☒ Lead Agency is Public Agency Approving Project
☒ Lead Agency is Carrying Out Project

PROJECT INFORMATION

1. **TITLE:** Camanche South Shore WTP Potable Water Tank Replacement
2. **LOCATION:** (City, County, and specific location)
 Camanche South Shore Recreation Area, Wallace, CA 95254, coordinates: 38.22141, -120.92845
3. **DESCRIPTION:** The project will replace existing 245,000-gallon potable water storage tank with a new potable water storage tank of same capacity.

EXEMPTION FINDING (Check one)

This project is exempt from CEQA because:

1. ☐ Activity is not a project
2. ☐ Activity is Ministerial (Sec.21080(b)(1); Guideline 15268)
3. ☐ Activity is a Declared Emergency (Sec.21080(b)(3); Guideline 15269(a))
4. ☐ Activity is an Emergency Project (Sec.21080(b)(4); Guideline 15269(b)(c))
5. ☒ Activity is Categorically Exempt Under Guideline 15301, 15302 and 15304
6. ☐ Activity is Statutorily Exempt Under Section _____
7. ☒ **Reasons why project is exempt:** Project is exempt under Sections 15301, 15302 and 15304 as the scope of work includes maintenance of existing facility, replacement of an existing structure, and minor alteration to land. Project will have no significant environmental impacts relative to Locations, Cumulative Impact, Scenic Highways, Significant Effect due to unusual circumstances, Hazardous Waste or Historical Resources as pursuant to Section 15300.2 of the CEQA Guidelines.

Attachment A
Camanche South Shore Water Treatment Plant Potable Water Tank Replacement Project

Overview and Background

The project will replace one of the two established 245,000-gallon potable water storage tanks at the Camanche South Shore Water Treatment Plant. The purpose of project is to remove the existing tank as it has reached its end of use, with the new tank ensuring reliable potable water storage for the East Bay Municipal Utility District (EBMUD) owned Camanche South Shore (CASS) Recreation Area, located in Calaveras County (see Figure 1a).

Project Purpose and Objectives

The existing tank has reached its end of use, with flaking of interior coating, in addition to areas of rusting and leaks. Failure of the tank would result in environmental impacts, in addition to loss of potable water storage capacity for the CASS Recreation Area.

Project Location

The project site is located on an established gravel road near the CASS Water Treatment Plant, within the CASS Recreation Area (see Figure 1b).

Project Characteristics

The new tank will retain the 245,000 gallons storage capacity, in addition to conforming with the American Water Works Association requirements for potable water storage. The project complies with applicable California Building Codes and California Code of Regulations Title 8.

Tank features include a 3-foot x 3-foot aluminum roof hatch, with a latch that can be padlocked, an exterior galvanized stairway, plus a galvanized safety railings around the top perimeter. The project also includes the installation of cathodic protection and interior forced air ventilation system.

Existing instrumentation and respective electronics will be reinstalled once the new tank is in place.

The project includes installation of a new foundation that meets current code for the anchoring of the new tank.

Permits

All work will be on EBMUD property, so no encroachment permits are necessary. Regulatory environmental permits are not required as there are no impacts to jurisdictional waters.

Schedule

Work is anticipated to start in late August 2026. The project is expected to be completed within seven months, dependent on the retained contractor's schedule. Work hours will be limited to weekdays with standard business hours of 7:00 a.m. to 3:00 p.m.

Camanche South Shore Water Treatment Plant Potable Water Tank Replacement Project

EBMUD Practices and Procedures

Standard construction environmental and safety practices applicable to all EBMUD construction projects have been incorporated into the project and will be implemented accordingly. A preconstruction survey will be conducted by a qualified EBMUD Biologist prior to start-up of work to ensure there are no impacts to sensitive species or habitat.
