1 Introduction

This is the findings document adopted by the East Bay Municipal Utility District (EBMUD) Board of Directors (Board) for the Walnut Creek Water Treatment Plant Pretreatment Project (Project). As approved by the Board and described more fully in Section 1.3 of this Exhibit, the Project includes:

- Construction of pretreatment and ozone facilities at the Walnut Creek Water Treatment Plant (WTP) (i.e., removal of vegetation including trees, grading, construction of new pretreatment facilities, ozone facilities, consolidated maintenance building, buried pipelines, outdoor lighting, stormwater facilities, security fencing, paving, relocation of social footpaths, demolition of existing facilities including maintenance facilities and site restoration including new trees); and
- Improvements to weirs at the Lafayette WTP (i.e. removal of vegetation including trees, grading, construction of new weir structures, buried pipelines, paving, demolition of and existing weir structure and site restoration including new trees).

Sections 1.1 through 1.3 of this document describe the Project, its objectives, and the need to complete the Project.

Section 2, “CEQA Requirements Regarding Project Impacts,” describes the requirements under the California Environmental Quality Act (CEQA) regarding Project impacts.

Section 3, “Findings Regarding Independent Review and Judgment,” contains the findings regarding the independent analysis and judgment of the Board.

Section 4, “Findings Regarding the Project,” contains the findings regarding potential Project impacts. This section is divided into three parts.

- Section 4.1 contains findings regarding standard specifications and practices that have been incorporated into the Project to minimize environmental impacts.
- Section 4.2 contains findings regarding potentially significant and unavoidable environmental impacts. As explained in detail in the Statement of Overriding Considerations

found in Section 5, the Board finds that the Project benefits outweigh or override these impacts, such that they are acceptable.

- Section 4.3 contains the findings regarding significant or potentially significant Project impacts that will be mitigated to a less-than-significant level.
- Section 4.4 contains the findings regarding Project impacts that will be less than significant or where there will be no impact.

Section 5, “Statement of Overriding Considerations,” sets forth the statement of overriding considerations including the economic, legal, social, technological, or other benefits that justify the Project despite the identified significant and unavoidable impacts.

Section 6, “Findings Related to Potential Growth Inducing Impacts,” contains the findings concerning the potential growth-inducing impact of the Project. The Board finds that the Project would not indirectly or directly support growth.

Section 7, “Findings Regarding Alternatives and Selecting the Project,” contains the findings concerning the alternative Project configurations considered in the Draft Environmental Impact Report (EIR). The Board finds that the selected Project is feasible, and that the other alternatives do not provide any clear environmental or other benefit beyond those of the Project.

The findings presented here also summarize the mitigation measures set forth in the Final EIR and agreed to by EBMUD or incorporated into the Project. The mitigation measures are summarized for convenience, but the summary is not intended to replace or change any aspects of the complete text of the mitigation measures described in the Final EIR and adopted by the Board.

1.1 Project Need

Addition of pretreatment and ozone facilities are required to allow the Walnut Creek WTP to more reliably treat a broader range of untreated water quality from Pardee and Briones Reservoirs resulting from high rainfall runoff, wildfires, algae blooms, and supplemental supplies from the Freeport Regional Water Project or other interties during planned and unplanned outages and future droughts, all of which are expected to increase in the future due to climate change. The Project would also ensure EBMUD continues to meet existing drinking water and environmental regulations and achieve EBMUD’s internal long-term water quality goals, as well as addressing any potential future emerging contaminants. The Project would increase the Walnut Creek WTP capacity to meet planned future demands, improve water system reliability and operational flexibility, and allow for the potential decommissioning of the Lafayette WTP.

1.2 Project Objectives

The Project objectives include:

Primary Operational Objectives

- Maintain water treatment capacity at the Walnut Creek WTP when untreated water quality is diminished at Pardee Reservoir or Briones Reservoir due to high rainfall runoff, watershed fire events, droughts, algae blooms, and emerging contaminants.
- Increase flexibility to treat a broader range of water quality from supplemental water supplies entering EBMUD's water system from the Sacramento River via Freeport Regional Water Project.
- Increase flexibility to treat a broader range of water quality from supplemental water supplies entering EBMUD's water system from neighboring water agencies through untreated water agency interties during planned and unplanned outages as well as droughts.
- Increase the water treatment capacity to meet planned future demands, support planned and unplanned outages and rate restrictions at other water treatment plants, recover distribution storage quickly after power outages, allow distribution pumping plants to operate only when renewable electricity is most plentiful and electricity costs are lowest, and accommodate the potential decommissioning of the Lafayette WTP.
- Continue to meet drinking water and environmental regulations and achieve EBMUD's internal long-term water quality goals.

Secondary Operational Objectives

- Maintain a similar and acceptable aesthetic site environment after construction.
- Minimize life-cycle costs (capital, operating, and maintenance) to EBMUD's customers.
- Maximize the useful life of existing facilities in a manner that reduces costs for customers.
- Minimize operational emissions of greenhouse gases.

Construction Objectives

- Minimize environmental impacts on the community during construction.
- Reuse or recycle building materials on site to the extent feasible, including concrete demolition materials and excavated earth.
- Maintain water service and emergency flows during construction.
- Protect the local community from construction hazards.
- Provide safe construction site conditions.

1.3 Project Description

The Project is described in detail in Chapter 2, *Project Description*, of the Draft EIR, and summarized below.

The Project would include installing pretreatment facilities at the Walnut Creek WTP and making improvements at the Lafayette WTP. The Project would be designed and constructed in two separate phases. Phase 1 would allow the Walnut Creek WTP to treat a broader range of untreated water quality and increase the capacity from 115 million gallons day (MGD) to 125 MGD. Phase 2 would further improve the ability of the Walnut Creek WTP to treat a broader range of untreated water quality and would increase the capacity to 160 MGD.

Walnut Creek WTP

The new pretreatment facilities consist of a ballasted flocculation process to remove turbidity, total organic carbon and algae, and ozone treatment which oxidizes and destroys organic compounds that produce undesirable taste and odor. Ozone treatment would occur both upstream of the ballasted flocculation process (pre-ozone) and downstream of the ballasted flocculation process (intermediate ozone). Phase 1 improvements would enable pretreatment of untreated water before entering the north filters and Phase 2 improvements would enable pretreatment of untreated water before entering the south filters. The construction timing of the Phase 2 improvements is not firmly established but would depend on untreated water quality conditions in the future and the timing of future demands.

Phase 1 Improvements at Walnut Creek WTP

- North ballasted flocculation basins
- North intermediate ozone pumping plant
- North intermediate ozone contactor
- Ozone generation building
- Liquid oxygen (LOX) storage area
- North pre-ozone pumping plant
- Combined reclaimed metering vault
- North ozone gas destruct vault
- Solids dewatering building and truck loading facility
- Thickened solids blending tanks
- Two gravity thickeners
- Thickened solids pumping plant
- Solids transfer pumping plant
- Electrical facilities building
- Consolidated maintenance building
- North ozone gas quenching vault
- Chemical storage building extension
- Hydrogen peroxide station
- Large diameter buried pipelines
- Paved roadways
- Paved parking

- Retaining walls
- Security fencing and cameras
- Stormwater facilities
- Lighting
- Redirected social footpaths
- Demolition of existing process and maintenance facilities
- Revegetation including new trees and hydroseeding

Phase 2 Improvements at Walnut Creek WTP

- South ballasted flocculation basins
- South intermediate ozone pumping plant
- South intermediate ozone contactor
- South pre-ozone pumping plant
- South ozone gas destruct vault
- Two gravity thickeners
- Thickened solids pump station
- South ozone gas quenching vault
- Large diameter buried pipelines

Lafayette WTP

The Project would also require raising the height of one hydraulic weirs and replacing an existing weir located at the Lafayette WTP. The raised weirs will increase the water pressure in the Lafayette Aqueducts No. 1 and No. 2 to accommodate the hydraulic requirements to serve the new pretreatment processes at the Walnut Creek WTP. The following improvements would take place at the same time as the Phase 1 improvements at the Walnut Creek WTP.

Phase 1 Improvements at Lafayette WTP

- New Lafayette Weir No. 1
- Retaining wall
- Demolition of existing Lafayette Weir No. 1
- Modification of existing Lafayette Weir No. 2 to increase height by 10 feet
- New large diameter buried pipelines
- Revegetation including new trees and hydroseeding

Construction would typically occur between 7:00 a.m. and 6:00 p.m., Monday through Friday. Extended work hours, early starts, and weekend work may occasionally be required for large concrete pours or critical pipeline shutdowns at the Walnut Creek WTP. Concrete delivery trucks would be allowed access to the Walnut Creek WTP site from 6:00 a.m. to 6:00 p.m. to accommodate extended concrete pours. Early and/or extended concrete delivery days are estimated to occur on approximately 40 days of the 3-year construction period for Phase 1 and on approximately 15 days for the approximately 2-year construction period for Phase 2.

Once constructed the pretreatment facilities would be operated by staff at the Walnut Creek WTP in a manner similar to the existing facilities. New pretreatment processes would require additional deliveries of chemicals (alum, polymer, microsand, hydrogen peroxide and liquid oxygen) with delivery trips increasing from approximately two trips per week to approximately four trips per week. The pretreatment process would also generate additional solids, which would be trucked to a landfill; solids handling truck trips would increase from approximately two trips per day to approximately three trips per day. There would be no new chemical usage or vehicle trips associated with operation of the Lafayette WTP.

Long-term site maintenance would continue, and would involve vegetation management on site, keeping the site clean and free of debris, and trimming shrubbery and trees for both fire prevention and public safety. Ongoing maintenance activities would continue to be conducted by staff already on site.

As described in the Draft EIR, EBMUD has incorporated a number of standard construction specifications, and standard practices from EBMUD's Standard Construction Specifications and Engineering Standard Practices, into the Project. These standard specifications and practices are designed to address typical characteristics of EBMUD construction projects and are not project-specific or tailored to the unique characteristics of the Project. These standard specifications and practices, which are applicable to all EBMUD construction projects and reflect generally applicable EBMUD standard operating procedures, are described in the Draft EIR. The particular provisions of those standard specifications and practices that help minimize Project impacts are set forth in Exhibit C Practices and Procedures Monitoring and Reporting Program (PPMRP) for the Project to ensure their implementation.

2 CEQA Requirements Regarding Project Impacts

The CEQA, Public Resources Code, Section 21000 et seq., requires written findings of Project impacts, pursuant to Section 21081. Regarding these findings, CEQA Guidelines, Title 14, California Code of Regulations (CEQA Guidelines), Section 15091, states the following:

- a. No public agency shall approve or carry out a project for which an EIR has been certified which identifies one or more significant environmental effects of the project unless the public agency makes one or more written findings for each of those significant effects, accompanied by a brief explanation of the rationale for each finding. The possible findings are:
 1. Changes or alterations have been required in, or incorporated into, the project which avoid or substantially lessen the significant environmental effect as identified in the final EIR.
 2. Such changes or alterations are within the responsibility and jurisdiction of another public agency and not the agency making the finding. Such changes have been adopted by such agency or can and should be adopted by such other agency.
 3. Specific economic, legal, social, technological, or other considerations including provision of employment opportunities for highly trained workers, make infeasible the mitigation measures or project alternative identified in the final EIR.

- b. The findings required by subdivision (a) shall be supported by substantial evidence in the record.
- c. The finding in subdivision (a)(2) shall not be made if the agency making the finding has concurrent jurisdiction with another agency to deal with identified feasible mitigation measures or alternatives. The finding in subdivision (a)(3) shall describe the specific reasons for rejecting identified mitigation measures and project alternatives.
- d. When making the findings required in subdivision (a)(1), the agency shall also adopt a program for reporting on or monitoring the changes which it has either required in the project or made a condition of approval to avoid or substantially lessen significant environmental effects. These measures must be fully enforceable through permit conditions, agreements, or other measures.
- e. The public agency shall specify the location and custodian of the documents or other material which constitute the record of the proceedings upon which its decision is based.
- f. A statement made pursuant to Section 15093 does not substitute for the findings required by this section.

CEQA Guidelines Section 15093 states the following:

- a. CEQA requires the decision-making agency to balance, as applicable, the economic, legal, social, technological, or other benefits of a proposed Project against its unavoidable environmental risks when determining whether to approve the Project. If the specific economic, legal, social, technological, or other benefits of a proposed Project outweigh the unavoidable adverse environmental effects, the adverse environmental effects may be considered “acceptable.”
- b. When the lead agency approves a project which will result in the occurrence of significant effects which are identified in the final EIR but are not avoided or substantially lessened, the agency shall state in writing the specific reasons to support its action based on the final EIR and/or other information in the record. The statement of overriding considerations shall be supported by substantial evidence in the record.
- c. If an agency makes a statement of overriding considerations, the statement should be included in the record of the project approval and should be mentioned in the notice of determination. This statement does not substitute for, and shall be in addition to, findings required pursuant to Section 15091.

The changes or alterations referred to in State law, as quoted above, may be mitigation measures, alternatives to the Project, or changes to the Project by the Project proponent. The Final EIR identifies mitigation measures that are proposed to minimize significant environmental effects of the Project or to mitigate other potential effects that may not be, strictly speaking, environmental effects under CEQA. These mitigation measures will be incorporated into the Project. A Mitigation Monitoring and Reporting Program (MMRP) as set forth in Exhibit B is also adopted by the Board to ensure implementation of all relevant mitigation measures identified in the Final EIR and these Findings.

3 Findings Regarding Independent Review and Judgment

Each member of the Board was provided access to a complete electronic copy of the Draft EIR in September 2023 and of the Final EIR in May 2024. The Board hereby finds that the Final EIR reflects the Board's own judgment, and that the Board has independently reviewed and analyzed the Final EIR prior to taking any final action with respect to the Project.

4 Findings Regarding the Project

Having reviewed and considered the information contained in the Final EIR, PPMRP and MMRP, the Board hereby adopts the following findings regarding Project impacts and mitigation measures.

4.1 Findings Regarding Construction Standard Specifications and Practices

EBMUD hereby finds that the Standard Construction Specifications, Procedures, and Engineering Standard Practices described in the Draft EIR and included in Exhibit C, have been incorporated into the Project and are required to be implemented. As explained below in these Findings and in Exhibit C, as with other Project components, inclusion of these standard specifications, best management practices, and engineering standard practices in the Project helps minimize some of the Project's environmental impacts.

4.2 Findings Regarding Significant and Unavoidable Effects

One potentially significant and unavoidable impact associated with construction noise could result from implementing the Project. While the impact is temporary and would only occur during construction, EBMUD has conservatively identified the impact as significant and unavoidable. Mitigation measures included in the Final EIR would lessen this impact but may not completely mitigate adverse environmental impacts to less-than-significant levels. These findings reflect EBMUD's decision to approve the Project despite these impacts.

4.2.1 Noise

Impact NOI-1: Result in the generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the Project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies.

Findings

Mitigation Measures TRA-1 and NOI-1 are hereby adopted by EBMUD and will be implemented as set forth in the MMRP. EBMUD hereby finds that even with implementation of Mitigation Measures TRA-1 and NOI-1, temporary noise impacts would be significant and unavoidable (see Draft EIR pages 3.11-28 to 3.11-43). Therefore, EBMUD hereby makes finding (a)(3), as described in Section 2 above, as required by CEQA, Section 21081, and as stated in the CEQA Guidelines, Section 15091, with respect to these effects.

Facts in Support of Findings

Project construction would result in temporary noise increases in the vicinity of the Walnut Creek WTP and Lafayette WTP sites, and new mechanical and electrical equipment has the potential to increase operational noise levels at the Walnut Creek WTP site.

Construction

Construction noise would be generated during multiple on-site construction activities and truck traffic associated with the Project at both the Walnut Creek WTP and the Lafayette WTP sites, with construction generally occurring between 7:00 a.m. and 6:00 p.m. Monday through Friday but starting as early as 6:00 a.m. at the Walnut Creek WTP site during large concrete pours (estimated to occur approximately 40 days over Phase 1 and 15 days over Phase 2). On-site daytime (7:00 a.m. to 6:00 p.m.), on-site early morning (6:00 a.m. to 7:00 a.m.), off-site traffic AM peak (7:00 a.m. to 9:00 a.m.), and off-site traffic early morning (6:00 a.m. to 7:00 a.m.) Walnut Creek WTP site construction-related noise levels were estimated at the nearest sensitive receptors and compared to noise thresholds, which are summarized in Tables 3.11-11 through 3.11-14 on Draft EIR pages 3.11-29 through 3.11-37 and Final EIR pages 10-26 through 10-27. On-site and off-site traffic Lafayette WTP site construction-related noise levels were estimated at the nearest sensitive receptors and compared to noise thresholds. The on-site noise levels are summarized in Table 3.11-15 on Draft EIR page 3.11-39 and the offsite traffic noise level increase would not be substantial (less than a 1 dBA increase).

As summarized in Exhibit C, a number of EBMUD standard practices and procedures, applicable to all EBMUD projects, have been incorporated into the Project, including Standard Construction Specification 01 14 00, Section 1.7(A), which requires that noise-generating activities greater than 90-dBA (impact construction such as concrete breaking, concrete crushing, tree grinding, etc.) shall be limited to the hours of 8:00 a.m. to 4:00 p.m., Monday through Friday, and Standard Construction Specification 01 35 44, Section 1.4(G) and Section 3.8, which include a range of noise control measures such as developing a Noise Control and Monitoring Plan and requiring the contractor to implement noise control measures (e.g., mufflers or noise-attenuating shields) on all equipment. In addition, EBMUD Procedure 600 designates a Public Affairs liaison to respond to construction-related issues and coordinate with the construction project manager/engineer and any contractors to resolve issues. Even with the incorporation of EBMUD's Standard Construction Specifications, construction would generate noise levels that exceed the construction noise ordinance limits.

To mitigate potential construction noise levels below noise ordinance limits, EBMUD would implement Mitigation Measures NOI-1 and TRA-1. Mitigation Measure NOI-1 requires installation of noise barriers around the Hydrogen Peroxide station (minimum 8 feet high), Combined Reclaimed Metering Vault (minimum 9 feet high), and Thickened Solids Pumping Plants and Gravity Thickeners (minimum 9 feet high) during the entire construction duration. Mitigation Measure NOI-1 also requires daily noise monitoring at the EBMUD property line east of Staging Area 4 during both phases of construction and if noise thresholds are exceeded and expected to continue to be exceeded, a 6-foot high redwood fence would be installed at that time at Staging Area 4. Mitigation Measure NOI-1 also requires that non-essential noise generating activities be minimized between 6:00 a.m. and 7:00 a.m. Mitigation Measure TRA-1 limits soil

and demolition off-haul and large equipment delivery trucks at the Walnut Creek WTP to the hours between 9:00 a.m. and 3:30 p.m. While EBMUD will implement these mitigation measures, which would reduce on-site noise to less than significant, no feasible mitigation measures have been identified that would reduce temporary impacts related to off-site haul truck noise to less-than-significant levels because noise levels at the intersection of San Luis Road and Buena Vista Avenue would exceed the sleep disturbance indicator between 6:00 am and 7:00 am on days where concrete trucks could start arriving at the Walnut Creek WTP site as early as 6:00 a.m.

Operation and Maintenance

After construction is complete, new sources of operational noise at the Walnut Creek WTP would be generated by the pre-ozone and intermediate ozone pumping plants, thickened solids pumping plant, solids transfer pumping plant, ballasted flocculation basins, and new electrical substation with transformer and switchgear as well as from increased vehicle trips associated with off hauling dewatered solids (approximately 2 to 3 trucks per day typically and up to 21 trucks during periods of high turbidity), importing alum, polymer, microsand, hydrogen peroxide, and liquid oxygen (approximately one additional truck per week), and increased vehicle trips associated with approximately four new operational staff reporting to the site. Walnut Creek WTP operation and maintenance related noise levels were estimated at the nearest sensitive receptors and compared to noise thresholds, which are summarized in Table 3.11-16 in the Draft EIR. Operation and maintenance associated with the Project at Walnut Creek WTP would not create a substantial noise increase at the nearest sensitive receptors (less than 1 dBA) and no new operational noise sources would be added at the Lafayette WTP. Therefore, the Project would not result in the generation of an increase in ambient noise levels in the vicinity of the Project and impacts during operation and maintenance would be less than significant.

Section 5: Statement of Overriding Considerations provides a summary of the Project benefits that outweigh the significant and unavoidable temporary noise impacts, including maintaining treatment capacity when untreated water quality is diminished, increasing flexibility to treat a broader range of water quality from supplemental supplies, increasing water treatment capacity to meet planned future demands, supporting planned and unplanned outages and rate restrictions at other water treatment plants, and continuing to meet drinking water and environmental regulations to achieve EBMUD's long-term water quality goals. No feasible alternatives were found that would avoid or mitigate the significant and unavoidable off-site noise impact to less-than-significant levels (see Section 7: Findings Regarding Alternatives and Selecting the Project).

4.3 Findings Regarding Significant Effects Mitigated to Less Than Significant Levels

It has been determined that mitigation measures proposed in the Final EIR, and as set forth in the MMRP, will avoid or mitigate the effects shown below to less than significant levels.

4.3.1 Transportation and Traffic

Impact TRA-1: Conflict with a program, plan, ordinance, or policy addressing the circulation system, including transit, roadway, bicycle, and pedestrian facilities.

Findings

Mitigation Measure TRA-1 is hereby adopted by EBMUD and will be implemented as set forth in the MMRP. EBMUD hereby finds that implementation of Mitigation Measure TRA-1 would ensure that impacts would be less than significant (see Draft EIR pages 3.13-22 to 3.13-27).

Facts in Support of Findings

Construction

Transit Network

The Project access route for construction traffic accessing the Walnut Creek WTP does not overlap with any transit routes and thus would not affect transit in Walnut Creek. The access route for the Lafayette WTP overlaps with County Connection school routes 625 and 626, with two daily stops on Mt. Diablo Boulevard at 8:00 a.m. and 4:00 p.m. on weekdays. Mt. Diablo Boulevard is a major arterial, designed to handle a mix of vehicle types including heaving trucks. Conflicts between construction traffic and transit vehicles in Lafayette would be minor due to the low volumes of construction traffic and low service frequencies for Routes 625 and 626 (i.e., 2 trips per day) and, therefore, construction impacts on the transit network would be less than significant.

Bicycle Network

Increased construction traffic on public roadways would potentially decrease the safety of bicyclists because local users may not be accustomed to the presence of large construction vehicles.

As summarized in Exhibit C, a number of EBMUD standard practices and procedures, applicable to all EBMUD projects, have been incorporated into the Project, including EBMUD Standard Construction Specification 01 55 26, which would require the contractor to prepare a Traffic Control Plan to minimize impacts on bicycle circulation on local streets. To maintain safe bicycle circulation, the Traffic Control Plan would identify specific measures around the Project site during periods of construction with heavy truck traffic (such as during concrete pours) to minimize impacts on circulation on the streets surrounding the Project site, and EBMUD Standard Construction Specification 01 32 36, Video Monitoring and Documentation, which would require documentation of both pre- and post-construction pavement conditions in the project vicinity. Even with the incorporation of EBMUD's standard practices and procedures for traffic control measures, the Project's construction traffic may potentially decrease the safety of bicyclists.

To mitigate the potential for construction traffic to bicyclist safety, EBMUD would implement Mitigation Measure TRA-1 which specifies detailed requirements for measures that shall be incorporated in the Traffic Control Plan including timing of truck traffic and safety requirements for haul trucks. With implementation of EBMUD Standard Construction Specifications and

Mitigation Measure TRA-1, construction of the Project would not result in changes in bicycle use or safety that would conflict with an applicable plan or policy related to bicycle use, and impacts would be less than significant.

Pedestrian Circulation

Pedestrian volumes in the vicinity of the Project sites are generally low to moderate, with the highest volumes occurring near the point where trucks would exit Interstate 680 in Walnut Creek. Approximately 73 pedestrians crossed at the intersection of North Main Street and Parkside Drive in the a.m. peak hour (based on observed count data). Potential conflicts between pedestrians and construction traffic would generally be low.

As summarized in Exhibit C, a number of EBMUD standard practices and procedures, applicable to all EBMUD projects, have been incorporated into the Project, including EBMUD Standard Construction Specification 01 55 26, which would require the contractor to prepare a Traffic Control Plan to minimize impacts on pedestrian circulation on local streets, and EBMUD Standard Construction Specification 01 32 36, Video Monitoring and Documentation, which would require documentation of both pre- and post-construction pavement conditions in the project vicinity. Even with the incorporation of EBMUD's standard practices and procedures for traffic control measures, the Project's construction traffic may potentially decrease the safety of pedestrians.

To mitigate the potential for construction traffic to pedestrian safety, EBMUD would implement Mitigation Measure TRA-1 which provides specific measures that would be included in the Traffic Control Plan to minimize the potential for conflicts with pedestrian circulation. With implementation of EBMUD Standard Construction Specifications and Mitigation Measure TRA-1, construction of the Project would not result in changes in pedestrian use or safety that would conflict with an applicable plan or policy, and impacts would be less than significant.

Operation and Maintenance

After construction is complete, vehicle trips generated by Project operations at the Walnut Creek WTP would increase but the change would be minimal. There would be about 4 new daily vehicle trips for workers. Weekly truck trips would increase from approximately 2 per week to approximately 4 per week for chemical deliveries. Solids handling truck trips could increase from approximately 2 trips per day to approximately 3 trips per day. There would be no staffing changes or additional truck trips at the Lafayette WTP. The minor changes in operation and maintenance traffic would not worsen the intersection operating conditions along local roads, adversely affect pedestrian and bicycle circulation, or adversely affect pavement conditions on local roads. Therefore, Project operation and maintenance would not conflict with a program, plan, ordinance, or policy addressing the circulation system, and the impact would be less than significant.

Impact TRA-3: Substantially increase hazards due to a geometric design feature (e.g., sharp curve or dangerous intersections) or incompatible uses (e.g., farm equipment).

Findings

Mitigation Measures TRA-1 and TRA-2 are hereby adopted by EBMUD and will be implemented as set forth in the MMRP. EBMUD hereby finds that implementation of Mitigation Measures TRA-1 and TRA-2 would ensure that impacts would be less than significant (see Draft EIR pages 3.13-28 to 3.13-29).

Facts in Support of Findings

Construction

The increased construction traffic on public roadways could potentially decrease the safety of vehicles, bicyclists, and pedestrians because the larger vehicles may not be compatible with residential streets. Pedestrian facilities near the Walnut Creek WTP are limited with unmarked crosswalks and non-continuous sidewalks on Larkey Lane. Students or local residents walking in the neighborhood jaywalk across Larkey Lane where convenient to cross. The stretch of Larkey Lane from Rachele Road to Alvarado Avenue has a long, sweeping curve that can obscure the sightlines of vehicles traveling along Larkey Lane. The northbound lane faces downhill, which influences the speed of vehicles. This is the area where an east-west pedestrian path starts on Alvarado Avenue that is used by local residents and students walking east to Buena Vista Elementary School, transit facilities, or to downtown Walnut Creek.

As summarized in Exhibit C, a number of EBMUD standard practices and procedures, applicable to all EBMUD projects, have been incorporated into the Project, including Standard Construction Specification 01 55 26, Traffic Regulation, which requires a Traffic Control Plan. EBMUD Standard Construction Specification 01 55 26 would require contractor vehicles to yield to public traffic, would require the contractor to use traffic safety and slowing devices such as signs, barricades, and other traffic safety devices, and would require the contractor to maintain safe access around the project area at all times. Even with the incorporation of EBMUD's standard practices and procedures for traffic control measures, the Project's construction traffic along Larkey Lane may impact vehicle, bicyclist, and pedestrian safety as described above, due to the temporary increase in the number of vehicles, which would constitute a potentially significant impact.

To mitigate the potential for construction traffic to impact vehicle, bicyclist, and pedestrian safety, EBMUD would implement Mitigation Measure TRA-1 which implements additional measures for heavy construction vehicle traffic safety monitoring, including requiring the contractor to distribute written traffic safety requirements to all heavy construction vehicle drivers, obtain drivers' written acknowledgement of the traffic safety requirements, and provide radar speed feedback signs on Larkey Lane to reduce vehicle speeds. Additionally, EBMUD would implement Mitigation Measure TRA-2 which would provide traffic control flaggers in coordination with local school schedules during extended workdays with large concrete pours at the Walnut Creek WTP. With implementation of EBMUD Standard Construction Specifications and Mitigation Measures TRA-1 and TRA-2, potential conflicts between vehicles, pedestrians, and bicyclists would be reduced to a less than significant level by requiring safety measures to minimize potential conflicts between Project construction trips and the traveling public along local roads.

Operation and Maintenance

The Project's long-term operation and maintenance activities would be contained within the Walnut Creek and Lafayette WTP sites and there would be no changes to public roadways. The Project would not include any design features that present hazards at the Walnut Creek WTP entrance/exit at Larkey Lane or the Lafayette WTP driveway at Mt. Diablo Boulevard. Therefore, the Project operation and maintenance would have less than significant impacts.

4.4 Findings Regarding Less than Significant Effects

It has been determined that the following effects would be less than significant or have no impact, and no mitigation is needed.

4.4.1 Aesthetics

Impact AES-1: Have a substantial adverse effect on a scenic vista.

Findings

EBMUD hereby finds that impacts would be less than significant (see Draft EIR pages 3.1-33 to 3.1-35).

Facts in Support of Findings

Construction, Operation and Maintenance

The visual study areas for the Project include public viewpoints where the construction and operation activities would be most visible to the public, including six of the Walnut Creek WTP and one of the Lafayette WTP. Two viewpoints of the Walnut Creek WTP, Viewpoint 3 and Viewpoint 5, are scenic vistas due to their high visual quality and moderate to high visual sensitivity and views of the Project site. Construction activities would include staging of equipment and materials, hauling materials in and out of the site, excavation, construction of the new structures, equipment, retaining walls, paving, and security fencing. Tree removal would occur to accommodate the new facilities, retaining wall and security fencing. However, tree removal would not substantially change the views from Walnut Creek WTP Viewpoint 3 or Walnut Creek WTP Viewpoint 5 because there are other trees between the viewpoints and the trees designated for removal, or trees to be removed, are not visible from the viewpoints. New trees would be planted as part of construction to provide additional screening for the new facilities. Limited views of the Lafayette WTP are available from Mt. Diablo Boulevard, and the Lafayette WTP is not within the viewshed of any scenic vistas.

As summarized in Exhibit C, a number of EBMUD standard practices and procedures, applicable to all EBMUD projects, have been incorporated into the Project, including Standard Construction Specification 01 35 45, Section 3.1, Tree Protection, which would ensure that trees that do not need to be removed for the Project would be protected from damage. As a result, existing trees that provide screening and have not been identified as needing removal for construction, would continue to provide screening of the Project from Walnut Creek WTP Viewpoint 3 and Walnut Creek WTP Viewpoint 5 during and after construction. Also, EBMUD Standard Construction Specifications 01 74 05, Cleaning and 01 35 44, Section 1.1(B), Site Activities require

construction practices that will ensure the site is maintained in as orderly and clean a condition as possible throughout construction. With implementation of EBMUD Standard Construction Specifications, project construction would not have a substantial adverse effect on a scenic vista, and impacts would be less than significant.

Visual simulations completed for the Project for Walnut Creek Viewpoint 3 show that distance, topography, and existing vegetation that would remain during and after construction, provide screening of the new structures. Visual simulations for Walnut Creek Viewpoint 5 show that the Gravity Thickeners, Thickened Solids Pumping Plant, and Solids Dewatering Building would be visible following construction, though remain at a distance of approximately 500 feet from the viewpoint. Additionally, native oak trees would be planted during construction to provide long-term screening of the structures from Walnut Creek WTP Viewpoint 5. Visual simulations show that the tree growth over time would continue to increase the screening of the Project from the public. Based on the visual simulations for Viewpoint 3 and 5, no substantial adverse impacts to the scenic vista would be experienced during project operation, and impacts would be less than significant.

Impact AES-2: In non-urbanized areas, substantially degrade the existing visual character or quality of public views of the site and its surroundings (Public views are those that are experienced from publicly accessible vantage points), or in an urbanized area, conflict with applicable zoning and other regulations governing scenic quality.

Findings

EBMUD hereby finds that impacts would be less than significant (see Draft EIR pages 3.1-35 to 3.1-37).

Facts in Support of Findings

The Project would affect the visual character of the Project area both due to short-term disruption during construction and due to the long-term change in visual character during operation.

Construction

Although the Walnut Creek WTP is adjacent to residential areas, the proposed Project would primarily be visible from the Acalanes Ridge Open Space and Briones to Mt. Diablo Regional Trail, which crosses the open space area. Thus, visual impacts were evaluated to consider potential degradation of public views in a non-urbanized area.

Views of the Walnut Creek WTP from the public viewpoints vary. Viewpoints 1, 4 and 6 have moderate visual sensitivity and moderate to high exposure (i.e., the public would have moderate views of the Project and would view the Project for an extended period of time) while Viewpoint 2 has moderate visual quality and low exposure (i.e., when the public is able to see the Walnut Creek WTP, the site would only be visible for short periods of time). Thus, for Viewpoints 1, 2, 4, and 6, construction activities could be visible but would not substantially degrade the existing visual character or quality of the public views because the construction would be screened by distance, natural features, or existing structures, or because the public would have a limited duration of exposure to views of the construction activities.

Viewpoints 3 and 5 both have high visual quality. Viewpoint 3 has moderate exposure, which in combination with its high visual quality results in moderate visual sensitivity. Viewpoint 5 has high exposure, resulting in a high visual sensitivity. Although construction activities could be visible from Viewpoint 3, screening provided by distance, natural features, and topography would help to reduce views of such activities. Construction activities would be temporary. The Walnut Creek WTP site does not dominate views from Walnut Creek WTP Viewpoint 3 or Walnut Creek WTP Viewpoint 5, and construction activities would not substantially block or alter other portions of the views. As a result, construction at the Walnut Creek WTP would result in a less than significant impact on the existing visual character or quality of public views of the site and its surroundings.

At the Lafayette WTP views of the Project site have low visual sensitivity and limited changes would be visible from Mt. Diablo Boulevard. Thus, the Project would not substantially degrade the existing visual character and impacts of construction at the Lafayette WTP would be less than significant.

Operation and Maintenance

At the Lafayette WTP, limited changes would be visible from Mt. Diablo Boulevard and views into the Lafayette WTP have low visual sensitivity. Thus, the Project would not substantially degrade the existing visual character and impacts would be less than significant.

Visual simulations show the limited views of the new structures and how those structures are consistent with the existing visual character of the Walnut Creek WTP. Because the Project would be consistent with the existing Walnut Creek WTP's visual character, impacts would be less than significant for Walnut Creek WTP Viewpoints 1, 2, 4, and 6.

The views of the Project from Walnut Creek WTP Viewpoint 3 which represents the Acalanes Ridge Open Space are distant and screened to a large degree by topography and trees. Changes would be difficult to discern within the context of the overall view from Walnut Creek WTP Viewpoint 3. Views of the Project from Viewpoint 5 which represents the Briones to Mt. Diablo Regional Trail would be clearly visible following construction, though remain at a distance of approximately 500 feet from the viewpoint. Additionally, native oak trees would be planted during construction to provide long-term screening of the structures from Walnut Creek WTP Viewpoint 5. Visual simulations show that the tree growth over time would continue to increase the screening of the Project from the public. Additionally, the new structures completed for the Project would be consistent in size, architectural design and exterior color with existing Walnut Creek WTP structures and would not be a departure from the existing visual character of the area, and the retaining wall proposed around the gravity thickeners and the thickened solids pumping plants would have an aesthetic treatment (i.e., decorative concrete architectural finish) that would blend in with the surrounding open space environment. Therefore, operations of the Walnut Creek WTP would not substantially alter the existing visual character of the public views of the site. Impacts would be less than significant.

Impact AES-3: Create a new source of substantial light or glare which would adversely affect day or nighttime views in the area.

Findings

EBMUD hereby finds that impacts would be less than significant (see Draft EIR pages 3.1-37 to 3.1-38).

Facts in Support of Findings

Construction

Construction at both the Walnut Creek and Lafayette WTP sites would typically occur between 7:00 a.m. and 6:00 p.m. Monday through Friday. No routine nighttime construction is expected, though some temporary extended workdays may be required for large concrete pours or temporary shutdowns/outages. Given the anticipated construction hours, and limited extended days, the use of construction lighting would be limited.

As summarized in Exhibit C, a number of EBMUD standard practices and procedures, applicable to all EBMUD projects, have been incorporated into the Project, including Standard Construction Specification 01 35 44, Environmental Requirements, Section 3.9, Lighting Used During Nighttime Work, has been incorporated into the Project and includes measures to ensure that any lighting is designed and operated to minimize disturbance to traffic or residences and avoid unnecessary glare. With implementation of EBMUD Standard Construction Specifications, which would implement measures to reduce nuisance lighting and because the Project would have limited lighting needs during construction, construction would not create a new source of substantial light or glare which would adversely affect day or nighttime views in the area. Therefore, lighting impacts during construction would be less than significant.

Operation and Maintenance

Lighting would be required for securing and maintenance at new structures at both the Walnut Creek and Lafayette WTPs. All lighting would match existing light poles and be shielded fixtures that would be directed downward to minimize light pollution to the surrounding neighborhood. As a result, operational lighting impacts would be less than significant.

4.4.2 Air Quality

Impact AIR-1: Conflict with or obstruct implementation of the applicable air quality plan.

Findings

EBMUD hereby finds that impacts would be less than significant (see Draft EIR pages 3.2-22 to 3.2-31).

Facts in Support of Findings

The most recently adopted air quality plan is the Bay Area Air Quality Management District's (BAAQMD) *2017 Clean Air Plan* whose primary goals are to attain air quality standards, reduce population exposure, protect public health in the Bay Area, reduce greenhouse gas

(GHG) emissions, and protect the climate. The *2017 Clean Air Plan* includes a range of control measures, which consist of actions to reduce combustion-related activities, decrease fossil fuel combustion, improve energy efficiency, and decrease emissions of potent GHGs. The Project includes construction of pretreatment facilities at the Walnut Creek WTP and construction of weirs at the Lafayette WTP.

Construction

Pollutant emissions associated with Project construction would be generated from the following general construction activities: site preparation and mobilization; excavation; development of staging areas, foundations, and subsurface structures; construction of buildings and drainage facilities; demolition of components in the existing water treatment plant (including facilities that potentially contain asbestos); and site restoration. Pollutant emissions associated with construction would be generated from the following general construction activities: vehicle trips from workers traveling to and from the construction areas; trips associated with delivery and hauling of construction supplies to, and debris from, the construction areas; and fuel combustion by on-site construction equipment associated with site clearing, grading, excavation, construction, and demolition.

These construction activities would temporarily create emissions of dust, fumes, equipment exhaust, and other air pollutants. Emissions of ozone precursors and exhaust particulate matter are primarily a result of the combustion of fuel from on-road and off-road vehicles. However, reactive organic gases (ROG) are also emitted from activities that involve painting or asphalt paving. Although construction emissions are considered short term and temporary, they have the potential to have a significant impact with respect to air quality. Total quantified emissions of criteria air pollutants over the Walnut Creek WTP Phase 1, Walnut Creek WTP Phase 2, and Lafayette WTP are averaged over their entire duration of construction respectively, and then compared to the BAAQMD significance thresholds in Tables 3.2-5 through 3.2-8 on Draft EIR pages 3.2-25 through 3.2-27.

As summarized in Exhibit C, a number of EBMUD standard practices and procedures, applicable to all EBMUD projects, have been incorporated into the Project, including Standard Construction Specification 02 82 13, Asbestos Control Activities, Standard Construction Specification 01 35 44 Section 1.4 (F), Submittal of Dust Control and Monitoring Plan, Section 3.6, Dust Monitoring During Demolition and Construction, and Section 3.5, Air Quality Control, which would ensure compliance with the procedures required by the BAAQMD for the safe removal and disposal of asbestos containing material, require BAAQMD-recommended measures addressing dust and emissions controls, and require use of architectural coatings compliant with appropriate volatile organic carbon (VOC) limits as established in the BAAQMD regulations to reduce ROG emissions during construction and maintenance. In addition, EBMUD Procedure 600 designates a Community Affairs liaison to respond to construction-related issues and coordinate with the construction project manager/engineer and any contractors to resolve issues. With implementation of the EBMUD Standard Construction Specifications and because the estimated construction emissions from the Project would be less than the recommended BAAQMD significance thresholds for construction, the Project would be consistent with all applicable control strategies in the *2017 Clean Air Plan* and construction-related impacts would be less than significant.

Operation and Maintenance

Operational emissions at the Lafayette WTP would not change and thus there would be no air quality impact of operations at the Lafayette WTP. Operational emission at the Walnut Creek WTP would increase slightly because of increased worker and truck trips, occasional recoating and repainting for asphalt surfaces and buildings, occasional use of a diesel backup generator, and net loss of trees on site, but overall emissions would be less than the recommended BAAQMD significance thresholds for operation as shown on Table 3.2-9 on Draft EIR page 3.2-29. Operation of the Walnut Creek WTP would include an ozone (O₃) treatment system, which would be permitted by the BAAQMD. To meet permitting and Occupational Safety and Health Administration (OSHA) requirements, multiple redundant O₃ gas destruct systems would run whenever O₃ is being generated. The permit would require O₃ concentrations in the discharge to be very limited. Therefore, the average daily amount of O₃ released to the atmosphere is expected to be none or negligible. Because operational emissions would be below the BAAQMD regional significance thresholds for criteria air pollutants, the operational air quality impacts thus would be less than significant with respect to conflicts with the *2017 Clean Air Plan*.

Impact AIR-2: Expose sensitive receptors to substantial pollutant concentrations.

Findings

EBMUD hereby finds that impacts would be less than significant (see Draft EIR pages 3.2-31 to 3.2-37).

Facts in Support of Findings

Construction

Toxic Air Contaminants and Localized PM_{2.5} Concentrations

Project construction activities would produce toxic air contaminants (TACs) primarily as diesel particulate matter (DPM) and particulate matter consisting of particles less than 2.5 microns in diameter (PM_{2.5}) from the exhaust of diesel-fueled construction equipment such as loaders, backhoes, and cranes, as well as heavy-duty truck trips. The Project's construction-related emissions would not exceed the BAAQMD construction-related criteria air pollutant significance thresholds as discussed in Impact AIR-1 above. These emissions could result in elevated concentrations of DPM and PM_{2.5} at nearby receptors. Exposure of receptors in the vicinity of the Project site to these elevated concentrations could lead to an increase in the risk of cancer or other health impacts. Consequently, a Health Risk Assessment was conducted at the Walnut Creek WTP and the Lafayette WTP to determine the level of risk generated by construction related TACs and PM_{2.5} at nearby receptors and compared to the BAAQMD significance threshold and summarized in Tables 3.2-10 and 3.2-11 on Draft EIR page 3.2-33 and 3.2-35.

As summarized in Exhibit C, a number of EBMUD standard practices and procedures, applicable to all EBMUD projects, have been incorporated into the Project, including Standard Construction Specification 01 35 44, Section 3.5, Air Quality Control, which requires that all construction equipment, diesel trucks, and generators be equipped with Best Available Control Technology (BACT) for emission reductions of nitrogen oxides (NO_x) and PM. With implementation of the EBMUD Standard Construction Specifications, use of engines that meet the Tier 4 Final

Standards would be required and would minimize short-term construction-related health risk to nearby receptors and the estimated health risk from exposure to Project construction emissions would be less than the BAAQMD significance thresholds. With implementation of EBMUD Standard Construction Specifications, the Project's estimated construction emissions from the Project would be less than the recommended BAAQMD significance thresholds for criteria pollutants and construction-related health risk from exposure to TAC and PM_{2.5} would be less than the BAAQMD cumulative health risk threshold and therefore the impact would be less than significant.

Criteria Air Pollutants

During construction, the Project would generate criteria pollutant emissions of ROG, NO_x, and particulate matter and the Project's construction-related emissions would not exceed the BAAQMD construction-related criteria air pollutant significance thresholds as discussed in Impact AIR-1 above. Given that the Project would not exceed the mass emissions thresholds established by the BAAQMD, it is unlikely that emissions from Project-related activities would cause or contribute to the exposure of sensitive receptors to ground-level concentrations of O₃ in excess of health-protective levels. Because the Project would not exceed the numeric indicator for emissions of the O₃ precursors ROG and NO_x during either construction or operation, impacts would be less than significant.

Operation and Maintenance

Operation of the Project would not introduce any new sources of TAC emissions. Therefore, there would be no Project-related operational health risk impacts to nearby receptors. Operational emissions of criteria air pollutants from the Project would be minimal and less than significant.

Impact AIR-3: Result in a cumulatively considerable net increase of any criteria pollutant for which the Project region is nonattainment under an applicable federal or state ambient air quality standard.

Findings

EBMUD hereby finds that impacts would be less than significant (see Draft EIR pages 3.2-37 to 3.2-39).

Facts in Support of Findings

Criteria Air Pollutant Emissions

The Project's emissions would not exceed the BAAQMD thresholds for construction or operational criteria air pollutant significance as discussed in Impact AIR-1 above, with incorporation of EBMUD's Standard Construction Specification 01 35 44, Environmental Requirements, Section 3.5, Air Quality Control, which includes measures to control dust, reduce equipment idling times, and properly maintain construction equipment. Therefore, the Project would not result in a cumulatively considerable contribution to regional air quality impacts, resulting in a cumulative impact that is less than significant.

Health Risks

Estimated cumulative health risks would be below BAAQMD-recommended thresholds for cumulative impacts as discussed in Impact AIR-2 above. Therefore, the Project's contribution to cumulative health risks would be less than significant.

4.4.3 Biological Resources

Impact BIO-1: Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special-status species in local or regional plans, policies, or regulations or by the CDFW or USFWS.

Findings

EBMUD hereby finds that impacts would be less than significant (see Draft EIR pages 3.3-39 to 3.3-44).

Facts in Support of Findings

Rare and Special-Status Plants

Construction

The Walnut Creek WTP study area lacks suitable habitats for special-status plant species that would occur in the region and no special-status plant species were observed during rare plant surveys conducted at the Walnut Creek WTP. The Lafayette WTP study area consists primarily of developed areas with ornamental landscaping. A Northern California black walnut tree is located just outside the Lafayette WTP Project area and would be protected during construction.

As summarized in Exhibit C, a number of EBMUD standard practices and procedures, applicable to all EBMUD projects, have been incorporated into the Project, including Standard Construction Specification 01 35 45, Biological, Cultural, and Paleontological Resource Requirements, Section 3.1, Protection of Native and Non-Native Protected Trees, which includes measures for protecting the drip line of trees. With implementation of EBMUD Standard Construction Specifications, impacts to rare plant species would be less than significant.

Operation and Maintenance

Once the Project is completed and operational, operation and maintenance activities would occur within the developed areas at the Walnut Creek and Lafayette WTPs. Due to the absence of special-status plant species at the Project sites, operation of the Project would have no impact on special-status plant species.

Special-Status and Common Nesting Bird Species

Construction

Several special-status raptors and passerine avian species may nest and/or forage in or near the Walnut Creek WTP and Lafayette WTP sites. Disruption of nesting special-status or common avian species could occur as a result of tree removal throughout the Project sites or increased

human activity during the breeding season, which is a potentially significant impact as it may result in direct mortality or disturb nesting avian species and lead to nest abandonment or poor reproductive success. As summarized in Exhibit C, a number of EBMUD standard practices and procedures, applicable to all EBMUD projects, have been incorporated into the Project, including Standard Construction Specification 01 35 45, Biological, Cultural, and Paleontological Resource Requirements, Section 3.2, Protection of Birds Protected Under the Migratory Treaty Act and Roosting Bats, which includes provisions for preconstruction biological reconnaissance, including nesting bird surveys, biologic monitoring during construction, and delineation of active bird nest avoidance buffer zones. With implementation of EBMUD Standard Construction Specifications, impacts of potential tree removal and increased human activity impacts on special-status and common migratory birds, including the destruction of potential nesting habitat, eggs, or occupied nests, direct mortalities of young, and the abandonment of nests with eggs or young birds prior to fledging, would be less than significant.

Operation and Maintenance

After construction, operational impacts on nesting birds would be considered less than significant due to no change in maintenance activities from existing conditions and because lighting for the new facilities would be minimized, directed downward, and shielded thus minimizing potential disturbance to nesting birds.

Roosting Bats

Construction

Roosting habitat for special-status and common roosting bat species may be present in mature trees in the study area. Construction activities may result in the removal or disturbance of hibernation or maternal roost sites due to tree removal, building demolition, ground disturbance, noise, or human intrusion during the roosting season (approximately March through July), which is a potentially significant impact as it may result in direct mortality and reduction in reproductive success. As summarized in Exhibit C, a number of EBMUD standard practices and procedures, applicable to all EBMUD projects, have been incorporated into the Project, including Standard Construction Specification 01 35 45, Biological, Cultural, and Paleontological Resource Requirements, Section 3.2, Protection of Birds Protected Under the Migratory Bird Treaty Act and Roosting Bats, which requires that either construction begin outside of the bat maternity season (i.e., March 1 to July 31) or a pre-activity roosting bat survey be performed (EBMUD, 2023b). If active roosts are discovered, avoidance buffers shall be implemented as applicable. Additionally, Standard Construction Specification 01 35 45, Biological, Cultural, and Paleontological Resource Requirements, Section 3.1 Protection of Native and Non-Native Protected Trees, requires that work such as grading occur outside the established tree protection zone, and measures are taken to protect trees where work may occur nearby (such as protective mats, no storage of excess soil or equipment). Protective measures included in Section 3.1 would ensure that the trees outside construction footprints, which are not planned for removal, would be preserved, thus preventing loss of bat habitat. With implementation of EBMUD Standard Construction Specifications, construction impacts on roosting bats would be less than significant.

Operation and Maintenance

After construction, operational impacts on roosting bats would be considered less than significant due to no change in maintenance activities from existing conditions and because lighting for the new facilities would be minimized, directed downward, and shielded thus minimizing potential disturbance to bat species.

San Francisco Dusky-Footed Woodrat

Construction

No signs of San Francisco dusky-footed woodrat middens were observed during surveys of the Walnut Creek WTP, and San Francisco dusky-footed woodrat is not expected to inhabit Lafayette WTP because of the developed nature of the site.

Because construction at the Walnut Creek WTP would be located near potential woodrat habitat, woodrats, if present, could be impacted if they were to move through active work areas. However, the San Francisco dusky-footed woodrat is largely nocturnal, so the species is not expected to be active in the work area during daytime construction activities. Because active construction in potential woodrat habitat would be limited, and there were no woodrats or woodrat middens observed during the field survey, and because construction activities would occur during daytime when woodrats would not be expected to move through the active work areas during the daytime, the potential for impacts to the San Francisco dusky-footed woodrat would be less than significant.

Operation and Maintenance

Operation and maintenance of the Project would be similar to the existing activities. No operation activities at the Walnut Creek WTP would impact potential woodrat habitat in oak woodland or riparian areas within the Walnut Creek WTP study area and the San Francisco dusky-footed woodrat is not expected to occur within the Lafayette WTP study area due to the developed nature of the site; therefore, impacts on the San Francisco dusky-footed woodrat associated with Project operation and maintenance would be less than significant.

Impact BIO-2: Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, or regulations, or by the CDFW or USFWS.

Findings

EBMUD hereby finds that impacts would be less than significant (see Draft EIR pages 3.3-44 to 3.3-45).

Facts in Support of Findings

Construction

There are no riparian areas or sensitive natural communities present at the Lafayette WTP study area. The Walnut Creek WTP study area includes riparian habitat but does not include any other sensitive natural communities. Five native trees may need to be removed from riparian habitat at the Walnut Creek WTP to allow construction of the proposed facilities. Although five riparian trees would need to be removed, the remaining trees would be preserved to the extent possible.

Construction activities could also indirectly affect riparian areas if soil disturbing activities resulted in runoff to riparian areas introducing sediment or other pollutants.

As summarized in Exhibit C, a number of EBMUD standard practices and procedures, applicable to all EBMUD projects, have been incorporated into the Project, including EBMUD Standard Specification 01 35 45, Section 3.1, Protection of Native and Non-Native Protected Trees, which includes provisions to ensure the protection of trees that remain during construction by installing exclusion fencing around the trees to be protected outside of tree driplines, avoiding work within the tree protection zone, careful pruning of tree roots within the excavation zone, and careful pruning of tree limbs that may be damaged by heavy equipment. EBMUD Standard Construction Specification 01 35 44, Section 1.1(B), requires control of site activities to manage surface water flows, including containing surface run-off; Section 1.4(B), requires preparation of a Control and Disposal Plan; and Section 1.4(A), requires preparation of a Stormwater Pollution Prevention Plan (SWPPP) and compliance with the Contra Costa County Stormwater Permit. The listed specifications require proper stormwater management, including, but not limited to, implementing best management practices to contain runoff; maintaining a clean site without debris that could enter riparian areas; complying with applicable construction stormwater permits; disposing properly of groundwater from dewatering; and maintaining proper grading and stockpile management so that erosion is minimized, and surface runoff does not enter waterways.

With implementation of EBMUD Standard Construction Specifications, existing trees that do not need to be removed would be preserved, and riparian areas would not be subjected to an appreciable increase in turbidity or flow as a result of soil-disturbing activities on the Project site. Impacts on riparian habitat during construction would be less than significant.

Operation and Maintenance

Project operation and maintenance would include activities such as vegetation management, and tree and shrub trimming and would be limited to developed and landscaped areas at the Walnut Creek and Lafayette WTPs. Therefore, operation and maintenance of the Project would not impact riparian habitats or sensitive natural communities and there would be no impact.

Impact BIO-3: Have a substantial adverse effect on state or federally protected wetlands (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means.

Findings

EBMUD hereby finds that impacts would be less than significant (see Draft EIR pages 3.3-46 to 3.3-47).

Facts in Support of Findings

Construction

Construction of the Project would require excavation, dewatering, grading changes in drainage patterns, and other soil-disturbing activities, potentially delivering increased flows, sediment, and other pollutants to Putnam Creek, the unnamed intermittent creeks, and the ephemeral drainage

in the Walnut Creek WTP study area, and Lafayette Creek, which is south of the Lafayette WTP study area. An increase in flow, turbidity, and stormwater run-off entering the creeks and drainage is a potentially significant impact as it may result in habitat modifications that could affect the habitat function of the creek areas.

As summarized in Exhibit C, a number of EBMUD standard practices and procedures, applicable to all EBMUD projects, have been incorporated into the Project, including: EBMUD Standard Construction Specification 01 35 44, Section 1.1(B), which requires control of site activities to manage surface water flows, including containing surface run-off; Section 1.4(A) which requires submittal of a SWPPP and compliance with Contra Costa County stormwater permit requirements, and Section 1.4(B), which requires a Water Control and Disposal Plan. With implementation of EBMUD Standard Construction Specifications creeks and riparian corridors would not be subjected to an appreciable increase in turbidity and flow as a result of grading, excavation, changes in drainage patterns, and other soil-disturbing activities on the Project sites; therefore, impacts on wetlands and waters would be less than significant.

Operation and Maintenance

Project operation has very limited potential for substantial runoff or erosion that could impact waterways. Exposed soils would be hydroseeded with EBMUD's standard hydroseed mix upon the completion of construction to prevent erosion of topsoil. In addition, the Project would include the construction of new bioretention facilities at the Walnut Creek WTP site. Because the new bioretention facilities would enhance drainage and reduce runoff at the Walnut Creek WTP, and because both the Walnut Creek and Lafayette WTPs would be revegetated, operation and maintenance of the Project would not create a substantial adverse effect on state or federally protected wetlands or jurisdictional non-wetland waters, and the impact would be less than significant.

Impact BIO-4: Interfere substantially with the movement of any resident or migratory fish or wildlife species or with established resident or migratory wildlife corridors, or impede the use of wildlife nursery sites.

Findings

EBMUD hereby finds that impacts would be less than significant (see Draft EIR pages 3.3-48 to 3.3-49).

Facts in Support of Findings

Construction, Operation and Maintenance

During both the construction and operational phases, the activities proposed at the Project sites would not interfere substantially with the movement of wildlife species or impede the use of wildlife nursery sites. Because the Walnut Creek WTP study area is highly developed and surrounded on three sides by residential development, it would not serve as a wildlife corridor. Putnam Creek, the unnamed intermittent creek, and the ephemeral drainage channel are all highly disturbed and would not provide movement corridors for fish or wildlife species. The Lafayette WTP study area would not be considered a wildlife corridor because it is highly developed, consisting mainly of paved roads and buildings. Tree canopies in the Walnut Creek

WTP study area could serve as nest sites for birds; potential impacts on nesting birds are analyzed in Impact BIO-1. As described under Impact BIO-1, above, a number of EBMUD standard practices and procedures, applicable to all EBMUD projects, have been incorporated into the Project, including Standard Construction Specification 01 35 45, Biological, Cultural, and Paleontological Resource Requirements, Section 3.2, Protection of Birds Protected Under the Migratory Treaty Act and Roosting Bats, which includes provisions for preconstruction biological reconnaissance, including nesting bird surveys, biologic monitoring during construction, and delineation of active bird nest avoidance buffer zones.

Because the Walnut Creek WTP and Lafayette WTP study areas do not serve as wildlife corridors, the Project would result in a less-than-significant impact on the movement of any resident or migratory fish or wildlife species or impede the use of wildlife nursery sites during Project construction or operation.

Impact BIO-5: Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance.

Findings

EBMUD hereby finds that impacts would be less than significant (see Draft EIR pages 3.3-49 to 3.3-50).

Facts in Support of Findings

Construction, Operation and Maintenance

City of Walnut Creek General Plan

The Project is consistent with policies contained in the City of Walnut Creek General Plan. Goal 1 of the Walnut Creek General Plan's Natural Environment and Public Space chapter is to maintain and enhance open space lands, and Goal 3 aims to maintain and restore creek systems and riparian environments. Project work at the Walnut Creek WTP would take place entirely within the boundary of the water treatment plant and would not affect public lands in Walnut Creek that are currently dedicated to open space use. Construction activities at the Walnut Creek WTP would not impact creeks or riparian habitat in the study area. The Project would be consistent with goals and policies in the Walnut Creek General Plan and the impact would be less than significant.

City of Lafayette General Plan

The Project is consistent with policies contained in the City of Lafayette General Plan. Goal LU-2 of the General Plan states that the scenic qualities of ridgelines, hills, creek areas, and trees should be preserved. Similarly, Goal OS-4 and associated policies are intended to preserve areas with important biotic resources such as riparian vegetation, ridgelines, and woodlands. Goal OS-5 focuses on preservation and protection of creeks and streams. The Project work at the Lafayette WTP would not impact the natural topography of the area, nor would work impact nearby creek areas. Therefore, the Project would be consistent with Goals LU-2, OS-4, and OS-5 and the impact would be less than significant.

City of Walnut Creek Municipal Code

Tree removal is necessary for Project construction at the Walnut Creek WTP. Of the approximately 189 existing trees within the Walnut Creek WTP arborist study area, approximately 86 would be removed to accommodate Project construction, 74 of which are considered “protected” by the Walnut Creek Municipal Code, and 45 of which are considered “highly protected”. While the Walnut Creek Municipal Code does not have a tree replacement requirement, approximately 31 new native oak trees (24-inch box) would be planted for visual screening, resulting in a total of 134 trees within the Walnut Creek study area after construction is complete and the impact would be less than significant. As summarized in Exhibit C, a number of EBMUD standard practices and procedures, applicable to all EBMUD projects, have been incorporated into the Project, including EBMUD Standard Specification 01 35 45, Section 3.1, Protection of Native and Non-Native Protected Trees, which includes provisions to ensure the protection of trees that remain during construction by installing exclusion fencing around the trees to be protected outside of tree driplines, avoiding work within the tree protection zone, careful pruning of tree roots within the excavation zone, and careful pruning of tree limbs that may be damaged by heavy equipment. With implementation of EBMUD Standard Construction Specifications, the Project would not conflict with the City of Walnut Creek Municipal Code and therefore the impact would be less than significant.

City of Lafayette Municipal Code

Of the approximately 59 existing trees within the Lafayette WTP arborist study area, approximately 28 would be removed to accommodate Project construction, 18 of which are considered “protected” according to the Lafayette Municipal Code. The City of Lafayette Tree Preservation Ordinance 6-1707(G)(1) requires replacement of protected trees at a 2:1 ratio, and only seven new native oak trees (24-inch box) would be planted within the Project at Lafayette WTP due to limitations of the existing site conditions. Ordinance 6-1707(G)(4) allows for a smaller number of trees to be replaced due to Project site conditions and if that reduction will be beneficial to the health and vigor of other protected trees on the property. Due to the site constraints (i.e., built out site with little opportunity for new landscaping) and to protect the health and vigor of the existing trees, only 7 new native oak trees would be planted at the Lafayette WTP site, which is consistent with the Tree Ordinance. After the new tree planting, there would be 38 trees within the Lafayette WTP arborist study area after construction is complete and the impact would be less than significant. As summarized in Exhibit C, a number of EBMUD standard practices and procedures, applicable to all EBMUD projects, have been incorporated into the Project, including EBMUD Standard Specification 01 35 45, Section 3.1, Protection of Native and Non-Native Protected Trees, which includes provisions to ensure the protection of trees that remain during construction by installing exclusion fencing around the trees to be protected outside of tree driplines, avoiding work within the tree protection zone, careful pruning of tree roots within the excavation zone, and careful pruning of tree limbs that may be damaged by heavy equipment. With implementation of EBMUD Standard Construction Specifications, the Project would not conflict with the City of Lafayette’s Tree Preservation Ordinance and therefore the impact would be less than significant.

4.4.4 Cultural Resources

Impact CUL-1: Cause a substantial adverse change in the significance of a historical resource, as defined in Section 15064.5.

Findings

EBMUD hereby finds that impacts would be less than significant (see Draft EIR pages 3.4-15 to 3.4-16).

Facts in Support of Findings

Construction

The Walnut Creek WTP is not considered a historical resource under CEQA; therefore, construction activities are considered to have a less than significant impact related to architectural historical resources. The Lafayette WTP as a whole is not considered a historical resource but Bryant No. 2 Pumping Plant, which is within the Lafayette WTP property, but outside the Project area, and Temple Isaiah of Contra Costa County, which is located adjacent to the Lafayette WTP, are both considered to be historical resources. However, the demolition of the Lafayette Weir No. 1 structure at the Lafayette WTP would not alter the Bryant No. 2 Pumping Plant or the historic Temple Isaiah of Contra Costa County. Construction activities at the Lafayette WTP site would not cause a substantial change in the significance of a historical resource pursuant to CEQA Guidelines Section 15064.5, and the impact is considered to be less than significant.

Operation and Maintenance

Because operation and maintenance activities at the Walnut Creek WTP and Lafayette WTP would not involve demolition or alteration of existing structures there would be no changes in historical resources and impacts would be less than significant.

Impact CUL-2: Cause a substantial adverse change in the significance of an archaeological resources, pursuant to CEQA Guidelines Section 15064.5.

Findings

EBMUD hereby finds that impacts would be less than significant (see Draft EIR pages 3.4-17 to 3.4-18).

Facts in Support of Findings

Construction

The results of the background research and surface survey indicate that there are no prehistoric or historic-era archaeological resources within the Project area and that there is a low potential to uncover resources during Project implementation. However, the possibility of inadvertent discovery cannot be entirely discounted, and could result in a potentially significant impact. As summarized in Exhibit C, a number of EBMUD standard practices and procedures, applicable to all EBMUD projects, have been incorporated into the Project, including EBMUD's Standard Construction Specification 01 35 44, Environmental Requirements, Section 3.3, Protection of

Cultural and Paleontological Resources, which includes appropriate cultural resource management practices such as preconstruction cultural resources training and procedures to follow in the event that a cultural resource is identified during construction. With implementation of EBMUD Standard Construction Specifications, the Project's construction impacts related to archaeological resources would be less than significant.

Operation and Maintenance

Because operation and maintenance activities at the Walnut Creek WTP and Lafayette WTP would not involve ground disturbing activities there would be no disturbance to archaeological resources and no impact is anticipated.

Impact CUL-3: Disturb any human remains, including those interred outside of dedicated cemeteries.

Findings

EBMUD hereby finds that impacts would be less than significant (see Draft EIR pages 3.4-18 to 3.4-19).

Facts in Support of Findings

Construction

There is no indication from archival research or survey effort that any part of the Project sites has been used for human burial purposes in the recent or distant past. Therefore, it is unlikely that human remains would be encountered during construction of the Project. However, the possibility of inadvertent discovery cannot be entirely discounted. As summarized in Exhibit C, a number of EBMUD standard practices and procedures, applicable to all EBMUD projects, have been incorporated into the Project, including EBMUD's Standard Construction Specification 01 35 44, Environmental Requirements, Section 3.3, Protection of Cultural and Paleontological Resources, which requires implementation of procedures that address the inadvertent discovery of human remains and follows statutory law. With implementation of EBMUD Standard Construction Specifications, the Project's impacts related to disturbing human remains are less than significant.

Operation and Maintenance

Because operation and maintenance activities at the Walnut Creek WTP and Lafayette WTP would not involve ground disturbing activities there would be no disturbance to human remains and no impact is anticipated.

4.4.5 Energy

Impact EN-1: Result in potentially significant environmental impact due to wasteful, inefficient, or unnecessary consumption of energy resources during Project construction or operation.

Findings

EBMUD hereby finds that impacts would be less than significant (see Draft EIR pages 3.5-7 to 3.5-12).

Facts in Support of Findings

Construction

Construction of the Project would require use of energy; however, the energy used during construction would be temporary and would cease after construction is completed. Fuel use would be consistent with typical construction and manufacturing practices and would not require excessive or wasteful use of energy. As summarized in Exhibit C, a number of EBMUD standard practices and procedures, applicable to all EBMUD projects, have been incorporated into the Project, including Standard Construction Specification 01 35 44 Section 3.5, Air Quality Control, which includes BMPs to ensure efficient use of construction-related fuels. With implementation of EBMUD Standard Construction Specifications, the Project construction impacts related to energy use and impacts on energy resources would be less than significant because construction vehicles and equipment would comply with federal standards for fuel efficiency, construction would not result in wasteful, inefficient, or unnecessary consumption of energy resources.

Operation and Maintenance

The new water treatment processes and facilities at the Walnut Creek WTP would require additional staff to operate and maintain facilities. Work trips would result in an additional approximately 104 miles travelled per day, and approximately 5 gallons of gasoline fuel per day. The existing Walnut Creek WTP uses approximately 2,000 MWh of electricity each year for water treatment, pumping treated water, and site operations. The Project would require an increase in electrical power at the Walnut Creek WTP of approximately 2,000 to 5,000 MWh each year (depending on untreated water quality) for lighting in the new buildings and for operation of the ballasted flocculation, ozone generation, and mechanical dewatering equipment. Power demands would be met by the local utility, PG&E. Although the Project would consume electricity, gasoline, and diesel fuel, the Project would have a less than significant impact on unnecessary or wasteful energy use because the Project would adhere to all applicable energy conservation measures, including Advanced Clean Cars and the In-Use Off-Road Diesel Vehicles regulations, and applicable measures adopted under the EBMUD Sustainability and Resilience Policy and Climate Action Plan. Therefore, the Project would have a less than significant impact due to inefficient energy use.

4.4.6 Geology and Soils

Impact GEO-1: Directly or indirectly cause potential substantial adverse effects, including the risk of loss, injury, or death involving: rupture of a known earthquake fault; strong seismic groundshaking; seismic-related ground failure (liquefaction, lateral spreading); or landslides.

Findings

EBMUD hereby finds that impacts would be less than significant (see Draft EIR pages 3.6-20 to 3.6-23).

Facts in Support of Findings

Construction, Operation and Maintenance

None of the Project elements are within an Alquist-Priolo Earthquake Fault Zone and no mapped active faults are known to pass through the immediate Project region at either the Walnut Creek WTP or Lafayette WTP sites. Seismic-related groundshaking and the hazardous conditions created by it could result in potentially significant impacts on the Project site. A preliminary geotechnical analysis has been conducted at the Walnut Creek WTP site and will be conducted at the Lafayette WTP site to address seismic-related impacts in the final design including groundshaking and, if necessary, during construction. Site-specific design-level geotechnical evaluations have been performed, which included subsurface drilling, soil testing, and analysis of site seismic response. Recommendations resulting from findings of the Walnut Creek WTP geotechnical study, including seismic design parameters for new facilities to ensure that facilities are designed per applicable California Building Code (CBC) requirements, are presented in the Geotechnical Interpretive Report that is included as an appendix to the Draft EIR and would be incorporated into the design and construction of proposed facilities.

As summarized in Exhibit C, a number of EBMUD standard practices and procedures, applicable to all EBMUD projects, have been incorporated into the Project, including EBMUD Engineering Standard Practice 512.1 and Engineering Standard Practice 550.1, Seismic Design Requirements, and EBMUD Standard Construction Specification 01 81 02, Seismic Design Criteria, which include requirements for pipelines and structures to withstand seismic hazards and requires the completion of a geotechnical investigation during design and incorporation of geotechnical design recommendations in Project plans and specifications and ensures Project elements are designed, constructed and installed in conformance with the seismic requirements contained in the CBC and other applicable standards. With implementation of EBMUD Engineering Standard Practices and Standard Construction Specifications, all new facilities would be designed and constructed in accordance with applicable seismic design criteria per applicable recommendations presented in the Geotechnical Interpretive Report and all new structures would be built to withstand seismic shaking. Thus, the risk of loss, injury, or death involving strong seismic groundshaking is low, and impacts are considered less than significant.

Impact GEO-2: Result in substantial soil erosion or the loss of topsoil.

Findings

EBMUD hereby finds that impacts would be less than significant (see Draft EIR pages 3.6-23 to 3.6-25).

Facts in Support of Findings

Construction

The excavation and grading activities that are planned during Project construction would increase exposure of topsoil to erosion. Storm weather (e.g., wind and rain) could also result in soil erosion, which could potentially have a significant impact.

As summarized in Exhibit C, a number of EBMUD standard practices and procedures, applicable to all EBMUD projects, have been incorporated into the Project, including Standard Construction Specification 01 35 44, Environmental Requirements, Section 1.1(B), Site Activities, Section 01 35 44, Environmental Requirements, Section 1.4(A), Storm Water Management, which would require provisions for preventing soil erosion and loss of soil during construction, diversion of surface waters and maintenance of the construction site to minimize erosion and loss of soil, measures to prevent the run-off of polluted stormwater from the construction site, and compliance with a design-level geotechnical investigation to confirm the characteristics of the subsurface and to identify any soil control measures. With implementation of EBMUD's Standard Construction Specifications, construction activities would implement practices and regulations to reduce erosion and control sediment, and therefore the construction impacts related to soil erosion and loss of topsoil would be less than significant.

Operation and Maintenance

During operation and maintenance of the Project, the potential for substantial soil erosion or loss of topsoil at the Walnut Creek WTP and Lafayette WTP sites is minimized as revegetation for erosion control/site stabilization would be established. Erosion control measures implemented during construction would reduce the potential for short- or long-term structural damage to fills, foundations, and other engineered structures. Because site stabilization would be established, impacts on substantial soil erosion or loss of topsoil would be less than significant.

Impact GEO-3: Be located on a geologic unit or soil that is unstable or that would become unstable as a result of the Project, and potentially could result in on-site or off-site landslide, lateral spreading, subsidence, liquefaction, or collapse.

Findings

EBMUD hereby finds that impacts would be less than significant (see Draft EIR pages 3.6-25 to 3.6-28).

Facts in Support of Findings

Construction, Operation and Maintenance

Landslides

While several landslides exist on the slopes along the easterly, western, and northern portions of the Walnut Creek WTP, with the exception of the southern Intermediate Ozone Contactor, the mapped landslides do not overlap with the proposed facilities. A geotechnical analysis has been conducted to address seismic-related impacts including landslides in the final design. Site-specific design-level geotechnical evaluations have been performed, which included subsurface drilling, soil testing, and analysis of site seismic response. Additionally, a geotechnical engineer has developed the seismic design parameters for new facilities to ensure that facilities are

designed per applicable CBC requirements. Recommendations resulting from findings of the geotechnical study would be incorporated into the design and construction of proposed facilities.

Because the modified slopes are anticipated to be stable with the proposed improvements, and the southern Intermediate Ozone Contractor would be sited on formational material below the soils prone to sliding, the risk of landslides as a result of the Project is low and impacts at the Walnut Creek WTP are considered less than significant.

Groundshaking during earthquakes could trigger landslides at the Lafayette WTP. The Delaplane landslide is a large, active landslide beneath the Lafayette WTP that has the potential to create a hazard risk. A geotechnical investigation would be conducted at the Lafayette WTP to gather subgrade information and address seismic-related impacts including landslides in the final design. A geotechnical engineer would develop the seismic design parameters for new facilities to ensure that facilities are designed per applicable CBC requirements. Recommendations resulting from findings of the geotechnical study would be incorporated into the design and construction of proposed facilities.

Because all new facilities would be designed and constructed in accordance with applicable seismic design criteria, and because facilities would also be designed per applicable recommendations presented in the geotechnical study, all new structures would be built such that the risk of landslide as a result of the Project is low, and the impacts are considered less than significant.

Liquefaction and Lateral Spreading

Neither the Walnut Creek WTP nor the Lafayette WTP are located in areas subject to liquefaction and the risk of liquefaction and lateral spreading is low at both sites. In addition, recommendations resulting from findings of the geotechnical study would be incorporated into the design and construction of proposed facilities. With implementation of applicable seismic design criteria and compliance with the latest editions of the CBC, impacts associated with liquefaction and lateral spreading would be less than significant.

Subsidence and Soil Collapse

The Project would not change existing groundwater levels and impacts associated with dewatering-induced settlement thus would be less than significant. Unsupported excavations into soft or loose soils can cause soil collapse.

As summarized in Exhibit C, a number of EBMUD standard practices and procedures, applicable to all EBMUD projects, have been incorporated into the Project, including Standard Construction Specification 01 35 24, Project Safety Requirements, Section 1.3(L), Excavation Safety Plan, which includes practices and procedures for preventing subsidence and soil collapse. With implementation of EBMUD Standard Construction Specifications, which will require appropriate excavation safety measures, the risk of soil collapse would be less than significant.

Impact GEO-4: Be located on expansive soil, as defined in Table 18-1-B of the Uniform Building Code (1994), creating substantial direct or indirect risks to life or property.

Findings

EBMUD hereby finds that impacts would be less than significant (see Draft EIR pages 3.6-28 to 3.6-29).

Facts in Support of Findings

Construction, Operation and Maintenance

Soils at the Walnut Creek WTP site range from having very low to very high expansion potential and Project elements located in areas with moderate to high expansion characteristics are expected to have these soils excavated and replaced with appropriate fill. Because excavation of expansive soils and replacement with additional fill would be used in subgrade locations with moderate to high expansion characteristics, impacts related to construction at the Walnut Creek WTP would not create a risk to life or property and would therefore be less than significant.

The Lafayette WTP site is underlain by sedimentary rock, which would be confirmed with a future geotechnical investigation at the site including recommendations on how to address expansive soils if encountered. Because excavation of expansive soil and replacement with additional fill would be used in subgrade locations with moderate to high expansion characteristics, impacts related to construction at the Lafayette WTP would not create a risk to life or property and would therefore be less than significant.

Impact GEO-5: Directly or indirectly destroy a unique paleontological resource or site or unique geologic feature.

Findings

EBMUD hereby finds that impacts would be less than significant (see Draft EIR pages 3.6-29 to 3.6-30).

Facts in Support of Findings

Construction

Paleontological resources have the potential to occur in the sedimentary rock formations at both the Walnut Creek WTP and Lafayette WTP. As summarized in Exhibit C, a number of EBMUD standard practices and procedures, applicable to all EBMUD projects, have been incorporated into the Project, including EBMUD Standard Construction Specification 01 35 45, Biological, Cultural, and Paleontological Resource Requirements Section 3.3, Protection of Cultural and Paleontological Resources, which outlines paleontological resource protection measures such as requiring construction personnel to undergo paleontological resources training and immediately stop work if paleontological resources are discovered on site. With implementation of EBMUD Standard Construction Specifications, which include practices and regulations to prevent the direct or indirect destruction of unique paleontological resources or unique geological features, the impact of the Project would be less than significant.

Operation and Maintenance

Because operation and maintenance activities at the Walnut Creek WTP and Lafayette WTP would not involve ground disturbing activities there would be no disturbance to paleontological resources and no impact is anticipated.

4.4.7 Greenhouse Gas (GHG) Emissions

Impact GHG-1: Generate GHG emission, either directly or indirectly, that may have a significant impact on the environment.

Findings

EBMUD hereby finds that impacts would be less than significant (see Draft EIR pages 3.7-15 to 3.7-19).

Facts in Support of Findings

Construction

Project construction would involve the use of fossil fuels in construction equipment, which would generate GHGs such as carbon dioxide, methane, and nitrous oxide. Although BAAQMD's CEQA Guidelines do not specify thresholds of significance for construction related GHG emissions, they do encourage incorporation of best management practices to reduce GHG emissions during construction, where feasible and applicable. As summarized in Exhibit C, a number of EBMUD standard practices and procedures, applicable to all EBMUD projects, have been incorporated into the Project, including EBMUD Standard Construction Specification 01 35 44, Section 3.5, Air Quality Control, which includes measures to conserve energy, recycle materials, maintain equipment, use clean fuels, and reduce emissions from equipment. With implementation of EBMUD Standard Construction Specifications, Project construction would not generate GHG emissions that would have a significant impact on the environment, and the impact would be less than significant.

Operation and Maintenance

Annual operational GHG emissions would be below the 2017 BAAQMD CEQA significance threshold. In addition, EBMUD produces more electricity annually through renewable sources than it requires for its operation and maintenance. EBMUD currently produces renewable energy through hydropower, combusting biogas, and through solar photovoltaic projects. Therefore, GHG emissions from the Project associated with indirect electricity use would be largely offset by EBMUD's renewable energy supplies. GHG emissions from operation and maintenance would not have a significant impact on the environment, and the operational impact would be less than significant.

Impact GHG-2: Conflict with a plan, policy, or regulation adopted for the purpose of reducing GHG emissions.

Findings

EBMUD hereby finds that impacts would be less than significant (see Draft EIR pages 3.7-20 to 3.7-22).

Facts in Support of Findings

Construction

Project GHG emissions were analyzed in the context of the GHG reduction goals of Assembly Bill (AB) 32, Senate Bill (SB) 32, 2017 Scoping Plan Update, BAAQMD's 2017 Clean Air Plan, EBMUD's Climate Change Monitoring and Response Plan, and EBMUD's Climate Action Plan to determine whether the Project would conflict with an applicable plan, policy, or regulation adopted for the purpose of reducing GHG emissions. The Project's construction related GHG emissions would not conflict with any plans, policies, or regulations adopted for the purpose of reducing GHG emissions.

As summarized in Exhibit C, a number of EBMUD standard practices and procedures, applicable to all EBMUD projects, have been incorporated into the Project, including Standard Construction Specification 01 35 44 Section 3.5, Air Quality Control, which would minimize GHG emissions by ensuring that line electricity is used instead of diesel generators whenever possible, idling time for trucks and construction equipment is minimized, applicable regulations for fuel and fuel additives are followed for all vehicles and equipment, equipment is regularly tuned up to maintain fuel efficiency, proper tire pressure is maintained for all vehicles and equipment, and demolition debris is recycled to the extent feasible. With implementation of EBMUD Standard Construction Specifications, the Project would reuse or recycle demolition materials and diesel trucks and off-road equipment would be required to comply with the latest vehicle emission standards established by the California Air Resources Board (CARB) pursuant to the 2017 Scoping Plan Update resulting in a less than significant impact.

Operation and Maintenance

Operation and maintenance of the Project would involve an increase in electricity use, which would indirectly produce GHG emissions, and a small increase in vehicle trips (approximately six new trips per day (i.e., 1 trip for dewatered solids removal, 1 for chemical delivery, and 4 for operations and maintenance staff), which would result in direct GHG emissions. EBMUD's Climate Change Monitoring and Response Plan includes actions EBMUD is taking to reduce its emissions, particularly from its fleet operations, which accounted for approximately 15 percent of EBMUD's total GHG emissions in 2020. Indirect GHG emissions from electricity used by the Project would be subject to goals in EBMUD's 2021 Climate Action Plan and measures in EBMUD's 2014 Climate Change Monitoring and Response Plan, which outlines how GHG emissions reductions are accomplished through implementation of energy efficiency practices, use of low-carbon energy sources, reductions in non-CO₂ emissions reductions (including black carbon), and carbon sequestration. Because energy efficiency measures would be implemented in accordance with the 2014 Climate Change Monitoring and Response Plan and 2021 Climate Action Plan, the Project's operation and maintenance GHG emissions would not conflict with Scoping Plan actions, 2017 Clean Air Plan, or the BAAQMD-recommended CEQA significance thresholds, resulting in a less than significant impact.

4.4.8 Hazards and Hazardous Materials

Impact HAZ-1/ Create a significant hazard to the public or the environment

Impact HAZ-2: through the routine transport, use, or disposal of hazardous materials. Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the likely release of hazardous materials into the environment.

Findings

EBMUD hereby finds that impacts would be less than significant (see Draft EIR page 3.8-15 to 3.8-21).

Facts in Support of Findings

Construction

During the Project demolition and construction phases, construction equipment and building materials may include the following substances: fuels, oils and lubricants, solvents and cleaners, cements and adhesives, paints and thinners, degreasers, cement and concrete, and asphalt mixtures, all of which would be transported, used, and disposed of during construction. The routine use or an accidental spill of hazardous materials could result in inadvertent releases, which could adversely affect construction workers, the public, and the environment. Also, implementation of the Project would involve the demolition and removal of existing structures that could contain hazardous materials. The Lafayette Weir No. 1, which would be demolished, does not contain asbestos or lead-based paint. Hazardous building materials are known to be present in structures at the Walnut Creek WTP and include asbestos containing materials, lead-based paint, and polychlorinated biphenyls. There are also records of an underground storage tank (UST) at the Walnut Creek WTP. Demolition activities at the Walnut Creek WTP could release hazardous building materials.

General Procedures to Address Hazardous Materials during Construction

As summarized in Exhibit C, a number of EBMUD standard practices and procedures, applicable to all EBMUD projects, have been incorporated into the Project to safely manage and dispose of hazardous materials. These include EBMUD Standard Construction Specification 01 35 24, Project Safety Requirements, Section 1.3(B), Project Safety and Health Plan, and Standard Construction Specification 01 35 44, Environmental Requirements, Section 1.1(B), Site Activities, Section 1.4(A), Storm Water Management, Section 1.4(B), Water Control and Disposal Plan, Section 1.4(C), Waste Management, Section 1.4(E), Spill and Prevention Response Plan, Section 1.4(I), Waste Disposal Records, Engineering Standard Practice 514, Identifying Buried Conflicts, and Procedure 711, Hazardous Waste Removal.

Together, the EBMUD Standard Construction Specifications will require the contractor to prepare a Project Safety and Health Plan that will be implemented to address anticipated hazards related to hazardous substances, fall protection, confined spaces, and trenches or excavations; a Storm Water Pollution Prevention Plan that will be implemented to control activities to prevent the discharge of sediment and/or other pollutants in stormwater; a Construction and Demolition Waste Disposal Plan that will be implemented to remove, handle, transport, and dispose of all materials in a safe, appropriate, and lawful manner in compliance with all applicable regulations; a Water Control and Disposal Plan that will be implemented to maintain proper control of discharges to prevent sediment and potential pollutants, such as fuel spills and/or petroleum

products from construction equipment leaks, in storm water discharges into receiving waters; a Spill and Prevention Response Plan that will be implemented to prevent and control spills of hazardous substances; and to maintain Waste Disposal Records to ensure proper disposal of hazardous wastes.

Implementation of EBMUD Procedure 711, Hazardous Waste Removal will define hazardous wastes and establish responsibilities for the removal of hazardous wastes from EBMUD facilities; require the contractor to carry out specific steps and responsibilities for characterizing waste and determining what analyses are needed to classify the waste; and ensure correct labeling, storing, inspecting, and tracking of any hazardous waste, including handling, disposal requirements, and hazardous waste manifests.

Asbestos Containing Materials (ACM)

Existing Walnut Creek WTP structures to be demolished during site preparation could contain asbestos due to the age of the structures. As summarized in Exhibit C, a number of EBMUD standard practices and procedures, applicable to all EBMUD projects, have been incorporated into the Project including EBMUD Standard Construction Specification 02 82 13, Asbestos Control Activities which requires that the contractor submit a detailed plan of the procedures to address Asbestos Containing Materials (ACM). The plan will include the location and layout of decontamination areas, the sequencing of asbestos work, the interface of trades involved in the performance of work, disposal plan including location of approved disposal site, a detailed description of the methods to be employed to control pollution, description of the use of portable high efficiency particulate air (HEPA) ventilation system, method of removal to prohibit visible emissions in the work area (including suppressing air-borne particulates using a minimum of two misting units operated simultaneously), and packaging of removed asbestos debris. Once all abatement measures have been implemented, the contractor would conduct a clearance examination and provide documentation that testing and abatement were completed in accordance with federal, state, and local laws and regulations. The required compliance with applicable regulations, along with implementation of EBMUD Standard Construction Specifications and District Procedure 711 the Project's impacts related to the release of ACM into the environment would be less than significant.

Lead-Based Paint (LBP)

Existing Walnut Creek WTP structures to be demolished during site preparation could contain Lead-Based Paint (LBP) due to the age of the structures. As detailed summarized in Exhibit C, a number of EBMUD standard practices and procedures, applicable to all EBMUD projects, have been incorporated into the Project, including Standard Construction Specification 02 83 13, Lead Hazard Control Activities which requires preparation of a Lead Demolition Plan prior to demolition. The plan would detail the safe handling, engineering control, removal, and disposal procedures for lead-containing materials and would therefore minimize the risk to the public and environment from the disposal of lead-based paint.

Wastes from abatement and demolition activities would be transported to and disposed of at a Class I or certified Class II landfill permitted to accept such waste. Once all abatement measures have been implemented, the contractor would conduct a clearance examination and provide documentation that testing and abatement were completed in accordance with federal, state, and local laws and regulations. The required compliance with these regulations, along with implementation of EBMUD Standard Construction Specifications and Procedures, would ensure

that the Project's impacts related to the release of LBP into the environment would be less than significant.

Polychlorinated Biphenyls (PCBs)

Older transformers located on the Walnut Creek WTP site may contain Polychlorinated Biphenyls (PCBs) due to the age of the equipment. Although there is no evidence of a spill or release, the presence of PCBs and potential PCB-containing equipment is considered an environmental risk. As summarized in Exhibit C, a number of EBMUD standard practices and procedures, applicable to all EBMUD projects, have been incorporated into the Project, including EBMUD Standard Construction Specification 01 35 24, Section 1.3(B), Project Safety Requirements, which require any personnel likely to be exposed to hazardous conditions or substances at the site have completed all appropriate training for the hazards they may encounter. The Project Health and Safety Plan will ensure that all personnel are in compliance with applicable health and safety requirements. There is no record of PCB use at the Lafayette Weir No. 1 structure at the Lafayette WTP. The required compliance with applicable regulations, along with implementation of EBMUD Standard Construction Specifications and Procedures, would ensure that the Project's impacts related to the release of PCBs into the environment would be less than significant.

Underground Storage Tanks (USTs)

Historical records indicated the potential listing of a 55-gallon gasoline Underground Storage Tank (UST) and a 1,000-gallon gasoline UST on the Walnut Creek WTP property. No record of a spill or release was identified in connection with the USTs; however, the lack of information associated with the USTs is considered an environmental risk. As summarized in Exhibit C, a number of EBMUD standard practices and procedures, applicable to all EBMUD projects, have been incorporated into the Project, including EBMUD Standard Construction Specification 01 35 24, Section 1.3(B), Project Safety Requirements, which require any personnel likely to be exposed to hazardous conditions or substances at the site have completed all appropriate training for the hazards they may encounter. The Project Health and Safety Plan will ensure that all personnel are in compliance with applicable health and safety requirements. There is no record of USTs near the Lafayette Weir No. 1 structure at the Lafayette WTP. The required compliance with applicable regulations, along with implementation of EBMUD Standard Construction Specifications and Procedures, would ensure that the Project's impacts related to release of gasoline from USTs into the environment would be less than significant.

Accidental Rupture of High-Priority Subsurface Utilities

There is a potential for accidental rupture of high-priority subsurface utilities during excavation and trenching at the Walnut Creek WTP. As summarized in Exhibit C, a number of EBMUD standard practices and procedures, applicable to all EBMUD projects, have been incorporated into the Project including EBMUD Engineering Standard Practice 514, Identifying Buried Conflicts, and EBMUD Standard Construction Specification 01 35 24, Project Safety Requirements Section 1.3 (B), Project Health and Safety Plan, Section 1.3(K), Electrical Safety Plan, and Section 1.3 (L) Excavation Safety Plan, which requires researching, collecting, identifying, and depicting existing utilities; preparing and implementing a Project Safety and Health Plan; and preparing and implementing an Electrical Safety Plan that would identify requirements to protect workers from hazardous voltages and hazardous materials. The required compliance with applicable regulations, along with implementation of EBMUD Standard

Construction Specifications and Procedures that would identify requirements to protect workers from hazardous voltages and hazardous materials, will ensure that the risk of accidental rupture of high-priority subsurface utilities is low, and impacts would be less than significant.

Operation and Maintenance

Ongoing operation and maintenance at the Walnut Creek WTP and Lafayette WTP require the use, transport, and storage of hazardous materials. New treatment processes at the Walnut Creek WTP would require the routine transport, use, and off-site disposal of additional chemicals, including alum, anionic polymer, hydrogen peroxide and liquid oxygen. There would be no new chemical usage related to operation and maintenance activities at the Lafayette WTP site, and no hazard-related operational impacts to the public or environment would occur. As required by law, EBMUD maintains a Hazardous Materials Business Plan (HMBP) for both the Walnut Creek WTP and Lafayette WTP, which include a hazardous materials inventory that lists chemicals stored and used at each site. Operation and maintenance activities associated with the Project would adhere to the required HMBP and comply with applicable state and federal requirements regulating the storage and routine handling and transport of hazardous materials.

Operation and maintenance activities associated with the Project would adhere to the required HMBP, which includes specific requirements for the use, transport, and storage of hazardous materials. As summarized in Exhibit C, a number of EBMUD standard practices and procedures, applicable to all EBMUD projects, have been incorporated into the Project to safely manage and dispose of hazardous materials. EBMUD Procedure 711, Hazardous Waste Removal, defines hazardous wastes and establishes responsibilities for the removal of hazardous wastes from the site. Procedure 711 requires specific actions for characterizing waste and determining what analyses are needed to classify the waste; ensuring correct labeling, storing, inspecting, and maintaining of inventory records for waste; and requiring review, signature, and tracking of any hazardous waste handling, disposal requirements, and hazardous waste manifests.

Because operation and maintenance activities at the Walnut Creek WTP and Lafayette WTP would adhere to the required HMBP and comply with applicable state and federal requirements regulating the storage and routine handling and transport of hazardous materials, and because Procedure 711, Hazardous Waste Removal is incorporated into the Project, the operational activities would not expose the public or environment to hazardous materials, and impacts would be less than significant.

Impact HAZ-3: Expose people or structures, either directly or indirectly, to a significant risk of loss, injury or death involving wildland fires.

Findings

EBMUD hereby finds that impacts would be less than significant (see Draft EIR pages 3.8-22 to 3.8-23).

Facts in Support of Findings

Construction

Construction activities can exacerbate the risk of wildfire because construction equipment can generate fires from hot exhaust gases or from contact with the hot surfaces of the exhaust system. As summarized in Exhibit C, a number of EBMUD standard practices and procedures, applicable

to all EBMUD projects, have been incorporated into the Project, including EBMUD Standard Construction Specification 01 35 24 Section 1.3(B), which dictates project safety requirements, EBMUD Standard Construction Specification 01 35 24 Section 1.3(E), which requires the contractor to submit an Emergency Action Plan; and EBMUD Standard Construction Specification 01 35 24 Section 3.2(G), which requires that 100 feet of defensible space be maintained around work sites. Construction would require the use of diesel fuel that would be stored at the Walnut Creek WTP and Lafayette WTP sites during construction. The Project would adhere to the California Fire Code, Article 80, which includes specific requirements for the safe storage and handling of flammable and combustible liquids or hazardous materials. With implementation of EBMUD Standard Construction Specifications, construction activities would not expose people or structures to a significant risk involving wildland fires, and impacts would be less than significant.

Operation and Maintenance

While operation and maintenance of water treatment plant facilities does not entail high fire risk, both the Walnut Creek WTP and Lafayette WTP have an Emergency Action Plan and Fire Prevention Plan as required by Cal/OSHA. These plans require specific maintenance and inspection activities for fire prevention. Long-term site maintenance would continue, and would involve vegetation management on site, keeping the site clean and free of debris, and trimming shrubbery and trees for both fire prevention and public safety. Ongoing maintenance activities would continue to be conducted by staff already on site. The California Fire Code, Article 80, includes specific requirements for the safe storage and handling of flammable and combustible liquids or hazardous materials, which would be adhered to during operation and maintenance activities at the Walnut Creek WTP. The site-specific Emergency Action Plan and Fire Prevention Plan would be updated after the completion of the Project to address these issues. Fire risk at the Walnut Creek WTP site would be comparable risk from existing operations. The Project does not include operation and maintenance changes at the Lafayette WTP site that would affect fire risk, including the storage or handling of flammable or combustible materials. Because the Project would be required to comply with numerous laws and regulations, including the California Fire Code, Article 80 and includes measures to maintain defensible space, operation and maintenance activities would not expose people or structures to a significant risk involving wildland fires, and the risk of wildland fires would be less than significant.

4.4.9 Hydrology and Water Quality

Impact HYD-1: Violate water quality standards or waste discharge requirements, or otherwise substantially degrade water quality.

Findings

EBMUD hereby finds that impacts would be less than significant (see Draft EIR pages 3.9-13 to 3.9-16).

Facts in Support of Findings

Construction

Construction of the Project would require grading, excavation, stockpiling and other soil-disturbing activities on the Project sites, potentially delivering sediment and other pollutants to receiving waters by stormwater run-off, potentially degrading the water quality of receiving waters.

As summarized in Exhibit C, a number of EBMUD standard practices and procedures, applicable to all EBMUD projects, have been incorporated into the Project, including EBMUD Standard Construction Specification 01 34 44, Environmental Requirements, Section 1.1 (B), Site Activities, Section 1.4(A), Storm Water Management, Section 1.4(B), Water Control and Disposal Plan, and Section 1.4(E), Spill and Prevention Response Plan, and EBMUD Standard Construction Specification 01 74 05, Cleaning, Section 3.1(B). Section 1.1(B) requires that activities on the construction site be controlled through Best Management Practices (BMPs) to prevent the discharge of contaminated stormwater, and controls on site activities to ensure that hazardous materials are not released through stormwater, violate discharge requirements, or otherwise degrade water quality. Section 1.4(A) requires an EBMUD-approved SWPPP be prepared for the Project that would describe measures that shall be implemented to prevent the release or discharge of contaminated stormwater run-off from the worksite, requires qualified professionals to implement effective stormwater/non-stormwater management practices and conduct inspections, and requires the contractor to control discharge of soil, sediment, and concrete residue and control pH and chlorine residual of any discharges to the storm drain or otherwise. Section 1.4(B) requires a Water Control and Disposal Plan to be prepared for the Project which will specify management actions to minimize the degradation of surface and groundwater quality. Section 1.4(E) requires a Spill Prevention and Response Plan to protect downstream resources from leaks or spills of hazardous substances, including diesel fuel, during construction. Section 3.1(B) requires proper disposal of wastes and prohibits wastes from being disposed into streams or waterways. With implementation of EBMUD Standard Construction Specifications, the Project would control erosion to ensure that no water quality standards are exceeded, and no additional sources of polluted run-off are created, and BMPs would be implemented to ensure that sediment is controlled and that contaminants such as fuel and lubricants do not contaminate local storm drains such that impacts on water quality during construction would be less than significant.

Operation and Maintenance

When the Project is operational, new facilities at the Walnut Creek WTP would increase impervious surface area by approximately 5.5 acres, which has the potential to result in additional discharge of stormwater to surface waters. Improvements at the Walnut Creek WTP would include installation of bioretention basins to capture and treat stormwater in accordance with applicable local and state water quality control plans and regulations. Treatment and flow controls would be put in place to ensure that runoff from the new facilities does not degrade or erode receiving waters once runoff leaves the site. Changes in surface area at the Lafayette WTP would be limited and would not substantially increase total impervious surface area or resultant runoff. Following construction, potential for substantial runoff or erosion at both sites would be minimized as erosion control/site stabilization measures would be established.

The Project would require new deliveries of alum, polymer, microsand, hydrogen peroxide, and liquid oxygen as necessary to treat the range of water quality entering the Walnut Creek WTP,

which if improperly stored or handled, could result in contamination of runoff and impact downstream water quality. There would be no new chemical usage related to operation and maintenance activities at the Lafayette WTP site, and no water quality-related to the use or handling of hazardous materials would occur. As required by law, EBMUD maintains HMBPs for both sites. Operation and maintenance activities associated with the Project would adhere to the required HMBP and comply with applicable state and federal requirements regulating the storage and routine handling and transport of hazardous materials.

Erosion control/site stabilization measures at both sites would be in place, and the new bioretention basins at the Walnut Creek WTP would enhance drainage and reduce runoff. Operation and maintenance activities also would adhere to the required HMBP and comply with applicable state and federal requirements regulating the storage and routine handling and transport of hazardous materials.

As summarized in Exhibit C, a number of EBMUD standard practices and procedures, applicable to all EBMUD projects, have been incorporated into the Project including EBMUD Procedure 711, Hazardous Waste Removal, which defines hazardous wastes and establishes responsibilities for the removal of hazardous wastes from the site. With implementation of EBMUD's procedures, operation and maintenance activities would not contribute to degradation of water quality. Therefore, the risk of operation and maintenance activities triggering a violation of water quality standards or waste discharge requirements, or otherwise substantially degrading water quality, is low, and the impact would be less than significant.

Impact HYD-2: Substantially decrease groundwater supplies or interfere substantially with groundwater recharge such that the Project may impede sustainable groundwater management of the basin.

Findings

EBMUD hereby finds that impacts would be less than significant (see Draft EIR page 3.9-17).

Facts in Support of Findings

Construction, Operation and Maintenance

Neither the Walnut Creek WTP nor the Lafayette WTP overlies the Ygnacio Valley Subbasin, nor any other defined groundwater subbasin. Construction at the Walnut Creek WTP and Lafayette WTP sites would not require groundwater supplies or involve the construction of groundwater wells. Because the Project does not require groundwater supplies or overlie a defined groundwater subbasin, and because new stormwater facilities at the Walnut Creek WTP would increase infiltration of runoff such that the total volume of water available for recharge that is generated at both the Walnut Creek WTP and the Lafayette WTP sites is not anticipated to substantially decrease, Project operation and maintenance would not substantially decrease groundwater supplies or interfere with groundwater recharge such that the Project may impede sustainable groundwater management. Therefore, the impact would be less than significant.

Impact HYD-3a: Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river or through the addition of impervious surfaces, in a manner that would result in substantial erosion or siltation on or off site.

Findings

EBMUD hereby finds that impacts would be less than significant (see Draft EIR pages 3.9-18 to 3.9-20).

Facts in Support of Findings

Construction

Construction of the Project would involve major alterations to the drainage patterns of the existing site, as the site would be reconfigured to accommodate new structures and paving. Approximately 44,000 cubic yards (CY) of material would be excavated in Phase 1, and Phase 2 construction would require excavation of approximately 27,000 CY of material, which in the absence of appropriate design measures and practices, could result in substantial erosion and siltation on and off site. The Project would increase the amount of impervious surface area at the Walnut Creek WTP by approximately 5.5 acres, which could alter the existing drainage pattern of the site or area. However, bioretention basins would be constructed at the Walnut Creek WTP, and thus no off-site drainage system improvements would be required because runoff would be handled on site and the volume of drainage exiting the site would not increase.

As summarized in Exhibit C, a number of EBMUD standard practices and procedures, applicable to all EBMUD projects, have been incorporated into the Project, including EBMUD's Standard Construction Specification 01 34 44, Environmental Requirements, Section 1.1(B), Section 1.4(A), and Section 1.4(B), which require activities on construction sites be controlled such that waters flowing from existing projects, structures, or surrounding areas do not come onto the work and staging areas to prevent discharge of contaminated stormwater and require development and adherence to a SWPPP and Water Control and Disposal Plan. With implementation of EBMUD Standard Construction Specifications, the Project would comply with the requirements of the Construction General Permit including providing treatment and flow controls for stormwater runoff, as well as site stabilization and erosion control measures and therefore construction-related impacts related to alteration of drainage patterns resulting in substantial erosion or siltation on or off-site during construction would be less than significant.

Operation and Maintenance

Operation of the Project would include routine maintenance measures similar to those for the existing facilities, such as site and facility inspection, and vegetation management, which would reduce the likelihood of erosion or siltation on and off site. Because site stabilization would be established, erosion control measures would be in place at both the Walnut Creek WTP and Lafayette WTP sites, and new bioretention basins would enhance drainage and reduce runoff at the Walnut Creek WTP, operation and maintenance activities are not anticipated to alter drainage patterns or result in substantial erosion or siltation on or off site, and impacts would be less than significant.

Impact HYD-3b: Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river or through the addition of impervious surfaces, in a manner that would substantially increase the rate or amount of surface run-off and result in flooding on or off site.

Findings

EBMUD hereby finds that impacts would be less than significant (see Draft EIR pages 3.9-20 to 3.9-21).

Facts in Support of Findings

Construction

As described above in Impact HYD-3a, Project construction would alter the existing drainage patterns of the site. Work areas at the Walnut Creek WTP and Lafayette WTP are not within flood zones, but soil-disturbing activities, such as excavation and site clearing, could increase stormwater run-off to downstream water bodies and storm drains.

As summarized in Exhibit C, a number of EBMUD standard practices and procedures, applicable to all EBMUD projects, have been incorporated into the Project, including EBMUD's Standard Construction Specification 01 35 44, Section 1.1(B), which requires control of site activities to manage surface water flows, including containing surface run-off, preventing construction debris from entering storm drains or surface waters, and implementing spill prevention and response measures. With implementation of EBMUD's Standard Construction Specifications construction-related alteration of local drainage patterns would be managed in a manner that would not substantially increase the rate or amount of surface run-off or cause flooding on or off site, resulting in a less-than-significant impact.

Operation and Maintenance

New bioretention basins would encourage infiltration of stormwater and reduce runoff at the Walnut Creek WTP, and additional impervious areas at the Lafayette WTP would be limited in extent. Therefore, operational activities at both the Walnut Creek WTP and Lafayette WTP would not substantially increase the rate of runoff in a manner that would result in flooding on or off site. The Project would not substantially alter existing drainage patterns in a manner that would substantially increase the rate or amount of surface runoff or result in flooding on or off site, resulting in a less-than-significant impact.

Impact HYD-3c: Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river or through the addition of impervious surfaces, in a manner that would create or contribute run-off water that exceeds the capacity of existing or planned stormwater drainage systems, or provide substantial additional sources of polluted run-off.

Findings

EBMUD hereby finds that impacts would be less than significant (see Draft EIR pages 3.9-22 to 3.9-24).

Facts in Support of Findings

Construction

Project construction would require grading, excavation, stockpiling and other soil-disturbing activities on the Project site, potentially causing erosion or siltation. As summarized in Exhibit C, a number of EBMUD standard practices and procedures, applicable to all EBMUD projects, have been incorporated into the Project, including EBMUD Standard Construction Specification 01 35 44, Environmental Requirements, Section 1.1(B) Site Activities, Section 1.4(A) Storm Water Management, and Section 1.4(B) Water Control and Disposal Plan. Section 1.1(B) requires controls on site activities to prevent discharge of contaminated stormwater, including control of construction materials, control of surface water flows, restoration of ground surfaces, and maintenance of construction sites to prevent erosion. Section 1.4(A) requires stormwater management procedures to prevent the generation of polluted run-off from the site. Section 1.4(B) requires that the contractor submit a detailed Water Control and Disposal Plan prior to construction that complies with all discharge permit requirements. EBMUD Standard Construction Specification 01 35 44 also stipulates that the contractor is responsible for preparation of a SWPPP, Water Control and Disposal Plan, Spill Prevention and Response Plan, and Discharge Plans, as applicable, that outline procedures to be followed to ensure effective stormwater/non-stormwater management and documentation of compliance. With implementation of the EBMUD Standard Construction Specifications, the capacity of the stormwater drainage system would not be exceeded, and substantial additional sources of polluted run-off would not occur and therefore the impact would be less than significant.

Operation and Maintenance

New bioretention basins at the Walnut Creek WTP would be designed to treat and infiltrate stormwater runoff generated by the additional impervious surfaces and would be properly maintained and inspected. Erosion control/site stabilization measures would be in place at both sites to prevent soil erosion. Thus, the Project would not exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff, and impacts would be less than significant.

Impact HYD-4: Conflict with or obstruct implementation of a Water Quality Control Plan or Sustainable Groundwater Management Plan.

Findings

EBMUD hereby finds that impacts would be less than significant (see Draft EIR pages 3.9-24 to 3.9-25).

Facts in Support of Findings

Construction

Construction of improvements at the Walnut Creek WTP and Lafayette WTP sites would not require groundwater supplies or involve the construction of groundwater wells and neither Project site overlies the Ygnacio Valley Subbasin nor any other defined groundwater basin. However, construction-related activities involving soil disturbance, such as grading and excavation, could result in erosion, siltation, and/or delivery of sediments to surface waters. In addition, as construction equipment would require the use of fuels, lubricants, and other hazardous materials, if these materials are stored improperly during Project construction, water quality violations could occur. As summarized in Exhibit C, a number of EBMUD standard practices and procedures, applicable to all EBMUD projects, have been incorporated into the Project, including EBMUD Standard Construction Specification 01 35 44, Section 1.4(A), Storm Water Management, which requires qualified professionals to implement effective stormwater and non-stormwater management practices and conduct inspections and monitoring as part of the SWPPP. The SWPPP must be reviewed and approved by EBMUD before the start of construction, and requires the contractor to control discharge of soil, sediment, and concrete residue and control pH and chlorine residual of any discharges. With implementation of EBMUD Standard Construction Specifications, construction of the Project would not conflict with or obstruct surface or groundwater objectives identified in the Ygnacio Valley Subbasin nor would it be inconsistent with the San Francisco Regional Water Quality Control Board's Water Quality Control Plan objectives and, therefore, impacts would be less than significant.

Operation and Maintenance

After construction, once operational, the Project would incorporate source control measures and would not degrade water quality at the Walnut Creek WTP or Lafayette WTP. Thus, the Project would be consistent with the San Francisco Regional Water Quality Control Board's Water Quality Control Plan objectives. Neither the Walnut Creek WTP nor the Lafayette WTP overlies the Ygnacio Valley Subbasin, or any other defined groundwater basin. Therefore, the Project would not impact or obstruct implementation of a Sustainable Groundwater Management Plan and impacts would be less than significant.

4.4.10 Land Use

Impact LU-1: Cause a significant environmental impact due to a conflict with any land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating an environmental effect.

Findings

EBMUD hereby finds that impacts would be less than significant (see Draft EIR pages 3.10-8 to 3.10-11).

Facts in Support of Findings

Construction, Operation and Maintenance

The proposed Walnut Creek WTP improvements would be consistent with the existing use of the site for water treatment and distribution activities. All proposed facilities would be located on EBMUD property. The Project would add and/or alter specific water treatment plant facilities at

the Walnut Creek WTP, but the overall land use at the site would not change. Although the Project would require temporary closure of social footpaths that pass through EBMUD property, the footpaths would ultimately be redirected around new facilities and hiking access would be maintained, which would be consistent with Walnut Creek General Plan goals, policies, and actions related to providing open space and trail connectivity. Walnut Creek Zoning does not permit water treatment facilities in areas zoned for Open Space Recreation. However, because the Project consists of "construction of facilities for the production, generation, storage [and] transmission of water," EBMUD is not bound by local land use designations (California Government Code Section 53091).

Because the proposed facilities at the Walnut Creek WTP would not change the land use at the Walnut Creek WTP or influence surrounding residential and open space land uses, and because the proposed facilities are exempt from local land use designations as set forth in California Government Code Sections 53091, 53095 and 65402(c), the Project would not conflict with any land use plan, policy, or regulation, and the impact would be less than significant.

The proposed Lafayette WTP facilities would be constructed within the EBMUD-owned property. New facilities would be consistent with existing use at the site and would not permanently impact the existing surrounding land uses. The proposed facilities would not result in changes to land uses in the vicinity. All proposed facilities would be located within the Lafayette WTP and would be consistent with the existing use of the site. The Lafayette WTP is zoned as residential (R-20), but the residential zoning does not apply to the construction or maintenance of public utilities facilities as specified in Government Code Section 53091. The General Plan designates the Lafayette WTP as Open Space and Public Utility, and all proposed improvements at the Lafayette WTP would occur on the portion of the site designated as Public Utility, so the Project is consistent with the applicable land use plan.

Because the proposed Lafayette WTP facilities would be limited to the Lafayette WTP property, would not alter adjacent land uses, would not alter the semi-rural character of the City of Lafayette, and because the local zoning ordinances do not apply as specified in Government Code Section 53091, the Project would not conflict with any land use plan, policy, or regulation, and the impact would be less than significant.

4.4.11 Noise

Impact NOI-2: Result in the generation of excessive groundborne vibration or groundborne noise levels.

Findings

EBMUD hereby finds that impacts would be less than significant (see Draft EIR pages 3.11-43 to 3.11-46).

Facts in Support of Findings

Construction

Project construction activities could produce groundborne vibration. If groundborne vibration generated by Project-related demolition and construction activities for any of the project phases exceed 0.5 in/sec PPV for transient sources at a residence or other sensitive structure, damage could result.

As summarized in Exhibit C, a number of EBMUD standard practices and procedures, applicable to all EBMUD projects, have been incorporated into the Project, including Standard Construction Specification 01 35 44, Environmental Requirements, Section 1.4(H), Vibration Control and Monitoring Plan, and Section 3.7, Vibration Controls. Section 3.7, Vibration Controls, which requires that surface vibration generated by Project equipment be limited to no more than 0.5 in/sec PPV, as measured at the nearest residence. Section 1.4(H), Vibration Control and Monitoring Plan, requires that the contractor submit a plan detailing how vibration will be controlled and monitored during all vibration-generating work (such as demolition, grading, and compacting). The Vibration Control and Monitoring Plan must specify the equipment and methods used to monitor compliance with the plan. With implementation of EBMUD Standard Construction Specifications, the construction contractor would be required to maintain their activities such that vibration would not exceed 0.5 in/sec PPV and submit a plan detailing the means and methods for controlling and monitoring surface vibration generated by demolition, and therefore construction-related vibration impacts would be less than significant.

Operation and Maintenance

Project operation and maintenance would not include use of equipment that could create groundborne vibration. Thus, operation and maintenance would not result in the generation of excessive groundborne vibration or groundborne noise levels, and there would be no impact.

4.4.12 Recreation

Impact REC-1: Increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated.

Findings

EBMUD hereby finds that impacts would be less than significant (see Draft EIR pages 3.12-7 to 3.12-9).

Facts in Support of Findings

Construction

The Project would not increase population in the Project area and would thus not increase use of existing neighborhood or regional parks or recreational facilities such that substantial physical deterioration of the facilities could occur or be accelerated. At the Walnut Creek WTP, the Project would require temporary closure of informal social footpaths that cross the Project site. Construction would not preclude use of the Briones to Mt. Diablo Regional Trail or other formal trails in the Project area. Construction impacts related to closure of social footpaths during construction and redirecting portions of social footpaths at the Walnut Creek WTP are not expected to lead to substantial deterioration of existing recreational areas, would be temporary in

nature, and would ultimately support public recreational uses consistent with local plans and policies. The Lafayette Reservoir recreational area is on the opposite side of Mt. Diablo Boulevard from the Lafayette WTP and construction at the Lafayette WTP would not affect the Lafayette Reservoir area or increase use of the recreation area. Therefore, construction related impacts to recreation facilities would be less than significant because the Project would not increase the use of existing neighborhood and regional parks or other recreational facilities.

Operation and Maintenance

The long-term use of the surrounding open space and local trails would not be expected to increase as a result of the Project because operation and maintenance activities would be similar to existing operations and would be confined to the existing boundaries of the Lafayette and Walnut Creek WTPs. Operation and maintenance would thus not impact any recreational facilities.

Impact REC-2: Include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse physical effect on the environment.

Findings

EBMUD hereby finds that impacts would be less than significant (see Draft EIR pages 3.12-9 to 3.12-10).

Facts in Support of Findings

Construction

The Project includes the permanent redirection of existing social footpaths crossing the northwest portion of the Walnut Creek WTP near the proposed gravity thickeners and the pre-ozone pumping plants. Because construction impacts related to redirecting portions of social footpaths at the Walnut Creek WTP are not expected to have a substantial adverse effect on the environment, would be temporary in nature, and would ultimately support public recreational uses consistent with local plans and policies, the impact is less than significant.

The portion of the Project at the Lafayette WTP does not include recreational facilities or require the construction or expansion of recreational facilities that might have an adverse physical effect on the environment. Because construction at the Lafayette WTP does not include recreational facilities and is not expected to affect recreation areas in the vicinity, the impact is less than significant.

Operation and Maintenance

Operation and maintenance of the redirected social footpaths would be comparable to use under pre-Project levels, as the Project would not significantly change the overall footpath length or character. The long-term use of the social footpaths and the surrounding open space and local trails would not be expected to increase as a result of the Project. Because the redirected social footpaths would be kept as close to their existing state and location as possible, and their

operation and maintenance would not increase the long-term use of the trails or surrounding recreation areas, the impact would be less than significant.

4.4.13 Transportation and Circulation

Impact TRA-2: Conflict or be consistent with CEQA Guidelines Section 15064.3, Subdivision (b).

Findings

EBMUD hereby finds that impacts would be less than significant (see Draft EIR page 3.13-27).

Facts in Support of Findings

Construction

The Project is a temporary construction project with minimal increases in permanent Vehicle Miles Traveled (VMT) following construction, rather than a long-term land use project. Therefore, the Project would not conflict with or be inconsistent with CEQA Guidelines Section 15064.3, subdivision (b) and impacts would be less than significant.

Operation and Maintenance

The Project would generate very few additional vehicle trips (approximately 4 daily trips at Walnut Creek WTP and no additional trips at Lafayette WTP) for operation and maintenance, which would not result in a significant increase in VMT. Therefore, Project operation and maintenance would have less than significant impacts related to VMT.

Impact TRA-4: Result in inadequate emergency access.

Findings

EBMUD hereby finds that impacts would be less than significant (see Draft EIR page 3.13-30).

Facts in Support of Findings

Construction

Construction activities for the Project would primarily be confined to the Walnut Creek and Lafayette WTPs and would not cause any lane or roadway closures. Construction, staging and parking spaces would be contained within designated staging areas. Therefore, construction activities and staging would not block the site entrance/exit and would be planned to maintain adequate emergency access to and from the sites at all times. In the event of emergencies, vehicles would continue to use the main entrance/exit off Larkey Lane at the Walnut Creek WTP and off Mt. Diablo Boulevard at the Lafayette WTP. As summarized in Exhibit C, a number of EBMUD standard practices and procedures, applicable to all EBMUD projects, have been incorporated into the Project, including Standard Construction Specification 01 55 26, Traffic Regulation, which requires a Traffic Control Plan, including a description of emergency response vehicle access. With implementation of EBMUD Standard Construction, a Traffic Control Plan would be prepared and include a description of emergency response vehicle access to ensure that

emergency responders have access during the construction period, and therefore impacts on emergency access would be less than significant.

Operation and Maintenance

After construction, the Project would continue to use the existing Walnut Creek WTP access point on Larkey Lane, as well as the existing Lafayette WTP driveway off Mt. Diablo Boulevard. Therefore, Project operation and maintenance would have less than significant impacts related to emergency access.

4.4.14 Tribal Cultural Resources

Impact TC-1: Cause a substantial adverse change in the significance of a tribal cultural resource as defined in PRC Section 21074 as either a site, feature, place, cultural landscape that is geographically defined in terms of the size and scope of the landscape, sacred place, or object with cultural value to a California Native American Tribe.

Findings

EBMUD hereby finds that impacts would be less than significant (see Draft EIR pages 3.14-4 3.14-5).

Facts in Support of Findings

Construction

The results of the background research at the Northwest Information Center (NWIC) indicate that there are no archaeological tribal cultural resources within the Project sites and that there is a low potential to uncover resources during Project implementation. EBMUD has not received any requests for tribal consultation related to the Project. Despite the low archaeological sensitivity there is a possibility of inadvertent discovery that cannot be entirely discounted. As summarized in Exhibit C, a number of EBMUD standard practices and procedures, applicable to all EBMUD projects, have been incorporated into the Project, including EBMUD's Standard Construction Specification 01 35 45, Biological, Cultural, and Paleontological Resource Requirements. Section 3.3, Protection of Cultural and Paleontological Resources, requires implementation of procedures that address the inadvertent discovery of cultural resources and ensures compliance with legal requirements regarding the protection of such resources. With implementation of EBMUD Standard Construction Specifications, cultural resources procedures would be required that address the inadvertent discovery of tribal cultural resources and ensures compliance with legal requirements regarding the protection of such resources, and therefore the Project's impacts on tribal cultural resources would be less than significant.

Operation and Maintenance

Because operation and maintenance activities at the Walnut Creek WTP and Lafayette WTP would not involve ground disturbing activities there would be no disturbance to tribal cultural resources and no impact is anticipated.

4.4.15 Wildfire

Impact WF-1: Due to slope, prevailing winds, and other factors, exacerbate wildfire risks, and thereby expose project occupants to pollutant concentrations from a wildfire or the uncontrolled spread of a wildfire.

Findings

EBMUD hereby finds that impacts would be less than significant (see Draft EIR pages 3.15-13 to 3.15-15).

Facts in Support of Findings

Construction

Construction activities can exacerbate the risk of wildfire because construction equipment can generate fires from hot exhaust gases or from contact with the hot surfaces of the exhaust system. Walnut Creek WTP and Lafayette WTP staff and area residents could be exposed to risk of wildfire or associated pollutants in the event of a wildfire at the Walnut Creek WTP or Lafayette WTP sites. As summarized in Exhibit C, a number of EBMUD standard practices and procedures, applicable to all EBMUD projects, have been incorporated into the Project, including EBMUD Standard Construction Specification 01 35 24, which dictates project safety requirements. EBMUD Standard Construction Specification 01 35 24 Section 1.3(B) requires that, before the start of construction, the contractor shall prepare a Project Health and Safety Plan approved by EBMUD that addresses anticipated hazards related to hazardous substances, fall protection, confined spaces, and trenches or excavations. EBMUD Standard Construction Specification 01 35 24 Section 1.3(E) requires the contractor to submit an Emergency Action Plan that prepares responses to accidents and injuries, as well as other serious unplanned events, such as fire, which requires notifying any responsible agencies (including fire departments). Additionally, EBMUD Standard Construction Specification 01 35 24 Section 3.2(G) requires firefighting equipment on site, requires construction equipment to be properly maintained (including spark arrestors for internal combustion engines), and requires that 100 feet of defensible space be maintained around work sites, including mowing brush and grass to a height of 4 inches or less, and clearing combustible matter such as tree trimmings. Designated areas with combustible materials must be located away from structures and have combustible growth cleared for 15 feet around the combustible materials. During periods of high fire danger, further restrictions would be in place, as stated in EBMUD Standard Construction Specification 01 35 24 Section 3.2(G). The Project would adhere to the California Fire Code, Article 80, which includes specific requirements for the safe storage and handling of flammable and combustible liquids or hazardous materials. Because the Project would be required to comply with numerous laws and regulations including the California Fire Code Article 80 and with implementation of EBMUD Standard Construction Specifications which require measures to store adequate firefighting equipment on site and maintain defensible space around structures and work areas to reduce the potential for wildfire ignition and spread, the risk of wildfire as a result of construction activities is considered low, and the risk of exposing Project occupants to pollutant concentrations from wildfire or uncontrolled spread of a wildfire is less than significant.

Operation and Maintenance

The Project does not include operation or maintenance changes at the Lafayette WTP site that would affect fire risk, including the storage or handling of flammable or combustible materials. Operation of the Project at the Walnut Creek WTP would be required to comply with numerous laws and regulations, including the California Fire Code, Article 80, would update the site-specific Emergency Action Plan and Fire Prevention Plan to address the potential fire safety impacts associated with fuel storage, ozone and liquid oxygen facilities, and long-term site maintenance would continue, including maintenance and inspection activities for fire prevention, vegetation management on site, keeping the site clean and free of debris, and trimming shrubbery and trees for both fire prevention and public safety. Because the Project would be required to comply with numerous laws and regulations, including the California Fire Code, Article 80, and long-term site maintenance would continue, including measures to maintain defensible space, operation and maintenance activities would not exacerbate wildfire risk and expose people to pollutant concentrations from a wildfire or the uncontrolled spread of a wildfire, and impacts would be less than significant.

Impact WF-2: Expose people or structures to significant risks, including downslope or downstream flooding or landslides, as a result of runoff, post-fire slope instability, or drainage changes.

Findings

EBMUD hereby finds that impacts would be less than significant (see Draft EIR pages 3.15-15 to 3.15-18).

Facts in Support of Findings

Construction

The Project would not add substantial impervious surface or alter drainage at the Lafayette WTP, and new facilities would be designed and constructed in accordance with applicable recommendations presented in the proposed geotechnical study, all new structures would be built such that the risk of landslide as a result of the Project is low and impacts at the Lafayette WTP would be less than significant.

Improvements at the Walnut Creek WTP include the construction of new structures and paved areas including new paved roads and parking spaces, which would increase impervious surface area and potentially create opportunity for additional runoff or drainage changes that could expose people or structures to risk from downslope flooding. However, new bioretention facilities would be constructed around the Walnut Creek WTP site as needed to accommodate the additional runoff from new impervious areas. Thus, post-fire flooding and drainage changes would not be expected at the Walnut Creek WTP as a result of the Project. As summarized in Exhibit C, a number of EBMUD standard practices and procedures, applicable to all EBMUD projects, have been incorporated into the Project, including EBMUD Standard Construction Specification 01 35 44, which dictates environmental requirements. EBMUD Standard Construction Specification 01 35 24 Section 1.1(B), Controls on Site Activities, includes provisions for preventing soil erosion and loss during construction, including the diversion of surface waters and maintenance of the construction site to minimize erosion and loss of soil. EBMUD's Standard Construction Specification 01 35 44, Environmental Requirements, Section 1.4(A), Storm Water Management, requires implementation of BMPs for erosion and sediment

controls through a SWPPP. With implementation of EBMUD Standard Construction Specifications which require stormwater controls, the Project is not anticipated to contribute to runoff, post-fire slope instability, or drainage changes that would expose people or structures to significant risks, including flooding or landslides, after a wildfire, and would result in a less-than-significant impact.

Operation and Maintenance

Operation and maintenance activities at both sites would be similar to existing operations and maintenance and would not be expected to exacerbate wildfire risk, and erosion control/site stabilization measures at both sites would reduce the risk of flooding. Also, new bioretention facilities at the Walnut Creek WTP would enhance drainage and reduce runoff. Therefore, the risk of flooding and landslide as a result of runoff, post-fire slope instability, or drainage changes is considered low, and the impact would be less than significant.

5. Statement of Overriding Considerations

CEQA requires the lead agency to balance, as applicable, the economic, legal, social, technological, or other benefits of a Project against its unavoidable environmental impacts when determining whether to approve the Project. The lead agency may decide to accept unavoidable adverse environmental effects, if the specific economic, legal, social, technological, or other benefits of the Project outweigh the unavoidable, adverse effects (*CEQA Guidelines* Section 15093).

As described in Section 4.2 of these Findings and analyzed in Section 3.11 of the Draft EIR, there is one temporary, potentially significant and unavoidable adverse environmental effect of the Project related to temporary construction-period noise impacts: Impact NOI-1. These impacts concern the exceedance of the sleep disturbance indicator as a result of off-site haul truck traffic that would occur before 7:00 a.m. for early morning concrete pours for approximately 40 days of the approximate three-year construction of Phase 1 and approximately 15 days of the approximate two-year construction of Phase 2.

In accordance with Section 15093 of the *CEQA Guidelines*, the Board hereby finds that the following economic, legal, social, technological, or other benefits of the Project override and outweigh the above referenced potentially significant and unavoidable adverse environmental effect of the Project and makes this statement of overriding considerations to support its action to approve the Project.

EBMUD has identified the need to add pretreatment facilities to allow the Walnut Creek WTP to more reliably treat a broader range of untreated water quality from Pardee and Briones Reservoirs resulting from high rainfall runoff, wildfires, algae blooms, and supplemental supplies from Freeport or other interties during planned and unplanned outages and future droughts, all of which are expected to increase in the future due to climate change. The Project is needed to ensure EBMUD continues to meet existing drinking water and environmental regulations and to achieve EBMUD's internal long-term water quality goals, as well as addressing any potential future emerging contaminants.

Each Project benefit set forth below constitutes an overriding consideration justifying Project approval. The benefits of the Project include:

- **Maintain water treatment capacity.** Providing pretreatment would enable EBMUD to maintain water treatment capacity at the Walnut Creek WTP when untreated water quality is diminished at Pardee Reservoir or Briones Reservoir due to high rainfall runoff, watershed fire events, droughts, algae blooms, and emerging contaminants.
- **Increase flexibility.** Pretreatment would allow EBMUD to treat a broader range of water quality from supplemental water supplies entering EBMUD's water system from the Sacramento River via the Freeport Regional Water Project. Pretreatment would also allow EBMUD to treat a broader range of water quality from supplemental water supplies entering EBMUD's water system from neighboring water agencies through untreated water agency interties during planned and unplanned outages as well as droughts.
- **Increase capacity to meet future demands.** The Project would increase the Walnut Creek WTP capacity to meet planned future demands and allow for the potential decommissioning of the Lafayette WTP. The Walnut Creek WTP cannot reliably treat its current capacity of 115 MGD because treatment process limitations prevent the facility from supplying 115 MGD when the turbidity of water entering the WTP is high. Phase 1 would increase the capacity from 115 MGD to 125 MGD. Phase 2 would increase the capacity to 160 MGD. Increasing the capacity to 125 MGD (Phase 1) and 160 MGD (Phase 2) would allow the Walnut Creek WTP to serve planned land use changes and redevelopment projects disclosed and incorporated into relevant land jurisdiction general plans.
- **Meet drinking water and environmental regulations.** Pretreatment would improve treated water quality, taste, and odor by removing organics and by adding ozone treatment.
- **Reduce long-term operational costs for EBMUD customers.** Pretreatment would allow EBMUD to support planned and unplanned outages and rate restrictions at other water treatment plants, recover distribution storage quickly after power outages, and allow distribution pumping plants to operate only when renewable electricity is most plentiful and electricity costs are lowest.

The Board hereby finds and determines that it has considered identified means of lessening or avoiding the Project's significant impacts, and that if any impacts remain significant and unavoidable, those impacts are acceptable in light of the Project benefits discussed above. Each of these economic, legal, social, technological, and overall service-related benefits outweigh the identified potentially significant and unavoidable adverse environmental effect of the Project. Each of these benefits is a separate and independent basis for justifying Project approval, such that if a court were to set aside the determination that any particular benefit would occur, the Board determines that the remaining benefits, either in isolation or together, would justify Project approval.

The Board finds and determines that, with the exception of the potentially significant and unavoidable adverse environmental effect set forth in Section 4.2, all other potentially significant effects of the Project would be mitigated to less-than-significant levels by the imposition of the various mitigation measures. The Board also finds that to the extent that any such impacts set

forth in Section 4.2 of this Findings document have any residual unavoidable impacts, such impacts are acceptable in light of the benefits provided by the Project.

6. Findings Related to Potential Growth Inducing Impacts

CEQA Guidelines Section 15126.2 requires the lead agency to discuss the growth inducing impacts of the Project. As analyzed in Draft EIR Section 5.3 (pages 5-3 through 5-5), the Project would serve planned land-use changes and redevelopment projects disclosed and incorporated into relevant land jurisdiction general plans within the service area for the Walnut Creek WTP. EBMUD completed the *2050 Demand Study* in 2020. The *2050 Demand Study* is an extensive and exhaustive study of factors to forecast future water demands up to the year 2050 in EBMUD's service area. The Project is designed to serve demands identified in the *2050 Demand Study*, and those demands were determined based largely on projected land use changes identified in the general plans for the cities within the Walnut Creek WTP service area.

Because the *2050 Demand Study*'s demand projections are based on planned development already disclosed and incorporated into local general plans and subsequent amendments thereto, implementation of the Project would not support growth beyond planned levels or in areas not planned for development. The Project would neither directly nor indirectly support unplanned economic expansion, population growth, or residential construction in the EBMUD service area. Therefore, any potential growth-inducing impacts from the Project would be less than significant.

7. Findings Regarding Alternatives and Selecting the Project

The *CEQA Guidelines* require the lead agency to identify alternatives that would avoid or substantially lessen any of the significant adverse effects of the proposed Project, and to evaluate the comparative merits of the alternatives (*CEQA Guidelines*, Section 15126.6). This process may include evaluating those alternatives that could be costlier, or otherwise impede to some degree the attainment of certain Project objectives. The lead agency is also required to analyze the "no project" alternative in order to allow decision makers to compare the impacts of approving the proposed Project with the impacts of not approving the Project.

The alternatives analysis and screening phase consisted of a systematic process that examined the overall Project objectives and identified a range of alternatives for review before selection of the alternatives presented in detail in the Draft EIR. Alternatives considered in the analysis included alternatives identified by EBMUD in the *Water Treatment and Transmission Improvements Program (WTTIP) EIR* (EBMUD, 2010), *East Bay Municipal Utility District Walnut Creek WTP Improvement Project, Technical Memorandum No. 3, Pretreatment* (Carollo, 2000), *Technical Memorandum No. 4, Treatment Plant Siting and Design Criteria* (CH2M Hill, 2001), *East Bay Municipal Utility District Inline Water Treatment Plants' Pretreatment Upgrades, Technical Memorandum 1, Pretreatment Alternatives* (Carollo, 2018) and *Walnut Creek Water Treatment Plant Pretreatment Upgrades Basis of Design Report* (EBMUD, 2020), as well as alternatives suggested by members of the public during scoping, and alternatives identified by the EIR preparers based on the environmental impacts described in Draft EIR Chapter 3.

As part of the Draft EIR, alternatives were evaluated to determine if there were any alternatives that could reduce the significant and unavoidable construction noise impacts associated with the Project. The No Project Alternative was also addressed in the Draft EIR.

Several alternatives were rejected from further analysis because the alternatives did not meet the basic Project objectives, were not feasible, and/or would not substantially lessen the significant environmental effects of the proposed Project (see Section 4.5, Alternatives Rejected from Further Consideration, in the Draft EIR on pages 4-5 and 4-6). As noted in Section 4.5 of the Draft EIR and in the Final EIR, off-site alternatives were considered, but were eliminated because these alternatives could not treat all of the water sources that enter the Walnut Creek WTP, were not cost-effective, have substantial environmental impacts, and do not improve operational flexibility at the Walnut Creek WTP.

Based on the ability to meet the basic Project objectives, feasibility, and the potential to significantly lessen at least one potentially significant impact of the Project, one alternative (in addition to the No Project Alternative) was chosen to be carried forward for analysis in the Draft EIR. The Draft EIR evaluated the environmental impacts of the following alternatives: the proposed Project, the No Project Alternative, and the No Dewatering Building Alternative, which would involve eliminating the dewatering building at the Walnut Creek WTP and reducing the size of the gravity thickeners.

7.1 Project Alternatives

7.1.1 No Project Alternative

Under the No Project Alternative, the proposed pretreatment facilities would not be constructed. The circumstances that have caused EBMUD to move forward with the Project (i.e., reduced source water quality due to algae blooms, elevated turbidities from strong rains and from different water quality in the Sacramento River drought supply, fires in the watershed leading to high turbidity runoff, and a more variable climate), are anticipated to continue and worsen in the future. Consequently, under the No Project Alternative, EBMUD's water supply infrastructure, including the Walnut Creek WTP, would be less adaptive to on-going and future changes in source water quality, and therefore EBMUD customers may be required to ration more frequently and experience undesirable taste and odor during periods when untreated water quality is diminished in Pardee Reservoir, during droughts when supplemental supplies are entering EBMUD's water system, and during future high demand periods or during planned or unplanned outages when there is insufficient supply or treatment capacity to meet demands. EBMUD would implement costly and energy intensive short-term measures to mitigate the magnitude and frequency of rationing and address undesirable taste and odor, including backwashing filters more frequently, which requires more pumping, maximizing daily Walnut Creek WTP production by operating distribution pumping plants throughout the day including hours when renewable electricity is not plentiful and electricity costs are higher, and generating a larger volume of solids increasing operational truck trips to haul solids to a landfill for disposal.

The No Project Alternative would require more truck trips for solids removal than the Project because without gravity thickeners and a dewatering building, the volume and moisture content of the solids removed from the Walnut Creek WTP site would be greater than with the Project.

The existing Walnut Creek Alternate Emergency Operations Center would continue to be spread over multiple locations at the Walnut Creek WTP, leading to potential inefficiencies during emergencies. Without the proposed Project, EBMUD may be unable to use interconnections with untreated water supplies (if the supply has high turbidity, organics and/or algae) from neighboring agencies, which may also reduce EBMUD's ability to support planned and unplanned outages.

The Board hereby rejects the No Project Alternative because it would fail to meet any of the Project's primary operational objectives, and most of the Project's secondary operational objectives. (See Draft EIR Table 4-1 on pages 4-8 and 4-9). The No Project Alternative would not address the fundamental purpose of the proposed Project, which is to maintain treatment capacity and increase flexibility to treat a broader range of water quality. For all of these reasons, each of which would independently justify rejection, EBMUD finds that specific economic, legal, social, technological, and other considerations make this alternative infeasible.

7.1.2 No Dewatering Building Alternative

The No Dewatering Building Alternative would eliminate the dewatering building at the Walnut Creek WTP from the Project and reduce the size of the gravity thickeners, which would reduce the overall temporary construction impacts associated with the Project, and long-term visual impacts by not constructing the dewatering building. There would be no change to the facilities that would be constructed at the Lafayette WTP. With no dewatering building and smaller gravity thickeners, the overall construction footprint would be smaller, requiring less earthwork and soil off-haul to construct the facilities.

Without dewatering, the Project would generate a larger volume of wetter solids, because the dewatering building further reduces the overall volume of solids by removing the water and condensing the solids. Water removed from the dewatering operation can then be reused by pumping the water to the combined reclaimed metering vault, which is not possible without a dewatering building. With a higher volume of wetter solids there would need to be more operational truck trips to haul solids to a landfill for disposal and haul water for disposal.

Although aesthetic, biological resources, air quality and GHG impacts associated with the No Dewatering Building Alternative would be reduced as compared to the Project, operational haul truck traffic and associated emissions of criteria pollutants and GHGs would be greater because a higher volume of wetter solids would require more operational truck trips for disposal of solids and associated water. Noise impacts associated with construction of the No Dewatering Building Alternative would be less than for the Project because there would be less construction on the northern edge of the Walnut Creek WTP. There would still be a need for large concrete pours and though there may be fewer days with early morning haul truck traffic, the No Dewatering Building Alternative would not eliminate the significant unavoidable impact associated with haul truck noise along San Luis Road at Buena Vista Avenue.

Although the No Dewatering Building Alternative would achieve all of the primary operational objectives and construction objectives, and half of the secondary project objectives, it would not meet the objective of minimizing life-cycle costs because of the higher ongoing cost to dispose of higher volumes of solids with associated trucking and landfill disposal costs. The No Dewatering Building Alternative would not minimize operational emissions of GHGs because trucking increased volumes of solids would increase emissions from mobile sources.

The No Dewatering Building Alternative fails to minimize life-cycle costs (capital, operating, and maintenance) to EBMUD's customers, fails to minimize operational GHG emissions, does not eliminate the significant unavoidable construction noise impact from haul truck traffic and also increases operational traffic impacts. For all of these reasons, each of which would independently justify rejection, EBMUD finds that specific economic, legal, social, technological, and other considerations make this alternative infeasible.

7.2 Environmentally Superior Alternative

Construction for both the Project and the No Dewatering Building Alternative would result in a significant and unavoidable noise impact during early morning concrete pours, though there would be fewer days of concrete pours without a dewatering building. With elimination of the dewatering building and smaller gravity thickeners, construction would take less time and less earthwork and soil off-haul would be required. The No Dewatering Building Alternative thus would reduce the magnitude and duration of some construction-related air quality, GHG emissions, noise, and transportation impacts compared to the Project. Operational traffic impacts would be greater for the No Dewatering Building Alternative because a higher volume of solids would need to be removed on a regular basis, though traffic impacts would remain less than significant.

Only the No Project Alternative, which would include the operational adjustments described in Draft EIR Section 4.6.1, would avoid the significant and unavoidable construction noise impact associated with both the Project and the No Dewatering Building Alternative. The No Project Alternative is thus environmentally superior because it eliminates the significant and unavoidable adverse impact associated with construction noise. However, as shown in Draft EIR Table 4-1, the No Project Alternative does not meet the Project's primary operational objectives, nor does it meet most of the Project's secondary operational objectives, although it would meet the construction objectives.

Section 15126.6(e)(2) of the *CEQA Guidelines* specifies that "If the environmentally superior alternative is the 'no project' alternative, the EIR shall also identify an environmentally superior alternative among the other alternatives." The No Dewatering Building Alternative would reduce the magnitude and duration of some construction-related air quality and transportation impacts, which are mitigable to less than significant. The No Dewatering Building Alternative would reduce but would not eliminate the significant and unavoidable construction period noise impact. Because of the increased operational traffic impacts associated with the No Dewatering Building Alternative, it is not the environmentally superior alternative. The Project as proposed is environmentally superior to the alternative.

7.3 Project Selection

Based upon the Draft EIR, the Final EIR, and the Findings contained herein, the Board hereby finds and declares that the Project, as described in Section 1.3 of these Findings, is approved.

Exhibit B

Impact Area	Mitigation Measure	Responsible for Implementation	Responsible for Monitoring and/or Enforcement	Timing of Implementation
Noise				
Impact NOI-1: Result in the generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the Project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies.	Mitigation Measure NOI-1: Noise Reduction Measures The Noise Control and Monitoring Plan required in the Project specifications would include specific measures to reduce noise to ensure that noise at residential receptors does not exceed 60 dBA L_{eq} before 7:00 a.m. in Walnut Creek. The following measures, or their equivalent, would be used in combination to meet the noise limits: • Coordinate worksite activities to minimize or eliminate non-essential noise-generating activities between 6:00 a.m. and 7:00 a.m. • Install temporary sound barriers achieving a minimum sound transmission class (STC) 25 to block the line of sight from concrete activities to nearby residences (Figure 3.11-5) for the duration of the applicable construction phase(s). ○ To reduce noise by at least 8 dBA from concrete trucks at the Hydrogen Peroxide Station during Phase 1, sound barriers would need to be at minimum 8 feet high and located on the northeast side of the Hydrogen Peroxide Station. ○ To reduce noise by at least 5 dBA from concrete trucks at the Combined Reclaimed Metering Vault during Phase 1, sound barriers would need to be at minimum 9 feet high, and located on the north, northeast, and northwest sides of the vault. ○ To reduce noise by at least 3 dBA from concrete trucks at the Thickened Solids Pumping Plants and Gravity Thickeners during Phases 1 and 2, sound barriers would need to be at minimum 9 feet high and located on the northeast side of the work area. ○ The Noise Control and Monitoring Plan will include daily noise monitoring at the EBMUD property line east of Staging Area 4 during construction of Phases 1 and 2. If noise thresholds are exceeded and expected to continue to be exceeded, a 6-foot-high redwood fence would be installed at that time at Staging Area 4. In anticipation of the possibility that a fence would be needed, 16 5-gallon shrubs will be planted in the area east of Staging Area 4 prior to construction to provide visual screening for the fence. Mitigation Measure TRA-1: Minimize Impacts of Heavy Truck Traffic at the Walnut Creek WTP ○ (Refer to Impact TRA-1 below for the full text of Mitigation Measure TRA-1)	EBMUD and EBMUD's Contractors	EBMUD	Prior to and During Construction

Impact Area	Mitigation Measure	Responsible for Implementation	Responsible for Monitoring and/or Enforcement	Timing of Implementation
Transportation				
Impact TRA-1: Conflict with a program, plan, ordinance, or policy addressing the circulation system, including transit, roadway, bicycle, and pedestrian facilities.	Mitigation Measure TRA-1: Minimize Impacts of Heavy Truck Traffic at the Walnut Creek WTP - Use of soil and demolition off-haul and large equipment delivery trucks to and from the Walnut Creek WTP will be restricted to between the hours of 9:00 a.m. to 3:30 p.m. - The required Traffic Control Plan shall include the following measures: - EBMUD's Contractor shall distribute written traffic safety requirements to all Contractor heavy construction vehicle drivers. All drivers shall provide signed acknowledgement of having read and understood all traffic safety requirements and consequences of non-compliance. - Written traffic safety requirements shall include: - Construction work hours specifying when construction traffic would be allowed to access the Walnut Creek WTP and staging areas. - Construction haul routes and associated speed limits. - Designated parking and queuing locations. - Contractor shall provide Project sticker or equivalent to drivers who have provided written acknowledgement of traffic safety requirements. - Project sticker shall be made available upon request by EBMUD during the construction contract period. - Contractor heavy construction vehicle drivers shall conform to designated construction hours, including no driving, queuing, idling or parking on local roadways outside of designated construction hours as outlined in written traffic safety requirements. - Contractor heavy construction vehicle drivers shall use only designated construction traffic haul routes. - Contractor shall provide Radar Speed Feedback Signs along Larkey Lane and San Luis Road for the entire Project duration (four, one in each direction of traffic on Larkey Lane and San Luis Road) to deter speeding by heavy construction vehicles on construction traffic routes. - Contractor heavy construction vehicle drivers shall comply with roadway traffic safety rules as outlined in written traffic safety requirements, including, but not limited to: - Stoplight signals and stop signs. - Roadway speed limits (reduced speeds in construction zones and near schools). - Prior to Project construction, EBMUD shall require the contractor(s) to video document pavement conditions on San Luis Road between Casa Way and Larkey Lane and on Larkey Lane between San Luis Road and Alfred Avenue that will be used by Project-related vehicles. Pavement conditions shall also be documented after Project construction is complete. If there is visible deterioration in the pavement condition, any pavement damaged by Project construction-related traffic shall be repaired to a structural condition equal to that which existed prior to Project construction activity.	EBMUD and EBMUD's Contractors	EBMUD	Prior to and During Construction

Impact Area	Mitigation Measure	Responsible for Implementation	Responsible for Monitoring and/or Enforcement	Timing of Implementation
Impact TRA-3: Substantially increase hazards due to a design feature or incompatible uses.	Mitigation Measure TRA-1: Minimize Impacts of Heavy Truck Traffic at the Walnut Creek WTP (Refer to Impact TRA-1 above for the full text of Mitigation Measure TRA-1) Mitigation Measure TRA-2: Additional Flagger Requirements at Larkey Lane for Walnut Creek WTP Contractors shall implement the following measures as part of the Traffic Control Plan in Walnut Creek: - On extended workdays with large concrete pours and days with soil off-hauling at the Walnut Creek WTP, provide a traffic control flagger at the intersection of Larkey Lane and Alvarado Avenue and the intersection of Larkey Lane and San Luis Road during school start and dismissal times with a buffer before school starts and after school ends. - The construction contractor shall confirm with the Contra Costa Christian Schools (2721 Larkey Lane, Walnut Creek) and Buena Vista Elementary School (2355 San Juan Avenue, Walnut Creek) the typical start and dismissal times, school events, and irregular start and dismissal times prior to the beginning of each school year. Impact Area	EBMUD Practices and Procedures ¹	Responsibility for Implementation	Responsibility for Monitoring and/or Enforcement	Timing of Implementation
Aesthetics				
Impact AES-1 Have a substantial adverse effect on a scenic vista.	EBMUD Standard Construction Specification 01 35 44, Environmental Requirements <i>Section 1.1, Summary</i> B. Site Activities 1. Protect storm drains and surface waters from impacts of project activity. 2. Store materials and wastes such as demolition material, soil, sand, asphalt, rubbish, paint, cement, concrete or washings thereof, oil or petroleum products, or earthen materials in a manner to prevent it from being washed by rainfall or runoff outside the construction limits. 3. Reuse or dispose of excess material consistent with all applicable legal requirements and disposal facility permits. 4. Clean up all spills and immediately notify the Engineer in the event of a spill. 5. Equip stationary equipment such as motors, pumps, and generators with drip pans. 6. Divert or otherwise control surface water and waters flowing from existing projects, structures, or surrounding areas from coming onto the work and staging areas. The method of diversions or control shall be adequate to ensure the safety of stored materials and of personnel using these areas. 7. Following completion of Work, remove ditches, dikes, or other ground alterations made by the Contractor. The ground surfaces shall be returned to their former condition, or as near as practicable, in the Engineer's opinion. 8. Prevent visible dust emissions from leaving the work areas. 9. Maintain construction equipment in good operating condition to reduce emissions. 10. Handle, store, apply, and dispose of any chemical or hazardous material used in the performance of the Work in a manner consistent with all applicable federal, state, and local laws and regulations. EBMUD Standard Construction Specification 01 35 45, Biological, Cultural, and Paleontological Resource Requirements <i>Section 3.1, Protection of Native and Non-Native Protected Trees</i> A. Tree Protection 1. Locations of trees to be removed and protected are shown in the construction drawings. Pruning and trimming shall be completed by the Contractor and approved by the Engineer. Pruning shall adhere to the Tree Pruning Guidelines of the International Society of Arboriculture. 2. Erect exclusion fencing five feet outside of the drip lines of trees to be protected prior to ground disturbing activities. Erect and maintain a temporary minimum 3-foot high orange plastic mesh exclusion fence at the locations as shown in the drawings prior to ground disturbing activities. The fence posts shall be six-foot minimum length steel shapes, installed at 10-foot minimum on center, and be driven into the ground. The Contractor shall be prohibited from entering or disturbing the protected area within the fence except as directed by the Engineer. Exclusion fencing shall remain in place until construction is completed and the Engineer approves its removal. 3. No grading, construction, demolition, trenching for irrigation, planting or other work, except as specified herein, shall occur within the tree protection zone established by the exclusion	EBMUD and EBMUD's Contractors	EBMUD	Prior to and During Construction
Impact AES-1 (cont.)				

Impact Area	EBMUD Practices and Procedures ¹	Responsibility for Implementation	Responsibility for Monitoring and/or Enforcement	Timing of Implementation
Impact AES-1 (cont.)	fencing installed shown in the drawings. In addition, no excess soil, chemicals, debris, equipment or other materials shall be dumped or stored within the tree protection zone. 4. In areas that are within the tree drip line and outside the tree protection zone that are to be traveled over by vehicles and equipment, the areas shall be covered with a protective mat composed of a 12-inch thickness of wood chips or gravel and covered by a minimum ¾-inch-thick steel traffic plate. The protective mat shall remain in place until construction is completed and the Engineer approves its removal. 5. Tree roots exposed during trench excavation shall be pruned cleanly at the edge of the excavation and treated to the satisfaction of a certified arborist provided by EBMUD. 6. Any tree injured during construction shall be evaluated as soon as possible by a certified arborist provided by EBMUD, and replaced as deemed necessary by the certified arborist. EBMUD Standard Construction Specification 01 74 05, Cleaning <i>Section 1.1, Description</i> A. Section includes: Perform the work necessary for cleaning during construction and final cleaning on completion of the work. B. Cleaning for specific products or work is specified in the individual specification sections. <i>Section 3.1, General</i> A. At all times maintain areas covered by the Contract and public properties free from accumulations of waste, debris, and rubbish caused by construction operations. B. Conduct cleaning and disposal operations to comply with local ordinances and anti pollution laws. Do not burn or bury rubbish and waste materials on project site. Do not dispose of volatile wastes such as mineral spirits, oil, or paint thinner in storm or sanitary drains. Do not dispose of wastes into streams or waterways. C. Use only cleaning materials recommended by manufacturer of surface to be cleaned. D. Use cleaning materials only on surfaces recommended by cleaning material manufacturers. <i>Section 3.2, Cleaning During Construction</i> A. During execution of work, clean site and public properties and legally dispose of waste materials, debris, and rubbish to assure that buildings, grounds, and public properties are maintained free from accumulations of waste materials and rubbish. All soil and any other material tracked onto the streets by the Contractor shall be cleaned immediately. The Contractor shall comply with all rules and regulations as applicable for its cleaning method. B. Dispose of all refuse off EBMUD property as often as necessary so that at no time shall there be any unsightly or unsafe accumulation of rubbish. 1. Pine needles, leaves, sticks, and other vegetative debris on the ground shall be removed if they are in the way of construction, present a safety hazard, or present a fire hazard. Otherwise they shall be left in place during construction and final cleaning C. Wet down dry materials and rubbish to lay dust and prevent blowing dust. D. Provide approved containers for collection and disposal of waste materials, debris, and rubbish. E. Remove grease, dust, dirt, stains, labels, fingerprints, and other foreign materials from exposed and semi exposed surfaces. F. Repair, patch, and touch up marred surfaces to specified finish to match adjacent surfaces. G. Vacuum clean all interior spaces, including inside cabinets. Broom clean paved surfaces; rake clean other surfaces of grounds. H. Handle materials in a controlled manner with as few handlings as possible; do not drop or throw materials from heights.			

Impact Area	EBMUD Practices and Procedures ¹	Responsibility for Implementation	Responsibility for Monitoring and/or Enforcement	Timing of Implementation
	I. Schedule cleaning operations so that dust and other contaminants resulting from cleaning process will not fall on wet, newly painted surfaces. J. Vacuum clean interior of shop building areas when ready to receive finish painting and continue vacuum cleaning on an as needed basis until successful completion of the Startup Test as defined in Section 01 75 17 – Field Startup and Testing. <i>Section 3.3, Final Cleaning</i> . At the completion of work on all portions of the contract and immediately prior to final inspection, cleaning of the entire project will be accomplished according to the following provisions: 1. Thoroughly clean, sweep, wash, and polish all work and equipment, including finishes. The cleaning shall leave the structures and site in a complete and finished condition to the satisfaction of the Engineer. 2. Should the Contractor not remove rubbish or debris or not clean buildings and site as specified above, EBMUD reserves the right to have the cleaning done at the expense of the Contractor. B. Employ professional cleaners for final cleaning. C. In preparation for contract completion, conduct final inspection of sight exposed interior and exterior surfaces, and of concealed spaces. D. Remove grease, dust, dirt, stains, labels, fingerprints, and other foreign materials from sight exposed interior and exterior finished surfaces; polish surfaces so designated to shine finish. E. Repair, patch, and touch up marred surfaces to specified finish, to match adjacent surfaces. F. Broom clean paved surfaces; rake clean other surfaces of grounds. G. Replace air handling filters if units were operated during construction. H. Clean ducts, blowers, and coils, if air handling units were operated without filters during construction. I. Clean luminaires in accordance with manufacturer's recommendations and relamp. Clean all light fixtures. J. Clean debris from roofs, gutters, and downspouts. K. Remove from EBMUD property all temporary structures and all material, equipment, and appurtenances not required as a part of, or appurtenant to, the completed work. L. Leave watercourses, storm drains, inlets, and ditches open and clear.			
Impact AES-3 Create a new source of substantial light or glare which would adversely affect day or nighttime views in the area.	EBMUD Standard Construction Specification 01 35 44, Environmental Requirements <i>Section 3.9, Lighting Used During Nighttime Work</i> A. Ensure that temporary stationary lighting used during nighttime construction is only used when needed. All lighting used for nighttime construction shall be designed, installed, and operated to minimize glare that affects traffic near the work zone or that causes annoyance or discomfort for residences near the work zone. Lighting fixtures shall be located and aimed to provide the required level of illumination and uniformity in the work zone without the creation of unnecessary glare.	EBMUD and EBMUD's Contractors	EBMUD	Prior to and During Construction
Air Quality				
Impact AIR-1: Conflict with or obstruct implementation of the applicable air quality plan.	EBMUD Standard Construction Specification 01 35 44, Environmental Requirements <i>Section 1.4(F), Dust Control and Monitoring Plan</i> 1. Submit a plan detailing the means and methods for controlling and monitoring dust generated by demolition and other work on the site for the Engineer's acceptance prior to any work at the jobsite.	EBMUD and EBMUD's Contractors	EBMUD	Prior to and During Construction

Impact Area	EBMUD Practices and Procedures ¹	Responsibility for Implementation	Responsibility for Monitoring and/or Enforcement	Timing of Implementation
Impact AIR-1 (cont.)	a. Identify methods to comply with all applicable regulations including but not limited to the Bay Area Air Quality Management District (BAAQMD) visible emissions regulation and Public Nuisance Rule. b. Outline practices for preventing dust emissions and procedures to be used during operations and maintenance activities. c. Include measures for the control of paint overspray and abrasive blasting emissions, including, but not limited to containment, ventilation systems and monitoring for damage and leaks. d. Describe equipment and methods used to monitor compliance with the plan. <i>Section 3.5, Air Quality Control</i> A. Implement all necessary air pollutant construction measures per the Bay Area Air Quality Management District "Basic Construction Mitigation Measures" (BAAQMD CEQA Guidelines May 2017), including, but not limited to the following: 1. All exposed surfaces (e.g., parking areas, staging areas, soil piles, graded areas, and unpaved access roads) shall be watered two times per day. 2. All haul trucks transporting soil, sand, or other loose material off-site shall be covered. 3. All visible mud or dirt track-out onto adjacent public roads shall be removed using wet power vacuum street sweepers at least once per day. The use of dry power sweeping is prohibited. 4. All vehicle speeds on unpaved roads shall be limited to 15 mph. 5. All roadways, driveways, and sidewalks to be paved shall be completed as soon as possible. Building pads shall be laid as soon as possible after grading unless seeding or soil binders are used. 6. Idling times shall be minimized either by shutting equipment off when not in use or reducing the maximum idling time to 5 minutes (as required by the California airborne toxics control measure Title 13, Section 2485 of California Code of Regulations [CCR]). Clear signage shall be provided for construction workers at all access points. 7. All construction equipment shall be maintained and properly tuned in accordance with manufacturer's specifications. All equipment shall be checked by a certified mechanic and determined to be running in proper condition prior to operation. 8. The contractor shall post an EBMUD-furnished, publicly visible sign with EBMUD and Air District contact information regarding dust complaints. B. Implement all necessary air pollutant construction measures per the Bay Area Air Quality Management District "Additional Construction Mitigation Measures" (BAAQMD CEQA Guidelines May 2017) including but not limited to the following: 1. All exposed surfaces shall be watered at a frequency adequate to maintain minimum soil moisture of 12 percent. Moisture content can be verified by lab samples or moisture probe. 2. All excavation, grading, and/or demolition activities shall be suspended when average wind speeds exceed 20 mph. 3. Wind breaks (e.g., trees, fences) shall be installed on the windward side(s) of actively disturbed areas of construction. Wind breaks should have at maximum 50 percent air porosity. 4. Vegetative ground cover (e.g., fast-germinating native grass seed) shall be planted in disturbed areas as soon as possible and watered appropriately until vegetation is established.			

Impact Area	EBMUD Practices and Procedures ¹	Responsibility for Implementation	Responsibility for Monitoring and/or Enforcement	Timing of Implementation
Impact AIR-1 (cont.)	5. The simultaneous occurrence of excavation, grading, and ground-disturbing construction activities on the same area at any one time shall be limited. Activities shall be phased to reduce the amount of disturbed surfaces at any one time. 6. All trucks and equipment, including their tires, shall be washed off prior to leaving the site. 7. Site accesses to a distance of 100 feet from the paved road shall be treated with a 6- to 12-inch compacted layer of wood chips, mulch, or gravel. 8. Sandbags or other erosion control measures shall be installed to prevent silt runoff to public roadways from sites with a slope greater than one percent. 9. Minimizing the idling time of diesel-powered construction equipment to two minutes. 10. The project shall develop a plan demonstrating that the off-road equipment (more than 50 horsepower) to be used in the construction project (i.e., owned, leased, and subcontractor vehicles) would achieve a project wide fleet-average 20 percent NOx reduction and 45 percent PM reduction compared to the most recent ARB fleet average. Acceptable options for reducing emissions include the use of late model engines, low-emission diesel products, alternative fuels, engine retrofit technology, after-treatment products, add-on devices such as particulate filters, and/or other options as such become available. 11. Use low VOC (i.e., ROG) coatings beyond the local requirements (i.e., Regulation 8, Rule 3: Architectural Coatings). 12. Requiring that all construction equipment, diesel trucks, and generators be equipped with Best Available Control Technology for emission reductions of NOx and PM. 13. Requiring all contractors use equipment that meets CARB's most recent certification standard for off-road heavy duty diesel engines. C. Implement all necessary EBMUD air pollutant construction measures, including but not limited to the following: 1. Gravel or apply non-toxic soil stabilizers on all unpaved access roads, parking areas and staging areas at construction sites. Submit specifications for any dust palliatives applied to unpaved roads to the Engineer. 2. Water and/or cover soil stockpiles daily. 3. All transitions from soil to a paved road shall have best management practices applied to prevent drag out of soil. 4. Water used for dust control shall not run off the job site and cause erosion or other issues. 5. Use of recycled water for dust control is encouraged. 6. Use line power instead of diesel generators at all construction sites where line power is available. 7. Temporary sources of air emissions (such as portable pumps, compressors, generators, etc.) shall be electrically powered unless the use of such equipment is not practical, feasible, or available. 8. All portable engines and equipment units used as part of construction shall be properly registered with the California Air Resources Board or otherwise permitted by the appropriate local air district, as required 9. Minimize the use of diesel generators where possible. 10. Follow applicable regulations for fuel, fuel additives, and emission standards for stationary, diesel-fueled engines. 11. Locate generators at least 100 feet away from adjacent homes, schools, and parks.			

Impact Area	EBMUD Practices and Procedures ¹	Responsibility for Implementation	Responsibility for Monitoring and/or Enforcement	Timing of Implementation
	12. Perform regular low-emission tune-ups on all construction equipment, particularly haul trucks and earthwork equipment. 13. On road and off-road vehicle tire pressures shall be maintained to manufacturer specifications. Tires shall be checked and re-inflated at regular intervals. 14. Demolition debris shall be recycled for reuse to the extent feasible. See the Construction and Demolition Waste Disposal Plan paragraphs above for requirements for wood treated with preservatives (TWW). D. Dust Control during Abrasive Blasting: 1. Provide a containment system for the structure prior to beginning abrasive blasting operations. The system shall remain in place during the abrasive blasting operations and the painting of exterior surfaces. <i>Section 3.6, Dust Monitoring during Demolition and Construction</i> A. Provide air monitoring along the perimeter of the job site. A minimum of 4 stations, one on each side of the District property, shall be established, capable of continuous measurement of total particulate concentration when any dust generating activity is occurring. B. Conduct real-time air monitoring at appropriate locations onsite based on wind direction, type of construction activity, and sensitive receptors to ensure dust control measures are effective. C. All environmental and personal air sampling equipment shall be in conformance with the Association of Industrial Hygiene and National Institute of Safety and Health (NIOSH) standards. 1. All analysis shall be completed by an ELAP certified laboratory for the specific parameters of interest. 2. The Contractor shall provide to the Engineer, within 72 hours of sampling, all test results. D. The dust control system shall comply with the requirements of this section and any applicable laws and regulations. Specific limitations that shall be met include the following: 1. Ringelmann No. 1 Limitation: Contractor shall not emit from any source for a period or periods aggregating more than three minutes in any hour, a visible emission which is as dark or darker than No. 1 on the Ringelmann Chart, or of such opacity as to obscure an observer's view to an equivalent or greater degree. 2. Opacity Limitation: Contractor shall not emit from any source for a period or periods aggregating more than three minutes in an hour an emission equal to or greater than 20% opacity as perceived by an opacity sensing device, where such device is required by Air Quality Management District regulations. EBMUD Standard Construction Specification 02 82 13, Asbestos Control Activities <i>Section 1.1, Compliance and Intent</i> A. Furnish all labor, materials, facilities, equipment, services, employee training and testing, permits, and agreements necessary to perform the lead removal in accordance with these specification and with the latest regulations from the U.S. Environmental Protection Agency (EPA), the Occupational Safety and Health Administration (OSHA), the Air Quality Management District with authority over the project, the Cal/EPA Department of Toxic Substance Control, the California Occupational Safety and Health Administration (Cal/OSHA), and other federal, state, county, and local agencies. Whenever there is a conflict or overlap of the above references, the most stringent provision is applicable. B. The Electrical and Instrumentation Building has the potential to contain asbestos materials. Notify the BAAQMD at (415) 749-4762 regarding the demolition of any facility containing asbestos at least ten (10) work days prior to beginning demolition activities.			

Impact Area	EBMUD Practices and Procedures ¹	Responsibility for Implementation	Responsibility for Monitoring and/or Enforcement	Timing of Implementation
	<i>Section 1.5, Submittals (Pre-Job)</i> A. Project Safety and Health Plan: The Contractor shall provide a Project Safety and Health Plan prior to project initiation as specified in Section 01 35 24. B. Plan of Action 1. Asbestos Abatement: a. Submit a detailed plan of the procedures proposed for use in complying with the regulations included in this specification. The plan shall include the location and layout of decontamination areas, the sequencing of asbestos work, the interface of trades involved in the performance of work, disposal plan including location of approved disposal site, and a detailed description of the methods to be employed to control pollution. Expand upon the use of portable HEPA ventilation system, method of removal to prohibit visible emissions in work area, and packaging of removed asbestos debris. Include asbestos abatement in the Construction and Demolition Waste Disposal Plan, in accordance with Section 01 35 44. EBMUD Procedure 600 Purpose: To promote effective proactive communication and interaction with the public to maintain and enhance relationships between EBMUD and its customers. This procedure ensures residents are provided advance notice of potentially disruptive construction activities and provides mechanisms for customers and the public to get concerns and questions addressed.			
Impact AIR-2: Expose sensitive receptors to substantial pollutant concentrations.	EBMUD Standard Construction Specification 01 35 44, Environmental Requirements <i>Section 3.5(A), Air Quality Control</i> (Details as listed under Impact AIR-1)	EBMUD and EBMUD's Contractors	EBMUD	Prior to and During Construction
Impact AIR-3: Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard.	EBMUD Standard Construction Specification 01 35 44, Environmental Requirements <i>Section 3.5(A), Air Quality Control</i> (Details as listed under Impact AIR-1)	EBMUD and EBMUD's Contractors	EBMUD	Prior to and During Construction
Biological Resources				
Impact BIO-1: Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special-status species in local or regional plans, policies, or regulations or by the CDFW or USFWS.	EBMUD Standard Construction Specification 01 35 45, Biological, Cultural, and Paleontological Resource Requirements <i>Section 3.1, Protection of Native and Non-Native Protected Trees</i> (Details as listed under Impact AES-1) <i>Section 3.2, Protection of Birds Protected Under the Migratory Bird Treaty Act and Roosting Bats</i> A. Provide 30 days' written notice to the Engineer prior to ground disturbing activities, pruning, and trimming. 1. EBMUD will conduct biological reconnaissance in advance of construction and will conduct biologic monitoring during construction as necessary. B. Protected Species 1. If protected species or suitable habitat for protected species is found during biological reconnaissance surveys:	EBMUD and EBMUD's Contractors	EBMUD	Prior to and During Construction

Impact Area	EBMUD Practices and Procedures ¹	Responsibility for Implementation	Responsibility for Monitoring and/or Enforcement	Timing of Implementation
Impact BIO-1 (cont.)	a. Before beginning construction, all Contractor construction personnel are required to attend an environmental training program provided by EBMUD of up to one-day for site supervisors, foreman and project managers, and up to 30-minutes for non-supervisory contractor personnel. The training program will be completed in person or by watching a video at an EBMUD-designated location, conducted by a designated biologist. The program will discuss all sensitive habitats and sensitive species that may occur within the project work limits, including the responsibilities of Contractor's construction personnel, applicable mitigation measures, and notification requirements. The Contractor is responsible for ensuring that all workers requiring training are identified to EBMUD. Prior to accessing or performing construction work, all Contractor personnel shall: 1) Sign a wallet card provided by the Engineer verifying that all Contractor construction personnel have attended the appropriate level of training relative to their position; have read and understood the contents of the environmental training; and shall comply with all project environmental requirements. 2) Display an environmental training hard hat decal (provided by EBMUD after completion of the training) at all times. b. Birds Protected under the Migratory Bird Treaty Act (MBTA): 1) It is unlawful to pursue, hunt, take, capture, or kill any migratory bird without a permit issued by the U.S. Department of the Interior. 2) If construction commences between February 1 and August 31, during the nesting season, EBMUD will conduct a preconstruction survey for nesting birds within 7 days prior to construction to ensure that no nest will be disturbed during construction. 3) If active nests of migratory bird species (listed in the MBTA) are found within the project site, or in areas subject to disturbance from construction activities, an avoidance buffer to avoid nest disturbance shall be constructed. The buffer size shall be determined by the Designated Biologist in consultation with California Department of Fish and Wildlife (CDFW) and is based on the nest location, topography, cover and species' tolerance to disturbance. 4) If an avoidance buffer is not achievable, the Designated Biologist shall monitor the nest(s) to document that no take of the nest (nest failure) has occurred. Active nests shall not be taken or destroyed under the MBTA and, for raptors, under the CDFW Code. If it is determined that construction activity is resulting in nest disturbance, work should cease immediately, and the Contractor shall notify the Engineer who will consult with the Designated Biologist and appropriate regulatory agencies. 5) If preconstruction surveys indicate that nests are inactive or potential habitat is unoccupied during the construction period, no further action is required. Trees and shrubs within the construction footprint that have been determined to be unoccupied by special-status birds or that are located outside the avoidance buffer for active nests may be removed. Nests initiated during construction (while significant disturbance from construction activities persist) may be presumed to be unaffected, and only a minimal buffer, determined by the Designated Biologist, would be necessary. c. Roosting Bats: 1) If construction commences between March 1 and July 31, during the bat maternity period, EBMUD will conduct a preconstruction survey for roosting bats within two weeks prior to construction to ensure that no roosting bats will be disturbed during construction.			

Impact Area	EBMUD Practices and Procedures ¹	Responsibility for Implementation	Responsibility for Monitoring and/or Enforcement	Timing of Implementation
	2) If roosting surveys indicate potential occupation by a special-status bat species, and/or identify a large day roosting population or maternity roost by any bat species within 200 feet of a construction work area, the Designated Biologist shall conduct focused day- and/or night-emergence surveys, as appropriate. 3) If active maternity roosts or day roosts are found within the project site, or in areas subject to disturbance from construction activities, avoidance buffers shall be constructed. The buffer size will be determined by the Designated Biologist in consultation with CDFW. 4) If a non-breeding bat roost is found in a structure scheduled for modification or removal, the bats shall be safely evicted, under the direction of the Designated Biologist, in consultation with CDFW to ensure that the bats are not injured. 5) If preconstruction surveys indicate that no roosting is present, or potential roosting habitat is unoccupied during the construction period, no further action is required. Trees and shrubs within the construction footprint that have been determined to be unoccupied by roosting bats, or that are located outside the avoidance buffer for active roosting sites may be removed. Roosting initiated during construction is presumed to be unaffected, and no buffer would be necessary.			
Impact BIO-2: Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations, or by the CDFW or USFWS. Impact BIO-2 (cont.)	EBMUD Standard Construction Specification 01 35 44, Environmental Requirements <i>Section 1.1(B), Site Activities</i> (Details as listed under Impact AES-1) <i>Section 1.4(A), Storm Water Management</i> 1. Construction General Permit a. Submit the Notice of Intent, Storm Water Pollution Prevention Plan (SWPPP), and all other documents prepared for compliance with the General Construction Storm Water Permit (NPDES No. CAS000002) to the Engineer and upload them in the SWRCB's Storm Water Multi-Application & Report Tracking System (SMARTS). 1) The Engineer will electronically acknowledge appropriate submittals in SMARTS after review. 2) Contractor shall pay for all registration and annual fees under this permit/program. 2. Storm Water Management Plan a. Submit a Storm Water Management Plan that describes measures that shall be implemented to prevent the discharge of contaminated storm water runoff from the jobsite. Contaminants to be addressed include, but are not limited to soil, sediment, concrete residue, pH less than 6.5 or greater than 8.5, and any other contaminants known to exist at the jobsite location as described in Document 00 31 24 – Materials Assessment Information. 3. Local Storm Water Permits a. Obtain any local storm water permits (e.g. city, county, etc.), submit copies, and comply with their requirements. b. For jobs in unincorporated Contra Costa County that are greater than one acre, Contractor shall obtain and comply with Contra Costa County's Watershed Program to enable the inspection of C.6 construction stormwater BMPs. <i>Section 1.4(B), Water Control and Disposal Plan</i> 1. Submit a detailed Water Control and Disposal Plan that complies with all requirements of the Specification and includes provisions for the types of discharges and permits in a through c below, if applicable to the project. a. Drinking Water System Discharges	EBMUD and EBMUD's Contractors	EBMUD	Prior to and During Construction

Impact Area	EBMUD Practices and Procedures ¹	Responsibility for Implementation	Responsibility for Monitoring and/or Enforcement	Timing of Implementation
	1) Plan shall comply with Drinking Water Systems Discharges Statewide Permit, General Order CAG140001. a) Include the approximate discharge start date, location, receiving water, estimated flow rate, and volume of all proposed discharges to surface waters, including discharges to storm drains. b) Identify the tracking system to record all actual discharges to a surface water body or a storm drain system that drains to a surface water body, regardless of volume. c) Describe monitoring program for drinking water system discharges greater than 325,850 gallons. The Planned Discharge Tracking Form, attached to the end of this section, may be used to fulfill this requirement. d) Notify the Engineer at least one week prior to the start of a planned discharge equal to or greater than 325,850 gallons. e) Describe dechlorination and erosion/sediment controls to be used for discharges. Note: These controls shall meet or exceed EBMUD minimum standards (see Supplement 1 attached to the end of this section). f) Outline potential beneficial reuse of water from drinking water systems. Potential reuse strategies may include landscape irrigation, agricultural irrigation, dust control, and discharge to stormwater capture basins or other groundwater recharge systems. 2) Submit all records of actual discharges, monitoring, water quality data, and beneficial reuse described above to the Engineer. 3) Follow city/county/local requirements for discharging water from drinking water systems into storm drains. b. Non-Stormwater Discharges 1) Plan shall describe measures for containment, handling, treatment (as necessary), and disposal of discharges such as groundwater (if encountered), runoff of water used for dust control, stockpile leachate, tank heel water, wash water, sawcut slurry, test water and construction water. c. Sanitary Sewer Discharges 1) Plan shall describe required applications and/or permits from the sanitary sewer system owner or agency having jurisdiction regarding the planned discharge. a) Outline monitoring and reporting expected to support sanitary sewer discharge, including a sampling and analysis plan required in Paragraph 1.4.J. All monitoring results shall be submitted to the Engineer prior to the end of the Work. EBMUD Standard Construction Specification 01 35 45, Biological, Cultural, and Paleontological Resource Requirements <i>Section 3.1, Protection of Native and Non-Native Protected Trees</i> (Details as listed under Impact AES-1)			
Impact BIO-3: Have a substantial adverse effect on state or federally protected wetlands (including, but not limited to, marsh, vernal pool,	EBMUD Standard Construction Specification 01 35 44, Environmental Requirements <i>Section 1.1(B), Site Activities</i> (Details as listed under Impact AES-1) <i>Section 1.4(A), Storm Water Management</i> (Details as listed under Impact BIO-2) <i>Section 1.4(B), Water Control and Disposal Plan</i> (Details as listed under Impact BIO-2)	EBMUD and EBMUD's Contractors	EBMUD	Prior to and During Construction

Impact Area	EBMUD Practices and Procedures ¹	Responsibility for Implementation	Responsibility for Monitoring and/or Enforcement	Timing of Implementation
coastal, etc.) through direct removal, filling, hydrological interruption, or other means.				
Impact BIO-4: Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites.	EBMUD Standard Construction Specification 01 35 45, Biological, Cultural, and Paleontological Resource Requirements <i>Section 3.2, Protection of Birds Protected Under the Migratory Bird Treaty Act and Roosting Bats</i> (Details as listed under Impact BIO-1)	EBMUD and EBMUD's Contractors	EBMUD	Prior to and During Construction
Impact BIO-5: Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance.	EBMUD Standard Construction Specification 01 35 45, Biological, Cultural, and Paleontological Resource Requirements <i>Section 3.1, Protection of Native and Non-Native Protected Trees</i> (Details as listed under Impact AES-1)	EBMUD and EBMUD's Contractors	EBMUD	Prior to and During Construction
Cultural Resources				
Impact CUL-2: Cause a substantial adverse change in the significance of a unique archaeological resource pursuant to §15064.5.	EBMUD Standard Construction Specification 01 35 45, Biological, Cultural, and Paleontological Resource Requirements <i>Section 3.3, Protection of Cultural and Paleontological Resources</i> A. Confidentiality of Information on Cultural and Paleontological Resources 1. In conjunction with Contractor's performance under this contract, the Contractor may obtain information as to the location and/or nature of certain cultural or paleontological resources, including Native American artifacts and remains. This information may be provided to the Contractor by EBMUD or a third party, or may be discovered directly by the Contractor through its performance under the contract. All such information shall be considered "Confidential Information" for the purposes of this Article. 2. Pursuant to California Government Code Section 6254.10, cultural resource information is protected from public disclosure. The Contractor agrees that the Contractor, its subcontractors, and their respective agents and employees shall not publish or disclose any Confidential Information to any person, unless specifically authorized in advance, in writing by the Engineer. B. Conform to the requirements of statutes as they relate to the protection and preservation of cultural and paleontological resources. Unauthorized collection of prehistoric or historic artifacts or fossils along the Work Area, or at Work facilities, is strictly prohibited. C. Before beginning construction, Contractor construction personnel involved in ground disturbing activities shall attend a cultural and paleontological resources training course provided by EBMUD of up to two hours for site supervisors, foreman, project managers, and non-supervisory	EBMUD and EBMUD's Contractors	EBMUD	Prior to and During Construction

Impact Area	EBMUD Practices and Procedures ¹	Responsibility for Implementation	Responsibility for Monitoring and/or Enforcement	Timing of Implementation
Impact CUL-2 (cont.)	contractor personnel. The training program will be completed in person or by watching a video, at an EBMUD designated location, conducted by a qualified archaeologist and/or paleontologist provided by EBMUD, or by EBMUD staff. The program will discuss cultural and paleontological resources awareness within the project work limits, including the responsibilities of Contractor's construction personnel, applicable mitigation measures, confidentiality, and notification requirements. The Contractor is responsible for ensuring that all workers requiring training are identified to EBMUD. Prior to accessing the construction site, or performing site work, all Contractor personnel shall: 1. Sign an attendance sheet provided by the Engineer verifying that all Contractor construction personnel involved in ground disturbing activities have attended the appropriate level of training; have read and understood the contents of the training; have read and understood the contents of the "Confidentiality of Information on Cultural and Paleontological Resources" document, and shall comply with all project environmental requirements. D. In the event that potential cultural or paleontological resources are discovered at the site of construction, the following procedures shall be instituted: 1. Discovery of prehistoric or historic-era archaeological resources requires that all construction activities shall immediately cease at the location of discovery and within 100 feet of the discovery. a. The Contractor shall immediately allow EBMUD to evaluate the find. The Contractor is responsible for stopping work and notifying the Engineer and shall not recommence work until authorized to do so by the Engineer. b. EBMUD will retain a qualified archaeologist to inspect the findings within 24 hours of discovery. If it is determined that the Project could damage a historical resource as defined by CEQA (or a historic property as defined by the National Historic Preservation Act of 1966, as amended), construction shall cease in an area determined by the archaeologist until a management plan has been prepared, approved by the Engineer, and implemented to the satisfaction of the archaeologist (and Native American representative if the resource is prehistoric, who shall be identified by the Native American Heritage Commission [NAHC]). In consultation with the Engineer, the archaeologist (and Native American representative) will determine when construction can resume. 2. Discovery of human remains requires that all construction activities immediately cease at, and within 100 feet of the location of discovery. a. The Contractor shall immediately notify the Engineer who will engage a qualified archaeologist provided by EBMUD to evaluate the find. The Contractor is responsible for stopping work and notifying the Engineer and shall not recommence work until authorized to do so by the Engineer. b. EBMUD will contact the County Coroner, who will determine whether or not the remains are Native American. If the remains are determined to be Native American, the Coroner will contact the Native American Heritage Commission (NAHC). The NAHC will then identify the person or persons it believes to be the most likely descendant from the deceased Native American, who in turn would make recommendations to EBMUD for the appropriate means of treating the human remains and any associated funerary objects. 3. Discovery of paleontological resources requires that all construction activities immediately cease at, and within 100 feet of the location of discovery. a. The Contractor shall immediately notify the Engineer who will engage a qualified paleontologist provided by EBMUD to evaluate the find. The Contractor is responsible			

Impact Area	EBMUD Practices and Procedures ¹	Responsibility for Implementation	Responsibility for Monitoring and/or Enforcement	Timing of Implementation
Impact CUL-2 (cont.)	for stopping work and notifying the Engineer and shall not recommence work until authorized to do so by the Engineer. b. EBMUD will retain a qualified paleontologist to inspect the findings within 24 hours of discovery. The qualified paleontologist, in accordance with Society of Vertebrate Paleontology guidelines (Society of Vertebrate Paleontology 2010), will assess the nature and importance of the find and recommend appropriate salvage, treatment, and future monitoring and management. If it is determined that construction activities could damage a paleontological resource as defined by the Society of Vertebrate Paleontology guidelines (Society of Vertebrate Paleontology 2010), construction shall cease in an area determined by the paleontologist until a salvage, treatment, and future monitoring and management plan has been prepared, approved by the Engineer, and implemented to the satisfaction of the paleontologist. The Engineer, in consultation with the paleontologist, will determine when construction can resume. E. If EBMUD determines that the find requires further evaluation, at the direction of Engineer, the Contractor shall suspend all construction activities at the location of the find and within a larger radius, as required.			
Impact CUL-3: Disturb any human remains, including those interred outside of dedicated cemeteries.	EBMUD Standard Construction Specification 01 35 45, Biological, Cultural, and Paleontological Resource Requirements <i>Section 3.3, Protection of Cultural and Paleontological Resources</i> (Details as listed under CUL-2)	EBMUD and EBMUD's Contractors	EBMUD	Prior to and During Construction
Energy				
Impact EN-1: Result in potentially significant environmental impact due to wasteful, inefficient, or unnecessary consumption of energy resources, during project construction or operation.	EBMUD Standard Construction Specification 01 35 44, Environmental Requirements <i>Section 3.5, Air Quality Control</i> (Details as listed under Impact AIR-1)	EBMUD and EBMUD's Contractors	EBMUD	Prior to and During Construction
Geology, Soils, and Seismicity				
Impact GEO-1: Directly or indirectly cause potential substantial adverse effects, including the risk of loss, injury, or death involving: rupture of a known earthquake fault; strong seismic groundshaking; seismic-related ground failure (liquefaction,	EBMUD Standard Construction Specification 01 81 02, Seismic Design Criteria <i>Section 1.1 References:</i> A. ASCE 7 , American Society of Civil Engineers, Minimum Design Loads for Buildings and Other Structures. <i>Section 1.2 Related Sections</i> A. Section 01 42 19 – Reference Standards B. lateral spreading); or landslides. Impact GEO-1 (cont.)	F. Section 26 24 19 – Motor Control Centers <i>Section 1.2 System Description</i> A. Design Requirements: 1. Architectural elements, mechanical and electrical components, equipment housings and their attachments, supporting structures, and anchorages shall comply with the requirements of ASCE 7, using the following values: a. Design spectral acceleration at short periods, SDS = ____ b. Design spectral acceleration at long periods, SD1 = ____ c. Seismic Design Category, [C] [D] [E] [F] d. Component importance Factor, Ip = 1.50 e. Component amplification factor, ap: In accordance with ASCE 7, Tables 13.5-1 and 13.6-1. f. Component response modification factor, Rp: In accordance with ASCE 7, Tables 13.5-1 and 13.6-1. g. Overstrength Factor, Ω: In accordance with ASCE 7, Tables 13.5-1 and 13.6-1 for anchorage in concrete. 2. Do not use friction to resist sliding due to seismic forces. 3. Do not use more than 60 percent of the weight of the mechanical and electrical equipment for designing anchors for resisting overturning due to seismic forces. 4. Do not use more than 60 percent of the weight of the tanks for resisting overturning due to seismic forces. 5. Resist seismic forces through direct bearing on anchors and fasteners. Do not design or provide connections that use friction to resist seismic loads. 6. Anchoring and fastening to concrete and masonry. a. Use cast-in anchors (anchor bolts or welded studs) whenever possible for anchors at connections that resist seismic forces. b. Do not use concrete anchors, flush shells, sleeve anchors, screw anchors, powder actuated fasteners, or other types of post-installed anchors unless indicated on the Drawings or accepted in writing by the Engineer. <i>Section 1.3 Seismic Qualification and Certification</i> A. The equipment and all components listed in this specification shall not undergo loss of their intended function after application of the Code prescribed seismic forces as specified in Section 01 43 11. <i>Section 1.4 Submittals</i> A. Shop drawings and calculations: Complete shop drawings and seismic calculations. B. Seismic Qualification and Certification shall be verified by an approved calculation that demonstrates the adequacy of the system for seismic forces. This calculation may be based on principles of structural analysis and engineering mechanics, or based on similarity to approved shake table tests as specified in Section 01 43 11. C. Contractor shall submit for review and approval test data or calculations signed and sealed by a Civil or Structural Engineer registered in the State of California to show compliance with the above requirements. EBMUD Engineering Standard Practice 512.1			

Impact Area	EBMUD Practices and Procedures ¹	Responsibility for Implementation	Responsibility for Monitoring and/or Enforcement	Timing of Implementation
	Engineering Standard Practice 512.1, Water Main and Services Design Criteria, establishes basic criteria for the design of water pipelines and establishes minimum requirements for pipeline construction materials. EBMUD Engineering Standard Practice 550.1, Seismic Design Requirements Engineering Standard Practice 550.1, Seismic Design Requirements, sets forth minimum criteria for the seismic design of new and existing EBMUD facilities which include (but are not limited to) offices, operating centers, water and wastewater treatment plants, water and other liquids storage structures, pumping plants, retaining walls, underground vaults, pipelines, and miscellaneous structures not covered above.			
Impact GEO-2: Result in substantial soil erosion or the loss of topsoil.	EBMUD Standard Construction Specification 01 35 44, Environmental Requirements <i>Section 1.1(B), Site Activities</i> (Details as listed under Impact AES-1) <i>Section 1.4(A), Storm Water Management</i> (Details as listed under Impact BIO-2)	EBMUD and EBMUD's Contractors	EBMUD	Prior to and During Construction
Impact GEO-3: Be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in on- or off-site landslide, lateral spreading, subsidence, liquefaction or collapse.	EBMUD Standard Construction Specification 01 35 24, Project Safety Requirements <i>Section 1.3(L), Excavation Safety Plan</i> - Section 6705 of the Labor Code requires that the excavation of any trench 5 feet or more in depth shall not begin until the Contractor has received from the Engineer notification of the Engineer's acceptance of the Contractor's detailed plan for worker protection from the hazards of caving ground during the excavation of such trench. - The plan shall show the details of the design of shoring, bracing, sloping or other provisions to be made for worker protection during such excavation. - The plan shall meet the requirements of the Construction Safety Orders, Title 8, California Code of Regulations. - Contractor shall obtain an excavation permit per Cal/OSHA Title 8, CCR § 341(a)(1). - California Government Code § 4216 describes the requirements and procedures for excavation notifications and utility excavation.	EBMUD and EBMUD's Contractors	EBMUD	Prior to and During Construction
Impact GEO-5: Directly or indirectly destroy a unique paleontological resource or site or unique geologic feature. Impact GHG-2: Conflict with a plan, policy, or regulation adopted for the purpose of reducing GHG emissions.	EBMUD Standard Construction Specification 01 35 44, Environmental Requirements <i>Section 3.5, Air Quality Control</i> (Details as listed under Impact AIR-1)	EBMUD and EBMUD's Contractors	EBMUD	Prior to and During Construction

Impact Area	EBMUD Practices and Procedures ¹	Responsibility for Implementation	Responsibility for Monitoring and/or Enforcement	Timing of Implementation
Hazards and Hazardous Materials				
Impacts HAZ-1 and HAZ-2: Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials. Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the likely release of hazardous materials into the environment.	EBMUD Standard Construction Specification 01 35 24, Project Safety Requirements <i>Section 1.3(B), Project Health and Safety Plan</i> 1. Submit a Project Health & Safety Plan for the Work to be performed prior to start of the Notice to commence field work (NTCFW) and/or prior to any limited notice to commence field work (LNTCFW). 2. The Project Health & Safety Plan shall implement applicable Title 8, California Code of Regulations for the work performed. <i>Section 1.3(K), Electrical Safety Plan</i> 1. Submit a detailed electrical safety plan that is in accordance with NFPA 70E Article 110. The plan shall include at a minimum: a. Electrical hazard potential b. Electrical safety program principles per Annex E.1 of NFPA 70E c. Electrical safety program controls per Annex E.2 of NFPA 70E d. Electrical safety program procedures per Annex E.3 of NFPA 70E e. Risk assessment and risk control procedures per Annex F of NFPA 70E f. Job briefing and planning checklists per Annex I of NFPA 70E g. Auditing effectiveness of project electrical safety program <i>Section 1.3 (L) Excavation Safety Plan</i> (Details as listed under GEO-3) EBMUD Standard Construction Specification 01 35 44, Environmental Requirements, <i>Section 1.1(B), Site Activities</i> (Details as listed under AES-1) <i>Section 1.4(A), Storm Water Management</i> (Details as listed under BIO-2) <i>Section 1.4(B), Water Control and Disposal Plan</i> (Details as listed under BIO-2) <i>Section 1.4(C), Waste Management</i> 1. Prepare a Waste Management Plan and submit a copy of the plan for the Engineer's acceptance prior to start of work (except for water wastes which shall be addressed in the Water Control and Disposal Plan). The Waste Management Plan shall address all Construction and Demolition Waste, universal wastes, Hazardous Wastes, Excavation Soils, and any other solid debris intended to be removed from the project site(s). a. Identify each type of material that will be generated during the project for disposal, recycling, salvage, or other management and estimate the volume/weight of each. b. Identify how the Contractor will handle, transport, dispose of, or otherwise divert each type of material required to be removed under this contract in a safe, appropriate, and lawful manner in compliance with all applicable regulations of local, state, and federal agencies having jurisdiction over the removed materials. c. Specify rules, regulations, and ordinances in the plan required by local agencies having jurisdiction over the handling, transportation, and disposal of waste. At a minimum, the following local rules, regulations or ordinances shall be followed:	EBMUD and EBMUD's Contractors	EBMUD	Prior to and During Construction

Impact Area	EBMUD Practices and Procedures ¹	Responsibility for Implementation	Responsibility for Monitoring and/or Enforcement	Timing of Implementation
Impacts HAZ-1 and HAZ-2 (cont.)	d. Identify diversion goals for all Construction and Demolition Wastes generated during the project. The specified diversion goals shall meet the minimum requirements of the local ordinances in the City/County/jurisdiction where each project site is located. e. Identify any onsite or offsite soil reuse or recycling but note the limitations on this practice below. 1) Excavation Soils shall not be reused or recycled without explicit approval from the Engineer. Do not assume approval for any reuse of soils. Any proposed reuse shall be initially discussed with the Engineer for evaluation. If soil reuse is planned onsite or offsite, include a Soil Reuse Plan within the Waste Management submittal outlining sites and specific locations where soil will be reused and the estimated volumes of soil to be used at each site. Necessary sampling and analytical work shall be included in the Sampling and Analytical Plan submittal in Paragraph 1.4.J1.4.I. 2) Soil reuse is not allowed in excavations for EBMUD drinking water pipelines. 3) Soil reuse is not allowed at sites with land use covenants or other site restrictions. 4) Notwithstanding items 2 and 3 above, soil reuse may be allowed in other circumstances as outlined below: a) Soil may be placed in the same trench or excavation it came from on EBMUD property if no evidence of contamination (e.g. oil, sheen, chemical odors, discoloration, etc.) is found in the excavated soil. b) Soil may be sent to offsite reuse facilities with published contaminant acceptance criteria when: i) Offsite facility is on EBMUD-Approved Disposal Facility list ii) Offsite facility has regulatory approval to accept soil iii) Contractor tests soil for acceptability at facility iv) Contractor submits test results and approval of facility receiving soil for reuse f. Include a list of recycling facilities and processing facilities that will be receiving recyclable or recoverable materials, including, but not limited to concrete, asphalt, and metals. g. Identify materials that are not recyclable or not recovered which will be disposed of in a landfill (or other means acceptable by the State of California and local ordinance and regulations). List the permitted landfill, or other permitted disposal facilities, which will be accepting the disposed waste materials. All landfills, hazardous waste, and universal waste disposal sites shall be approved for use by the Engineer. Engineer will provide a list of approved facilities. h. Identify how the Contractor will comply with DTSC Alternative Management Strategies (AMS) when handling and disposing of TWW in compliance with Health and Safety Code Section 25230. i. Plan should state that TWW records demonstrating proper management of TWW shall be submitted to the Engineer within 5 work days of off-haul. j. Describe planned sampling and analysis for characterizing wastes or the Sampling and Analysis Plan below in Paragraph 1.4.J. 2. The following additional waste management provisions shall be included in the Waste Management Plan to demonstrate compliance with requirements of local agencies having jurisdiction over the handling, transportation, and disposal of waste.			

Impact Area	EBMUD Practices and Procedures ¹	Responsibility for Implementation	Responsibility for Monitoring and/or Enforcement	Timing of Implementation
Impacts HAZ-1 and HAZ-2 (cont.)	a. Include a good faith quantity estimate of each type of Construction and Demolition Waste that would be generated if no diversion methods were implemented. Submit estimate with calculations based on weight of each material. The following materials are subject to the estimate requirement: 1) Asphalt 2) Concrete 3) Aggregates 4) Brick, masonry, clay products, and ceramic tile 5) Excavation Soils 6) Wood products, including clean dimensional wood, palette wood, plywood, OSB, and particleboard 7) Metals, including banding, ductwork, flashing, piping, rebar, steel, iron, galvanized sheet steel, stainless steel, aluminum, copper, zinc, lead, brass and bronze 8) Plant and tree trimmings (may be included in wood products if accepted by recycling service) 9) Cardboard, paper products, and packaging 10) Treated Wood Waste 11) Drywall 12) Mixed waste, including, but not necessarily limited to the following: a) Beverage containers b) Insulation c) Roofing d) Glass, excluding that used for containers e) Gypsum board f) Acoustical ceiling materials g) Plastics, including ABS, PVC, and piping h) Latex paint i) Other materials b. Specify the haulers that will be used to transport or haul waste to landfills and disposal/reuse/recycling sites. c. Include an example of a waste log or other tracking mechanism that will clearly show each load and its destination. The record shall clearly distinguish between anything sent to landfill or recycling/reuse or salvage. 1) Include in log the type of load, load weight, name of hauling service, recycling service or landfill, and date accepted by recycling service or by landfill (or other service). d. Submit copies of any submittals to local agencies required by their local ordinance. This includes permit applications, Waste Reduction and Recycling Plans, Construction and Demolition Summary Reports, or other similar documents. The permit application and Waste Reduction and Recycling Plan shall be submitted as an Appendix to the Waste Management Plan when possible.			
Impacts HAZ-1 and HAZ-2 (cont.)	3. For any proposed facility that is not on EBMUD-approved disposal list, submit permission to reuse, recycle, reclaim, or dispose of material from the site owner along with any other information needed by EBMUD to evaluate the acceptability of the proposed reuse,			

Impact Area	EBMUD Practices and Procedures ¹	Responsibility for Implementation	Responsibility for Monitoring and/or Enforcement	Timing of Implementation
Impacts HAZ-1 and HAZ-2 (cont.)	recycling, or disposal site and obtain acceptance of the Engineer prior to removing any material from the project site. 4. All information pertinent to the characterization of the material or waste shall be disclosed to EBMUD and the reuse, recycling, reclamation, or disposal facility. Submit copies of any profile forms and/or correspondence between the Contractor and the reuse, recycling, reclamation, or disposal facility. <i>Section 1.4(E), Spill Prevention and Response Plan</i> 1. Submit plan detailing the means and methods for preventing and controlling the spilling of known hazardous substances used on the jobsite or staging areas. a. Include a list of the hazardous substances proposed for use or generated by the Contractor on site, including petroleum products. b. Define measures that will be taken to prevent spills, monitor hazardous substances, and provide immediate response to spills. c. Include provisions for notification of the Engineer or alternate contact and appropriate agencies including phone numbers; spill-related worker, public health, and safety issues; spill control, and spill cleanup. d. Map showing hazardous materials project-related storage locations, names of the hazardous materials, and volumes/quantities. e. Submit a Safety Data Sheet (SDS) for each hazardous substance proposed to be used prior to delivery of the material to the jobsite. <i>Section 1.4(I), Waste Disposal Records</i> 1. Copies of waste management and disposal records including bills of lading, manifests, weight tickets, and receipts from waste management facilities shall be submitted to the Engineer. This provision applies to Hazardous Wastes, universal wastes, treated wood wastes, solid wastes disposed at landfills, and radioactive wastes. 2. Hazardous Waste Manifests a. Use the "Uniform Hazardous Waste Manifest", EPA form 8700-22. Contractor shall prepare and Engineer will review all hazardous waste manifests for acceptability prior to use. b. Submit the "Generator's Initial Copy" and a legible photocopy of the first page of hazardous waste manifests, land disposal restriction forms, or other documentation required by applicable regulations governing transport and disposal of Hazardous Wastes for disposal of hazardous substances within 5 days of off haul. 3. TWW Records a. Submit all disposal records to the Engineer within 5 work days of off-haul. b. Records shall include: 1) Name and address of the TWW facility to which the TWW was sent 2) Estimated weight of TWW, or the weight of the TWW as measured by the receiving TWW facility 3) EPA ID (for quantities greater than 10,000 pounds) 4) Date of the shipment of TWW. EBMUD Standard Construction Specification 02 82 13, Asbestos Control Activities <i>Section 1.1, Compliance and Intent</i> (Details as listed under Impact AIR-1) <i>Section 1.5, Submittals (Pre-Job)</i> (Details as listed under Impact AIR-1)			

Impact Area	EBMUD Practices and Procedures ¹	Responsibility for Implementation	Responsibility for Monitoring and/or Enforcement	Timing of Implementation
Impacts HAZ-1 and HAZ-2 (cont.)	EBMUD Standard Construction Specification 02 83 13, Lead Hazard Control Activities A. Furnish all labor, materials, facilities, equipment, services, employee training and testing, permits, and agreements necessary to perform the lead removal in accordance with these specifications and with the latest regulations from the U.S. Environmental Protection Agency (EPA), the Occupational Safety and Health Administration (OSHA), the Air Quality Management District with authority over the project, the Cal/EPA Department of Toxic Substance Control, the California Occupational Safety and Health Administration (Cal/OSHA), and other federal, state, county, and local agencies. Whenever there is a conflict or overlap of the above references, the most stringent provision is applicable. B. During demolition procedures, the Contractor shall protect against contamination of soils, water, adjacent buildings and properties, and the airborne release of hazardous materials and dusts. The costs associated with the implementation of controls will be incurred by the Contractor. C. Any information developed from exploratory work done by EBMUD and any investigation done by the Contractor to acquaint himself with available information will not relieve the Contractor from the responsibility of properly estimating the difficulty or cost of successfully performing the work. EBMUD is not responsible for any conclusions or interpretations made by the Contractor based on the information made available by EBMUD or EBMUD's representative. D. Hazardous materials uncovered during the demolition activities shall be disposed of in an approved manner complying with all applicable federal, state, and local regulations. Appropriate waste manifests shall be furnished to the Engineer as per Section 01 35 44 – Environmental Requirements. Materials are conveyed to the Contractor "as is," without any warranty, expressed or implied, including but not limited to, any warranty to marketability or fitness for a particular purpose, or any purpose. <i>Section 1.4, Submittals (Pre-Job)</i> A. Site safety plan: The Contractor shall provide a site safety plan prior to project initiation as specified in Section 01 35 24 – Project Safety Requirements. B. Lead Demolition Plan: Lead-containing coating handling, engineering control, removal, and disposal procedures C. Cal/OSHA Lead Work Pre-Job Notification, if required D. Submittal of worker documentation for employees used on the job 1. Lead-Containing Coating Demolition Work: All Contractor's supervisors and workers performing lead-containing coating work shall meet the requirements of the California Department of Health Services (DHS) lead-related construction interim certification (17 CCR 350001). E. Licenses: Submit copies of state and local licenses and evidence of Cal-OSHA certification and permits necessary to perform the work of this contract. F. Submit name and Environmental Laboratory Accreditation Program Certificate number of laboratory that will test samples collected during air monitoring. See Article 3.2 below. EBMUD Engineering Standard Practice 514, Identifying Buried Conflicts Purpose: to provide pipeline project guidelines for the investigation needed to identify existing underground utilities, and to establish a uniform approach for site reconnaissance of existing buried conflicts, such as active and abandoned utilities. Minimum steps required to identify existing utilities are also provided. Efforts made during the planning, design, and pre-construction phases to identify existing buried conflicts should lessen the potential for subsequent impacts during construction. EBMUD Procedure 711, Hazardous Waste Removal			

Impact Area	EBMUD Practices and Procedures ¹	Responsibility for Implementation	Responsibility for Monitoring and/or Enforcement	Timing of Implementation
Impacts HAZ-1 and HAZ-2 (cont.)	Purpose: To define hazardous waste and establish removal responsibilities for hazardous wastes generated at EBMUD facilities. Definitions: - Waste: Any solid, liquid, or contained gaseous material that is (1) disposed of, recycled, or incinerated, or (2) accumulated, stored, or treated before or in lieu of being disposed of, recycled, or incinerated. - Hazardous Waste: Any waste that meets the criteria for identification of a hazardous waste as set forth in California Code of Regulations, Title 22, Section 66261.3. A waste may be hazardous if it exhibits one or more of the characteristics of toxicity, reactivity, corrosivity, or ignitability, or if it is included on a specific list of wastes the U.S. Environmental Protection Agency (EPA) and/or California Department of Toxic Substances Control (DTSC) has determined are hazardous because the waste poses substantial present or potential hazards to human health or the environment. - Hazardous Waste Manifest: EPA's hazardous waste manifest is a document (paper or electronic) designed to track hazardous waste from the moment it leaves the facility where it was generated, until it reaches the off -site waste management facility that will store, treat and/or dispose of the hazardous waste. The manifest is what ties the generator to the waste from "cradle to grave". - These definitions are instructive but not comprehensive. State and federal legal definitions of hazardous waste are complex and subject to exceptions. Waste sample collection, analyses, and data comparison with Title 22 action levels may be necessary to determine if a waste is a hazardous waste. Responsibilities: - The Work Unit Supervisor or Project Manager (or his/her designee) - Identifies hazardous wastes and/or wastes requiring a determination for hazardous or non-hazardous classification and informs the Environmental Compliance Section (ECS). - Contacts ECS staff to coordinate waste disposal, reuse, or recycling. - Provides all known information about the waste to the ECS. - Labels, stores, inspects, and maintains the waste inventory records as directed by the ECS. - Ensures that the waste is available for transportation as scheduled through the ECS. - Helps the ECS coordinate interim storage of non-routine hazardous waste while an appropriate disposal method is being determined. - Reviews, with assistance from the ECS, Hazardous Waste Manifests (Manifest) prepared by haulers, to confirm the accuracy of information. - Signs the Manifest, if authorized and trained by the ECS. - For paper manifests, sends the signed Generator copy of the Manifest to the ECS within seven (7) days of the off-haul date, unless the ECS has an agreement that the transporter sends the Generator copy directly to the ECS. - Provides the ECS with a budget unit number and a job number. - Environmental Compliance Section - Coordinates the appropriate steps to determine if the waste is hazardous. - Determines, with the help of the relevant department, what analyses are required to classify the waste.			

Impact Area	EBMUD Practices and Procedures ¹	Responsibility for Implementation	Responsibility for Monitoring and/or Enforcement	Timing of Implementation
	○ Works with the EBMUD Laboratory and/or retained hazardous and nonhazardous waste management services contractor to analyze the waste or to assist in identifying other laboratories certified to perform the analyses. ○ Reviews analytical data to characterize the waste. ○ Obtains and provides EPA generator identification number. ○ Identifies and/or manages companies providing hazardous waste management services (sampling, hauling, and disposal) depending on EBMUD departmental needs. ○ Identifies and approves the waste disposal, reuse, or recycling method; additionally identifies disposal, reuse, or recycling facility. ○ Obtains hazardous waste acceptance documents (e.g., waste profile) from the disposal facility and provides to generating department to be included with hazardous waste shipment, as needed. ○ Provides training and guidance to unit or project staff on hazardous waste handling, disposal and Manifest completion requirements. ○ Reviews completed and signed Manifests prior to submittal to DTSC. ○ Tracks Manifest in dedicated database, and generates reports and summaries as needed. ○ Completes hazardous waste reporting requirements including, but not limited to: Biennial Reports, Waste Minimization Plans, and hazardous waste fee and tax forms. ○ Provides additional information as needed.			
Impact HAZ-3: Expose people or structures, either directly or indirectly, to a significant risk of loss, injury or death involving wildland fires. Impact HAZ-3 (cont.)	EBMUD Standard Construction Specification 01 35 24, Project Safety Requirements <i>Section 1.3(B), Project Safety and Health Plan</i> (Details as listed under Impact HAZ-1 and HAZ-2) <i>Section 1.3(E), Emergency Action Plan</i> E. Submit an Emergency Action Plan that prepares responses to employee accident/injury events, or any serious unplanned event (e.g.: utility break, fire, structure collapse, etc.) that requires notifying any first aid provider or responsive response agencies (e.g.: fire departments, utility agencies, rescue teams, etc.) 1. Plan shall include a map to medical facilities that are capable of caring for worker accidents & injury. 2. Plan shall include emergency contact numbers. <i>Section 3.2(G), Fire Prevention and Protection</i> G. Fire Prevention and Protection 1. Perform all Work in a fire safe manner and supply and maintain on the site adequate fire fighting equipment capable of extinguishing incipient fires. Comply with applicable federal, local, and state fire prevention regulations. Where these regulations do not apply, applicable parts of the National Fire Prevention Standards for Safeguarding Building Construction Operations (NFPA No. 241) shall be followed. 2. A long-handled, round-point shovel, or a fire extinguisher shall be kept at an accessible (unlocked) location on the construction site at all times. 3. Earthmoving and portable equipment with internal combustion engines shall be equipped with a spark arrestor to reduce the potential for igniting a wildfire. Such equipment shall be maintained to ensure proper functioning of spark arrestor. 4. For all work occurring between April 1 and December 1, or any other periods during which a high fire danger has been identified:	EBMUD and EDMUD's Contractors	EBMUD	Prior to and During Construction

Impact Area	EBMUD Practices and Procedures ¹	Responsibility for Implementation	Responsibility for Monitoring and/or Enforcement	Timing of Implementation
	a. Equipment that could produce a spark, fire, or flame shall not be used within 10 feet of any flammable materials. b. Portable tools powered by gasoline-fueled internal combustion engines shall not be used within 25 feet of any flammable materials. 5. Vegetation management for fire prevention and protection a. Prior to and during construction: 1) Create and maintain a defensible space (100 feet or to EBMUD property boundary, whichever is shorter) around construction site, construction ingress and egress sites through landscaping, mowing, disking, and/or spraying dry brush or native grasses to a height of 4-inches or less. 2) Remove dead trees within 100-feet of construction site. 3) Limb up trees within 100 feet of construction site so that no leafy foliage, twigs or branches are within 5-feet of the ground. To maintain tree health, tree limbing shall not remove more than 25 percent of a tree canopy within one growing season. 4) Ensure and maintain 5-feet of vertical clearance between roof surfaces and portions of trees overhanging all structures within construction site, and keep roofs free of leaves, needles, twigs, and other combustible matter. To maintain tree health, tree limbing shall not remove more than 25 percent of a tree canopy within one growing season. 5) Keep all overhanging trees, shrubs, and other vegetation, or portions thereof, free of dead limbs, branches, and other combustible matter. b. Neatly stack all combustible materials away from structures within construction site and have all combustible growth cleared 15-feet around the stack. 6. During construction, maintain an unobstructed horizontal clearance at access drives of not less than the required width of the access drives, and an unobstructed vertical clearance of not less than 13 feet 6 inches above all roadways.			
Hydrology and Water Quality				
Impact HYD-1: Violate any water quality standards or waste discharge requirements, or otherwise substantially degrade water quality	EBMUD Standard Construction Specification 01 35 44, Environmental Requirements <i>Section 1.1(B), Site Activities</i> (Details as listed under Impact AES-1) <i>Section 1.4(A), Storm Water Management</i> (Details as listed under Impact BIO-2) <i>Section 1.4(B), Water Control and Disposal Plan</i> (Details as listed under Impact BIO-2) <i>Section 1.4(E), Spill Prevention and Response Plan</i> (Details as listed under Impact HAZ-1 and HAZ-2) EBMUD Standard Construction Specification 01 74 05, Cleaning (Details as listed under Impact AES-1) EBMUD Procedure 711, Hazardous Waste Removal (Details as listed under Impact HAZ-1 and HAZ-2)	EBMUD and EDMUD's Contractors	EBMUD	Prior to and During Construction

Impact Area	EBMUD Practices and Procedures ¹	Responsibility for Implementation	Responsibility for Monitoring and/or Enforcement	Timing of Implementation
pattern of the site or area, including through the alteration of the course of a stream or river or through the addition of impervious surfaces, in a manner which would result in substantial erosion or siltation on- or off-site, substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or off-site, or create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff.	<i>Section 1.4(A), Storm Water Management</i> (Details as listed under Impact BIO-2) <i>Section 1.4(B), Water Control and Disposal Plan</i> (Details as listed under Impact BIO-2)			
Impact HYD-4: Conflict with or obstruct implementation of a Water Quality Control Plan or Sustainable Groundwater Management Plan.	EBMUD Standard Construction Specification 01 35 44, Environmental Requirements <i>Section 1.4(A), Storm Water Management</i> (Details as listed under Impact BIO-2)	EBMUD and EBMUD's Contractors	EBMUD	Prior to and During Construction
Noise and Vibration				
Impact NOI-1: Result in the generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the Project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies.	EBMUD Standard Construction Specification 01 14 00, Work Restrictions <i>Section 1.7, Construction Noise</i> A. Noise-generating activities greater than 90 dBA (impact construction such as concrete breaking, concrete crushing, tree grinding, etc) shall be limited to the hours of 8 a.m. to 4 p.m., Monday through Friday. EBMUD Standard Construction Specification 01 35 44, Environmental Requirements <i>Section 1.4(G), Noise Control and Monitoring Plan</i> 1. Submit a plan detailing the means and methods for controlling and monitoring noise generated by construction activities, including demolition, alteration, repair or remodeling of or to existing structures and construction of new structures, as well as by items of machinery, equipment or devices used during construction activities on the site. The plan shall detail the equipment and methods used to monitor compliance with the plan. <i>Section 3.8, Noise Control</i> A. Comply with sound control and noise level rules, regulations, and local ordinances and in the CEQA documents which apply to any work performed pursuant to the contract. Noise-generating activities shall be limited to the hours specified in Section 01 14 00.	EBMUD and EBMUD's Contractors	EBMUD	Prior to and During Construction

Impact Area	EBMUD Practices and Procedures ¹	Responsibility for Implementation	Responsibility for Monitoring and/or Enforcement	Timing of Implementation
Impact NOI-1 (cont.)	B. Take appropriate measures, including muffling of equipment, selecting quieter equipment, erecting noise barriers, modifying work operations, and other measures as needed to bring construction noise into compliance. C. Each internal combustion engine, used for any purpose on the job or related to the job, shall be equipped with a muffler of a type recommended by the manufacturer. D. Use the best available noise control techniques (including mufflers, intake silencers, ducts, engine enclosures, and acoustically attenuating shields or shrouds) for all equipment and trucks, as necessary. E. Truck operations (haul trucks and concrete delivery trucks) shall be limited to the daytime hours specified in Section 01 14 00. F. Stationary noise sources (e.g., chippers, grinders, compressors) shall be located as far from sensitive receptors as possible. Enclosure opening or venting shall face away from sensitive receptors. Enclosures shall be designed by a registered engineer regularly involved in noise control analysis and design. G. If impact equipment (e.g., jack hammers, pavement breakers, rock drills etc.) is used during project construction, Contractor is responsible for taking appropriate measures, including but not limited to the following: 1. Hydraulically or electric-powered equipment shall be used wherever feasible to avoid the noise associated with compressed-air exhaust from pneumatically powered tools. However, where use of pneumatically powered tools is unavoidable, an exhaust muffler on the compressed-air exhaust shall be used. External jackets on the tools themselves shall be used, where feasible. Quieter procedures, such as drilling rather than impact equipment, shall be used whenever feasible. It is the Contractor's responsibility to implement any measures necessary to meet applicable noise requirements. 2. Impact construction including jackhammers, hydraulic backhoe, concrete crushing/recycling activities, vibratory pile drivers etc. shall be limited to the daytime hours specified in Section 01 14 00. 3. Erect temporary noise barriers or noise control blankets around the construction site, particularly along areas adjacent to residential buildings. 4. Limit the noisiest phases of construction to 10 work days at a time, where feasible. 5. Notify neighbors/occupants within 300 feet of project construction at least thirty days in advance of extreme noise generating activities about the estimated duration of the activity. 6. Noise Monitoring shall be conducted periodically during noise generating activities. Monitoring shall be conducted using a precision sound-level meter that is in conformance with the American National Standards Institute (ANSI) Standard S1.4, Specification for Sound Level Meters. Monitoring results shall be submitted weekly to the Engineer. EBMUD Procedure 600 (Details as listed under Impact AIR-1)			
Impact NOI-2: Result in the generation of excessive groundborne vibration or groundborne noise levels.	EBMUD Standard Construction Specification 01 35 44, Environmental Requirements <i>Section 1.4(H), Vibration Control and Monitoring Plan</i> 1. Submit a plan detailing the means and methods for controlling and monitoring surface vibration generated by demolition and other work on the site. The plan shall detail the equipment and methods used to monitor compliance with the plan. <i>Section 3.7, Vibration Control</i> A. Limit continuous surface vibration to no more than 0.5 in/sec Peak Particle Velocity (PPV), measured at the nearest residence or other sensitive structure. See Section 01 14 00.	EBMUD and EBMUD's Contractors	EBMUD	Prior to and During Construction

Impact Area	EBMUD Practices and Procedures ¹	Responsibility for Implementation	Responsibility for Monitoring and/or Enforcement	Timing of Implementation
Transportation				
Impact TRA-1: Conflict with a program, plan, ordinance or policy addressing the circulation system, including transit, roadway, bicycle, and pedestrian facilities.	EBMUD Standard Construction Specification 01 32 36, Video Monitoring and Documentation <i>PART 1 - General</i> <i>1.1 Summary</i> A. Section includes: 1. Audio-video documentation utilizing digital recording of surface features, supplemented by photography, that may be taken along the entire length of the project and may include work and storage areas, adjacent properties, and/or intersecting roadways. a. Prior to audio-video recording of the project, all areas to be inventoried shall be investigated visually with notations made of items not readily visible by audio-video recording or photographic methods. B. Related sections: 1. Section 01 11 00 – Summary of Work 2. Section 01 31 23.10 – Web-based Construction Document Management 3. Section 01 33 00 – Submittal Procedures <i>1.2 Site Survey Audio-Video Recording Requirements</i> A. The Contractor shall employ a qualified videographer, experienced in taking properly documented and annotated video to perform the Pre-Construction Site Survey, which shall be completed within 20 days after the issuance of the Notice to Proceed. The Pre-Construction Site Survey shall be completed and accepted prior to EBMUD issuance of the Notice to Commence Field Work (NTCFW). B. Pre-Construction Site Survey: The Contractor shall perform a Pre-Construction Site Survey of: 1. The project alignment 2. Proposed equipment and material staging areas 3. Access and haul routes to be utilized during construction (San Luis Road between Casa Way and Larkey Lane and on Larkey Lane between San Luis Road and Alfred Avenue), C. Prior to commencement of the Pre-Construction Site Survey recording, the Contractor shall notify the Engineer in writing within 48 hours of the recording. EBMUD will provide a designated representative to accompany and observe audio-video recording operations. Audio-video recording completed without an EBMUD Representative present will be unacceptable unless specifically authorized in writing and in advance by EBMUD. D. Provide a copy of the Pre-Construction Site Survey to EBMUD for review and comment. The Survey shall include all audio-video recordings, photography, annotations and all documentation. If the Engineer determines that critical areas are missing from the survey, the Contractor shall provide additional recording and documentation of the requested area and locations. E. Post-Construction Site Survey: The Contractor shall perform a Post-Construction Site Survey of the same areas recorded in the Pre-Construction Site Survey. The Engineer will review post-construction survey findings with the Contractor and develop a complete listing of project site restoration requirements to be accomplished by the Contractor. Prior to commencement of Post-Construction Site Survey recording, the Contractor shall notify the Engineer in writing within 48-hours of the recording. EBMUD will provide a designated representative to accompany and observe audio-video recording operations. Audio-video recording completed without an EBMUD Representative present will be unacceptable unless specifically authorized in writing and in advance by EBMUD.	EBMUD and EBMUD's Contractors	EBMUD	Prior to and During Construction
Impact TRA-1 (cont.)				

Impact Area	EBMUD Practices and Procedures ¹	Responsibility for Implementation	Responsibility for Monitoring and/or Enforcement	Timing of Implementation
Impact TRA-1 (cont.)	F. The Contractor shall be responsible for repairing any damage or defects not documented as existing prior to construction. <i>Part 2 - Products</i> <i>2.1 Audio-Video Recording</i> A. The resolution of the video shall be 1080p or higher. B. The format of the site survey shall be a digital audio-video file in mp4, avi, or mpg with narrative. C. Each recording shall contain the following information and arrangement at the beginning as a title screen: 1. "EBMUD" 2. PROJECT NAME 3. PROJECT NUMBER 4. CONTRACTOR: (Name of Contractor) 5. DATE: (When video was recorded) 6. VIDEO BY: (Firm Name of Videographer) 7. LOCATION: (Description of Location(s), View(s), Direction of Travel) D. Information appearing on the video recording must be continuous and run simultaneously by computer generated transparent digital information. No editing or overlaying of information at a later date will be acceptable. E. Time must be accurate and continuously displayed on the recording. F. Written documentation must coincide with the information on the recordings so as to make easy retrieval of locations at a later date. G. The video recording system shall have the capability to transfer individual frames of video electronically into hard copy prints or photographic negatives. H. The finalized audio-video recordings shall be saved on appropriate physical media (e.g. USB flash drive, DVD) viewable on computer with standard media player software and shall contain a Table of Contents outlining the file folder hierarchy and description of files included. I. The physical media shall be labeled with the following information: 1. "EBMUD" 2. Project Name and Number 3. Date of Recording 4. Contractor Name 5. Videographer Name J. Ownership of Recordings: All audio-video recordings will become the property of EBMUD. K. Any portion of the recorded coverage deemed unacceptable by EBMUD shall be re-taped by the Contractor at no additional cost to EBMUD. <i>Part 3 - Execution</i> <i>3.1 Views and Narrative Required</i> A. Prior to conducting the survey, the Contractor shall discuss with the Engineer to establish specific areas that must be recorded. If surveying of these areas requires private property access, the Contractor shall obtain written permission from the property owner(s), which shall be submitted to the Engineer.			

Impact Area	EBMUD Practices and Procedures ¹	Responsibility for Implementation	Responsibility for Monitoring and/or Enforcement	Timing of Implementation
Impact TRA-1 (cont.)	B. [Coverage shall include all surface features within 100-feet of the limits of Work to be used by the Contractor and shall be supported by appropriate audio description made simultaneously with video coverage.] C. Such coverage shall include, but not be limited to, existing driveways, sidewalks, pavement, curbs, gutters, ditches, berms, roadways, landscaping, trees, culverts, headwalls, and retaining walls, fencing, gates, handrails, signage, manholes, vaults, utility boxes, lighting, traffic signals and controls, loop detectors, landscaping, irrigation controllers, street furniture, equipment, appurtenances, structures, and other existing features etc. located within the work zone. Video coverage shall extend to the maximum height of all structures within the work zone. D. [When the Work includes construction of water, wastewater, recycled, or other lines in the vicinity of any street or road, the Contractor shall take digital audio-video recordings of existing conditions along both sides of the street or road.] E. All video recording shall be done during times of good visibility. No outside recording shall be done during periods of visible precipitation, mist, fog, or when the ground area is covered with snow, standing water, leaves or debris, unless otherwise authorized by the Engineer. F. Sufficient sunlight shall be present to properly illuminate the subjects of recording and to produce bright, sharp video recordings of those subjects. Shadowing and glare shall be avoided. In order to produce the proper detail and perspective, adequate auxiliary lighting shall be provided to fill in shadow areas caused by trees, utility poles, road signs and other such objects, as well as other conditions requiring artificial illumination. G. The camera shall be firmly stabilized such that transport of the camera during the recording process will not cause an unsteady picture. H. The average rate of speed in the general direction of travel of the conveyance used during taping shall not exceed 60-feet per minute. Panning rates and zoom-out rates shall be controlled sufficiently so that playback will produce adequate clarity of the object and features of interest being viewed. I. When conventional wheeled vehicles are used as conveyances for the recording, the distance from the camera lens to the ground shall be such as to ensure proper perspective. In instances where tape coverage will be required in areas not accessible to conventional wheeled vehicles, such coverage shall be obtained by walking or by special conveyance approved by the Engineer but with the same requirements for tape quality and content as specified herein, except as may be specifically exempted by the Engineer. J. When detail of areas in question are unable to be captured on video, high-resolution digital photography of adequate resolution shall be used to supplement video, with written annotations and descriptions. K. The video recorder shall take special efforts to point out and provide audio commentary on cracking, breakage, damage, settlement and other defects in existing features. Restrict commentary to factual descriptions of all features without commentary on causation. EBMUD Standard Construction Specification 01 55 26, Traffic Regulation <i>Section 1.1, Summary</i> A. Section includes: Comply with the traffic regulation requirements as specified herein. B. Where specific requirements are not detailed herein or in permits, comply with the requirements of the most current version of the California Manual on Uniform Traffic Control Devices (MUTCD). C. All proposed street closures shall be clearly identified in the Traffic Control Plan (TCP) and shall conform to the section "Traffic Control Devices" below. Construction area signs for street closure and detours shall be posted a minimum of forty-eight (48) hours prior to the commencement of			

Impact Area	EBMUD Practices and Procedures ¹	Responsibility for Implementation	Responsibility for Monitoring and/or Enforcement	Timing of Implementation
Impact TRA-1 (cont.)	street closure. Contractor shall maintain safe access around the project limit at all times. Street closures shall be limited to those locations indicated on the construction documents. D. Related requirements specified elsewhere: 1. Section 01 14 00 – Work Restrictions <i>Section 1.2, Submittals</i> A. Submit at least 15 calendar days prior to work a detailed traffic control plan, that is approved by all agencies having jurisdiction and that conforms to all requirements of these specifications and the most recently adopted edition of the MUTCD. Traffic Control Plan shall include: 1. Circulation and detour plans to minimize impacts to local street circulation. Use haul routes minimizing truck traffic on local roadways to the extent possible. 2. A description of emergency response vehicle access. If the road or area is completely blocked, preventing access by an emergency responder, a contingency plan must be included. 3. Procedures, to the extent feasible, to schedule construction of project elements to minimize overlapping construction phases that require truck hauling. 4. Designated Contractor staging areas for storage of all equipment and materials, in such a manner to minimize obstruction to traffic. 5. Locations for parking by construction workers. <i>Section 2.1, Traffic Control Devices</i> A. Traffic signs, flashing lights, barricades and other traffic safety devices used to control traffic shall conform to the requirements of the most recently adopted edition of the MUTCD and the agency having jurisdiction. 1. Portable signals shall not be used unless permission is given in writing by the agency having jurisdiction. 2. Warning signs used for nighttime conditions shall be reflectorized or illuminated. "Reflectorized signs" shall have a reflectorized background and shall conform to the current State of California Department of Transportation specification for reflective sheeting on highway signs. <i>Section 3.1, General</i> A. Except where public roads have been approved for closure, traffic shall be permitted to pass through designated traffic lanes with as little inconvenience and delay as possible. B. Install temporary traffic markings where required to direct the flow of traffic. Maintain the traffic markings for the duration of need and remove by abrasive blasting when no longer required. C. Convenient access to driveways and buildings in the vicinity of work shall be maintained as much as possible. Temporary approaches to, and crossing of, intersecting traffic lanes shall be provided and kept in good condition. D. When leaving a work area and entering a roadway carrying public traffic, the Contractor's equipment, whether empty or loaded, shall in all cases yield to public traffic. E. Provide temporary signs as required by the traffic control plan and remove signs when no longer required. F. Haul routes for each construction phase shall be provided to all trucks serving the site during the construction period. G. For complete road closures, immediate emergency access to be provided if needed to emergency response vehicles. H. A minimum of twelve (12) foot travel lanes must be maintained unless otherwise approved.			

Impact Area	EBMUD Practices and Procedures ¹	Responsibility for Implementation	Responsibility for Monitoring and/or Enforcement	Timing of Implementation
	<i>Section 3.2, Alternating One-Way Traffic</i> A. Where alternating one-way traffic has been authorized, the following shall be posted at each end of the one-way traffic section at least one week prior to start of work: 1. The approximate beginning and ending dates that traffic delays will be encountered. 2. The maximum time that traffic will be delayed. B. The maximum delay time shall be approved by the agency having jurisdiction. <i>Section 3.3, Flagging</i> A. Provide flaggers to control traffic where required by the approved traffic control plan. 1. Flaggers shall perform their duties and shall be provided with the necessary equipment in accordance with the current "Instructions to Flaggers" of the California Department of Transportation. 2. Flaggers shall be employed full time on traffic control and shall have no other duties. <i>Section 3.4, Temporary Traffic Control</i> A. All traffic control devices shall conform to the latest edition of the MUTCD, and as amended by the latest edition of the MUTCD California supplement. Electronic signage board with changeable message shall be placed on a street in both directions 2 weeks in advance. B. The Contractor shall replace within 72 hours, all traffic signal loop detectors damaged during construction. Any work that disturbs normal traffic signal operations and ensure proper temporary traffic control (lane shifts, lane closures, detours etc.) shall be coordinated with the agency having jurisdiction, at least 72 hours prior to commencing construction. C. A minimum of twelve (12) foot travel lanes must be maintained unless otherwise approved. D. Access to driveways will be maintained at all times unless other arrangements are made. E. All traffic control devices shall be removed from view when not in use. F. Before leaving a work area, ensure the area is left orderly. Trenches must be backfilled or plated during non-working hours. G. Sidewalks for pedestrians will remain open if safe for pedestrians. Alternate routes and signing will be provided if pedestrian routes are to be closed.			
Impact TRA-3: Substantially increase hazards due to a design feature or incompatible uses.	EBMUD Standard Construction Specification 01 55 26, Traffic Regulation (Details as listed under Impact TRA-1)	EBMUD and EBMUD's Contractors	EBMUD	Prior to and During Construction

EAST BAY MUNICIPAL UTILITY DISTRICT

DATE: July 9, 2024

MEMO TO: Board of Directors

THROUGH: Clifford C. Chan, General Manager 

FROM: Derry L. Moten, Special Assistant to the General Manager 

SUBJECT: Service Award Recipients - April through June 2024

The District values the individual and collective contributions of employees and recognizes that staff longevity is a key factor in successfully providing high quality water and wastewater services for the people of the East Bay. Employee longevity milestones are acknowledged for every five years of service.

During the Board meeting on July 9, 2024, staff will present a list of 57 District employees who reached service award milestones ranging from five to 40 years of service between April 1 and June 30, 2024. This group includes five employees celebrating 25 years of service at the District.

Employees who reach service award milestones are also recognized by their organizational leadership through the Employee Recognition and Service Award Program and receive a service award on behalf of the District.

EAST BAY MUNICIPAL UTILITY DISTRICT

DATE: July 9, 2024

MEMO TO: Board of Directors

FROM: Clifford C. Chan, General Manager 

SUBJECT: Monthly Report – June 2024

HIGHLIGHTS

In June, staff completed the East Bay annual creek electrofishing surveys for the East Bay Habitat Conservation Plan. This year Pinole, San Leandro and Kaiser creeks were surveyed. No trout were captured in Pinole Creek, but a healthy trout component was found in San Leandro and Kaiser creeks. Several trout were observed in the stretch above the site of last year's Two Dog Fish Passage Project, indicating that fish can successfully move through the project site to get upstream.

Between June 24-26, the District hosted Baywork's IgnitED Education Program's Teacher Externship. Staff provided information on water supply, water treatment, and wastewater treatment. Staff also conducted tours of the Adeline Maintenance Center, the Main Wastewater Treatment Plant, San Pablo Reservoir, and Sobrante Water Treatment Plant. Teachers then developed classroom curriculum based on the information provided. Approximately 15 people attended.

WATER SUPPLY

On June 3, staff attended the Mokelumne Integrated Conjunctive Use Program (MICUP) Interested Parties meeting in Stockton. San Joaquin County provided an overview of its MICUP, the status of the MICUP water right application, and the approach to preparing the environmental documents. San Joaquin County is preparing the Notice of Preparation of an Environmental Impact Report for MICUP that is anticipated to be posted in July 2024.

On June 5, the District shared a draft Purveyor Specific Agreement (PSA) with Sacramento Water Forum Members. The Sacramento Water Forum is a diverse group of business and agricultural leaders, citizen groups, environmentalists, water managers, and local governments in the Sacramento region. Objectives are to provide a reliable and safe water supply for the Sacramento region's economic health and planned development and to preserve the Lower American River's fishery, wildlife, recreational, and aesthetic values. Negotiations to develop a draft agreement will continue through 2024. As a potential signatory, staff prepared a draft PSA, which outlines the District's specific commitments to achieving the co-equal objectives including a long-term commitment to purchase Placer County Water Agency Water

Forum releases. The draft PSA will soon be circulated to Sacramento Water Forum staff for review.

On June 6, staff provided an update on the completion of operations for the Demonstration, Recharge, Extraction, and Aquifer Management (DREAM) Project to the Eastern Water Alliance (EWA) and DREAM Monitoring Committee. In coordination with North San Joaquin Water Conservation District and San Joaquin County's consultant, staff provided an overview of 2024 extraction timeline, 2023 and 2024 recharge and extraction water accounting, groundwater monitoring results, lessons learned, and project next steps. The EWA and DREAM Monitoring Committee requested an update on the larger conceptual project at the next EWA meeting scheduled for September 5, 2024.

On June 10, staff met with WaterReuse California and the State Water Resources Control Board Division of Administrative Services - Fee Branch to discuss the proposed recycled water permit fees. Representatives from Los Angeles County Sanitation District and Orange County Water District were also in attendance. The purpose of the meeting was to discuss the new proposed fee options and the schedule for when the fees would be assessed. The Water Board intends to assess the new fees in Fiscal Year 2024-2025. Because many agencies have not budgeted for these fees in the upcoming fiscal year, the Water Board is considering invoicing later in the fiscal year. A second stakeholder meeting was held on June 13, 2024 and the final stakeholder meeting will be held on August 1.

On June 11, staff met with the State Water Resources Control Board's (SWRCB) Division of Water Rights to review and finalize the workplan to complete work on the District's hydropower licensing request initiated in 2008 for Pardee and Camanche hydropower water rights permits. SWRCB provided input on the schedule and sequence of tasks to be completed by EBMUD and SWRCB and agreed to proceed with the work. A follow-up meeting is scheduled for September 11, 2024 to review results for initial licensing quantities.

On June 17, staff met with U.S. Bureau of Reclamation (USBR) to discuss a discrepancy in their records for EBMUD's water transfers in 2022. During the meeting, staff helped USBR identify a discrepancy in their records of EBMUD water deliveries and payments of transfer water in 2022. USBR plans to correct their database and issue a revised invoice to EBMUD.

Precipitation. There was no East Bay precipitation for June and the season total was 19.88 inches (74 percent of average). The Mokelumne precipitation for June was 0.03 inches (4 percent of average) and the season total was 42.06 inches (87 percent of average).

Water Releases

Camanche Reservoir. The average rate of Camanche release for June was 925 cfs (847 cfs generation, 67 cfs sluice, and 11 cfs through the hatchery), and the average flow below Woodbridge Dam was 651 cfs, both in accordance with the Joint Settlement Agreement "Below Normal" water year criteria.

East Bay Reservoirs. There were no East Bay reservoir releases in June.

Water Storage

Mokelumne reservoirs storage is 110 percent of average. As of June 30, 2024, Pardee was at 563.4 feet or 97 percent of average, and Camanche was at 231.7 feet or 118 percent of average. Combined Pardee and Camanche reservoir storage was 583,000 acre-feet compared to 588,000 acre-feet last year.

East Bay reservoirs storage is 102 percent of average. As of June 30, 2024, Upper San Leandro was at 458.2 feet or 113 percent of average, San Pablo was at 302.8 feet or 92 percent of average, and Briones was at 573.4 feet or 103 percent of average. Total terminal reservoir storage was 136,000 acre-feet compared to 139,000 acre-feet last year.

Mokelumne Aqueducts and Raw Water Pumping Plants. The average rate of Mokelumne Aqueduct draft for June 2024 was 175 MGD. Walnut Creek, Moraga and Briones Raw Water Pumping Plants remained out of service for the month.

Water Production. Average rate of gross water production for June:

	June 2024	June 2023	June 2020	Average of FY 2005-2007
East of Hills	61 MGD	53 MGD	67 MGD	87 MGD
West of Hills	120 MGD	118 MGD	134 MGD	173 MGD
Total	181 MGD	171 MGD	201 MGD	260 MGD
Max Day Production	195 MGD (6/17/2024)	188 MGD (6/30/2023)	218 MGD (6/18/2020)	

Note: Data are all from preliminary daily operational reports and are subject to revision

WATER QUALITY AND ENVIRONMENTAL PROTECTION

In June, staff met with the San Francisco Regional Water Quality Control Board (SFRWQCB) to review the status of the ongoing toxicity investigation at the Orinda Water Treatment Plant (WTP). Staff provided a detailed update, including data, demonstrating that there is no toxicity leaving the plant and the discharge to receiving waters is in full compliance. Staff is implementing corrective action measures to ensure the sample collection point for the discharge from the Orinda WTP to San Pablo Creek is on a routine maintenance schedule to prevent sludge buildup.

In June, seasonal salmonid field monitoring was conducted in the Mokelumne River. Through June 13, 76,144 and 19,558 naturally produced juvenile Chinook salmon were counted in the upstream and downstream traps, respectively (including weekend estimates). In addition to trap checks, rotary screw trap calibrations were conducted to help provide an estimate of the proportion of natural-origin juvenile Chinook salmon captured. As a result, the current

production estimate of juvenile Chinook salmon at the upstream trap is 1,753,977 while the outmigration estimate of juvenile Chinook salmon at the downstream traps is 432,849.

In June, staff completed raptor nest surveys within District property surrounding Pardee and Camanche reservoirs. The bi-weekly nest monitoring surveys started in March and end when nests are no longer active. The purpose of the surveys is to identify active raptor nests on the watershed, provide nest maps and avoidance buffers to staff, and provide information for coordinating maintenance and construction projects on the watershed.

On June 7, the District reported a release of digester gas to the Bay Area Air Quality Management District (BAAQMD). An investigation of the incident found a release of approximately 42,960 cubic feet of digester gas from the Digester 8 overflow piping p-trap during a preventive maintenance task when staff was attempting to clean the sight glass. Since this incident is similar to one on April 2, 2023, the District is exploring more systemic corrective actions to make the process of p-trap preventive maintenance less prone to operator error. BAAQMD is reviewing this incident and will determine if a Notice of Violation will be issued.

On June 12, staff participated in a meeting with the State Water Resources Control Board to discuss the District's draft flow accounting for the Healthy Rivers and Landscapes Program. During the meeting, staff helped answer questions regarding modeling, water rights, and diverters between Camanche Reservoir and Woodbridge Irrigation Dam.

On June 24, staff and the City of Hayward met with the San Francisco Regional Water Quality Control Board (SFRWQCB) to discuss coordination between the agencies to address a Department of Water Resources' recommended corrective action related to groundwater quality on the East Bay Plain Subbasin Groundwater Sustainability Plan. The agencies agreed to meet biannually to discuss updates from SFRWQCB on the largest plumes, site closures, and groundwater quality management.

All authorized discharges from the Main Wastewater Treatment Plant (MWWTP) were in compliance with the permit limits for the month of June. This is the 298th consecutive month that the MWWTP experienced no exceedances.

The District received no odor reports from the public in June.

INFRASTRUCTURE INVESTMENT

In June, staff completed a pipeline replacement project in the Camino Tassajara area in Danville. This project replaced asbestos cement pipe with approximately 8,000 feet of 6- and 8-inch structurally enhanced polyvinyl chloride pipe.

In June, staff completed a pipeline replacement project in the Le Roy Avenue area in Berkeley. This project replaced cast iron pipe with approximately 1,415 feet of 6- and 8-inch earthquake-resistant ductile iron pipe.

In June, staff began a pipeline replacement project in the St. Mary’s Road area in Lafayette. This project will replace cast iron pipe with approximately 5,580 feet of 6-, 8-, and 12-inch mortar-lined zinc coated ductile iron pipe. This project is expected to be completed in September 2024.

In June, staff began a pipeline replacement project in the Arbor Drive area in San Leandro. This project will replace steel pipe and cast-iron pipe with approximately 2,685 feet of 6-inch mortar-lined zinc coated ductile iron pipe. This project is expected to be completed in October 2024.

In June, staff began a pipeline replacement project in the Lovegrove Street area in San Pablo. This project will replace cast iron pipe with approximately 3,115 feet of 6-inch structurally enhanced polyvinyl chloride pipe and mortar-lined zinc coated ductile iron pipe. This project is expected to be completed in October 2024.

Construction of the Dechlorination Facility Improvements Phase 2B project was completed under SD-290A. This \$2.5 million project included installation of a new engine-generator, structural improvements to the Injector Building, new potable water piping to the Transition Building, replacement of laboratory and computer equipment, site improvements, and replacement/relocation of underground utilities.

Mains repaired in June totaled 68. The attached table lists the mains repaired by staff in June, sorted by city and street. The table indicates the source of the leaks in three categories: non-surfacing leaks discovered by leak detection technologies, breaks caused by contractors or other agencies, and all other main breaks. The associated map shows the location of the main repairs.

CUSTOMER AND COMMUNITY SERVICES

In June, staff presented at the American Water Works Association’s Annual Conference and Exposition in Anaheim. The presentations highlighted the history of the Pipeline Rebuild Program, its innovative model of practice for water main rehabilitation and how to extend the lives of old water mains using proven cost-effective methods. Staff also participated on a panel topic related to cured-in-place pipelining of asbestos cement pipe for seismic resiliency. Approximately 15 people attended.

In June, staff met with the Oakland Ballers to discuss placing recycled water signs at Raimondi Park in West Oakland. Once the signs are installed, they will remain for the season with up to 4,000 people in attendance per game.

On June 1, staff participated in the City of Orinda’s Wildfire Prevention Safety Fair. Staff provided information on the District’s fuel reduction and vegetation management program in the watershed and ongoing capital projects in Orinda. Approximately 75 people attended.

On June 1, staff participated in the Oakland Drinks Water Health Fair at Lake Merritt. Staff provided information on water conservation, the watershed, and the Customer Assistance Program. Approximately 1,000 people attended.

On June 1, staff participated at the annual San Leandro Cherry Festival. Director Chan and staff provided information on indoor and outdoor leak detection, water conservation rebates, and job information at the District. The Water on Wheels Trailer was present. Approximately 20,000 people attended.

On June 2, staff participated in the Hercules Cultural Festival at Refugio Valley Park. Staff engaged customers with water trivia and provided information on water conservation, the watershed, and the Customer Assistance Program. The Water on Wheels trailer was present. Approximately 10,000 people attended.

On June 3, staff met with the Gilman Street Business District to discuss pipeline replacement work and water outages in Berkeley. Approximately 15 people attended.

On June 4, staff participated in the Bay Area Clean Water Agencies Asset Management Committee's first Asset Management Workshop. Staff described how the District utilizes asset management in capital planning, discussed plans to improve the wastewater's asset management program, and shared lessons learned and project successes. Approximately 30 people attended.

On June 6, staff conducted a tour of the Mokelumne River Day Use Area and Mokelumne River Fish Hatchery for the Buena Vista Rancheria Natural Resources Staff and the California Department of Fish and Wildlife Tribal Liaison. The tour highlighted areas for potential collaboration including tribal riparian plantings, restoration projects, and access to hatchery salmon for tribal uses. Approximately 10 people attended.

On June 8, gunfire was reported at Camanche South Shore. At approximately 9:30 p.m. staff were alerted by campers of gunfire in Lakeside Campground at Camanche South Shore Recreation Area. A shelter in place alert was broadcast to District and concession staff. Calaveras Sheriff deputies located and arrested the suspect at around 1:30 a.m. the following morning. No one was injured in the incident.

On June 10, staff attended the Castro Valley Advisory Council Land Use meeting to learn about community issues.

On June 11, staff met with the Contra Costa County Public Works to coordinate construction activities. The two agencies shared information on current and upcoming work.

On June 11, staff attended the Eden Municipal Advisory Council General Purpose meeting to learn about community issues.

On June 12, staff attended San Joaquin Council of Governments' Habitat Technical Advisory Committee meeting. This meeting provided an opportunity to coordinate District initiatives and projects with the San Joaquin County multi-species habitat conservation and open space plan.

On June 13, the District presented Woodbridge Irrigation District (WID) with Board Resolution No. 35401-24 recognizing its centennial year.

On June 13, staff coordinated with the Contra Costa County Office of Emergency Services on water distribution during emergencies.

On June 13, staff attended the Cherryland Community Association's quarterly meeting to learn about community issues.

On June 13, staff met with the City of Orinda to review and discuss capital projects in the City as part of an ongoing quarterly coordination meeting. The project status, environmental documentation, and schedules were presented to the city as an early opportunity to share information and receive input early in the planning phase.

On June 13, staff participated at the Lincoln Square Park Summer Nights in Oakland Chinatown. Staff provided information on the Customer Assistance Program and water conservation. Approximately 500 people attended.

On June 16, staff participated in Berkeley's Juneteenth Festival. Staff provided information on water conservation, the watershed, and the Customer Assistance Program. Approximately 60,000 people attended.

On June 17, staff attended the Castro Valley Advisory Council General Purpose meeting to learn more about community issues.

On June 18, staff participated in the East Oakland Senior Center Community Fair. Staff provided information on the Customer Assistance Program payment plans, leak detection and water conservation. Approximately 25 people attended.

On June 21 and June 27, Director Gómez and staff met with neighbors of the Walnut Creek Water Treatment Plant (WCWTP) to discuss the Walnut Creek Water Treatment Plant Pretreatment Project (Project). The purpose of the meeting was to engage in further discussions on the Project and identified alternatives and ways to potentially improve Project implementation. Staff provided a presentation on all project alternatives, described upcoming opportunities for community input, and responded to the neighbors' questions and concerns, including construction work hours; the need for staging near the entrance to the WCWTP; noise; wildlife, traffic, and air quality during construction; operational traffic and chemical safety; seismic safety; wildfire; emergency evacuation; and the Bixler alternative site. Staff stated that Board consideration of the Final Environmental Impact Report and approval of the Project is scheduled for July 9. Approximately 30 people attended.

On June 22, staff participated in the Lamorinda Safety Fair at the Lafayette Reservoir. Staff provided information on EBMUD's fuel reduction and vegetation management program and the upcoming Lafayette Reservoir Tower Retrofit Project. Approximately 200 people attended.

On June 24, staff attended the McCormack-Williamson Tract – Phase B groundbreaking ceremony at the Cosumnes River Preserve Visitor Center in Walnut Grove. This project provides important tidal marsh rearing habitat for Mokelumne River juvenile salmonids and is part of the Voluntary Agreements for the Bay Delta.

On June 25, staff met with the City of San Leandro Public Works to coordinate construction activities. The two agencies shared information on current and upcoming work.

On June 26, the District hosted a Water Wednesday Webinar. The presentation highlighted recreation opportunities at Pardee and Camanche reservoirs. Approximately 40 people attended.

On June 26, staff met with The Unity Council and assisted with Customer Assistance Program enrollment in Oakland. Approximately 15 people attended.

On June 27, the District hosted the California Water Environment Association's Communications Workshop to share outreach techniques with project engineers at its Administration Building.

On June 29, staff participated in the Fire Light Tea Party at Cal Shakes Theater. The event was organized to bring wildland fire awareness to the community. Staff provided information on EBMUD's fuel break on the property and showcased EBMUD's fire engine. Approximately 125 people attended.

Media. The Orinda PV Solar Energy Project media event generated significant and continued coverage by local media (KTVU2, KRON4, KPIX5, KGO7, KNTV11, KCBA, KCBS radio, Patch, Lamorinda Weekly, Local News Matters, Danville San Ramon) and in water industry and solar trade journals (ACWA, Water and Finance Management Journal, Energy Central, Solar Industry Online, Solar Builder Online, List Solar, Solar Energy Decisions, JD Supra, Energy Jobline News, Renewables Now, World News Network, Solar Quarter, Renewable Energy Magazine).

EBMUD's water treatment process improvements were detailed along with neighbors' concerns about upcoming work at the Walnut Creek Water Treatment Plant (East Bay Times and KTVU2).

In other news, the District provided interviews regarding the closure of Pardee Recreation Area (KCRA-3 NBC Sacramento, KFBK radio); EBMUD was mentioned in an article about development in San Ramon (Diablo Online); an EBMUD pipeline replacement project on St. Mary's was noted (Patch); an altercation and a boating accident (Factiva, Press Democrat,

KVGC radio, Sierra Sun); a man charged with attempted murder at a Camanche Reservoir campground (Press Democrat) was covered; a story on Berkeley firefighting practice included the use of EBMUD hydrants (Patch); a story about John Garamendi securing funding for infrastructure projects included recycled water for EBMUD’s East Bayshore water recycling project (U.S. Political and Economic Organizations News); and an article about water affordability policies included EBMUD in a list of agencies who participated (Pacific Institute).

Social Media:

Nextdoor	H2-Oh Fun! Water Wednesday	14,363		

Staff conducted public outreach to neighbors and interested parties on the following projects:

- Briones Reservoir Soil Off Haul (Orinda)
- Happy Valley Pumping Plant and Pipeline Replacement (Orinda)
- Moraga Country Club HOA (Moraga)
- Orinda Water Treatment Plant Disinfection Improvements (Orinda)
- Ridgewood Road Pipeline Replacement and Facility Demo (Alamo)
- St. Mary’s Pipeline Replacement (Lafayette)
- Walnut Creek Water Treatment Plant Pretreatment (Walnut Creek)

Contract Equity

- **On June 13, staff participated in U.C. Berkeley’s Small Business Diversity Council Meeting.** Staff provided information on conducting business with the District and networked with other agencies comparing best practices. Approximately 30 people attended.
- **Between June 17-18, staff attended the Women Construction Owners & Executives’ Annual Conference in Napa.** Staff attended panels and workshops led by industry experts covering topics including succession planning, mentorship, technical assistance, and many other valuable subjects. Staff also promoted the upcoming EBMUD’s Small Business Resource Forum.
- **On June 24, the District hosted a Small Business Resource Forum at its Administration Building.** Staff panel discussions related to upcoming contracting opportunities with the District and other agencies, mentorship, access to creative financing, and lender relationships. Approximately 80 people attended.

- **On June 25, staff attended the Women’s Business Enterprise Council’s Ideation Conference the Berkeley.** The District received the “Top Corp” award for recognition of excellence in support of women in business enterprise. Approximately 150 people attended.

Contract Equity staff participated in the following customer events and outreach activities:

- June 11 – American Indian Chamber Board Expo Planning Meeting – 25 attendees
- June 20 – Quarterly Supplier Diversity Professionals Mixer – 40 attendees

Water Conservation

On June 1, at the District sponsored a Sheet Mulching Workshop with the City of Lafayette and Sustainable Contra Costa held in Lafayette. The workshop provided training to city staff and residents on the lawn conversion method. Staff provided information on District landscape rebates. Approximately 20 people attended.

On June 6, the District held an Irrigation Leak Detection Workshop in Walnut Creek. Attendees learned how to use a wire tracer, evaluate designed versus actual flow rates of an irrigation zone, and audit an irrigation zone. Approximately 20 people attended.

On June 7, staff participated in the virtual California Native Plant Society Landscaper Certification Program session. Staff provided information on District landscape rebates and water budget program. Approximately 30 people attended.

On June 12, staff participated in a virtual StopWaste meeting. Staff provided information on Assembly Bill 1572, which bans the irrigation of nonfunctional turf with potable water. Staff also shared information on District rebates and programs. Approximately 55 people attended.

On June 25, the District sponsored the California Native Plant Society Landscaper Certification Program’s maintenance training program in Walnut Creek. Staff provided information on rebates and efficient irrigation. Approximately 30 people attended.

On June 25, staff participated in the Richmond City Council meeting. The District presented a proclamation to the City of Richmond Landscaping and Gardening Division and to the U.C. Berkeley Master Gardeners of Contra Costa County to recognize their work in restoring the demonstration gardens on the Richmond Civic Center Plaza. Approximately 85 people attended.

On June 25, staff presented at the virtual Alliance for Water Efficiency’s Water Efficiency Research Committeemeeting. The presentation highlighted a summary of ongoing research regarding water conservation opportunities for customers with commercial cooling towers in the District. Approximately 80 people attended.

WORKFORCE PLANNING AND DEVELOPMENT

In June, the District developed RSP 6000 – Workplace Violence Prevention Plan. Effective July 1, 2024, the California Labor Code requires California employers to maintain a Workplace Violence Prevention Plan. The District developed RSP 6000 to ensure a clear process for reporting concerns and incidents, investigating and mitigating hazards, maintaining a workplace violence incident log, and compulsory annual training for all staff.

Staff participated in events/activities that support the District’s long-term efforts to develop a diverse pipeline of candidates for future workforce needs and expand collaborative relationships with local partner organizations:

- **In June, the District launched the High School Summer Internship Program.** Twenty-nine students will be preparing work-based learning projects in a variety of fields over the next six weeks, including administration, communications, engineering and trades. They will participate in weekly enrichment sessions and complete assignments such as mock interviews with staff.

Hires/Rehires	20	202
Other Separations	5	92

FINANCIAL STABILITY

Capital Budget Transfers. In June 2024, there were two capital transfers for a total of \$1.5 million. There were no transfers greater than \$2.5 million.

Through June 30, 2024, there have been 16 capital transfers for a total of \$58.7 million in the Water System and \$6.5 million in the Wastewater System.

On June 13, staff attended State Water Resources Control Board’s virtual Water Rights Fees Stakeholder meeting. The purpose of the meeting was to discuss proposed changes to certain water rights fees and fee structure to cover the estimated 11 percent shortfall in the proposed budget. The annual water rights fees that EBMUD pays every year were not discussed.

Another stakeholder meeting is scheduled for August to discuss changes resulting from the adoption of the State Budget.

An amendment to the agreement with Aetypic, Inc. originally authorized under Board Motion No. 187-20, will be requested to increase the agreement amount by \$120,312 to a total amount not to exceed \$663,301 and extend the agreement by five months. The original agreement amount was \$428,157. A first amendment was authorized by the Board in April 2023 to add \$114,832 to a total not to exceed \$542,989. The Main Wastewater Treatment Plant Operations Center Project will address long-term replacement of capital equipment; improve worker efficiency, cost, and time savings by reducing maintenance costs; and improve worker safety and workspaces. An amendment is needed to provide additional engineering services during construction for an extended construction period and to provide design services for a replacement heating, ventilation, and air conditioning system serving the first-floor conference room. The Board will be asked to consider approval at its August 13, 2024 meeting.

The estimated earned revenue from the Main Wastewater Treatment Plant Power Generation Station’s surplus power sales for May is \$83,954. The District sold renewable power and related Renewable Energy Credits (RECs) to the Port of Oakland. The sale of RECs generated \$21,104 from the Port of Oakland. Earned revenue for FY24 is estimated at \$628,010 or 157% percent of the total FY24 budget of \$400,000.

The estimated earned revenue from Mokelumne power sales for June is \$1,635,000. The District sold renewable power and related Renewable Energy Credits (RECs) to Marin Clean Energy (MCE). Sales of RECs generated \$108,245 from MCE. Resource Adequacy capacity sales to NRG Business Marketing LLC and Ava Community Energy earned \$1,008,000 and \$4,950, respectively. Earned revenue to date through June is estimated at \$15,815,000 or 198 percent of the FY 2024 budgeted revenue of \$8 million.

There were no material, supply, or construction contracts from \$80,001 to \$100,000 and two general and professional service agreements from \$30,001 up to \$80,000 approved by the General Manager in June 2024.

VENDOR NAME	DATE AWARDED	CEP STATUS	ITEM (S) PURCHASED	PROJECT	CONTRACT TERM	VALUE
San Francisco Media Group, LLC	6/14/24	White Women	Amendment to increase existing agreement by \$11,210 under Purchase Order No. EBM213211 for video production services for the Office of Diversity, Equity, and Culture Division for the “Inclusion at EBMUD” initiative.	N/A	N/A	\$41,210
Stop Global Yawning, Inc. dba WHM Creative	6/20/24	White Women	Digital advertising services, including media buys and digital media planning to support the District’s Workforce Planning and Development Strategic Plan goal.	N/A	N/A	\$79,000

Water Sales (Billed Consumption)

The following consumption information is the average billed water consumption in millions of gallons per day (MGD) for the first 11 months of FY 2024.¹ Budgeted average daily water consumption for FY 2024 is 139.7 MGD, and summer month consumption is generally higher due to outdoor watering. The table below shows the average billed water consumption information by customer class with a comparison to FY 2023 data for the same period of time.

Fiscal Year-to-Date Billed Water Consumption			
Usage Type	FY 2024 (MGD)	FY 2023 (MGD)	Year-over-Year (% change)
Residential	66.3	65.2	1.7%
Commercial	44.6	43.6	2.3%
Industrial	18.5	18.1	2.2%
Public Authority	6.0	6.0	0.0%
Total Billed Water Consumption	135.4	132.9	1.9%

¹ Billed consumption is the amount of potable and non-potable water use for which EBMUD billed customers during the month and not actual customer usage within that month. During any month, roughly half of all EBMUD customers are billed for the prior two months of consumption. For example, a customer bill sent in early August would generally contain charges for water consumed in June and July.

Source: Customer Information System

Water Sales (Expected Revenue)

FY 2024 water revenues billed through the end of May were \$607.9 million or 6.6% more than the FY 2023 revenue for the same period of \$570.3 million.² This increase in water revenues is a result of higher consumption for the 11-month period, year-over-year, and an 8.5% rate increase (effective July 1), partially offset by the removal of drought surcharges prior to the start of FY 2024. FY 2024 water revenues through May are \$2.9 million less (or 0.5% less) than the budgeted water revenue of \$610.8 million due to lower-than-projected consumption.

Source: Customer Information System

² Water sales includes potable and non-potable water sales. FY 2023 water sales shown in this report include drought revenue (\$20.2M through May 2023).

EAST BAY MUNICIPAL UTILITY DISTRICT

DATE: July 5, 2024

MEMO TO: Board of Directors

THROUGH: Clifford C. Chan, General Manager *CCC*

FROM: Rischa S. Cole, Secretary of the District *RC*

SUBJECT: Planning Committee Minutes – June 11, 2024

Chair Marguerite Young called to order the Planning Committee meeting at 9:02 a.m. in the Administration Building Boardroom. Directors April Chan (remote) and Doug A. Linney were present at roll call. Staff participants included General Manager Clifford C. Chan, General Counsel Derek T. McDonald, Director of Wastewater Amit K. Mutsuddy, Director of Engineering and Construction Olujimi O. Yoloye, Supervising Wastewater Control Representative Adam P. Kern, Associate Civil Engineer Chien Wang, and Secretary of the District Rischa S. Cole.

Public Comment. None.

Presentations/Documentation. 1) Presentation entitled, “Wastewater Control Ordinance,” dated June 11, 2024; and 2) Presentation entitled, “Walnut Creek Water Treatment Plant Pretreatment Project Project Update and Final EIR,” dated June 11, 2024.

Wastewater Control Ordinance Changes. Supervising Wastewater Control Representative Adam P. Kern presented proposed changes to the ordinance, which was last amended in 2013, and provides authority for the District to operate its Pretreatment Program as required by federal regulations and the National Pollutant Discharge Elimination System (NPDES) permit for the Main Wastewater Treatment Plant (MWWTP). The ordinance includes prohibitions on the discharge of wastewater, permit terms and requirements, administrative authority, enforcement procedures and penalties, and terms related specifically to trucked-in wastes as part of the Resource Recovery Program. The District established limits for certain constituents for wastewater discharges to the community sewer to ensure regulatory compliance and protect MWWTP processes. The MWWTP NPDES permit requires that these limits be evaluated every five years. A local limits study was completed in 2023 and staff proposes modifications to limits for volatile organics as well as oil and grease. The District did not receive any objections to the proposed changes to the local limits during the federally required public comment period. Staff also recommends additional changes to the ordinance to improve clarity, update terminology, and control introduction of non-wastewater materials. On March 28, 2024, the San Francisco Regional Water Quality Control Board (Regional Board) approved the proposed changes and advised the District to proceed with modifying the ordinance. These changes will help the District control pollutants at their source to protect treatment staff, maintain treatment processes, and prevent contaminants from being discharged to the San Francisco Bay. They will also ensure compliance with federal pretreatment requirements and maintain effective ordinance enforcement. Staff will incorporate Committee feedback and conduct a first reading of the amended ordinance at the July 9, 2024 Board meeting, and a second reading thereafter. Once adopted, staff will notify the Regional Board and incorporate the changes to the local limits into all existing and new wastewater discharge permits. The changes will also be deemed

incorporated into the MWWTP NPDES permit. It was moved by Director Chan, seconded by Director Linney, and carried (3-0) by roll call vote to accept the report.

Walnut Creek Water Treatment Plant (WCWTP) Pretreatment Project Update and Final Environmental Impact Report (EIR).

Associate Civil Engineer Chien Wang provided the presentation. If approved, the project will add pretreatment and ozone facilities at the WCWTP to reliably treat a broader range of untreated water quality from various sources, increase the capacity to meet planned future demands, improve water system reliability and operational flexibility, and allow decommissioning of the aging Lafayette WTP. Ms. Wang reviewed the project's purpose and need; emergency raw water treatment needs; project briefings and staff reports to the Board; renderings of the current and proposed facilities; rerouting of the social footpaths near the site; staging areas; and work at the Lafayette WTP to be completed during the first phase of the project. A Draft EIR was completed and circulated for a 45-day public review period from September 29 to November 13, 2023. The Draft EIR analysis identified potential impacts from construction noise that are significant and unavoidable and require the District to approve a Statement of Overriding Considerations when approving the project. The remaining potential impacts are either less than significant or would be less than significant with mitigation. The District conducted extensive public outreach with neighbors, stakeholders and local entities between 2021 and 2023. All comments received as well as issues and concerns raised are addressed in the Final EIR. She reviewed key mitigation measures to address noise and transportation, revisions to the Draft EIR to address comments and concerns from stakeholders, traffic during operation and maintenance at the WCWTP, and how staff plans to address noise impacts from early morning concrete truck activity. The District considered various alternatives including adding pretreatment at the Bixler Chlorination Facility near Brentwood in Contra Costa County and at Camanche Reservoir near Clements in San Joaquin County. Ms. Wang discussed the Bixler alternative, which is preferred by neighbors of the WCWTP, and explained why this is not a feasible alternative. Staff is asking the Committee to recommend the project and Final EIR for Board approval at its meeting in the afternoon. If approved, project design will occur from 2024 through 2026, followed by Phase 1 construction from 2027 through approximately 2030. Phase 2 design and construction would depend on future untreated water quality conditions and the timing of future demands. Ms. Chien addressed Committee questions regarding the project alternatives; monitoring and mitigations for noise; vehicle traffic data; comments from WCWTP neighbors regarding truck traffic and trucks safely navigating Larkey Lane; and ensuring the District communicates with neighbors and stakeholders throughout the project. Addressing the Committee was Eric Larsen, President, AFSCME Local 444, who commented on rising project costs, and recommended the District evaluate cost increases at each project milestone to determine how they would be paid in the long term. There was additional discussion by the Committee and Director Linney commented he would reserve his decision to recommend the project and Final EIR for approval during the Board meeting this afternoon. It was moved by Director Linney, seconded by Director Chan, and carried (3-0) by roll call vote to accept the report.

Adjournment. Chair Young adjourned the meeting at 10:03 a.m.

CCC:RSC

EAST BAY MUNICIPAL UTILITY DISTRICT

DATE: July 5, 2024

MEMO TO: Board of Directors

THROUGH: Clifford C. Chan, General Manager 

FROM: Rischa S. Cole, Secretary of the District 

SUBJECT: Legislative/Human Resources Committee Minutes – June 11, 2024

Director Lesa R. McIntosh called to order the Legislative/Human Resources Committee meeting at 10:10 a.m. in the Administration Building Boardroom. Director Luz Gómez was present at roll call. Chair William B. Patterson was absent (excused). Staff participants included General Manager Clifford C. Chan, General Counsel Derek T. McDonald, Manager of Legislative Affairs Kathy Viatella, and Secretary of the District Rischa S. Cole.

Public Comment. Addressing the Committee was Ivette Rivera who commented on Board members leaving the District and the draft Board of Directors Governance Policies.

Presentations/Documentation. 1) Presentation entitled, “Board Governance Policies,” dated June 11, 2024.

Legislative Update. Manager of Legislative Affairs Kathy Viatella reviewed Legislative Report No. 04-24. Staff is requesting Board approval to sponsor or support a proposal to pursue minor changes to Municipal Utility District (MUD) Act section 12823 through a sponsored bill, committee bill, or other vehicle. MUD Act section 12823 currently contains a 12-month limitation on payment plan extensions for certain customers who are late on their utility bill payments and who request flexibility from EBMUD to pay off their debt. EBMUD is seeking statutory changes to have greater flexibility in determining the length of a payment plan and the ability to go beyond the 12-month limitation contained in the MUD Act, should a customer have an undue hardship. The proposed changes to the MUD Act would align with existing law contained in the Water Shutoff Protection Act, enacted by SB 998 (Dodd), which applies to covered water systems and grants a longer repayment period if a customer is experiencing undue hardship and based on the individual circumstances of the customer’s case. MUD Act section 12823 has not been amended since 1985. Staff is working to identify a legislative vehicle to advance the proposal this year. Ms. Viatella, General Manager Clifford C. Chan, and Director of Customer and Community Services Andrew L. Lee addressed Committee questions on whether the proposed revisions would apply to other municipal utility districts and confirmed the MUD Act limits the amount of interest that can accrue on past due bills. It was moved by Director Gómez, seconded by Director McIntosh, and carried (2-0) to support the staff recommendation. Chair Patterson was absent (excused).

Draft Board of Directors Governance Policies. General Counsel Derek T. McDonald provided the presentation. At the November 3, 2023 Board Retreat, the Board discussed the need for Governance Policies to serve as guiding documents for the role of the Board and the conduct of its affairs. The General Counsel, General Manager, and Secretary of the District collaborated to draft ten policies

based on existing Board practices as captured in various resolutions and other District documents, as well as a review of the governance policies of numerous other California local government entities. Mr. McDonald highlighted ten draft policies that cover: Role of the Board of Directors; Board Member Code of Conduct; Board Meetings; Election of Board Officers and Committee Assignments; Board Member Orientation and Training; Role of Board Committees; Ethics of the Board of Directors; Protection of Whistleblowers; Board Member Compensation and Benefits; and Reimbursement of Director Expenses. The Committee members present commented on the need for the full Board to review and provide feedback and asked staff to provide paper and editable electronic copies of the draft policies to all Board members. General Manager Clifford C. Chan confirmed edits and comments from the Board should be submitted to staff by June 28. Staff will update the draft policies based on edits and comments received and present the updated drafts for discussion at the July 11 Board meeting. Addressing the Committee was Ivette Rivera who thanked Director McIntosh for recognizing the need for full Board review and commented on language in some of the policies.

Adjournment. Director McIntosh adjourned the meeting at 10:39 a.m.

CCC/RSC
