

In the opinion of Stradling Yocca Carlson & Rauth LLP, Bond Counsel, under existing statutes, regulations, rulings and judicial decisions, and assuming the accuracy of certain representations and compliance with certain covenants and requirements described in this Official Statement, interest (and original issue discount) on the Series 2026 Bonds is excluded from gross income for federal income tax purposes and is not an item of tax preference for purposes of calculating the federal alternative minimum tax imposed on individuals. In the further opinion of Bond Counsel, interest (and original issue discount) on the Series 2026 Bonds is exempt from State of California personal income tax. See “TAX MATTERS” with respect to certain tax consequences relating to the Series 2026 Bonds, including with respect to the alternative minimum tax imposed on certain large corporations.

Refunding Bonds, Series 2026B**

Dated: Date of Delivery

Due: June 1, as shown on inside cover pages

This cover page contains certain information for general reference only. It is not intended to be a summary of the security or terms of this issue. Investors are advised to read the entire Official Statement to obtain information essential to the making of an informed investment decision. Capitalized terms used on this cover page and not otherwise defined shall have the meanings set forth herein.

The East Bay Municipal Utility District (the “District”) is issuing its Wastewater System Revenue Bonds, Series 2026A (Green Bonds) and its Wastewater System Revenue Refunding Bonds, Series 2026B (collectively, the “Series 2026 Bonds”) pursuant to a Wastewater System Revenue Bond Indenture, dated as of April 1, 1990, by and between the District and U.S. Bank Trust Company, National Association, as trustee (the “Trustee”), as amended, restated and supplemented, including by the Twenty-Fourth Supplemental Indenture relating to the Series 2026A Bonds, and the Twenty-Fifth Supplemental Indenture relating to the Series 2026B Bonds, each dated as of May 1, 2026, and each by and between the District and the Trustee (as so amended, restated and supplemented, the “Indenture”).

The Series 2026 Bonds will be issued in fully-registered form, without coupons, initially registered in the name of Cede & Co., as nominee of The Depository Trust Company, New York, New York (“DTC”). DTC will act as securities depository for the Series 2026 Bonds. Beneficial ownership interests in the Series 2026 Bonds of each Series may be purchased in book-entry form only in denominations of \$5,000 principal amount or any integral multiple thereof. Interest on the Series 2026 Bonds is payable semiannually on June 1 and December 1 of each year, commencing on December 1, 2026. Principal is payable on June 1 of the years set forth on the inside front cover pages. The principal or redemption price of, and interest on, the Series 2026 Bonds are payable by the Trustee to DTC, which is obligated in turn to remit such principal or redemption price and interest to the DTC participants for subsequent disbursement to the beneficial owners of the Series 2026 Bonds. See APPENDIX E – “DTC AND THE BOOK-ENTRY ONLY SYSTEM.”

The Series 2026 Bonds are subject to redemption prior to maturity as more fully described herein. See “THE SERIES 2026 BONDS – Redemption.”

The Series 2026 Bonds are being issued for the purpose of providing moneys to (i) finance and/or reimburse the District for certain costs of improvements to the Wastewater System of the District, (ii) together with certain other available funds, refund all of certain Series of the District’s outstanding Wastewater System Revenue Bonds, and (iii) pay costs of issuance of the Series 2026 Bonds, as described herein. See “PLAN OF FINANCE.”

The Series 2026 Bonds are special limited obligations of the District, payable solely from and secured by a pledge of Adjusted Net Wastewater Revenues as more fully described herein. Adjusted Net Wastewater Revenues generally consist of the District’s Wastewater Revenues (adjusted for deposits to and withdrawals from the Rate Stabilization Fund) remaining after the payment of all Wastewater Operation and Maintenance Costs. The Series 2026 Bonds are being issued on parity with the District’s Wastewater System Revenue Bonds and Parity Debt heretofore or hereafter incurred, as more fully described herein. The District also operates a Water System. The Series 2026 Bonds are not payable from or secured by the revenues of the Water System of the District. **Neither the full faith and credit nor the taxing power of the District is pledged to the payment of the Series 2026 Bonds or the interest thereon.**

Purchasers of the Series 2026 Bonds will be deemed to have consented to certain amendments to the Indenture. See “AMENDMENTS TO THE INDENTURE TO TAKE EFFECT IN THE FUTURE.”

The Series 2026 Bonds are offered when, as and if issued, subject to the approval of validity by Stradling Yocca Carlson & Rauth LLP, Bond Counsel, and certain other conditions. Certain legal matters will be passed upon for the District by its General Counsel and by Stradling Yocca Carlson & Rauth LLP, as Disclosure Counsel, and for the Underwriters by Kutak Rock LLP. Montague DeRose and Associates, LLC is serving as municipal advisor to the District in connection with the Series 2026 Bonds. It is anticipated that the Series 2026 Bonds will be available for delivery through the facilities of DTC in New York, New York by Fast Automated Securities Transfer (FAST) on or about May 20, 2026.

No dealer, broker, salesperson or other person has been authorized by the District to give any information or to make any representation other than as set forth herein and, if given or made, such other information or representation must not be relied upon as having been authorized by the District. This Official Statement does not constitute an offer to sell or the solicitation of an offer to buy, nor shall there be any sale of the Series 2026 Bonds by a person in any jurisdiction in which it is unlawful for such person to make such an offer, solicitation or sale. This Official Statement is not to be construed as a contract with the purchasers of the Series 2026 Bonds.

The information set forth in this Official Statement has been furnished by the District and obtained from official sources and other sources which are believed to be reliable. Statements contained in this Official Statement which involve estimates, forecasts or matters of opinion, whether or not expressly so described herein, are intended solely as such and are not to be construed as representations of facts. The information and expressions of opinion herein are subject to change without notice, and neither the delivery of this Official Statement nor any sale made hereunder shall under any circumstances create any implication that there has been no change in the affairs of the District since the date hereof.

The Underwriters have provided the following sentence for inclusion in this Official Statement:

The Underwriters have reviewed the information in this Official Statement in accordance with, and as part of, their responsibilities to investors under the federal securities laws as applied to the facts and circumstances of this transaction, but the Underwriters do not guarantee the accuracy or completeness of such information.

This Official Statement, including any supplement or amendment hereto, is intended to be deposited with the Municipal Securities Rulemaking Board through the Electronic Municipal Market Access (EMMA) website. The District also maintains a website and certain social media accounts. However, the information presented therein is not part of this Official Statement and must not be relied upon in making an investment decision with respect to the Series 2026 Bonds.

IN CONNECTION WITH THIS OFFERING, THE UNDERWRITERS MAY OVERALLOT OR EFFECT TRANSACTIONS WHICH STABILIZE OR MAINTAIN THE MARKET PRICE OF THE SERIES 2026 BONDS AT LEVELS ABOVE THOSE WHICH MIGHT OTHERWISE PREVAIL IN THE OPEN MARKET. SUCH STABILIZING, IF COMMENCED, MAY BE DISCONTINUED AT ANY TIME.

FORWARD-LOOKING STATEMENTS

CERTAIN STATEMENTS CONTAINED IN THIS OFFICIAL STATEMENT REFLECT NOT HISTORICAL FACTS BUT FORECASTS AND “FORWARD-LOOKING STATEMENTS.” NO ASSURANCE CAN BE GIVEN THAT THE FUTURE RESULTS DISCUSSED HEREIN WILL BE ACHIEVED, AND ACTUAL RESULTS MAY DIFFER MATERIALLY FROM THE FORECASTS DESCRIBED HEREIN. IN THIS RESPECT, THE WORDS “ESTIMATE,” “PROJECT,” “ANTICIPATE,” “EXPECT,” “INTEND,” “BELIEVE” AND SIMILAR EXPRESSIONS ARE INTENDED TO IDENTIFY FORWARD-LOOKING STATEMENTS. ALL PROJECTIONS, FORECASTS, ASSUMPTIONS, EXPRESSIONS OF OPINIONS, ESTIMATES AND OTHER FORWARD-LOOKING STATEMENTS ARE EXPRESSLY QUALIFIED IN THEIR ENTIRETY BY THE CAUTIONARY STATEMENTS SET FORTH IN THIS OFFICIAL STATEMENT.

INTRODUCTION

This Introduction is not a summary of this Official Statement, and is qualified by more complete and detailed information contained elsewhere in the Official Statement. A full review should be made of the entire Official Statement, including the cover page and attached appendices. The offering of Series 2026 Bonds to potential investors is made only by means of the entire Official Statement. Certain definitions of capitalized terms used and not defined herein are set forth in APPENDIX C – “SUMMARY OF CERTAIN PROVISIONS OF THE INDENTURE.”

Purpose

The purpose of this Official Statement, which includes the cover page and appendices hereto, is to set forth certain information concerning the East Bay Municipal Utility District (the “District”), the wastewater interception, treatment and disposal system owned by the District (the “Wastewater System” or the “System”), and System finances, in connection with the sale of the District’s \$37,010,000 Wastewater System Revenue Bonds, Series 2026A (Green Bonds) (the “Series 2026A Bonds”) and its \$130,980,000 Wastewater System Revenue Refunding Bonds, Series 2026B (the “Series 2026B Bonds,” and together with the Series 2026A Bonds, the “Series 2026 Bonds”). The Series 2026 Bonds are being issued pursuant to the Wastewater System Revenue Bond Indenture, dated as of April 1, 1990, by and between the District and U.S. Bank Trust Company, National Association, as trustee (the “Trustee”), as amended and restated pursuant to the Twenty-First Supplemental Indenture, dated as of March 1, 2024 (the “Wastewater System Revenue Bond Indenture”), and as otherwise supplemented and amended, including by the Twenty-Fourth Supplemental Indenture, dated as of May 1, 2026, by and between the District and the Trustee, relating to the Series 2026A Bonds, and the Twenty-Fifth Supplemental Indenture, dated as of May 1, 2026, by and between the District and the Trustee, relating to the Series 2026B Bonds (the Wastewater System Revenue Bond Indenture as so amended, restated and supplemented, the “Indenture”). See also “AMENDMENTS TO THE INDENTURE TO TAKE EFFECT IN THE FUTURE.”

The Series 2026 Bonds are being issued for the purpose of providing moneys to (i) finance and/or reimburse the District for certain costs of improvements to the Wastewater System of the District, (ii) together with certain other available funds, refund all of certain Series of the District’s outstanding Wastewater System revenue bonds, and (iii) pay costs of issuance in connection with the Series 2026 Bonds. See “ESTIMATED SOURCES AND USES OF FUNDS” and “PLAN OF FINANCE.” See also APPENDIX A – “THE EAST BAY MUNICIPAL UTILITY DISTRICT (THE WASTEWATER SYSTEM) – THE WASTEWATER SYSTEM – Capital Improvement Program.”

The District

The District is a municipal utility district, created in 1923 by vote of the electorate in portions of Alameda and Contra Costa Counties in the State of California (the “State”). The District is formed under the authority of the Municipal Utility District Act, constituting Division 6 of the Public Utilities Code of the State, commencing with Section 11501 (the “Municipal Utility District Act”). Pursuant to the Municipal Utility District Act, the District is empowered to own and operate the Wastewater System. See APPENDIX A – “THE EAST BAY MUNICIPAL UTILITY DISTRICT (THE WASTEWATER SYSTEM).” The District also operates a water system (the “Water System”).

The Series 2026 Bonds are not payable from or secured by the revenues of the Water System of the District.

Security for the Series 2026 Bonds

The Series 2026 Bonds are special limited obligations of the District, payable solely from and secured by a pledge of the Adjusted Net Wastewater Revenues of the District, as defined in the Indenture. Adjusted Net Wastewater Revenues generally consist of the District’s Wastewater Revenues (adjusted for deposits to and withdrawals from the Rate Stabilization Fund) remaining after the payment of all Wastewater Operation and Maintenance Costs. All Outstanding Wastewater System revenue bonds issued under the Indenture, together with any additional Wastewater System revenue bonds hereafter issued under the Indenture, are secured on parity by Adjusted Net Wastewater Revenues and are collectively referred to herein as the “Wastewater System Revenue Bonds.” See “SECURITY FOR THE SERIES 2026 BONDS – Pledge of Adjusted Net Wastewater Revenues.”

The Series 2026 Bonds are secured on a parity with the District’s other Wastewater System Revenue Bonds to be Outstanding upon the delivery thereof, together with any additional Wastewater System Revenue Bonds hereafter issued and with any other Parity Debt heretofore or hereafter incurred in accordance with the Indenture. See “SECURITY FOR THE SERIES 2026 BONDS – Outstanding Wastewater System Revenue Obligations,” and “– Issuance of Additional Wastewater System Revenue Bonds and Parity Debt; Junior and Subordinate Obligations.” As of March 1, 2026, the District had Outstanding \$356,140,000 aggregate principal amount of Wastewater System Revenue Bonds. A portion of the Outstanding Wastewater System Revenue Bonds in the aggregate principal amount of \$150,000,000 are being refunded in connection with the issuance of the Series 2026 Bonds. See APPENDIX A – “THE EAST BAY MUNICIPAL UTILITY DISTRICT (THE WASTEWATER SYSTEM) – WASTEWATER SYSTEM FINANCES – Outstanding Debt.” See also “PLAN OF FINANCE.”

NEITHER THE FULL FAITH AND CREDIT NOR THE TAXING POWER OF THE DISTRICT IS PLEDGED TO THE PAYMENT OF THE SERIES 2026 BONDS OR THE INTEREST THEREON.

Rate Covenant

The District covenants under the Indenture that it will at all times, while any of the Wastewater System Revenue Bonds (including the Series 2026 Bonds) remain Outstanding, fix, prescribe and collect rates, fees and charges in connection with the services and facilities furnished by the Wastewater System so as to yield Wastewater Revenues in each Fiscal Year sufficient so that the Adjusted Net Wastewater Revenues for such year shall be at least equal to 1.1 times the amount of Debt Service on all Wastewater System Revenue Bonds and Parity Debt for such Fiscal Year. See APPENDIX C – “SUMMARY OF

CERTAIN PROVISIONS OF THE INDENTURE – Covenants.” See also “CONSTITUTIONAL AND STATUTORY LIMITATIONS ON TAXES AND APPROPRIATIONS AND FEES AND CHARGES.”

Continuing Disclosure

Pursuant to a Continuing Disclosure Agreement, dated the date of delivery of the Series 2026 Bonds, by and between the District and Digital Assurance Certification, LLC, as dissemination agent (the “Dissemination Agent”), the District will covenant and agree for the benefit of the holders and beneficial owners of the Series 2026 Bonds to provide certain financial information and operating data relating to the District and the Wastewater System by not later than December 31 of each year in which the Series 2026 Bonds are outstanding (or if the District’s fiscal year changes, by no later than six months after the end of such Fiscal Year) (the “Annual Report”), commencing with the Annual Report for Fiscal Year 2025-26, and to provide notices of the occurrence of certain specified events. The Annual Report and the notices of specified events will be filed by the Dissemination Agent on behalf of the District with the Municipal Securities Rulemaking Board through the Electronic Municipal Market Access system (“EMMA”). See “CONTINUING DISCLOSURE.” These covenants have been made in order to assist the Underwriters in complying with Securities and Exchange Commission Rule 15c2-12(b)(5). See also APPENDIX F – “FORM OF CONTINUING DISCLOSURE AGREEMENT.”

As of the date hereof, the District is in compliance in all material respects with its continuing disclosure undertakings for the last five years. Filings through EMMA are linked to a particular issue of obligations by CUSIP number (which is subject to change after the issuance of obligations as a result of various subsequent actions). The District uses its best efforts to confirm that each report filed through EMMA is linked to all the correct 9-digit CUSIP numbers. However, as a technical matter, it has come to the District’s attention that certain filings during the past five years, when made, were not appropriately linked to all applicable CUSIP numbers. The District has since caused the applicable filings to be linked to the additional CUSIPs.

Professionals Involved in the Issue

U.S. Bank Trust Company, National Association serves as Trustee under the Indenture. Certain legal matters incident to the authorization, issuance and sale of the Series 2026 Bonds are subject to the approval of Stradling Yocca Carlson & Rauth LLP, Newport Beach, California, Bond Counsel. Certain legal matters will be passed upon for the District by its General Counsel and by Stradling Yocca Carlson & Rauth LLP, as Disclosure Counsel, and for the Underwriters by Kutak Rock LLP, Irvine, California, Underwriters’ Counsel. Montague DeRose and Associates, LLC, Walnut Creek, California, is serving as municipal advisor to the District in connection with the issuance of the Series 2026 Bonds.

Summaries Not Definitive

The summaries and references to all documents, statutes, reports and other instruments referred to herein do not purport to be complete, comprehensive or definitive, and each such summary or reference is qualified in its entirety by reference to each such document, statute, report or instrument. The capitalization of any word not conventionally capitalized or otherwise defined herein indicates that such word is defined in the Indenture and, as used herein, has the meaning given to it in the Indenture. Unless otherwise indicated, all financial and statistical information herein has been provided by the District.

All references to and summaries of the Indenture and all documents, statutes, reports and other instruments referred to herein are qualified in their entirety by reference to the full Indenture and each such document, statute, report or instrument, respectively, copies of which are available for inspection at the offices of the District in Oakland, California, and will be available from the Trustee upon request and

payment of duplication costs. Forward-looking statements in this Official Statement are subject to risks and uncertainties. Actual results may vary from forecasts or projections contained herein if events and circumstances do not occur as projected, and such variances may be material.

Additional Information

The District regularly prepares a variety of publicly available reports, including audits, budgets and related documents. Any Series 2026 Bondholder may obtain a copy of any such report, as available, from the Trustee or the District. Additional information regarding this Official Statement may be obtained by contacting the Trustee or Sophia D. Skoda, Director of Finance, East Bay Municipal Utility District, 375 Eleventh Street, Oakland, California 94607-4240, (866) 403-2683.

THE DISTRICT

The District is a municipal utility district, created in 1923 by vote of the electorate in portions of Alameda and Contra Costa Counties in the State of California. The District is formed under the authority of the Municipal Utility District Act. Under the Municipal Utility District Act, municipal utility districts are empowered to acquire, construct, own, operate or control works for supplying the district and public agencies in the district with light, water, power, heat, transportation, telephone service or other means of communications, means for the collection, treatment or disposition of garbage, sewage or refuse matter, and public recreation facilities appurtenant to its reservoirs and may do all things necessary and convenient to the full exercise of powers granted in the Municipal Utility District Act. The District presently exercises only those functions relating to water supply, power generation and recreational facilities through its Water System, and, within an area known as Special District No. 1, sewerage and wastewater interception, treatment and disposal, and power generation through its Wastewater System. Special District No. 1 covers only a portion of the service area of the District. The District presently does not intend to exercise other functions. Such other functions and the related facilities, if exercised, would not constitute part of the Water System or the Wastewater System.

For information on the District, the Wastewater System and its finances and operations, see APPENDIX A – “THE EAST BAY MUNICIPAL UTILITY DISTRICT (THE WASTEWATER SYSTEM)” and APPENDIX B – “EAST BAY MUNICIPAL UTILITY DISTRICT AUDITED FINANCIAL STATEMENTS FOR THE YEARS ENDED JUNE 30, 2025 AND 2024.”

PLAN OF FINANCE

Series 2026A Bonds

Purposes of the Series 2026A Bonds. The proceeds of the Series 2026A Bonds will be applied to (i) finance and/or reimburse the District for certain costs of improvements to the Wastewater System of the District, and (ii) pay costs incidental to the issuance of the Series 2026A Bonds. See also “ESTIMATED SOURCES AND USES OF FUNDS.”

Series 2026A Bonds Designation as Green Bonds. The Series 2026A Bonds are being issued for the primary purpose of providing additional moneys to finance (by reimbursement to the District of) a portion of the costs of various improvements to the District’s Wastewater System. The District has designated the Series 2026A Bonds as “Green Bonds” to allow investors to invest directly in bonds that finance environmentally beneficial projects. Such designation has been made by the District in accordance with the District’s Board-approved Guidance for Issuing Green Bonds (the “District’s Green Bond Guidance”), which was most recently approved by the District’s Board of Directors (the “Board”) on March 22, 2022. The District’s Green Bond Guidance identifies the criteria (described below) that the

District expects to take into consideration in identifying the types of “green” projects the costs of which may be funded (or reimbursed to the District) from the proceeds of Green Bonds. The District’s Green Bonds Guidance further provides that in identifying potential projects for Green Bond financing, the District’s aim should be towards including projects that best meet one or more of the identified criteria and excluding those projects that appear marginal or that have unresolved sustainability issues.

The District has promoted principles of sustainability for a number of years. The District initially adopted a Sustainability Policy, District Policy 7.05, in 1994. The District’s current Sustainability Policy provides that it is the policy of the District to provide reliable, high-quality drinking water and wastewater service through sustainable and resilient planning, design, construction, operations, maintenance, rehabilitation, and disposal activities that manage long-term economic, environmental, and human resource benefits. The District’s current Sustainability Policy further provides for District staff to annually report to the Board summarizing the status of the District’s sustainability efforts.

In identifying projects eligible for Green Bond financing, the District considers projects that are designed to meet one or more of the following criteria to be “green” projects: (i) maintain water quality; (ii) improve water use efficiency, including conservation through reduced water loss; (iii) improve biodiversity and ecosystem quality; (iv) protect against flooding; (v) reduce pollution; (vi) improve resilience (adaptation) to climate change; (vii) reduce the combustion of fossil fuels; (viii) reduce greenhouse gas emissions; (ix) implement “reduce, reuse, recycle” practices in preference to raw materials; or (x) adhere to sustainable purchasing guidelines. Where relevant, the District’s Green Bond Guidance maps these criteria for alignment with the categories, principles, or goals under the standards or frameworks established by the International Capital Market Association’s Green Bond Principles, the United Nations’ Sustainable Development Goals and the Climate Bonds Initiative’s Climate Bonds Taxonomy. It should be noted that such mapping is provided for comparison purposes only and no representation is made by the District that the projects satisfying the District’s criteria will necessarily fit the mapped criteria from the other frameworks.

The District’s Green Bond Guidance as approved by the Board on March 22, 2022 is set forth in APPENDIX G – “THE DISTRICT’S GREEN BOND GUIDANCE AND EXPECTED SERIES 2026A BONDS GREEN BOND PROJECTS.” Also set forth in Appendix G is a list of the particular projects that are considered by the District to be “green” projects, the costs of which the District expects to be funded (through reimbursement to the District) from proceeds of the Series 2026A Bonds. Proceeds of the Series 2026A Bonds will primarily be used to reimburse the District for some or all of the costs of the projects identified in Appendix G. The proceeds of the Series 2026A Bonds will be deposited into a separately labeled account by the District and allocated to prior expenditures for capital improvement projects identified by the District as satisfying its criteria for green projects. Because proceeds of the Series 2026A Bonds will be applied to reimburse the District for prior expenditures made in connection with the projects identified in Appendix G, the District does not intend to undertake any further tracking of and reporting on the use of the proceeds of the Series 2026A Bonds.

There can be no assurance that the green projects funded with the proceeds of the Series 2026A Bonds will meet an investor’s expectations regarding sustainability performance. It is possible that adverse environmental or social impacts may occur during the design, construction and operation of the green projects. For additional information regarding the District’s capital improvement program, and a description of the major programs and projects included therein, see APPENDIX A – “THE EAST BAY MUNICIPAL UTILITY DISTRICT (THE WASTEWATER SYSTEM) – THE WASTEWATER SYSTEM – Capital Improvement Program.”

The terms “Green Bonds” and “green project” are neither defined in nor related to provisions in the Indenture or otherwise defined under State or federal laws. No independent certification is being

obtained with respect to the treatment of the Series 2026A Bonds as Green Bonds. The use of such terms herein is for identification purposes only and is not intended to provide or imply that an owner of the Series 2026A Bonds is entitled to any additional security other than as provided in the Indenture. The repayment obligations of the District with respect to the Series 2026A Bonds are not conditioned on the completion of any particular project or the satisfaction of any certification relating to the status of the Series 2026A Bonds as Green Bonds. The District assumes no obligation to ensure that these projects comply with any legal or other principles of green projects as such principles may evolve over time. The District's Green Bond Guidance as applied in connection with the Series 2026A Bonds may be updated or changed in the future at the Board's discretion.

The Series 2026A Bonds will not constitute "exempt facility bonds" issued to finance "qualified green building and sustainable design projects" within the meaning of Section 142(1) of the Internal Revenue Code of 1986, as amended (the "Code").

Series 2026B Bonds

Purposes of the Series 2026B Bonds. The proceeds of the Series 2026B Bonds will be applied, together with certain other available funds of the District, to (i) refund all of the District's Outstanding Wastewater System Revenue Bonds, Series 2010B (Taxable Build America Bonds-Direct Payment) (such bonds the "Series 2010B BABs" and to the extent refunded by the Series 2026B Bonds, the "Refunded Series 2010B BABs"), and (ii) pay costs incidental to the issuance of the Series 2026B Bonds. See also "ESTIMATED SOURCES AND USES OF FUNDS."

Refunding of the Series 2010B BABs. A portion of the proceeds of the Series 2026B Bonds, together with certain other moneys to be contributed by the District, will be deposited with the Trustee and will be used on the date of delivery of the Series 2026 Bonds to redeem the Refunded Series 2010B BABs. The following table details the maturity dates and principal amounts of the Outstanding Series 2010B BABs.

[Remainder of page intentionally left blank.]

Refunded Series 2010B BABs

Wastewater System Revenue Bonds Series Designation and Issue Date	CUSIP (Base No. 271012)	Maturity Date (June 1)	Outstanding Principal Amount to be Redeemed	Interest Rate	Redemption Date
Wastewater System Revenue Bonds, Series 2010B (Taxable Build America Bonds) (Issued October 20, 2010)					
	DM5	2032	\$ 44,435,000	5.026%	May 20, 2026
	DN3	2033	12,675,000	5.076	May 20, 2026
	DL7	2040	92,890,000	5.176	May 20, 2026
TOTAL			\$150,000,000		

The Refunded Series 2010B BABs are being redeemed pursuant to the extraordinary optional redemption provisions of the Fourteenth Supplemental Indenture, dated as of October 1, 2010 (the “Fourteenth Supplemental Indenture”), executed and delivered by the District in connection with the issuance of the Series 2010B BABs. The Fourteenth Supplemental Indenture provides that the Series 2010B BABs are subject to redemption prior to their stated maturity date, at the option of the District, upon the occurrence of an Extraordinary Event, from any source of available funds, as a whole or in part, on any date, at the Extraordinary Optional Redemption Price (as defined in the Fourteenth Supplemental Indenture).

Pursuant to the Fourteenth Supplemental Indenture, an “Extraordinary Event” will have occurred if the District determines that a material adverse change has occurred to section 54AA or section 6431 of the Code or there is any guidance published by the Internal Revenue Service or the United States Treasury with respect to such sections or any other determination by the Internal Revenue Service or the United States Treasury, which determination is not the result of an act or omission by the District to satisfy the requirements to receive the 35% cash subsidy payment from the United States Treasury with respect to the Series 2010B BABs, pursuant to which the District’s 35% cash subsidy payment from the United States Treasury with respect to the Series 2010B BABs is reduced or eliminated. With respect to the Refunded Series 2010B BABs, the District has determined that an “Extraordinary Event” has occurred as described in the Fourteenth Supplemental Indenture, pursuant to which the District’s 35% cash subsidy payments from the United States Treasury for the Series 2010B BABs have been reduced, and the extraordinary optional redemption provisions relating to the Series 2010B BABs are therefore applicable.

Pursuant to the Fourteenth Supplemental Indenture, the Refunded Series 2010B BABs will be redeemed at the Extraordinary Optional Redemption Price, which is defined in the Fourteenth Supplemental Indenture to mean for each maturity of the Refunded Series 2010B BABs the greater of (i) 100% of principal amount of the Series 2010B BABs to be redeemed or (ii) the sum of the present value of the remaining scheduled payments of principal and interest on the Series 2010B BABs of such maturity to be redeemed, not including any portion of those payments of interest accrued and unpaid as of the date on which the Series 2010B BABs are to be redeemed, discounted to the date on which the Series 2010B BABs are to be redeemed on a semi-annual basis, assuming a 360-day year containing twelve 30-day months, at the Treasury Rate (as defined in the Fourteenth Supplemental Indenture) plus one hundred (100) basis points, plus accrued interest on the Series 2010B BABs of such maturity to be redeemed to the redemption date.

Upon delivery of the Series 2026B Bonds, Robert Thomas CPA, LLC, independent certified public accountants, will verify from the information provided to them, the mathematical accuracy of the computation of the Extraordinary Optional Redemption Price and certain computations relating to the adequacy of the amounts to be deposited with the Trustee to pay such redemption price of and accrued interest on the Refunded Series 2010B BABs on the redemption date therefor. See “VERIFICATION OF MATHEMATICAL COMPUTATIONS.”

ESTIMATED SOURCES AND USES OF FUNDS

The estimated sources and uses of funds with respect to the Series 2026 Bonds, rounded to the nearest dollar, are as follows:

	<i>Series 2026A Bonds</i>	<i>Series 2026B Bonds</i>	<i>Total⁽¹⁾</i>
<i>Sources</i>			
Principal Amount	\$37,010,000	\$130,980,000	\$167,990,000
Original Issue Premium	3,140,349	19,872,511	23,012,860
Other Available Funds	--	3,607,527	3,607,527
Total ⁽¹⁾	\$40,150,349	\$154,460,038	\$194,610,387
 <i>Uses</i>			
Series 2026A (Green Bonds)			
Wastewater System Fund ⁽²⁾	\$40,000,000	\$ --	\$40,000,000
Redemption of Series 2010B BABs	--	153,946,348	153,946,348
Underwriters' Discount	60,885	207,199	268,085
Costs of Issuance ⁽³⁾	89,464	306,491	395,955
Total ⁽¹⁾	\$ 40,150,349	\$154,460,038	\$194,610,387

⁽¹⁾ Totals may not sum due to rounding.

⁽²⁾ Includes previous expenditures to be reimbursed to the District.

⁽³⁾ Includes legal, financing and consulting fees, rating agency fees, printing costs and other miscellaneous expenses.

THE SERIES 2026 BONDS

General Description

The Series 2026 Bonds of each Series will be issued in the respective aggregate principal amounts, will bear interest at the respective rates and will mature in the respective years and amounts, all as set forth on the inside cover pages of this Official Statement. The Series 2026 Bonds of each Series will be issued in denominations of \$5,000 principal amount or any integral multiple thereof. The Series 2026 Bonds of each Series will be dated, and shall bear interest from, their date of delivery. Interest on the Series 2026 Bonds of each Series is payable on each June 1 and December 1, commencing on December 1, 2026, and will be computed on the basis of a 360-day year of twelve 30-day months. The Series 2026 Bonds will be issued as fully registered bonds in book-entry form only and when delivered will be registered in the name of Cede & Co., as nominee of The Depository Trust Company, New York, New York (“DTC”), which will act as securities depository for the Series 2026 Bonds. So long as DTC, or its nominee, Cede & Co., is the registered owner of the Series 2026 Bonds, all payments of principal or redemption price of, and interest on, the Series 2026 Bonds will be made directly to DTC, which is obligated in turn to remit such principal or redemption price and interest to its DTC participants for

subsequent disbursement to the beneficial owners of the Series 2026 Bonds. See APPENDIX E – “DTC AND THE BOOK-ENTRY ONLY SYSTEM.”

Redemption

Series 2026A Bonds

Optional Redemption. The Series 2026A Bonds are subject to redemption prior to their respective stated maturities, at the option of the District, from any source of available funds, as a whole or in part (by such maturities as may be specified by the District and by lot within a maturity), on any date on or after June 1, 2036, at a redemption price equal to the principal amount of Series 2026A Bonds called for redemption, plus accrued interest to the date fixed for redemption, without premium.

Mandatory Redemption. The Series 2026A Bonds maturing on June 1, 2051 are subject to redemption prior to their stated maturity, in part, by lot, from Mandatory Sinking Account Payments as specified below, commencing on June 1, 2048 at the principal amount of each Series 2026A Bond so redeemed plus accrued interest thereon to but not including the date fixed for redemption, without premium.

Term Series 2026A Bonds due June 1, 2051

<i>Mandatory Sinking Account Payment Dates (June 1)</i>	<i>Mandatory Sinking Account Payments</i>
2048	\$2,200,000
2049	2,310,000
2050	2,425,000
2051 [†]	2,550,000

[†] Final Maturity.

The Series 2026A Bonds maturing on June 1, 2056 are subject to redemption prior to their stated maturity, in part, by lot, from Mandatory Sinking Account Payments as specified below, commencing on June 1, 2052 at the principal amount of each Series 2026A Bond so redeemed plus accrued interest thereon to but not including the date fixed for redemption, without premium.

Term Series 2026A Bonds due June 1, 2056

<i>Mandatory Sinking Account Payment Dates (June 1)</i>	<i>Mandatory Sinking Account Payments</i>
2052	\$2,675,000
2053	2,810,000
2054	2,950,000
2055	3,100,000
2056 [†]	3,255,000

[†] Final Maturity.

Upon an optional redemption of a portion of any term Series 2026A Bond, the District shall provide the Trustee with a revised schedule of the foregoing Mandatory Sinking Account Payments which shall provide for a reduction in the amount of one or more of the Mandatory Sinking Account Payments

coming due on such term Series 2026A Bond after such redemption as specified by the District in such schedule to reflect such redeemed portion.

Series 2026B Bonds

Optional Redemption. The Series 2026B Bonds maturing on or before June 1, 2036 are not subject to optional redemption prior to maturity. The Series 2026B Bonds maturing on and after June 1, 2037 are subject to redemption prior to their respective stated maturities, at the option of the District, from any source of available funds, as a whole or in part (by such maturities as may be specified by the District and by lot within a maturity), on any date on or after June 1, 2036, at a redemption price equal to the principal amount of Series 2026B Bonds called for redemption, plus accrued interest to the date fixed for redemption, without premium.

Notice of Redemption

Notice of redemption of the Series 2026 Bonds shall be given by the Trustee, not less than 20 nor more than 60 days prior to the redemption date, to DTC by electronic means of communication or by first-class mail or, if the book-entry system as described in Appendix E has been discontinued, to the respective Owners of any Series 2026 Bonds designated for redemption at their addresses appearing on the bond registration books of the Trustee by first-class mail, and to EMMA by electronic means of communication, or to such other securities depositories or information services as the District may designate in a Request of the District delivered to the Trustee. Such notice of redemption will state, among other things, the date of issue of the Series 2026 Bonds to which such notice relates, the redemption date, the redemption price and in the case of Series 2026 Bonds to be redeemed in part only, the respective portions of the principal amount thereof to be redeemed, and shall be given in the form and otherwise in accordance with the terms of the Indenture. Failure by any Owner to receive notice or any defect in any such notice shall not affect the sufficiency of the proceedings for redemption.

In the event of an optional redemption of Series 2026 Bonds, if the District shall not have deposited or otherwise made available to the Trustee the money required for the payment of the redemption price of the Series 2026 Bonds to be redeemed at the time of the mailing of notice of redemption, such notice of redemption shall state that the redemption is expressly conditioned upon the timely deposit of sufficient funds therefor with the Trustee.

Selection of Bonds for Redemption

Whenever provision is made in the Indenture for the redemption of less than all of a Series of the Series 2026 Bonds, the maturities of the Series 2026 Bonds of such Series to be redeemed shall be specified by the District. In the case of partial redemption of less than all of the Series 2026 Bonds of any maturity, the Trustee will select the Series 2026 Bonds of such maturity to be redeemed from all Series 2026 Bonds of the respective Series and maturity not previously called for redemption, in authorized denominations, by lot, in any manner which the Trustee in its sole discretion deems appropriate and fair.

Effect of Redemption

If notice of redemption is given as provided in the Indenture, and moneys for payment of the redemption price of, together with interest accrued to the redemption date on, the Series 2026 Bonds (or portions thereof) so called for redemption is held by the Trustee, then on the redemption date designated in such notice, the Series 2026 Bonds (or portions thereof) so called for redemption will become due and payable at the redemption price specified in the notice of redemption, together with interest accrued thereon to the date fixed for redemption, interest on such Series 2026 Bonds so called for redemption will cease to accrue, the Series 2026 Bonds (or portions thereof) will cease to be entitled to any benefit or

security under the Indenture and the owners of the Series 2026 Bonds (or portions thereof) will have no rights in respect thereof except to receive payment of the redemption price plus accrued interest.

AMENDMENTS TO THE INDENTURE TO TAKE EFFECT IN THE FUTURE

The Twenty-Second Supplemental Indenture, dated as of March 1, 2024, executed and delivered by the District and the Trustee in connection with the issuance of the District's Wastewater System Revenue Bonds, Series 2024A (Green Bonds), includes certain material amendments to the Wastewater System Revenue Bond Indenture which purchasers of the Series 2026 Bonds are deemed to consent to by their purchase of the Series 2026 Bonds. Set forth in APPENDIX H – "PROPOSED CHANGES TO THE INDENTURE" is a description of the amendments and a marked copy of certain provisions of the Indenture which show the amendments and modifications set forth in the Twenty-Second Supplemental Indenture that the District intends to make to the Indenture. Such amendments will become effective on the date that consent of the Owners of a majority in principal amount of the Bonds then Outstanding has been obtained and a certificate of the District to such effect has been filed with the Trustee (the "Amendments Effective Date").

Upon the Amendments Effective Date, the Twenty-Second Supplemental Indenture will effectuate certain significant amendments to the Indenture, including:

- modifications to the District's rate covenant;
- modifications to the provisions allowing for the District to issue additional Bonds or incur other Parity Debt that are payable from Adjusted Net Wastewater Revenues on a parity with the payment by the District of the Wastewater System Revenue Bonds; and
- modifications to the timing requirement for the District to furnish its audited financial statements to the Trustee for each Fiscal Year.

Under the Indenture, the amendments set forth in the Twenty-Second Supplemental Indenture and described in Appendix H to this Official Statement will not become effective until the consent of Owners of a majority in principal amount of the Bonds then Outstanding has been obtained. The District is planning to effectuate the consent of Owners through a "springing consent" process, which means that the District will require the holders of each new Series of Bonds that it issues, including the Series 2026 Bonds, to be deemed to have consented to the proposed amendments in the Twenty-Second Supplemental Indenture until the requisite consents have been obtained. After giving effect to the issuance of the Series 2026 Bonds as contemplated under "PLAN OF FINANCE" herein, the District estimates that it will have received consent to the proposed amendments in the Twenty-Second Supplemental Indenture of approximately 72% of the outstanding Bonds.

By the purchase and acceptance of the Series 2026 Bonds, the Owners and Beneficial Owners of the Series 2026 Bonds will be deemed to have consented to the proposed amendments to the Indenture contained in the Twenty-Second Supplemental Indenture by their purchase of the Series 2026 Bonds. The District will not be requesting separate written consent from the purchasers of the Series 2026 Bonds for the proposed amendments included in the Twenty-Second Supplemental Indenture before the Amendments Effective Date.

Since the proposed amendments to the Indenture set forth in the Twenty-Second Supplemental Indenture will be effectuated on a "springing consent" basis, the timing of when such amendments will become effective will largely depend on the amortization of principal of the currently outstanding Wastewater System Revenue Bonds, the timing and sizes of future new money issuances of Wastewater

System Revenue Bonds, and the timing and sizes of refundings of Wastewater System Revenue Bonds pursuant to the Indenture.

See also APPENDIX H – “PROPOSED CHANGES TO THE INDENTURE.”

SECURITY FOR THE SERIES 2026 BONDS

General

The Series 2026 Bonds are authorized for issuance pursuant to the Municipal Utility District Act and laws of the State amendatory thereof or supplemental thereto, including the Revenue Bond Law of 1941, as made applicable by Article 6a of Chapter 6 of Division 6 of the Municipal Utility District Act, and with respect to the Series 2026B Bonds issued to refund outstanding bonds of the District, Article 11 of Chapter 3 of Part 1 of Division 2 of Title 5 of the Government Code of the State (collectively, the “Act”), resolutions adopted by the District and the Indenture.

Pledge of Adjusted Net Wastewater Revenues

Pursuant to the Indenture, the District has irrevocably pledged to the payment of the principal or redemption price of and interest on the Wastewater System Revenue Bonds, including the Series 2026 Bonds and any Parity Debt, all Adjusted Net Wastewater Revenues (as hereinafter defined) and all amounts held by the Trustee under the Indenture (except for amounts held in the Rebate Fund) subject only to the provisions of the Indenture permitting the application thereof for the purposes and on the terms and conditions set forth therein.

“Adjusted Net Wastewater Revenues” is generally defined in the Indenture to mean, for any fiscal period, the sum of (a) all charges received for, and all other income and receipts derived by the District from, the operation of the Wastewater System, or arising from the Wastewater System, together with income from the investment of any moneys in any fund or account established under the Indenture; provided, however, there shall be excluded therefrom any amounts reimbursed to the District by the United States of America pursuant to Section 54AA of the Code or any future similar program (“Wastewater Revenues”) for such fiscal period, plus (b) the amounts, if any, withdrawn by the District from the Rate Stabilization Fund for treatment as Wastewater Revenues for such fiscal period, less the sum of (c) all Wastewater Operation and Maintenance Costs (as hereinafter defined) for such fiscal period, and (d) the amounts, if any, withdrawn by the District from Wastewater Revenues for such fiscal period for deposit in the Rate Stabilization Fund.

The District may deposit into, or withdraw amounts from time to time held in, the Rate Stabilization Fund within 120 days after the end of the applicable Fiscal Year. Amounts deposited into the Rate Stabilization Fund shall be deducted from Wastewater Revenues for such Fiscal Year. Amounts withdrawn from the Rate Stabilization Fund shall be included in Wastewater Revenues for such Fiscal Year and may be applied for any purposes for which Wastewater Revenues generally are available. All interest and earnings upon deposits in the Rate Stabilization Fund will not be held therein, but will be treated and accounted for as Wastewater Revenues. The amount on deposit in the Rate Stabilization Fund as of March 1, 2026 was \$32,000,000.

“Wastewater Operation and Maintenance Costs” is generally defined in the Indenture to mean the reasonable and necessary costs of maintaining and operating the Wastewater System, calculated on sound accounting principles, including (among other things) the reasonable expenses of management, repair and other expenses necessary to maintain and preserve the Wastewater System in good repair and working order, and reasonable amounts for administration, overhead, insurance, taxes and other similar costs, but

excluding in all cases depreciation and obsolescence charges or reserves therefor and amortization of intangibles or other bookkeeping entries of a similar nature, and excluding all costs paid from the proceeds of taxes received by the District.

“Parity Debt” means any indebtedness, installment sale obligation, lease obligation or other obligation of the District for borrowed money or interest rate swap agreement having an equal lien and charge upon the Adjusted Net Wastewater Revenues and therefore payable on a parity with the Wastewater System Revenue Bonds (whether or not any Wastewater System Revenue Bonds are Outstanding).

The Series 2026 Bonds are not payable from or secured by the revenues of the Water System of the District.

The Series 2026 Bonds are special limited obligations of the District, payable solely from and secured by a pledge of Adjusted Net Wastewater Revenues. Neither the full faith and credit nor the taxing power of the District is pledged to the payment of the Series 2026 Bonds or the interest thereon.

Allocation of Adjusted Net Wastewater Revenues Under the Indenture

In accordance with the Indenture, all Adjusted Net Wastewater Revenues, when and as received by the District, shall be deposited into a fund to be established and maintained by the District designated as the “Revenue Fund.” So long as any Wastewater System Revenue Bonds are Outstanding, the District will transfer the moneys in the Revenue Fund into the following respective funds (established, maintained and held by the Trustee in trust for the benefit of the Owners of the Wastewater System Revenue Bonds) in the following order of priority; provided, that on a parity with such deposits the Trustee may set aside or transfer amounts with respect to outstanding Parity Debt as provided in the proceedings for such Parity Debt (which deposits shall be proportionate in the event such amounts are insufficient to provide for all deposits required as of any date to be made with respect to the Wastewater System Revenue Bonds and such Parity Debt):

Interest Fund. The District will transfer to the Trustee to be set aside in the Interest Fund on or before the Business Day prior to each interest payment date an amount equal to the interest becoming due and payable on the Outstanding Wastewater System Revenue Bonds (excluding any interest for which there are moneys on deposit in the Interest Fund from the proceeds of any Series of Wastewater System Revenue Bonds or other source to pay such interest).

Principal Fund; Sinking Accounts. The District shall transfer to the Trustee to be set aside in the Principal Fund on or before the Business Day prior to each principal or sinking account payment date an amount equal to the amount of Bond Obligation (as defined in the Indenture) plus the Mandatory Sinking Account Payments becoming due and payable on such date. All Mandatory Sinking Account Payments shall be made without priority of any payment into any one such sinking account over any other such payment.

Bond Reserve Funds. Upon the occurrence of any deficiency in any bond reserve fund established pursuant to the Indenture for any Series of Wastewater System Revenue Bonds, the District shall transfer to the Trustee and the Trustee shall set aside in such bond reserve fund an amount equal to the aggregate amount of each unreplenished prior withdrawal from such bond reserve fund until there is on deposit in such bond reserve fund an amount equal to the respective reserve requirement for such bond reserve fund. There are no bond reserve funds established in connection with any of the District’s Wastewater System Revenue Bonds Outstanding as of the date of this Official Statement. No bond

reserve fund is being established in connection with the Series 2026 Bonds. See “– No Bond Reserve Fund for Series 2026 Bonds” below.

The requirements of each such fund (including the making up of any deficiencies in any such fund resulting from a lack of Adjusted Net Wastewater Revenues sufficient to make any earlier required deposit) at the time of deposit is to be satisfied before any deposit is made to any other fund subsequent in priority. The Indenture provides that any Adjusted Net Wastewater Revenues remaining in the Revenue Fund after the foregoing transfers, except as otherwise provided in a Supplemental Indenture, shall be held free and clear of the Indenture by the District. The District may use and apply such Adjusted Net Wastewater Revenues for any lawful purpose of the District, including the redemption of Wastewater System Revenue Bonds upon the terms and conditions set forth in a Supplemental Indenture relating to such Wastewater System Revenue Bonds and the purchase of Wastewater System Revenue Bonds as and when and at such prices as it may determine.

Under the Indenture the District may enter into an interest rate swap agreement corresponding to the interest rate or rates payable on a Series of Wastewater System Revenue Bonds or any portion thereof and the amounts received by the District or the Trustee, if any, pursuant to such an interest rate swap agreement may be applied to the deposits required under the Indenture. If the District so designates, amounts payable under the interest rate swap agreement shall be secured by Adjusted Net Wastewater Revenues and other assets pledged under the Indenture to the Wastewater System Revenue Bonds on a parity basis therewith.

For further information regarding the allocation of Adjusted Net Wastewater Revenues with respect to the Wastewater System Revenue Bonds, see APPENDIX C – “SUMMARY OF CERTAIN PROVISIONS OF THE INDENTURE – Allocation of Adjusted Net Wastewater Revenues.”

No Bond Reserve Fund for Series 2026 Bonds

There is no bond reserve fund being established in connection with the Series 2026 Bonds and amounts on deposit in any bond reserve fund for any other Series of Wastewater System Revenue Bonds are not available for the payment of, and do not in any manner secure, the Series 2026 Bonds.

Rate Covenant

The District has covenanted under the Indenture that it will, at all times while any of the Wastewater System Revenue Bonds remain Outstanding, fix, prescribe and collect rates, fees and charges in connection with the services and facilities furnished by the Wastewater System so as to yield Wastewater Revenues in each Fiscal Year sufficient so that the Adjusted Net Wastewater Revenues for such year shall be at least equal to 1.1 times the amount of Debt Service on all Wastewater System Revenue Bonds and Parity Debt for such Fiscal Year. See APPENDIX C – “SUMMARY OF CERTAIN PROVISIONS OF THE INDENTURE – Certain Definitions” for the definition of Debt Service under the Indenture. See also “AMENDMENTS TO THE INDENTURE TO TAKE EFFECT IN THE FUTURE” and Appendix H for a discussion of certain changes to the foregoing covenant that will take effect at a later date.

Outstanding Wastewater System Revenue Obligations

Outstanding Wastewater System Revenue Bonds and Parity Debt. As of March 1, 2026, the District had Outstanding \$356,140,000 aggregate principal amount of Wastewater System Revenue Bonds (collectively, the “Outstanding Wastewater System Revenue Bonds”) issued under and pursuant to the Indenture. All of the District’s Outstanding Wastewater System Revenue Bonds are fixed rate bonds.

See APPENDIX A – “THE EAST BAY MUNICIPAL UTILITY DISTRICT (THE WASTEWATER SYSTEM) – WASTEWATER SYSTEM FINANCES – Outstanding Debt.”

The District’s \$150,000,000 Outstanding Series 2010B BABs were issued as “Build America Bonds” that are “qualified bonds” under the provisions of the American Recovery and Reinvestment Act of 2009. For the purpose of calculating Debt Service, Annual Debt Service and Maximum Annual Debt Service under the Indenture, to the extent interest on such Build America Bonds is reasonably anticipated to be reimbursed to the District by the United States of America pursuant to Section 54AA of the Code, or any future similar program (such cash subsidy payments being sometimes referred to herein as “BABs Interest Subsidy Payments”), then in making such calculations, interest payments with respect to the Build America Bonds shall be reduced by the amount of such interest reasonably anticipated to be paid or reimbursed by the United States of America. Pursuant to Federal sequestration legislation passed by Congress in 2011 and 2013, Federal subsidy payments for direct-pay bonds, including Build America Bonds, have been reduced (by formula) from the original funding subsidy level of 35% of interest costs on direct-pay bonds, including Build America Bonds. The sequestration reduction rate of the Federal subsidy payment for Build America Bonds is 5.7% for the Federal government’s fiscal year 2026 (which began on October 1, 2025 and ends on September 30, 2026), and this means that BABs Interest Subsidy Payments sought by the District for its Build America Bonds will be reduced by this percentage. This reduction will increase the District’s net interest cost. The sequestration reduction rate will be applied unless and until a law is enacted that cancels or otherwise affects the sequester, at which time the sequestration reduction rate is subject to change. At present, pursuant to Federal legislation, sequestration will continue through fiscal year 2031. The District can give no assurance regarding the level of subsidy payments or changes in the sequestration rate, if any, in the future, or whether Congress will adopt legislation in the future that will further reduce subsidy payments for direct-pay bonds, including Build America Bonds. Under the Indenture, the District is obligated to make all interest payments on the Wastewater System Revenue Bonds without regard to the receipt of any federal BABs Interest Subsidy Payments by the District. A portion of the Series 2026B Bonds will be applied to the redemption of all of the Outstanding Series 2010B BABs. See “PLAN OF FINANCE – Series 2026B Bonds.”

The Outstanding Wastewater System Revenue Bonds, together with any additional Wastewater System Revenue Bonds issued under the Indenture (including the Series 2026 Bonds), and any Parity Debt (which may include payment obligations under interest rate swap agreements) heretofore or hereafter issued or incurred in accordance with the Indenture, are on a parity as to the pledge of and lien on Adjusted Net Wastewater Revenues.

Parity State Loans. The District participates from time-to-time in the Clean Water State Revolving Fund loan program administered by the State Water Resources Control Board (the “SWRCB”), which was established to provide below-market rate financing for qualified water quality infrastructure projects in the State. Under this program, the District has from time-to-time entered into loan contracts with the SWRCB (the “State Loans”) payable from the Wastewater Revenues. The District currently has no outstanding State Loans payable from Wastewater Revenues.

State Loans entered into under the SWRCB low interest rate loan program generally provide that such State Loans shall be either senior to or on a parity with all future debt of the recipient thereof. Any future State Loans received by the District would likely constitute Parity Debt under the Indenture.

Subordinate Commercial Paper. The District maintains a commercial paper note program. Under the District’s commercial paper program, commercial paper notes may be issued at prevailing interest rates for periods of not more than 270 days from the date of issuance. In connection with its commercial paper program, the District has covenanted to procure and maintain in effect for any series or subseries of commercial paper notes issued thereunder one or more liquidity facilities enabling it to borrow an

aggregate amount at least equal to the principal amount of such series or subseries of commercial paper notes. As of March 1, 2026, the District had no Commercial Paper Notes (Wastewater Series) issued for the benefit of the Wastewater System under the District's commercial paper program. Commercial paper notes issued for the benefit of the Wastewater System under such program (and the District's repayment obligation for amounts borrowed, if any, under any applicable liquidity facility therefor), are payable from and secured by a pledge of Wastewater Revenues on a basis subordinate to the Wastewater System Revenue Bonds and Parity Debt. See APPENDIX A – "THE EAST BAY MUNICIPAL UTILITY DISTRICT (THE WASTEWATER SYSTEM) – WASTEWATER SYSTEM FINANCES – Outstanding Debt" for additional information regarding the District's authorized commercial paper note program.

Issuance of Additional Wastewater System Revenue Bonds and Parity Debt; Junior and Subordinate Obligations

The District covenants under the Indenture that it will not create any pledge, lien or charge upon any of the Adjusted Net Wastewater Revenues having priority over or having parity with the lien of the Bonds except only as permitted by the Indenture. The Indenture provides conditions under which additional Series of Wastewater System Revenue Bonds or other Parity Debt payable from Adjusted Net Wastewater Revenues may be issued on a parity with the Outstanding Wastewater System Revenue Bonds. Among other conditions, the Indenture requires that the District shall have placed on file with the Trustee a certificate of the District certifying that the sum of: (1) the Adjusted Net Wastewater Revenues for any period of 12 consecutive months during the 18 months immediately preceding the date on which such additional Wastewater System Revenue Bonds or Parity Debt will become Outstanding; plus (2) 90% of the amount by which the District projects Adjusted Net Wastewater Revenues for such period of 12 months would have been increased had increases in rates, fees and charges during such period of 12 months been in effect throughout such period of 12 months; plus (3) 75% of the amount by which the District projects Adjusted Net Wastewater Revenues will increase during the period of 12 months commencing on the date of issuance of such additional Series of Wastewater System Revenue Bonds due to improvements to the Wastewater System under construction (financed from any source) or to be financed with the proceeds of such additional Series of Wastewater System Revenue Bonds, shall have been at least equal to 1.1 times the amount of Maximum Annual Debt Service on all Wastewater System Revenue Bonds and Parity Debt then Outstanding and the additional Wastewater System Revenue Bonds or Parity Debt then proposed to be issued. See APPENDIX C – "SUMMARY OF CERTAIN PROVISIONS OF THE INDENTURE – Certain Definitions" for the definition of Maximum Annual Debt Service and Debt Service under the Indenture. See also "AMENDMENTS TO THE INDENTURE TO TAKE EFFECT IN THE FUTURE" and Appendix H for a discussion of certain changes to the provisions of the Indenture relating to the issuance of additional Bonds and Parity Debt that will take effect at a later date.

Refunding Wastewater System Revenue Bonds may be authorized and issued by the District without compliance with the provisions described above, subject to the terms and conditions of the Indenture, including the condition that Maximum Annual Debt Service on all Wastewater System Revenue Bonds and Parity Debt outstanding following the issuance of such refunding Wastewater System Revenue Bonds is less than or equal to Maximum Annual Debt Service on all Wastewater System Revenue Bonds and Parity Debt outstanding prior to the issuance of such refunding Wastewater System Revenue Bonds. See APPENDIX C – "SUMMARY OF CERTAIN PROVISIONS OF THE INDENTURE – Refunding Bonds."

The District has in the past, and may from time-to-time in the future, enter into interest rate swap agreements corresponding to the interest rate or rates payable on a Series of Bonds or any portion thereof. Any such interest rate swap agreements may contain such security and payment provisions, including collateral posting obligations and early termination provisions, as determined by the District and subject

to any conditions contained in the Indenture. Pursuant to the Indenture, if the District so designates, amounts payable under an interest rate swap agreement may be secured by Adjusted Net Wastewater Revenues and other assets pledged under the Indenture on a parity basis with the Wastewater System Revenue Bonds and other Parity Debt.

Pursuant to the Indenture, the District may incur obligations which are junior and subordinate to the payment of the principal, redemption price, interest and reserve fund requirements for the Wastewater System Revenue Bonds and all Parity Debt and which subordinated obligations are payable as to principal, redemption price, interest and reserve fund requirements, if any, only out of Adjusted Net Wastewater Revenues after the prior payment of all amounts then required to be paid under the Indenture from Adjusted Net Wastewater Revenues for principal, redemption price, interest and reserve fund requirements for the Wastewater System Revenue Bonds and all Parity Debt, as the same become due and payable and at the times and in the manner as required in the Indenture or the instrument authorizing such Parity Debt, as applicable.

Investment of Moneys in Funds and Accounts Under the Indenture

All moneys held in any of the funds and accounts held by the Trustee and established pursuant to the Indenture shall be invested, as directed by the District, solely in Investment Securities (see APPENDIX C – “SUMMARY OF CERTAIN PROVISIONS OF THE INDENTURE – Certain Definitions” for the definition of Investment Securities under the Indenture). If and to the extent the Trustee does not receive investment instructions from the District with respect to the moneys in such funds and accounts, such moneys shall be invested in a cash sweep or similar account arrangement of or available to the Trustee described in clause (xi) of the definition of Investment Securities.

Unless otherwise provided in a Supplemental Indenture, all interest, profits and other income received from the investment of moneys in any fund or account other than the Rebate Fund shall be transferred to the Revenue Fund when received; provided, however, that an amount of interest received with respect to any Investment Security equal to the amount of accrued interest, if any, paid as part of the purchase price of such Investment Security shall be credited to the fund or account from which such accrued interest was paid.

Limitations on Remedies

The ability of the District to comply with its covenants under the Indenture and to generate Wastewater Revenues sufficient to pay the principal of and interest on the Series 2026 Bonds may be adversely affected by actions and events outside of the control of the District. Furthermore, any remedies available to the owners of the Series 2026 Bonds upon the occurrence of an event of default under the Indenture are in many respects dependent upon judicial actions which are often subject to discretion and delay and could prove both expensive and time consuming to obtain. In addition, enforceability of the rights and remedies of the owners of the Series 2026 Bonds, and the obligations incurred by the District under the Series 2026 Bonds and the Indenture, may become subject to the following: the federal Bankruptcy Code and applicable bankruptcy, insolvency, reorganization, moratorium, or similar laws relating to or affecting the enforcement of creditor’s rights generally, now or hereafter in effect; equity principles which may limit the specific enforcement under State law of certain remedies; the exercise by the United States of America of the powers delegated to it by the Constitution; and the reasonable and necessary exercise, in certain exceptional situations, of the police powers inherent in the sovereignty of the State and its governmental bodies in the interest of serving a significant and legitimate public purpose. Bankruptcy proceedings, or the exercise of powers by the federal or State government, if initiated, could subject the owners of the Series 2026 Bonds to judicial discretion and interpretation of their rights in

bankruptcy or otherwise, and consequently may entail risks of delay, limitation, or modification of their rights.

See APPENDIX C – “SUMMARY OF CERTAIN PROVISIONS OF THE INDENTURE – Events of Default; Remedies” for additional information regarding events of default under the Indenture and the remedies available to owners of the Bonds pursuant to the terms thereof.

CONSTITUTIONAL AND STATUTORY LIMITATIONS ON TAXES AND APPROPRIATIONS AND FEES AND CHARGES

Tax Limitations – Proposition 13

Article XIII A of the State Constitution, known as Proposition 13, was approved by the voters in June 1978. Section 1(a) of Article XIII A limits the maximum *ad valorem* tax on real property to 1% of “full cash value,” and provides that such tax shall be collected by the counties and apportioned according to State statutes. Section 1(b) of Article XIII A provides that the 1% limitation does not apply to *ad valorem* taxes levied to pay interest or redemption charges on (1) indebtedness approved by the voters prior to July 1, 1978, and (2) any bonded indebtedness for the acquisition or improvement of real property approved on or after July 1, 1978, by two-thirds of the votes cast by the voters voting on the proposition.

Section 2 of Article XIII A defines “full cash value” to mean the county assessor’s valuation of real property as shown on the 1975-76 Fiscal Year tax bill, or, thereafter, the appraised value of real property when purchased, newly constructed, or a change in ownership has occurred. The full cash value may be adjusted annually to reflect inflation at a rate not to exceed 2% per year, or to reflect a reduction in the consumer price index or comparable data for the taxing jurisdiction, or may be reduced in the event of declining property value caused by substantial damage, destruction or other factors. Legislation enacted by the State Legislature to implement Article XIII A provides that, notwithstanding any other law, local agencies may not levy any *ad valorem* property tax except to pay debt service on indebtedness approved by the voters as described above. Such legislation further provides that each county will levy the maximum tax permitted by Article XIII A, which is \$1.00 per \$100 of assessed market value. The legislation further establishes the method for allocating the taxes collected by each county among the taxing agencies in the county. Special districts, such as the District, receive an allocation that is based primarily upon their tax levies in certain years prior to the amendment’s effective date relative to the tax levies of other congruent agencies. The District receives approximately 1.25% of the non-debt service related property taxes collected within its jurisdiction from Alameda and Contra Costa counties. See also APPENDIX A – “THE EAST BAY MUNICIPAL UTILITY DISTRICT (THE WASTEWATER SYSTEM) – WASTEWATER SYSTEM FINANCES – Property Tax Revenues.”

Since its adoption, Article XIII A has been amended a number of times. These amendments have created a number of exceptions to the requirement that property be reassessed when purchased, newly constructed or a change in ownership has occurred. These exceptions include certain transfers of real property between family members, certain purchases of replacement dwellings for persons over age 55 and by property owners whose original property has been destroyed in a declared disaster, and certain improvements to accommodate disabled persons and for seismic upgrades to property. These amendments have resulted in marginal reductions in the property tax revenues of the District.

Increases of assessed valuation resulting from reappraisals of property due to new construction, change in ownership or from the 2% annual adjustment are allocated among the various jurisdictions in the “taxing area” based upon their respective “situs.” Any such allocation made to a local agency continues as part of its allocation in future years.

The effect of Article XIII A on the District's finances has been to restrict *ad valorem* tax revenues for general purposes to the statutory allocation of the 1% levy while leaving intact the power to levy *ad valorem* taxes in whatever rate or amount may be required to pay debt service on its outstanding general obligation bonds and unissued bonds authorized prior to July 1, 1978. The District has had no outstanding general obligation bonds for the Wastewater System since such bonds were fully retired on April 1, 2018.

Both the California State Supreme Court and the United States Supreme Court have upheld the validity of Article XIII A.

For a description of the property tax collection procedure and certain statistical information concerning tax collections and delinquencies, see APPENDIX A – “THE EAST BAY MUNICIPAL UTILITY DISTRICT (THE WASTEWATER SYSTEM) – WASTEWATER SYSTEM FINANCES – Property Tax Revenues.”

Spending Limitations

At the statewide special election of November 6, 1979, the voters approved an initiative entitled “Limitation of Government Appropriations” which added Article XIII B to the California Constitution. Under Article XIII B, State and local governmental entities have an annual “appropriations limit” which limits the ability to spend certain moneys which are called “appropriations subject to limitation” (consisting of tax revenues, state subventions and certain other funds) in an amount higher than the “appropriations.” Article XIII B does not affect the appropriation of moneys which are excluded from the definition of “appropriations subject to limitation.” Among the exclusions is an “appropriation of any special district which existed on January 1, 1978, and which did not as of the 1977-78 Fiscal Year levy an *ad valorem* tax on property in excess of 12.5 cents per \$100 of assessed value.” In the opinion of the District's General Counsel, the appropriations of the District are excluded from the limitations of Article XIII B under this clause.

Proposition 62

A statutory initiative (“Proposition 62”) was adopted by the voters voting in the State at the November 4, 1986 General Election which (1) requires that any tax for general governmental purposes imposed by local governmental entities be approved by resolution or ordinance adopted by two-thirds vote of the governmental agency's legislative body and by a majority of the electorate of the governmental entity, (2) requires that any special tax (defined as taxes levied for other than general governmental purposes) imposed by a local governmental entity be approved by a two-thirds vote of the voters within that jurisdiction, (3) restricts the use of revenues from a special tax to the purposes or for the service for which the special tax was imposed, (4) prohibits the imposition of *ad valorem* taxes on real property by local governmental entities except as permitted by Article XIII A, (5) prohibits the imposition of transaction taxes and sales taxes on the sale of real property by local governmental entities and (6) requires that any tax imposed by a local governmental entity on or after March 1, 1985 be ratified by a majority vote of the electorate within two years of the adoption of the initiative or be terminated by November 15, 1988.

Proposition 218

On November 5, 1996, the voters of the State approved Proposition 218, the so-called “Right to Vote on Taxes Act.” Proposition 218 added Articles XIII C and XIII D to the State Constitution, which contain a number of provisions affecting the ability of local governments to levy and collect both existing and future taxes, assessments, fees and charges.

Article XIID. Article XIID established procedural requirements for the imposition of assessments, which are defined as any charge on real property for a special benefit conferred upon the real property. Standby charges are classified as assessments. Procedural requirements include the conducting of a public hearing and an election by mailed ballot, with notice to the record owner of each parcel subject to the assessment. The assessment may not be imposed if a majority of the ballots returned oppose the assessment, with each ballot weighted according to the proportional financial obligation of the affected parcel. The District does not currently impose standby charges or assessments for its Wastewater System.

Article XIID conditions the imposition or increase of any “fee” or “charge” subject to its provisions upon there being no written majority protest after a required public hearing and, for fees and charges other than for sewer, water or refuse collection services, voter approval. Article XIID defines “fee” or “charge” to mean levies (other than *ad valorem* or special taxes or assessments) imposed by a local government upon a parcel or upon a person as an incident of the ownership or tenancy of real property, including a user fee or charge for a “property-related service.” One of the requirements of Article XIID is that before a property-related fee or charge may be imposed or increased, a public hearing upon the proposed fee or charge must be held and notice must be mailed to the record owner of each identified parcel of land upon which the fee or charge is proposed for imposition. In the public hearing if written protests of the proposed fee or charge are presented by a majority of the owners of affected identified parcel(s), an agency may not impose the fee or charge.

Article XIID provides that nothing in Proposition 218 shall be construed to affect existing laws relating to the imposition of fees or charges as a condition of property development.

The California Supreme Court decisions in *Richmond v. Shasta Community Services District*, 32 Cal. 4th 409 (2004) (“Richmond”), and *Bighorn Desert View Water Agency v. Verjil*, 39 Cal. 4th 206 (2006) (“Bighorn”) have clarified uncertainty surrounding the applicability of Section 6 of Article XIID to service fees and charges. In *Richmond*, the California Supreme Court upheld a Court of Appeal decision that water connection fees (which included a capacity charge for capital improvements to the water system and a fire suppression charge) imposed by the Shasta Community Services District were not property related fees or charges subject to Article XIID because a water connection fee results from the property owner’s voluntary decision to apply for the connection. In both *Richmond* and *Bighorn*, however, the Court stated that a fee for ongoing water service through an existing connection is imposed “as an incident of property ownership” within the meaning of Article XIID, rejecting, in *Bighorn*, the water agency’s argument that consumption based water charges are not imposed “as an incident of property ownership” but as a result of the voluntary decisions of customers as to how much water to use.

The District has followed the notice, hearing and protest procedures in Article XIID in connection with wastewater rate increases since its Fiscal Year 2008 rate increases, and plans to follow such notice, hearing and protest procedures in connection with future rate increases. In addition, in connection with its wastewater rates for Fiscal Years 2026 and 2027, which were adopted by the District’s Board on June 10, 2025, the District followed the administrative remedy procedure established under California Government Code Sections 53759.1 and 53759.2 for the submission by ratepayers, and evaluation and consideration or resolution by the District, of any ratepayer objections related to such Fiscal Year 2026 and 2027 wastewater rates.

In addition to the procedural requirements of Article XIID, under Article XIID all property-related fees and charges, including those which were in existence prior to the passage of Proposition 218 in November 1996, must meet the following substantive standards:

- (1) Revenues derived from the fee or charge cannot exceed the funds required to provide the property-related service.

- (2) Revenues derived from the fee or charge must not be used for any purpose other than that for which the fee or charge was imposed.
- (3) The amount of a fee or charge imposed upon any parcel or person as an incident of property ownership must not exceed the proportional cost of the service attributable to the parcel.
- (4) No fee or charge may be imposed for a service unless that service is actually used by, or immediately available to, the owner of the property in question. Fees or charges based on potential or future use of a service are not permitted. Standby charges, whether characterized as charges or assessments, must be classified as assessments and cannot be imposed without compliance with Section 4 of Article XIID (relating to assessments).
- (5) No fee or charge may be imposed for general governmental services including, but not limited to, police, fire, ambulance or library services where the service is available to the public at large in substantially the same manner as it is to property owners.

On April 20, 2015, the California Fourth District Court of Appeal issued a decision in *Capistrano Taxpayers Association, Inc. v. City of San Juan Capistrano*, 235 Cal.App.4th 1493 (2015), holding that the City of San Juan Capistrano's tiered water rates (or inclining block rates) that were in effect from February 1, 2010 through June 30, 2014 violated the requirement of Proposition 218 that a fee or charge for property-related services, such as water delivery, must be proportional to the cost of providing service. In interpreting Proposition 218, the Court of Appeal emphasized that tiered water rates, or inclining block rates, that go up progressively in relation to usage are compatible with Proposition 218. However, the court concluded that Article XIID requires that each tier must reflect the actual costs of service for property owners falling in each of the tiers. The court further concluded that the city had the burden of proof to demonstrate compliance with Proposition 218 and that the city failed to meet its burden of proof in demonstrating that its tiered water rates corresponded to the actual costs of providing service to each tier. The Court of Appeal rejected the city's argument that the rates for its highest tiers constituted a penalty or a fine, which are excluded from Proposition 218. The court determined that deeming such rates to be penalties or fines would improperly circumvent Proposition 218 in that all an agency would need to do is establish a low base rate for service and then impose penalty rates for usage in excess of the base rate that have no relation to the cost of providing service at the penalty levels. In May 2015, the City of San Juan Capistrano announced that the city and the San Juan Capistrano Taxpayers Association, Inc. had reached a settlement, under the terms of which the city agreed that it would not seek review by the California Supreme Court of the Appellate Court decision.

It is District policy to conduct periodic cost of service studies for its rates and charges. The District believes that its established rates for wastewater service comply with the substantive standards of Article XIID. However, due to the uncertainties of evolving case law and potential future judicial interpretations of Proposition 218, the District is unable to predict at this time whether Proposition 218 could be interpreted, for example, to further limit fees and charges for wastewater services and/or to require stricter standards for the allocation of costs among customers and customer classes. See APPENDIX A – “THE EAST BAY MUNICIPAL UTILITY DISTRICT (THE WASTEWATER SYSTEM) – WASTEWATER SYSTEM FINANCES – Rates and Charges.”

Article XIIC. Article XIIC provides that the initiative power shall not be prohibited or otherwise limited in matters of reducing or repealing any local tax, assessment, fee or charge and that the power of initiative to affect local taxes, assessments, fees and charges shall be applicable to all local governments. Article XIIC does not define the terms “local tax,” “assessment,” “fee” or “charge.” On July 24, 2006, the California Supreme Court held in *Bighorn-Desert View Water Agency v. Verjil* that the

provisions of Article XIII C applied to rates and fees charged for domestic water use. In the decision, the Court noted that the decision did not address whether an initiative to reduce fees and charges could override statutory rate setting obligations. The District and its General Counsel do not believe that Article XIII C grants to the voters within the District the power to repeal or reduce rates and charges in a manner that would be inconsistent with the contractual obligations of the District.

The interpretation and application of Proposition 218 will likely be subject to further judicial determinations, and the District is unable to predict the outcome of such determinations, or what, if any, further implementing legislation will be enacted. No assurance can be given that the courts will not further interpret Article XIII C and Article XIII D to limit the ability of the District to impose, levy, charge and collect increased fees and charges for wastewater services, or the voters of the District will not, in the future, approve initiatives which seek to repeal, reduce or prohibit the future imposition or increase of assessments, fees or charges, including the District's wastewater service fees and charges, which are the source of Adjusted Net Wastewater Revenues pledged to the payment of debt service on the Series 2026 Bonds.

Proposition 26

Proposition 26, which amended Articles XIII A and XIII C of the California Constitution, was approved by the electorate at the November 2, 2010 election. Proposition 26 imposes a majority voter approval requirement on local governments with respect to certain fees and charges for general purposes, and a two-thirds voter approval requirement with respect to certain fees and charges for special purposes, unless the fees and charges are expressly excluded. Proposition 26, according to its supporters, was intended to prevent the circumvention of tax limitations imposed by the voters in California Constitution Articles XIII A, XIII C and XIII D pursuant to Proposition 13, approved in 1978, Proposition 218, approved in 1996, and other measures. Proposition 26 expressly excludes from its scope "a charge imposed for a specific government service or product provided directly to the payor that is not provided to those not charged, and which does not exceed the reasonable cost to the local government of providing the service or product" and "assessments and property-related fees imposed in accordance with the provisions of Article XIII D." The District believes that its wastewater fees and charges meet the criteria for exclusion under Proposition 26 and that the initiative is not intended to, and would not, apply to fees for wastewater services charged by the District. The District is unable to predict, however, how Proposition 26 will be interpreted by the courts or what its ultimate impact will be.

Other Initiatives

Articles XIII A, XIII B, XIII C and XIII D and Propositions 62 and 26 were adopted as measures that qualified for the ballot pursuant to California's initiative process. From time to time other initiatives have been and could be proposed and adopted affecting the District's revenues or ability to increase revenues. Neither the nature and impact of these measures nor the likelihood of qualification for ballot or passage can be anticipated by the District.

CERTAIN RISK FACTORS

This section provides a general overview of certain risk factors which should be considered, in addition to the other matters set forth in this Official Statement, in evaluating an investment in the Series 2026 Bonds. The ability of the District to pay principal of and interest on the Series 2026 Bonds depends primarily upon the District's receipt of Adjusted Net Wastewater Revenues. Any one or more of the risk factors discussed below, among others, could adversely affect the ability of the District to realize Adjusted Net Wastewater Revenues in amounts sufficient to satisfy the requirements of the Indenture and make timely payments of principal of or interest on the Series 2026 Bonds and/or lead to a decrease in

the market price and/or in the marketability of the Series 2026 Bonds. The order in which this information is presented does not necessarily reflect the relative importance of various risks or the probability of their occurrence. Further, there can be no assurance that other risk factors not discussed herein will not become material and the District has not undertaken to update investors about the emergence of the risk factors in the future. This section is provided for convenience and is not meant to be a comprehensive or definitive discussion of all of the risks associated with an investment in the Series 2026 Bonds. Many of the risk factors identified below are more fully discussed elsewhere in this Official Statement. Potential investors are advised to read the entire Official Statement, including the appendices hereto, to obtain information essential to making an informed investment decision.

Limited Obligations; General

The Series 2026 Bonds are special limited obligations of the District payable solely from and secured solely by a pledge of Adjusted Net Wastewater Revenues of the District. Neither the full faith and credit nor the taxing power of the District is pledged for the payment of the Series 2026 Bonds or the interest thereon. The Series 2026 Bonds are not secured by a legal or equitable pledge of, or charge, lien or encumbrance upon, any of the District's property or its income, receipts or revenues, except the Adjusted Net Wastewater Revenues. See "SECURITY FOR THE SERIES 2026 BONDS."

The ability of the District to generate Adjusted Net Wastewater Revenues in amounts sufficient to pay principal of and interest on the Series 2026 Bonds and all other Outstanding Wastewater System Revenue Bonds and Parity Debt may be adversely affected by actions and events outside the control of the District. Among other matters, general and local economic conditions and changes in law and government regulations (including initiatives and moratoriums on growth) could adversely affect the amount of Wastewater Revenues that the District receives or significantly increase Wastewater Operation and Maintenance Costs. Wastewater System rates and charges are calculated in part based upon metered water volumes. As a result, water deliveries at less than expected levels could result in lower than expected Adjusted Net Wastewater Revenues. Further, the realization of future Adjusted Net Wastewater Revenues by the District is subject to, among other things, the capabilities of management of the District, the ability of the District to provide wastewater services to its customers, and the ability of the District to establish, maintain and collect rates and charges sufficient to pay for Wastewater Operation and Maintenance Costs, debt service on Wastewater System Revenue Bonds, and other obligations payable from such Wastewater Revenues. See APPENDIX A – "THE EAST BAY MUNICIPAL UTILITY DISTRICT (THE WASTEWATER SYSTEM) – WASTEWATER SYSTEM FINANCES."

No Bond Reserve Fund

No bond reserve fund has been established for the Series 2026 Bonds. Amounts on deposit in any bond reserve fund established with respect to any other Series of the District's Wastewater System Revenue Bonds do not secure and are not available for the payment of the Series 2026 Bonds. See "SECURITY FOR THE SERIES 2026 BONDS."

Climate Change

One of the factors that may pose a risk to the operations of the District's Wastewater System is climate change. Numerous scientific studies on global climate change show that, among other effects on the global ecosystem, sea levels will rise, and extreme temperatures and extreme weather events will become more frequent as a result of increasing global temperatures attributable to atmospheric pollution. Warmer conditions in the San Francisco Bay may lead to more frequent and serious formation of harmful algal blooms. The occurrence of such algal blooms may lead to stricter regulations on nutrient loading from the Main Wastewater Treatment Plant, which could materially increase operating and capital costs.

In addition, the effects of global climate change are expected to increase the risk of inundation at low-lying wastewater facilities as sea levels rise. In addition, higher intensity storms are expected in California as a result of climate change, which are projected to result in potentially higher peak wet weather flow events, which could lead to higher turbidity in raw water and increased runoff that affects sewers and wastewater treatment. The District has incorporated potential impacts of climate change into its planning activities. See APPENDIX A – “THE EAST BAY MUNICIPAL UTILITY DISTRICT (THE WASTEWATER SYSTEM) – THE WASTEWATER SYSTEM – Wastewater Facilities” and “– Climate Change.”

Limitations on Rate-Setting

The generation of Adjusted Net Wastewater Revenues sufficient to satisfy the requirements of the Indenture and to pay the principal of and interest on the Series 2026 Bonds and all other Wastewater System Revenue Bonds and Parity Debt will require the District to periodically raise the wastewater rates and charges payable by its customers. The increase or imposition of retail wastewater rates is subject to various substantive and procedural requirements and limitations, including Proposition 218, which added Article XIIC and XIID to the State Constitution. Proposition 218 further authorizes the exercise of the initiative power by voters to repeal or reduce wastewater rate and charges. The District’s adopted wastewater rates for Fiscal Years 2026 and 2027 have been imposed in accordance with the notice, hearing and protest procedures provided for under Proposition 218. See “CONSTITUTIONAL AND STATUTORY LIMITATIONS ON TAXES AND APPROPRIATIONS AND FEES AND CHARGES” and APPENDIX A – “THE EAST BAY MUNICIPAL UTILITY DISTRICT (THE WASTEWATER SYSTEM) – WASTEWATER SYSTEM FINANCES – Rates and Charges.”

Statutory and Regulatory Compliance

The construction and operation of wastewater facilities and the discharge of wastewater are highly regulated activities. Federal, state and local standards and regulations are subject to change. In the event the District were to fail to comply with applicable laws and regulations, significant fines and penalties could be imposed by such agencies. In addition to claims by private parties, changes in the scope and standards for public agency wastewater systems such as the Wastewater System may also lead to administrative orders issued by federal or State regulators. Future compliance with new statutory and regulatory requirements or orders concerning matters such as water quality, discharge requirements and biosolids management could require significant capital investments and/or increases in Wastewater Operation and Maintenance Costs. See APPENDIX A – “THE EAST BAY MUNICIPAL UTILITY DISTRICT (THE WASTEWATER SYSTEM) – THE WASTEWATER SYSTEM – Regulatory Matters.”

Costs of Capital Improvement Program; Construction Risks

As part of the District’s biennial budget planning process and capital improvement program update, the District prepares a capital expenditure forecast. The District’s most recent capital expenditure forecast was prepared in connection with the development of its proposed biennial budget for Fiscal Years 2026 and 2027. Based upon this forecast, the District’s capital improvement program for the Wastewater System is projected to require cash expenditures of approximately \$496 million for the five Fiscal Years 2026 through 2030. The actual cost of acquiring and constructing the various components of the planned capital improvements to the Wastewater System will depend on a variety of factors, including but not limited to potential rising costs or shortages of labor or materials, the discovery of unforeseen subsurface conditions, natural hazards or seismic events encountered during construction, severe weather conditions, access to financial markets or other events outside the control of the District. There can be no assurances that costs for acquisition and construction of capital improvements to the Wastewater System

will not significantly exceed the amounts projected by the District. It is expected that a portion of the costs of the District's capital improvement program will be funded from proceeds of the Series 2026A Bonds and future revenue bond financings of the District. See APPENDIX A – "THE EAST BAY MUNICIPAL UTILITY DISTRICT (THE WASTEWATER SYSTEM) – THE WASTEWATER SYSTEM – Capital Improvement Program."

Natural Disasters and Casualty Risks

California is subject to geotechnical and extreme weather conditions which represent potential safety hazards, including expansive soils, wildfires, floods, high winds and areas of potential liquefaction and landslide. Primary hazards to which the service area of the District is most vulnerable include, but are not limited to, earthquakes, wildfires, floods, landslides, and drought. Natural disasters, severe weather-related events (which have become increasingly common), or man-made disasters or accidents, may occur and could cause failure of Wastewater System infrastructure or otherwise interrupt operation of the Wastewater System and thereby impair the ability of the District to generate Wastewater Revenues. The severity and/or frequency of natural disaster occurrences may be exacerbated by the impacts of climate change. The occurrence of such events could also result in liability claims against the District. Under the doctrine of inverse condemnation (a legal concept that entitles property owners to just compensation if their private property is damaged by a public use), California courts have imposed liability on public agencies in legal actions brought by private property holders for damages, where the inherent risks in the public agency's infrastructure are determined to be a substantial cause of damage to the property. Thus, if certain facilities of the District, such as its wastewater conveyance facilities, as deliberately designed, constructed or maintained, are determined to be the substantial cause of damage to property from sewer system overflows and flooding or otherwise, and the doctrine of inverse condemnation applies, the District could be liable in certain cases without having been found negligent.

The Indenture requires the District to maintain public liability insurance and insurance on the Wastewater System against such risks as and in such amounts as the District deems prudent taking into account insurance coverage for similar utilities, but only if it is obtainable at rates deemed reasonable by the District and upon terms and conditions deemed reasonable by the District. The District uses a combination of self-funding/self-insuring and insurance coverage in the District's risk management program; however, the program does not provide coverage for every conceivable risk of loss. The District's insurance program does not currently include earthquake coverage. Further, in the event of material damage to Wastewater System facilities, there can be no assurance that any insurance proceeds will be sufficient to rebuild or replace such facilities.

See APPENDIX A – "THE EAST BAY MUNICIPAL UTILITY DISTRICT (THE WASTEWATER SYSTEM) – THE WASTEWATER SYSTEM – Seismic Matters" and " – Insurance."

Cybersecurity; Other Safety and Security Risks

Cybersecurity breaches could damage the District's information and security systems and cause material disruption to its operations. The occurrence of military conflicts and terrorist activities, including cyber terrorism, could also adversely impact the operations of the Wastewater System or the finances of the District. Foreign state-sponsored and other cyber-activities may increase during periods of geopolitical conflict. United States government agencies have in the past issued warnings indicating that critical infrastructure sectors such as water and wastewater systems may be specific targets of cybersecurity threats. Attacks directed at critical sector operations could damage assets, cause operational malfunctions and outages, and result in costly recovery and remediation efforts. The District maintains active security (including information security) and emergency preparedness programs and has a number of security measures and safeguards in place. However, there can be no assurance that any existing or

additional safety and security measures will prove adequate in the event that military conflicts or terrorist activities, including cyber terrorism, or acts of malfeasance are directed against the assets of the Wastewater System or the information technology systems of the District. The costs of security measures or of remedying damage from security breaches could be greater than presently anticipated. See APPENDIX A – “THE EAST BAY MUNICIPAL UTILITY DISTRICT (THE WASTEWATER SYSTEM) – THE WASTEWATER SYSTEM – Security and Emergency Preparedness; Cybersecurity.”

Global Health Emergencies

A pandemic, epidemic or outbreak of an infectious disease can have significant adverse health and financial impacts on global and local economies. For example, beginning in 2020, the COVID-19 pandemic negatively affected economic activity throughout the world, including the United States and the State of California. The initial impacts of stay-at home orders globally were unprecedented, with commerce, travel, asset values and financial markets experiencing disruptions worldwide. Due to the essential nature of the services provided by the District’s Wastewater System, the District’s ability to provide wastewater service was not impaired and the District did not experience a significant, materially adverse impact on its annual revenues or operations as a result of COVID-19. However, in light of measures implemented by the District to mitigate the economic impact of COVID-19 on its customers, the District experienced increased delinquencies and more non-payment of utility bills than normal, which may continue. Moreover, while the declarations of COVID-19 as a public health emergency have been lifted, future pandemics and other widespread public health emergencies can and do arise from time to time. The District cannot predict whether another national or localized outbreak of highly contagious or epidemic disease in the future could negatively impact the District’s operations and finances and/or the economy of its service area. For additional information regarding the impacts of COVID-19 on the District, see APPENDIX A – “THE EAST BAY MUNICIPAL UTILITY DISTRICT (THE WASTEWATER SYSTEM) – WASTEWATER SYSTEM FINANCES – Billing and Collection Procedures – *COVID-19 Effects*.”

Federal Policy Risks Generally

Federal policies involving taxation, appropriations, borrowing (including the federal debt ceiling), climate change and other environmental matters, clean energy, trade (including tariffs), and other topics can shift, sometimes dramatically, from one Administration or Congress to another and such policy shifts may be inconsistent with the policy priorities of the State and/or the District. Recently, the new federal Administration has begun implementing several such policy shifts, including, among other things, through the revocation of certain policy initiatives of the prior federal administration, delays in appropriations, and instructing the Attorney General to identify and take certain action to limit the enforcement of State and local laws, regulations, causes of action, policies, and practices burdening the development, production or use of domestic energy resources that are determined to be unconstitutional, preempted by federal law or otherwise unenforceable, prioritizing those relating to climate change, environmental, social and governance initiatives, environmental justice, carbon or greenhouse gas emissions. Such policy shifts have been proposed or promulgated through presidential executive orders and other official and unofficial actions at the federal level. Certain of these actions have been the subject of judicial challenges. In addition to shifts in federal policy, the federal government has recently begun conducting large-scale layoffs across federal agencies, which may also impact the work and function of such entities. While the District does not generally rely upon or receive significant federal funding, the work of various federal agencies does affect the conduct of its operations. As one example, the United States Environmental Protection Agency, among other things, is responsible for, developing federal standards for water quality, and provides regulatory compliance guidance and testing protocols in connection therewith. The District is unable to predict with certainty the outcome of the recent federal

executive orders, proposals or other policy actions, nor the potential impact (positive or negative) any such changes in federal policy may have on the District's future operations.

Uncertainties of Projections, Forecasts and Assumptions

Certain information contained in this Official Statement is based upon assumptions and projections. Projections and assumptions are inherently subject to significant uncertainties. Inevitably, some assumptions will not be realized and unanticipated events and circumstances may occur and actual results are likely to differ, perhaps materially, from those projected. Accordingly, such projections are not necessarily indicative of future performance. See "FORWARD-LOOKING STATEMENTS" on page (c) of the inside cover pages of this Official Statement. See also APPENDIX A – "THE EAST BAY MUNICIPAL UTILITY DISTRICT (THE WASTEWATER SYSTEM) – WASTEWATER SYSTEM FINANCES – Projected Operating Results."

Limitations on Remedies

Upon the occurrence and continuance of an Event of Default under the Indenture, the registered owners of not less than a majority in aggregate principal amount of the Wastewater System Revenue Bonds at the time outstanding are entitled to declare the principal of all of such Wastewater System Revenue Bonds and the interest accrued thereon to be immediately due and payable. However, in the event of a default and such acceleration, there can be no assurance that the District will have sufficient Adjusted Net Wastewater Revenues available for payment of all of the Wastewater System Revenue Bonds. In addition, enforceability of the rights and remedies of the owners of the Series 2026 Bonds, and the obligations incurred by the District under the Series 2026 Bonds and the Indenture, may become subject to the following: the federal Bankruptcy Code and applicable bankruptcy, insolvency, reorganization, moratorium, or similar laws relating to or affecting the enforcement of creditor's rights generally, now or hereafter in effect; equity principles which may limit the specific enforcement under State law of certain remedies; the exercise by the United States of America of the powers delegated to it by the Constitution; and the reasonable and necessary exercise, in certain exceptional situations, of the police powers inherent in the sovereignty of the State and its governmental bodies in the interest of serving a significant and legitimate public purpose.

If the District fails to comply with its covenants under the Indenture or to pay the principal of and interest on the Series 2026 Bonds, there can be no assurance that the available legal remedies will be adequate to protect the interests of the owners of the Series 2026 Bonds. See "SECURITY FOR THE SERIES 2026 BONDS – Limitations on Remedies" and APPENDIX C – "SUMMARY OF CERTAIN PROVISIONS OF THE INDENTURE – Events of Default; Remedies."

Certain Other Obligations May Be Subject to Acceleration

The District is not prohibited by the Indenture from entering into revolving credit facilities, short-term credit facilities, standby bond purchase facilities, direct purchase arrangements or similar agreements which may provide, upon the occurrence of events of default, that the providers thereof may declare any outstanding obligations thereunder to be immediately due and payable, or from entering into interest rate swaps, which may be subject to early termination under some circumstances, upon which a substantial termination payment may become immediately due to the applicable counterparty. In such event, the acceleration of any parity or subordinate obligations may significantly reduce the amount of Adjusted Net Wastewater Revenues available to pay debt service on the Series 2026 Bonds and other Wastewater System Revenue Bonds. See "SECURITY FOR THE SERIES 2026 BONDS." See also "– Limitations on Remedies."

Green Bonds

The designation of the Series 2026A Bonds as Green Bonds is not based upon the receipt by the District of any third-party certification relating to the status of the Series 2026A Bonds as Green Bonds. The terms “Green Bonds” and “green project” are neither defined in nor related to provisions in the Indenture or otherwise defined under State or federal laws. The use of such terms herein is for identification purposes only and is not intended to provide or imply that an owner of the Series 2026A Bonds is entitled to any additional security other than as provided in the Indenture. The Series 2026A Bonds are being designated by the District as “Green Bonds” consistent with the District’s Green Bond Guidance approved by the District Board. However, there can be no assurance that the green projects funded with the proceeds of the Series 2026A Bonds will meet an investor’s expectations regarding sustainability performance. The purpose of labeling the Series 2026A Bonds as “Green Bonds” is, as noted, to allow owners of the Series 2026A Bonds to invest directly in bonds that are expected to finance environmentally beneficial projects. The District assumes no obligation to ensure that these projects comply with any legal or other principles of green projects as such principles may evolve over time. See “PLAN OF FINANCE – Series 2026A Bonds – *Series 2026A Bonds Designation as Green Bonds.*”

Tax Law Proposals; Risk of Audit

Existing law may change so as to reduce or eliminate the benefit to beneficial owners of the Series 2026 Bonds of the exclusion of interest thereon from gross income for federal income tax purposes. Any proposed legislation or administrative action, whether or not taken, could also affect the value and marketability of the Series 2026 Bonds.

The Internal Revenue Service (the “IRS”) has initiated an expanded program for the auditing of tax-exempt securities issues, including both random and target audits. It is possible that the Series 2026 Bonds will be selected for audit by the IRS. It is also possible that the market value of the Series 2026 Bonds might be affected as a result of such an audit of the Series 2026 Bonds (or by an audit of similar securities). See “TAX MATTERS.”

CONTINUING DISCLOSURE

Pursuant to a Continuing Disclosure Agreement, dated the date of delivery of the Series 2026 Bonds, by and between the District and the Dissemination Agent, the District will covenant and agree for the benefit of the holders and beneficial owners of the Series 2026 Bonds to provide in an Annual Report certain financial information and operating data relating to the District and the Wastewater System by not later than December 31 of each year in which the Series 2026 Bonds are outstanding (or if the District’s fiscal year changes, by no later than six months after the end of such Fiscal Year), commencing with the Annual Report for Fiscal Year 2025-26, and to provide notices of the occurrence of certain specified events. The Annual Report and the notices of specified events will be filed by the Dissemination Agent on behalf of the District with the Municipal Securities Rulemaking Board through EMMA. The Municipal Securities Rulemaking Board has made such information available to the public without charge through such internet portal. The specific nature of the information to be contained in the Annual Report and the notices of specified events is set forth in APPENDIX F – “FORM OF CONTINUING DISCLOSURE AGREEMENT.”

As of the date hereof, the District is in compliance in all material respects with its continuing disclosure undertakings for the last five years. Filings through EMMA are linked to a particular issue of obligations by CUSIP number (which is subject to change after the issuance of obligations as a result of various subsequent actions). The District uses its best efforts to confirm that each report filed through EMMA is linked to all the correct 9-digit CUSIP numbers. However, as a technical matter, it has come to

the District's attention that certain filings during the past five years, when made, were not appropriately linked to all applicable CUSIP numbers. The District has since linked the applicable filings to the additional CUSIPs.

LITIGATION

There is no action, suit or proceeding known to be pending or threatened, restraining or enjoining the District in the issuance and delivery of, or in any way contesting or affecting the validity of, the Series 2026 Bonds or the Indenture, or the pledge of Adjusted Net Wastewater Revenues under the Indenture, or contesting or affecting the power or authority of the District to impose rates and charges for services of the Wastewater System. There is no litigation known to be pending, or to the knowledge of the District, threatened, questioning the existence of the District or the title of the officers of the District to their respective offices.

At any given time, including the present, there are certain other claims and lawsuits against the District that arise in the course of operations of the Wastewater System. Certain of such matters could, if determined adversely to the District, affect expenditures by the District, and in some cases, Wastewater Revenues. The District is also a party to various other legal proceedings affecting the Wastewater System and the District. See APPENDIX A – “THE EAST BAY MUNICIPAL UTILITY DISTRICT (THE WASTEWATER SYSTEM) – THE WASTEWATER SYSTEM” for a discussion of certain of such matters. In addition to other matters, in June 2023, a judgment awarding damages of \$7.99 million to two former employees of the District was rendered in litigation filed by such former employees alleging certain racial discrimination and retaliation claims against the District. The District has appealed the trial court judgment. The District is unable to assess at this time the likelihood of success of the pending appeal. In the event of an unfavorable decision, any judgment to be paid by the District would include post-judgment interest and an award of attorneys' fees in addition to the damages award.

In the view of the District's management and General Counsel, there is no litigation pending against the District, or other ongoing legal proceedings to which the District is a party, which if determined adversely to the District, would individually or in the aggregate materially impair the District's ability to pay debt service on its indebtedness, including the Series 2026 Bonds.

RATINGS

S&P Global Ratings (“S&P”) and Moody's Investors Service, Inc. (“Moody's”) have assigned the Series 2026 Bonds the ratings of “AAA” and “Aa1,” respectively. Each of S&P's and Moody's rating outlook with respect to the Series 2026 Bonds is “stable.” No application has been made to any other rating agency for the purpose of obtaining any additional rating on the Series 2026 Bonds. Any desired explanation of such ratings should be obtained from the rating agency furnishing the same. Generally, rating agencies base their ratings on information and materials furnished to them and on investigations, studies and assumptions by the rating agencies. There is no assurance that any rating or rating outlook ascribed thereto will continue for any given period of time or that it will not be revised downward or withdrawn entirely by such rating agency if, in the judgment of such rating agency, circumstances so warrant. Any such change in or withdrawal of such ratings may have an adverse effect on the market price of the Series 2026 Bonds.

TAX MATTERS

In the opinion of Stradling Yocca Carlson & Rauth LLP, Bond Counsel, under existing statutes, regulations, rulings and judicial decisions, and assuming the accuracy of certain representations and compliance with certain covenants and requirements described herein, interest on the Series 2026 Bonds

is excluded from gross income for federal income tax purposes and is not an item of tax preference for purposes of calculating the federal alternative minimum tax imposed on individuals. However, it should be noted that, with respect to applicable corporations as defined in Section 59(k) of the Internal Revenue Code of 1986, as amended (the "Code"), generally certain corporations with more than \$1,000,000,000 of average annual adjusted financial statement income, interest on the Series 2026 Bonds might be taken into account in determining adjusted financial statement income for purposes of computing the alternative minimum tax imposed by Section 55 of the Code on such corporations. In the further opinion of Bond Counsel, interest on the Series 2026 Bonds is exempt from State of California personal income tax.

Bond Counsel's opinion as to the exclusion from gross income for federal income tax purposes of interest on the Series 2026 Bonds is based upon certain representations of fact and certifications made by the District and others and is subject to the condition that the District comply with all requirements of the Code that must be satisfied subsequent to the issuance of the Series 2026 Bonds to assure that interest on the Series 2026 Bonds will not become includable in gross income for federal income tax purposes. Failure to comply with such requirements of the Code might cause interest on the Series 2026 Bonds to be included in gross income for federal income tax purposes retroactive to the date of issuance of the Series 2026 Bonds. The District has covenanted to comply with all such requirements.

The difference between the issue price of a Series 2026 Bond (the first price at which a substantial amount of the Series 2026 Bonds of a maturity is to be sold to the public) and the stated redemption price at maturity of such Series 2026 Bond constitutes original issue discount. Original issue discount accrues under a constant yield method, and original issue discount will accrue to a Series 2026 Bond Owner before receipt of cash attributable to such excludable income. The amount of original issue discount deemed received by a Series 2026 Bond Owner will increase the Series 2026 Bond Owner's basis in the applicable Series 2026 Bond. The amount of original issue discount that accrues to the Owner of a Series 2026 Bond is excluded from the gross income of such Series 2026 Bond Owner for federal income tax purposes, is not an item of tax preference for purposes of the federal alternative minimum tax imposed on individuals, and is exempt from State of California personal income tax.

The amount by which a Series 2026 Bond Owner's original basis for determining loss on sale or exchange in the applicable Series 2026 Bond (generally, the purchase price) exceeds the amount payable on maturity (or on an earlier call date) constitutes amortizable bond premium, which must be amortized under Section 171 of the Code; such amortizable bond premium reduces the Series 2026 Bond Owner's basis in the applicable Series 2026 Bond (and the amount of tax-exempt interest received with respect to the Series 2026 Bonds), and is not deductible for federal income tax purposes. The basis reduction as a result of the amortization of bond premium may result in a Series 2026 Bond Owner realizing a taxable gain when a Series 2026 Bond is sold by the Owner for an amount equal to or less (under certain circumstances) than the original cost of the Series 2026 Bond to the Owner. Purchasers of the Series 2026 Bonds should consult their own tax advisors as to the treatment, computation and collateral consequences of amortizable bond premium.

The IRS has initiated an expanded program for the auditing of tax exempt bond issues, including both random and targeted audits. It is possible that the Series 2026 Bonds will be selected for audit by the IRS. It is also possible that the market value of the Series 2026 Bonds might be affected as a result of such an audit of the Series 2026 Bonds (or by an audit of similar municipal obligations). No assurance can be given that in the course of an audit, as a result of an audit, or otherwise, Congress or the IRS might not change the Code (or interpretation thereof) subsequent to the issuance of the Series 2026 Bonds to the extent that it materially adversely affects the exclusion from gross income of interest on the Series 2026 Bonds or their market value.

It is possible that subsequent to the issuance of the Series 2026 Bonds there might be federal, state, or local statutory changes (or judicial or regulatory interpretations of federal, state, or local law) that affect the federal, state, or local tax treatment of the Series 2026 Bonds or the market value of the Series 2026 Bonds. The introduction or enactment of any of such changes could adversely affect the market value or liquidity of the Series 2026 Bonds. No assurance can be given that subsequent to the issuance of the Series 2026 Bonds such changes (or other changes) will not be introduced or enacted or interpretations will not occur. Before purchasing any of the Series 2026 Bonds, all potential purchasers should consult their tax advisors regarding possible statutory changes or judicial or regulatory changes or interpretations, and their collateral tax consequences relating to the Series 2026 Bonds.

Bond Counsel's opinion with respect to the Series 2026 Bonds may be affected by actions taken (or not taken) or events occurring (or not occurring) after the date hereof. Bond Counsel has not undertaken to determine, or to inform any person, whether any such actions or events are taken or do occur. The Indenture and the Tax Certificate relating to the Series 2026 Bonds permit certain actions to be taken or to be omitted if a favorable opinion of Bond Counsel is provided with respect thereto. Bond Counsel expresses no opinion as to the effect on the exclusion from gross income of interest for federal income tax purposes with respect to any Series 2026 Bond if any such action is taken or omitted based upon the advice of counsel other than Bond Counsel.

Although Bond Counsel has rendered their opinions that interest on the Series 2026 Bonds is excluded from gross income for federal income tax purposes provided that the District continues to comply with certain requirements of the Code, the ownership of the Series 2026 Bonds and the accrual or receipt of interest on the Series 2026 Bonds may otherwise affect the tax liability of certain persons. Bond Counsel expresses no opinion regarding any such tax consequences. Accordingly, before purchasing any of the Series 2026 Bonds, all potential purchasers should consult their tax advisors with respect to collateral tax consequences relating to the Series 2026 Bonds.

A copy of the form of the opinion of Bond Counsel relating to the Series 2026 Bonds is included in APPENDIX D hereto.

UNDERWRITING

Purchase of the Series 2026 Bonds

The Series 2026 Bonds are being purchased by Samuel A. Ramirez & Co., Inc., on behalf of itself and as representative of Wells Fargo Bank, National Association, as the underwriters for the Series 2026 Bonds (collectively, the "Underwriters"), pursuant to and subject to the conditions set forth in the bond purchase contract between the District and the Underwriters, at a purchase price of \$190,734,775.48 (equal to the \$167,990,000.00 aggregate principal amount of the Series 2026 Bonds, plus original issue premium of \$23,012,860.15, less an Underwriters' discount of \$268,084.67). The bond purchase contract provides that the Underwriters will purchase all of the Series 2026 Bonds if any are purchased, and that the obligation to make such purchase is subject to certain terms and conditions set forth in the bond purchase contract.

The Underwriters may offer and sell the Series 2026 Bonds to certain dealers (including dealers depositing Series 2026 Bonds into investment trusts) and others at prices lower than the respective public offering prices stated or derived from information stated on the inside cover pages hereof. The initial public offering prices may be changed from time to time by the Underwriters.

Retail Brokerage Arrangements

The following paragraphs have been provided by and are being included in this Official Statement at the request of the referenced Underwriter. The District does not assume any responsibility for the accuracy or completeness of such statements or information.

Wells Fargo Securities is the trade name for certain securities-related capital markets and investment banking services of Wells Fargo & Company and its subsidiaries, including WFBNA, which conducts its municipal securities sales, trading and underwriting operations through the Wells Fargo Bank, NA Municipal Finance Group, a separately identifiable department of Wells Fargo Bank, National Association, registered with the Securities and Exchange Commission as a municipal securities dealer pursuant to Section 15B(a) of the Securities Exchange Act of 1934.

Wells Fargo Bank, National Association (hereinafter, “WFBNA”), acting through its Municipal Finance Group, an underwriter of the Series 2026 Bonds, has entered into an agreement (the “WFA Distribution Agreement”) with its affiliate, Wells Fargo Clearing Services, LLC (which uses the trade name “Wells Fargo Advisors”) (“WFA”), for the distribution of certain municipal securities offerings, including the Series 2026 Bonds. Pursuant to the WFA Distribution Agreement, WFBNA will share a portion of its underwriting or remarketing agent compensation, as applicable, with respect to the Series 2026 Bonds with WFA. WFBNA has also entered into an agreement (the “WFSLLC Distribution Agreement”) with its affiliate Wells Fargo Securities, LLC (“WFSLLC”), for the distribution of municipal securities offerings, including the Series 2026 Bonds. Pursuant to the WFSLLC Distribution Agreement, WFBNA pays a portion of WFSLLC’s expenses based on its municipal securities transactions. WFBNA, WFSLLC, and WFA are each wholly-owned subsidiaries of Wells Fargo & Company.

CERTAIN RELATIONSHIPS

The Underwriters and their respective affiliates are full service financial institutions engaged in various activities, which may include securities trading, commercial and investment banking, financial advisory, investment management, principal investment, hedging, financing and brokerage activities. Each of the Underwriters and their respective affiliates have, from time to time, performed, and may in the future perform, various investment banking services for the District, for which they received or will receive customary fees and expenses. WFSLLC, an affiliate of WFBNA, one of the Underwriters of the Series 2026 Bonds, has been appointed by the District to serve as the Designated Investment Banker to calculate the Treasury Rate to be used in the calculation of the Extraordinary Optional Redemption Price (as such terms are defined in the Fourteenth Supplemental Indenture) of the Refunded Series 2010B BABs. See “PLAN OF FINANCE – Series 2026B Bonds.” WFSLLC will not be compensated for serving in this capacity.

In the ordinary course of their various business activities, the Underwriters and their respective affiliates may make or hold a broad array of investments and actively trade debt and equity securities (or related derivative securities) and financial instruments (which may include bank loans and/or credit default swaps) for their own account and for the accounts of their customers and may at any time hold long and short positions in such securities and instruments. Such investment and securities activities may involve securities and instruments of the District.

The Underwriters and their respective affiliates may also communicate independent investment recommendations, market color or trading ideas and/or publish or express independent research views in respect of such assets, securities or instruments and may at any time hold, or recommend to clients that they should acquire, long and/or short positions in such assets, securities and instruments.

APPROVAL OF LEGAL PROCEEDINGS

All legal matters incident to the offering of the Series 2026 Bonds are subject to the approval of legality by Stradling Yocca Carlson & Rauth LLP, Bond Counsel. Certain legal matters will be passed upon for the District by its General Counsel and by Stradling Yocca Carlson & Rauth LLP, as Disclosure Counsel, and for the Underwriters by their counsel, Kutak Rock LLP. The form of the approving opinion to be delivered by Bond Counsel in connection with the issuance of the Series 2026 Bonds is included as APPENDIX D – “PROPOSED FORM OF BOND COUNSEL OPINION” to this Official Statement.

MUNICIPAL ADVISOR

The District has retained Montague DeRose and Associates, LLC, Walnut Creek, California, as municipal advisor (the “Municipal Advisor”) in connection with the issuance and delivery of the Series 2026 Bonds. The Municipal Advisor is not obligated to undertake, and has not undertaken to make, an independent verification or assume responsibility for the accuracy, completeness, or fairness of the information contained in this Official Statement.

VERIFICATION OF MATHEMATICAL COMPUTATIONS

Upon delivery of the Series 2026 Bonds, Robert Thomas CPA, LLC, independent certified public accountants, will deliver a report stating that the firm has verified the mathematical accuracy of the computation of the Extraordinary Optional Redemption Price of the Refunded Series 2010B BABs, and the computations relating to the adequacy of the amounts to be deposited with the Trustee to pay such redemption price of the Refunded Series 2010B BABs, and accrued interest thereon, on the redemption date of the Refunded Series 2010B BABs. See “PLAN OF FINANCE.”

INDEPENDENT ACCOUNTANTS

Included as APPENDIX B – “EAST BAY MUNICIPAL UTILITY DISTRICT AUDITED FINANCIAL STATEMENTS FOR THE YEARS ENDED JUNE 30, 2025 AND 2024” to this Official Statement are the audited financial statements of the District for the Fiscal Years ended June 30, 2025 and 2024. The District’s financial statements for the Fiscal Years ended June 30, 2025 and 2024 have been audited by Lance, Soll & Lunghard, LLP, certified public accountants. Lance, Soll & Lunghard, LLP has not been requested to consent to the inclusion of its report in APPENDIX B and it has not undertaken to update its report or to take any action intended or likely to elicit information concerning the accuracy, completeness or fairness of the statements made in this Official Statement, and no opinion is expressed by Lance, Soll & Lunghard, LLP with respect to any event subsequent to the date of its report.

MISCELLANEOUS

References made herein to certain documents and reports are brief summaries thereof and do not purport to be complete or definitive and reference is hereby made to such documents and reports for a full and complete statement of the contents thereof.

Any statements in this Official Statement involving matters of opinion, whether or not expressly so stated, are intended as such and not as representations of fact. This Official Statement is not to be construed as a contract or agreement between the District and the purchasers or registered owners of any of the Series 2026 Bonds. The delivery and distribution of this Official Statement have been duly authorized by the District.

EAST BAY MUNICIPAL UTILITY DISTRICT

General Manager

APPENDIX A

THE EAST BAY MUNICIPAL UTILITY DISTRICT

(THE WASTEWATER SYSTEM)

[THIS PAGE INTENTIONALLY LEFT BLANK]

The East Bay Municipal Utility District occupies 326 square miles (excluding all waterbodies within the service area) of the San Francisco – Oakland metropolitan region. The Wastewater System serves approximately 740,000 persons in an area designated as Special District No. 1, which covers approximately 88 square miles primarily within Alameda County.

THE DISTRICT

Organization

In May 1923, voters in cities along the eastern shore of the San Francisco Bay located in portions of Alameda and Contra Costa Counties (known throughout the San Francisco Bay Area as the “East Bay”) elected to create the East Bay Municipal Utility District (the “District”) under the provisions of the Municipal Utility District Act. Under the Municipal Utility District Act, municipal utility districts are empowered to acquire, construct, own, operate or control works for supplying the district and public agencies in the territory of the district with light, water, power, heat, transportation, telephone service or other means of communications, means for the collection, treatment or disposition of garbage, sewage or refuse matter, and public recreation facilities appurtenant to its reservoirs and may do all things necessary and convenient to the full exercise of powers granted in the Municipal Utility District Act. The District presently exercises only those functions relating to water supply, power generation, and recreational facilities through its Water System; and sewerage and wastewater interception, treatment and disposal, and power generation through its Wastewater System, within an area known as Special District No. 1. Special District No. 1 covers only a portion of the service area of the District. The District presently does not intend to exercise other functions. Such other functions and the related facilities, if exercised, would not constitute part of the Water System or the Wastewater System.

The District’s Wastewater System Revenue Bonds are not payable from or secured by the revenues of the Water System of the District.

District Board

The District, a public agency, is governed by an elected seven-member Board of Directors (the “Board” or “District Board”) which determines such matters as rates and charges for services, approval of contracts and District policy. Voters elect directors by ward to four-year terms. There are seven wards which together cover the entire service area of the District. Each year, the Board elects from among its members persons to serve as Board officers (*i.e.*, President and Vice President). Board members that have served for multiple terms have each served one or more years as an officer of the Board and have each chaired one or more of the Board’s standing committees that review financial, long-range planning, and legislative matters. The following persons currently serve on the Board:

Luz Gómez was initially appointed by the Board in April 2024 and was subsequently elected in the November 2024 general election. Ms. Gómez currently serves as President of the Board. Ms. Gómez represents Ward 2, which includes Alamo, Lafayette, the Town of Danville, the communities of Blackhawk and Diablo, and portions of Pleasant Hill, San Ramon, and Walnut Creek in Contra Costa County. Ms. Gómez represents the District on the governing boards of the Freeport Regional Water Authority (“FRWA”) and the DSRSD/EBMUD Recycled Water Authority (“DERWA”). Ms. Gómez is chair of the Contra Costa County Sustainability Commission with more than 20 years of experience in public health, air quality, lead poisoning prevention and community engagement. Ms. Gómez has managed programs for Contra Costa Public Health and the Bay Area Air Quality Management District and was Chief of Staff to Contra Costa County Supervisor John Gioia. Ms. Gómez also was a lecturer at University of California, Berkeley and co-founded the San Ramon Valley Climate Action Coalition. Ms. Gómez has a bachelor’s degree in community nutrition from the University of California, Davis, and a Master of Public Health degree from the University of California, Berkeley. Her current term expires on December 31, 2026.

Valerie D. Lewis was elected to the Board in the November 2024 general election and currently serves as Vice President of the Board. Ms. Lewis represents Ward 6, which includes portions of Oakland, including East Oakland and the area south of Park Boulevard/5th Avenue to the San Leandro city boundary, in Alameda County. Ms. Lewis is a practicing attorney and retired Assistant Vice President and Assistant Secretary, Legal, for Safeway Inc./The Albertsons Companies. She is a former trustee of the Alameda Health System and a member of the Executive Leadership Council, International Women's Forum, Oakland branch of the NAACP, Oakland African-American Chamber of Commerce, Oakland-Bay Area Chapter of the Links, Inc., and Delta Sigma Theta Sorority, Inc. Ms. Lewis has a bachelor's degree from the University of Virginia, and a law degree from the University of Virginia School of Law. Her current term expires on December 31, 2028.

April Chan was elected to the Board in 2022 and represents Ward 7, which includes the areas of Castro Valley, communities of Cherryland and Fairview; portions of San Leandro, San Lorenzo, and Hayward in Alameda County, and a portion of San Ramon in Contra Costa County. Ms. Chan represents the District on the governing board of DERWA. In addition to her service on the District's Board, Ms. Chan also serves on the Alameda County Fire Advisory Commission. Ms. Chan is the immediate past chair of the Fairview Municipal Advisory Council. She was appointed to the Fairview Municipal Advisory Council by the Alameda County Board of Supervisors in 2018 and served until she was elected to the District Board in 2022. Her current term expires on December 31, 2026.

Andy Katz was first elected to the Board in 2006 and represents Ward 4, which includes Albany, Berkeley, Emeryville and North Oakland in Alameda County, and El Cerrito and Kensington in Contra Costa County. Mr. Katz is an environmental and workers' rights attorney, and has taught as a lecturer at the University of California, Berkeley, School of Law. He is Chair of the Berkeley Community Health Commission, a member of the Berkeley Disaster and Fire Safety Commission, and a former Chair of Sierra Club California. Prior to his election to the District Board, he served for five years as a member of the City of Berkeley Zoning Adjustments Board. Mr. Katz has a bachelor's degree and a Master of City Planning degree from the University of California, Berkeley, and a law degree from Santa Clara University. His current term expires on December 31, 2026.

James H. Oddie was elected to the Board in the November 2024 general election. Mr. Oddie represents Ward 5, which includes the Alameda County cities of Alameda and San Lorenzo, the West Oakland and Oakland Airport Area, and a portion of San Leandro. Mr. Oddie represents the District on the governing board of FRWA. He also serves as a representative for the Oakland Chamber of Commerce. Mr. Oddie served as a member of the Alameda City Council from 2014 through 2020. He also spent over six years as District Director for then-Assemblymember Rob Bonta, serving the communities in Ward 5. Mr. Oddie is the Vice President and General Counsel of a small technology company. Mr. Oddie has a bachelor's degree from Indiana University, a Master of Business Administration degree from Loyola University of Chicago, and a law degree from the University of San Francisco Law School. His current term expires on December 31, 2028.

Joey D. Smith was elected to the Board in the November 2024 general election. Ms. Smith represents Ward 1, which includes Crockett, Hercules, Rodeo and San Pablo; portions of Richmond and Pinole, and the communities of North Richmond and Selby in Contra Costa County. Ms. Smith represents the District at the Special Districts Association of Contra Costa County and on the governing board of the Upper Mokelumne River Watershed Authority ("UMRWA"). Ms. Smith recently retired from the District following more than 30 years of service in the water industry. During the course of her career, Ms. Smith participated as a tradeswoman in the District's plumber series, managed staff, worked in the division responsible for water loss mitigation and energy

conservation, and was Emergency Response Team/Incident Base Commander and President of AFSCME Local 2019. Ms. Smith serves on the Contra Costa County Commission for Women and Girls and the City of Richmond Recreation and Parks Commission. She is also a member of Black Women Organized for Political Action, the Richmond branch of the NAACP, the Sierra Club, and the Association of Women in Water, Energy and Environment. Her current term expires on December 31, 2028.

Marguerite Young was first elected to the Board in 2014. Ms. Young represents Ward 3, which includes the City of Piedmont, part of Oakland in Alameda County, and the Contra Costa County communities of Orinda, El Sobrante, Moraga, and portions of Pinole and Richmond. As Principal and Founder of Rivernstream Consulting, Ms. Young provides strategic planning, research, policy guidance, and campaign support at the intersection of climate, labor, and justice. Ms. Young previously led the Climate and Environmental Justice Program at the Service Employees International Union (2016–2020) and managed the union’s Capital Stewardship Responsible Investment Program on the West Coast. Earlier, as California Director of Clean Water Action, Ms. Young co-chaired the CALFED Bay-Delta Program’s Water Quality Committee, fostering regional cooperation on drinking water quality. Ms. Young has served on several advisory committees, including California’s Source Water Assessment Advisory Committee, the United States Environmental Protection Agency (“USEPA”) Federal Advisory Committee on the Microbial and Disinfection By-product Rule, and California’s first Recycled Water Task Force. Ms. Young’s advocacy has contributed to stronger drinking water standards statewide. Ms. Young is also a board member of Clean Water Action, co-founder of the League of Conservation Voters–East Bay, and a former board member of Friends of the River and Carpe Diem West. Ms. Young holds a bachelor’s degree in natural resource economics from the University of California Berkeley. Her current term expires on December 31, 2026.

District Management

Clifford C. Chan joined the District in 1997 and was appointed General Manager in 2020. Mr. Chan has over 28 years of water industry related experience. Prior to his appointment as General Manager, Mr. Chan served as the District’s Director of Operations and Maintenance and was responsible for overseeing nearly one-half of the District’s employees tasked with operating and maintaining the District’s water system. Previously, he held engineering and management positions in the District’s Operations and Maintenance Department, including serving as Manager of Maintenance and Construction. Before joining the District, Mr. Chan was employed as an engineering consultant. He serves as a Board member and Treasurer for the Water Research Foundation; Board member and Vice Chair for the California Urban Water Agencies; Board member for WaterReuse California; and Board member for the Bay Area Council. He also serves on committees for the American Water Works Association and the California Urban Water Agencies. He has a bachelor’s degree and a master’s degree in civil engineering from the University of California, Berkeley and is a licensed Civil Engineer in California.

Derek T. McDonald joined the District in 2007 and was appointed General Counsel in 2021. Mr. McDonald has extensive experience in public agency law, including public works construction, public bidding and procurement, real estate, environmental law, tort and contract litigation, conflicts of interest, the Public Records Act, and the Brown Act, having worked on a number of significant cases and issues for the District during his tenure in the District’s Office of General Counsel. Before joining the District, he was a court research attorney and clerked for a law firm and a public defender’s office. Mr. McDonald also worked with local and international nonprofit and nongovernmental organizations in the areas of youth development, environmental restoration,

international elections and human rights advocacy. He has a bachelor's degree in sociology from the Boston College and a law degree from the University of San Francisco.

Sophia D. Skoda joined the District in 2006 and was appointed Director of Finance in 2015. Prior to her appointment as Director of Finance, Ms. Skoda served as Treasury Manager. In addition, Ms. Skoda has previously served as a Senior Civil Engineer for the District. Before joining the District, Ms. Skoda provided a range of financial consulting services to water and wastewater utility clients throughout California. She has a bachelor's degree in civil engineering from Stanford University and a master's degree in civil engineering from the University of California, Berkeley.

Serge V. Terentieff joined the District in 1999 and was appointed Director of Engineering and Construction in 2024. In this position, Mr. Terentieff is responsible for planning, design and construction of water system infrastructure. Prior to his current appointment, he served as the Engineering Manager of the Design Division, where he was responsible for overseeing the District's capital improvement program to upgrade the District's water system facilities. He has 35 years of experience in the engineering field. Prior to joining the District, Mr. Terentieff worked for the Marin County Public Works Department and CH2M Hill. He has a bachelor's degree in civil engineering and a master's degree in geotechnical engineering, both from the University of California, Berkeley. He is a licensed Professional Civil Engineer and Geotechnical Engineer in California.

Alice Towey joined the District in 2007 and was appointed Director of Water and Natural Resources in 2025. Ms. Towey has more than 20 years of experience in water resources management, including prior service as the District's Environmental Affairs Officer and Manager of Water Conservation. Before that, she held multiple engineering roles in water recycling and water resources planning. She is responsible for managing programs related to water supply planning, watershed and fisheries stewardship, and the protection and development of water resources. Ms. Towey holds a bachelor's degree in physics from Bryn Mawr College and a master's degree in environmental engineering from the University of California, Berkeley.

David A. Briggs joined the District in 2017 and is presently the Director of Operations & Maintenance and the Emergency Operations Director for the District. In this capacity he manages the operation and maintenance of water facilities and power generation facilities. Prior to joining the District, Dr. Briggs spent 10 years at the San Francisco Public Utilities Commission and 13 years at the Contra Costa Water District. He has been a manager since 2003. During his 27-year career, Dr. Briggs has developed experience in water resources, engineering, construction management, facilities planning, and operations and maintenance. He obtained his bachelor's degree in mechanical engineering from UC Davis, and his master's degree and Ph.D. from Stanford University, also in mechanical engineering. He is a licensed Civil Engineer in California.

Amit Mutsuddy joined the District in 2022 as the Director of Wastewater. Prior to joining the District, Mr. Mutsuddy was the Deputy Director, Wastewater Management at the San Jose-Santa Clara Regional Wastewater Facility for the City of San Jose for six years. In that position, he oversaw operations and maintenance of the wastewater treatment plant and collaborated in the implementation of \$1.4 billion in capital improvement projects at the plant. Mr. Mutsuddy's previous positions at the City of San Jose include Division Manager of the Mechanical Maintenance Division, and Senior Construction Manager for capital improvement projects for the regional wastewater treatment facility. He has more than 20 years of experience in engineering design and construction. Mr. Mutsuddy is a board member of the Bay Area Clean Water Agencies. He has a bachelor's degree in civil engineering from the Indian Institute of Technology, Chennai, India, and

a master's degree in civil and environmental engineering from San Jose State University. He is a licensed Civil Engineer in California and a LEED accredited professional.

Rischa S. Cole joined the District in 1997 and was appointed Secretary of the District in 2017. Ms. Cole has served in a variety of lead administrative roles at the District including Executive Assistant II in the Office of the Secretary and, prior to her appointment as Secretary, as Assistant to the General Manager. Ms. Cole received her bachelor's degree in business administration from California State University, East Bay. She is a member of the International Institute of Municipal Clerks and obtained her Certified Municipal Clerk credentials in August 2022.

David Glasser joined the District in 2023 as the Controller. Prior to joining the District, Mr. Glasser was the Finance Director for the City of Martinez, California. In that position, Mr. Glasser oversaw the finance, human resource, and information technology operations for the City. He has served as a finance executive in California municipal agencies for over 23 years. Mr. Glasser has also served as a public finance banker, financial advisor and bond analyst in the private sector. This included work for the San Francisco International Airport and Alameda County. He has more than 35 years of experience in finance and municipal management. He has a bachelor's degree in English from the State University of New York at Albany and a master's degree in public administration from the Rockefeller School at the State University of New York at Albany.

Robert L. Hannay joined the District in 2018 as Treasury Manager. Mr. Hannay is responsible for the oversight of the District's debt management, investment management, and rate planning. Mr. Hannay additionally provides financial management support to the District's retirement system. Prior to joining the District, Mr. Hannay worked in consulting, at a rating agency, at a financial advisory firm, and in public finance investment banking. Mr. Hannay has a bachelor's degree in civil engineering from Texas A&M University and master's degrees in civil engineering and city planning from the University of California, Berkeley. He is also a Chartered Financial Analyst (CFA) charterholder.

Jacqueline Lee joined the District in 2022 as the Debt Administrator. Ms. Lee is responsible for new money issuance and management of the outstanding debt portfolio. Prior to joining the District, she served as debt manager at the City of Oakland, California. Her previous experience also includes work in public finance investment banking and municipal advisory roles. She is a current or former board member of several public finance industry associations. Ms. Lee has a bachelor's degree in business economics from the University of California, Santa Barbara.

Employees and Employee Relations

As of January 21, 2026, the District had 1,755 employees in the Water System and 291 employees in the Wastewater System.

The District has four unions representing approximately 1,878 workers out of a total workforce of 2,046 employees: Local 2019 of the American Federation of State, County and Municipal Employees ("AFSCME") primarily represents professional, technical, and administrative office employees; Local 444 of AFSCME primarily represents skilled craft, operations, and maintenance employees; Local 21, International Federation of Professional and Technical Engineers represents supervisory employees; and Local 39, International Union of Operating Engineers represents water treatment/distribution employees.

Each of Locals 444, 21, 39, and 2019 are operating under Memoranda of Understanding (collectively, "MOUs"), approved by the District Board on July 8, 2025. The term of the MOUs with Local 444, 21, 39 and 2019 began on April 21, 2025 and extends through April 16, 2028. The MOUs are

comprehensive in scope and provide for binding arbitration for the resolution of grievances. The District has not had a strike or work stoppage since 1985. For a discussion of the District Employees' Retirement System, see "WASTEWATER SYSTEM FINANCES – Employees' Retirement System."

Over the next five years, approximately 19.20% of the District's workforce will be eligible for retirement, including 19.8% of employees in the Water System and 15.5% in the Wastewater System. As the workforce evolves, the District is committed to preparing for the future by investing in workforce development and sustainability. To support career growth, the District offers employees opportunities for advancement through programs like tuition reimbursement, skills training, and leadership development. Additionally, the District is dedicated to building a strong talent pipeline by offering a variety of paid internships and training programs designed to attract, recruit, and retain a diverse, skilled workforce. These programs provide high school, college, and graduate students with hands-on experience in fields such as engineering, water conservation, wastewater management, human resources, communications, skilled trades, administration, and information technology. The District also offers direct internships, where individuals are hired into part-time or limited-term positions, as well as sponsored internships, which allow participants to gain experience at the District while being employed by a community-based organization. These sponsored opportunities include both skilled trades and non-trades roles, such as information technology and ranger/naturalist positions. Beyond technical training, the District strives to foster a culture of professional development by providing ethics training, diversity and inclusion workshops, management development programs, environmental management system training, and fraud prevention and awareness education. Through these efforts, the District's goal is to prepare the next generation of skilled professionals while ensuring long-term workforce sustainability.

Geographic Area and Services

Originally formed to include nine cities covering 92.6 square miles, the District has grown by more than 450 separate annexations to a present area of 326 square miles (which excludes all waterbodies within the service area) in 20 incorporated and 26 unincorporated communities in both Alameda and Contra Costa Counties. It covers the eastern shore of San Francisco Bay from Carquinez Strait on the north to and including San Lorenzo on the south and it extends approximately 20 miles east, beyond the Oakland-Berkeley hills, into Contra Costa County.

The District's Water System serves this entire area, reaching approximately 50% of the combined population of Alameda County and Contra Costa County. Approximately two-thirds of the population within the District's service area resides in the cities of Alameda, Berkeley, Oakland, San Leandro, Richmond and Walnut Creek.

The Municipal Utility District Act was amended in 1941 to enable formation of special districts for wastewater service provision. In 1944, voters elected to form the District's Special District No. 1 to treat wastewater released into the San Francisco Bay. The District's Wastewater System presently serves approximately 740,000 people in an 88-square-mile area of Alameda and Contra Costa Counties along the east shore of the San Francisco Bay, extending from Richmond on the north, southward to Oakland's border with San Leandro. Domestic, commercial, and industrial wastewater is treated for the six participating cities of Alameda, Albany, Berkeley, Emeryville, Oakland and Piedmont, and for the Stege Sanitary District (which includes El Cerrito, Kensington and part of Richmond) (collectively, the "participating agencies"). Each of these participating agencies operates their own sewer collection system that discharges into the District's intercepting sewers. Waste received from the participating agencies' sewer collection systems is treated by the District. The District also accepts high-organic waste streams delivered in trucks. The wastes include domestic waste from septic tanks, fat, oil and grease from restaurants, and other food and drink wastes. The District's trucked-waste program continues to expand in the scope of wastes accepted. The District anaerobically digests the high-organic wastes with municipal solids to create renewable energy.

This energy is used to power the wastewater treatment facility, with excess energy sold through the electric grid.

Taxation of the District

All property of the District within the District’s boundaries generally is exempt from property taxation. District-owned land outside of the District’s boundaries is taxable, but improvements constructed on that land by the District are not taxable. As a public agency, the District is exempt from the payment of State of California (the “State”) income taxes and federal income taxes.

THE WASTEWATER SYSTEM

General

The District’s Wastewater System provides regional wastewater conveyance, treatment, and disposal services for an area within the District designated as Special District No. 1. Special District No. 1, a separate district within the District governed by the Board, was established in 1944 and is administered by the District’s Wastewater Department. The Wastewater System began operations in 1951.

Special District No. 1 intercepts, treats and disposes of wastewater within its wastewater service area, which includes the cities of Alameda, Albany, Berkeley, Emeryville, Oakland and Piedmont, and the Stege Sanitary District. Each of the participating agencies maintains its own separate sanitary sewer system (*i.e.*, a system designed to transport sewage separate from the pipe system constructed to convey storm water runoff directly to surface waters), and is responsible for collecting and conveying wastewater to the District interceptors. The participating agencies and Special District No. 1 operate under separate National Pollutant Discharge Elimination System (“NPDES”) permits issued by the Regional Water Quality Control Board San Francisco Bay Region (the “Regional Board”) and are separately responsible for their own collection, conveyance and/or disposal systems.

In addition to treating wastewater received from the participating agencies through their collection systems, the District also treats high-organic waste streams delivered to District facilities in trucks through its resource recovery program. The trucked wastes include domestic waste from septic tanks, industrial and commercial process wastes, fat, oil and grease from restaurants and other food and drink wastes. See “–Resource Recovery” below.

Table 1 shows the population trends for the seven largest cities within the District’s Wastewater System service area, Alameda and Contra Costa Counties and the State for the five years 2021 to 2025. As reflected in Table 1, over the five-year period 2021 through 2025, the California state population increased by approximately 0.4%, while the population of Alameda County declined by approximately 0.4%, and the population of Contra Costa County declined by approximately 0.4%. Oakland, the largest city in the District’s Wastewater System service area and the county seat of Alameda County, was the eighth most populous city in the State of California, based on January 1, 2025 population estimates.

⁽²⁾ As of January 1 of each year for 2021-2025; 2020 Benchmark as of April 1, 2020.

Source: State of California, Department of Finance, *E-4 Population Estimates for Cities, Counties, and the State, 2021-2025, with 2020 Census Benchmark*. Sacramento, California, May 2025.

The total civilian labor force in Alameda and Contra Costa Counties, representing all people who work or are seeking work, totaled 1,448,700 in 2024 (most recent calendar year for which information is available). In 2024, the most recent full calendar year of information available, the unemployment rate approximated 4.5% in both Alameda County and Contra Costa County. In comparison, the unemployment rate averaged 5.3% in both Alameda County and Contra Costa County. In comparison, the unemployment rate averaged 5.3% in the State of California and 4.0% in the nation as a whole for the same period. These unemployment rates reflect the recovery from the impact of the COVID-19 pandemic. In 2020, the unemployment rate approximated 8.5% in Alameda County, 8.7% in Contra Costa County, 10.1% in the State of California and 8.1% in the nation as a whole.

Table 2 shows the labor force and employment trends for Alameda and Contra Costa Counties, the State and the United States for the five years 2020 to 2024.

Wastewater Facilities

The District’s existing Wastewater System facilities consist of, among other things, the District’s Main Wastewater Treatment Plant in Oakland adjacent to the approach to the San Francisco-Oakland Bay Bridge (the “Main Wastewater Treatment Plant”), interceptors, force mains and pump stations for the conveyance of wastewater collected by the participating agencies to the Main Wastewater Treatment Plant, as well as certain wet weather facilities (the “Wet Weather Facilities”) which are operated during wet weather events when flows from the participating agencies’ collections systems exceed the capacity that can be treated at the Main Wastewater Treatment Plant.

The District’s interceptors consist of 29 miles of reinforced concrete gravity pipeline, ranging from 18 inches to 9 feet in diameter, and 8 miles of force main (pressurized) pipeline from pump stations for a

total of 37 miles of conveyance pipe. The interceptors collect wastewater from approximately 1,600 miles of public sewers owned and operated by the participating agencies. Fifteen pump stations, ranging in capacity from 1.5 to 60 million gallons per day (“MGD”), lift wastewater throughout the interceptors as it travels to the District’s Main Wastewater Treatment Plant for treatment prior to discharge of the treated effluent into the San Francisco Bay. The Main Wastewater Treatment Plant provides secondary treatment for permitted dry weather flow of up to 120 MGD and a maximum flow of 168 MGD during wet weather storm events. Primary treatment can be provided at the Main Wastewater Treatment Plant for a peak of up to 320 MGD, with peak influent hydraulic capacity of 415 MGD when utilizing an on-site 11-million gallon storage basin, a component of the District’s Wet Weather Facilities, which is used to temporarily store peak storm flows in excess of the permitted limits for treatment at the Main Wastewater Treatment Plant after flows subside.

Primary treatment removes floating material, oils and greases, sand and silt, and organic solids heavy enough to settle in water. Secondary treatment biologically removes most of the suspended and dissolved organic and chemical impurities that would otherwise reduce the oxygen content of the waters of the San Francisco Bay if allowed to decompose naturally. The treatment steps are pre-chlorination, screening, grit removal, primary sedimentation, secondary treatment using high-purity, oxygen-activated sludge, final clarification, biosolids digestion, dewatering and beneficial use of biosolids through land application at farm sites and as feedstock for compost and other fertilizer products. The treated effluent is then disinfected, dechlorinated, and discharged one mile off the East Bay shore through a deep-water outfall into San Francisco Bay.

The annual average daily flow through the District’s Main Wastewater Treatment Plant over the last five years is approximately 56 MGD. See “– Wastewater Flows” below. Peak daily flows from the participating agencies’ collection systems to the District’s interceptors increase significantly during wet weather primarily due to inflow and infiltration (“I&I”). Inflow is water that enters a sewer system from sources such as roof leaders, yard drains, area drains, maintenance hole covers, and cross connections between storm sewers and sanitary sewers. Infiltration is water that enters the system from the ground (particularly when saturated due to storms or flooding) through such means as defective pipes, pipe joints, connections or maintenance holes. Although the participating agencies’ wastewater collection systems are all separate sanitary systems designed to transport only sewage (with a separate stormwater system in place to discharge stormwater runoff), all sewer systems have some degree of I&I of surface water and groundwater.

District facilities designed to address increased flows during wet weather periods include three Wet Weather Facilities (Oakport, San Antonio Creek, and Point Isabel), as well as five overflow structures located at Temescal Creek, Oakland Inner Harbor (Alice Street), Oakland Inner Harbor (Webster Street), Elmhurst Creek, and San Leandro Creek.

The 158 MGD Oakport Wet Weather Facility, completed in 1990, provides primary treatment for peak wet weather flow diverted along the District’s South Interceptor. Following primary treatment, effluent from this facility is currently disinfected and discharged to East Creek Slough in the lower San Francisco Bay. The 100 MGD Point Isabel Wet Weather Facility, completed in 1993, accepts peak wet weather flows from the District’s North Interceptor, for primary treatment after which the effluent from this facility is currently disinfected and discharged to the central San Francisco Bay. The 51 MGD San Antonio Creek Wet Weather Facility, completed in 1996, provides preliminary treatment to wastewater diverted from the District’s South Interceptor. The effluent from this facility is currently disinfected and discharged to the Oakland Inner Harbor, in lower San Francisco Bay. As described herein, the operations of the District’s Wet Weather Facilities are subject to a NPDES permit issued by the Regional Board which prohibits the District from discharging from its Wet Weather Facilities to the San Francisco Bay except as

outlined in the Consent Decree. See “– Regulatory Matters – *Litigation Relating to the District’s Wet Weather Facilities NPDES Permit*” below.

The Wet Weather Facilities also serve as storage facilities. After a wet weather event, when the Main Wastewater Treatment Plant has available capacity, wastewater flows stored in these facilities can be returned to the interceptors for transport to the Main Wastewater Treatment Plant for secondary treatment prior to discharge.

During significant wet weather events, when the carrying capacity of the interceptors and/or the treatment capacity of the Main Wastewater Treatment Plant is exceeded or in the event of a major Wastewater System failure, the five overflow structures control the location of overflows and allow for the discharge of untreated sewage into the San Francisco Bay when necessary to avoid sanitary system overflows occurring in the collection system or at the Main Wastewater Treatment Plant. (A sanitary sewer overflow occurs when wastewater comes out of the sanitary sewer system, including when it enters a street, residence, business, or yard. This is usually caused by blockage, failure, or lack of capacity).

See also “– Regulatory Matters” below for a discussion of regulatory framework under which the District’s wastewater facilities operate, including its Wet Weather Facilities, and certain litigation relating thereto.

Wastewater Flows

Table 4 presents a ten-year record of wastewater flows through the Main Wastewater Treatment Plant, expressed as the average daily flow for each Fiscal Year.

Table 4

Wastewater Source Control Program

The District’s wastewater service area includes more than 20,000 commercial, industrial, and institutional accounts. See “WASTEWATER SYSTEM FINANCES – Rates and Charges.” In 1972, the District began a local source control program. Source control involves the removal of toxics such as heavy metals and organic pollutants before discharging wastes into the sewer system. The District’s Wastewater

Source Control Program issues permits and requires pretreatment of wastes by certain categories of industrial customers. The Wastewater Source Control Program has reduced approximately 93% of the toxic metals discharged into sewers, and the District's treatment process reduces the remaining toxic metals by approximately another 83%. These two steps have reduced by approximately 99% the toxic metals discharged by the Wastewater System into the San Francisco Bay since 1974. Since 1988, the District has expanded its local source control program efforts to include pollution prevention. Currently, the District is focused on reducing the discharge into the District's Wastewater System of fats, oils, grease, non-flushable wipes, and contaminants of emerging concern, such as pharmaceuticals. The District's pollution prevention efforts consist primarily of education and outreach, including distributing publications, attending outreach events, hosting in-person and virtual tours of the Main Wastewater Treatment Plant, and collaborating with numerous partners. In addition, the District sponsors a take-back program for fats, oils, grease and provides resources for customers to locate no-cost take-back programs for pharmaceuticals.

The District maintains and enforces a legally compliant wastewater control ordinance (the "Ordinance") which regulates the collection, treatment and disposal of wastewater and industrial wastes into the regional wastewater collection and treatment system. The Ordinance provides legal authority for the District to operate its discharge permitting program as required by federal regulations and specified in the NPDES for the Main Wastewater Treatment Plant. The Ordinance includes general and specific prohibitions on the discharge of wastewater, permit terms and requirements, administrative authority, enforcement procedures and penalties, and terms related specifically to trucked-in wastes as part of the District's resource recovery program.

Biosolids Management

The solid, stabilized organic materials removed from the wastewater treatment process are called biosolids. The District generates approximately 75,000 wet tons per year of biosolids from wastewater treatment. Because there is only approximately one and a half days of biosolids storage capacity available at the Main Wastewater Treatment Plant, each day's biosolids production must have a reliable daily destination for beneficial use. The District's biosolids from its Main Wastewater Treatment Plant are beneficially used through a combination of land application on farmland and feedstock for compost or liquid fertilizer. Biosolids handling is managed under one main contract, which has a scheduled expiration date of June, 30, 2028, as well as a smaller contract with a liquid fertilizer facility, which has a scheduled expiration date of June 30, 2027.

The District has a customized biosolids management program that focuses on continuous improvement, environmental performance beyond meeting regulatory requirements, proactive communications, and implementation of corrective and preventive measures to address programmatic issues. In addition to the District's internally-focused controls, District staff tracks regulatory, scientific, and public concern issues related to biosolids. In particular, District staff participates in monthly calls with the California Association of Sanitation Agencies Regulatory Workgroup and regular meetings with the Bay Area Biosolids Coalition.

In September 2016, Senate Bill 1383 ("SB 1383") was signed into law and established methane emissions reduction targets in a state-wide effort to reduce short-lived climate pollutants, such as methane. Among other things, SB 1383 set statewide targets to reduce 50% of organic waste going to landfills by 2020, and a 75% reduction of organic waste going to landfills by 2025 (based on 2014 levels). In addition, SB 1383 directed the State's Department of Resources Recycling and Recovery, in consultation with the California Air Resources Board, to develop regulations to achieve the organic waste reduction targets set forth in SB 1383. The regulations developed by the Department of Resources Recycling and Recovery became effective on January 1, 2022. SB 1383 and the related regulations significantly limit the ability to use biosolids as landfill alternative daily cover, a practice which the District undertook for several decades

but tapered beginning in 2017. Biosolids management costs gradually increased as the District reduced the use of biosolids as landfill alternative daily cover. The current biosolids handling contracts do not allow for any landfilling of the biosolids. The initial unit prices under these contracts were approximately 15% higher than the former contracts that included landfill alternative daily cover as an option.

Consistent with the District’s Integrated Main Wastewater Treatment Plant Master Plan and Board Policy 8.02, the District continues to undertake activities to ensure long-term, cost-effective, and beneficial use of biosolids produced at the Main Wastewater Treatment Plant. The District continues to advocate for the benefits of land application and explores alternative beneficial uses such as composting, conversion to liquid fertilizer, and other technologies to diversify options for end uses. The District is active with industry associations at the State and national level to advocate for expanded beneficial use of biosolids. In 2017, the District joined the multi-agency Bay Area Biosolids Coalition dedicated to expanding sustainable uses for biosolids. The Bay Area Biosolids Coalition funds local research on the environmental safety of biosolids and has participated in a regional collaboration regarding biosolids land application in the bay lands of the San Francisco Bay. Participation in the Bay Area Biosolids Coalition helps the District stay apprised of concerns and opportunities that affect all San Francisco Bay Area wastewater agencies.

Regulatory Matters

General Regulatory Framework. The construction and operation of wastewater treatment facilities and the discharge of wastewater are highly regulated. The two major laws governing the Wastewater System are the federal Clean Water Act enacted in 1972 (the “Clean Water Act”) and the State’s Porter-Cologne Act first enacted in 1969 (the “Porter-Cologne Act”). Both laws require that policies, plans, requirements, and standards for discharges be developed for all water bodies to protect the beneficial uses of the water. The Clean Water Act also regulates the disposal of sewage sludge and authorizes the adoption of sediment standards. The Porter-Cologne Act specifically requires the adoption of sediment standards for enclosed bays and estuaries. In 2008, the State approved sediment quality objectives for enclosed bays and estuaries, including the San Francisco Bay.

The USEPA, the federal agency charged with implementation and enforcement of the Clean Water Act, has delegated much of the planning, permitting and enforcement activities to the states. In California, the State Water Resources Control Board (“SWRCB”) develops policies, plans, requirements, and discharge standards for the three types of State waters: inland surface waters, enclosed bays and estuaries, and the ocean.

The Clean Water Act requires the adoption of criteria for priority toxic pollutants that may reasonably be expected to interfere with designated beneficial uses of the waters of the State. As they apply to inland surface waters, enclosed bays, and estuaries, these criteria are found in the California Toxics Rule (“CTR”) promulgated by the USEPA in 2000 (40 C.F.R. §131.38), and are implemented by the SWRCB’s “Policy for Implementation of Toxics Standards for Inland Surface Waters, Enclosed Bays, and Estuaries of California” (commonly known as the State Implementation Plan or “SIP”) approved in 2000 and amended in 2005 (SWRCB Order No. 2005-0019). These two documents form the basis of the NPDES permitting process for Publicly Owned Treatment Works (“POTWs”) in the State. The CTR provides the Water Quality Objectives for priority toxic pollutants and the SIP prescribes the methodology for determining whether a limit for a toxic pollutant should be included in a NPDES permit and the method for calculating the limit if one is needed.

In December 2022, the SWRCB updated the Statewide Waste Discharge Requirements (“WDR”) for Sanitary Sewer Systems (SWRCB Order No. WQ-2022-0103-DWQ). The WDR is a proactive approach to ensure system-wide operation, maintenance, and management plans to reduce sewer system overflows. Basic requirements of WDR continue to include on-line reporting of sewer system overflows and the

development of a Sewer System Management Plan. The District is in compliance with the online reporting of sewer system overflows and Sewer System Management Plan requirements of WDR.

The Regional Board is the enforcement arm of the State and federal water pollution control programs in the San Francisco Bay region. The Regional Board issues NPDES permits under Section 401 of the Clean Water Act, and establishes waste discharge requirements under the Porter-Cologne Act. Discharge permits are issued for a five-year period. The District's Wastewater System currently has two NPDES permits, one for the Main Wastewater Treatment Plant and one for the Wet Weather Facilities. The NPDES permit for the Main Wastewater Treatment Plant (Order No. R2-2020-0024) was reissued by the Regional Board in 2020 and became effective on November 1, 2020. The renewal application for the Main Wastewater Treatment Plant permit was completed and submitted to the Regional Board in January 2025. The permit expiration date was October 31, 2025, but the permit has been administratively continued pending the issuance of a new permit by the Regional Board. The current NPDES permit for the Wet Weather Facilities (Order No. R2-2025-0006) was reissued by the Regional Board in 2025. The permit became effective on May 1, 2025 and is scheduled to expire on April 30, 2030. See also “– *Litigation Relating to the District's Wet Weather NPDES Permit*” below.

On March 4, 2025, the Supreme Court of the United States in *City and County of San Francisco v. Environmental Protection Agency*, 604 U.S. 334 (2025) (“City and County of San Francisco”) held that the Clean Water Act does not authorize the USEPA to impose “end-result” requirements in its discharge permits. “End-result” requirements are permit provisions that do not delineate what a permittee must do or refrain from doing but instead make a permittee responsible for the quality of the water in the body of water into which the permittee discharges pollutants. The decision of the Supreme Court requires the USEPA to follow the Clean Water Act by establishing clear requirements that prevent pollution by restricting discharges before those discharges reach the receiving waters. The District is evaluating the impact, if any, that the decision in City and County of San Francisco will have on the operations or finances of the Wastewater System.

Other Agencies with Regulatory Oversight Affecting the Wastewater System. Other regulatory agencies with approval or oversight responsibilities over the construction or operation of the Wastewater System include the Bay Area Air District (“BAAD”) (formerly referred to as the Bay Area Air Quality Management District), the Bay Conservation and Development Commission, the California Department of Public Health, and the U.S. Army Corps of Engineers. The roles these other agencies play with respect to operations of the Wastewater System are summarized as follows:

The Bay Area Air District: responsible for administering and enforcing local, state, and federal air emissions regulations and issues air permits under Title V of the federal Clean Air Act (the “Clean Air Act”). The District currently has a BAAD-issued Title V air permit for the Main Wastewater Treatment Plant, which expired on November 6, 2024, and is administratively extended beyond that date until a new permit is issued. The Title V renewal application for the new permit was submitted to BAAD on April 30, 2024. BAAD has also issued several permits to operate the District's Wet Weather Facilities and pump stations. The Title V air permit is issued for a five-year period. Permits to operate for other facilities are generally issued annually.

The Bay Conservation and Development Commission: responsible for approving all projects undertaken within San Francisco Bay or within 100 feet of the mean high tide line of the Bay.

The California Department of Public Health: responsible for setting standards for the use of recycled water.

The U.S. Army Corps of Engineers: responsible for approving all construction projects undertaken within navigable waters of the United States.

District Permit Compliance History. The District's Wastewater System currently has two NPDES permits, one for the Main Wastewater Treatment Plant, and one for the Wet Weather Facilities. As described below, operation of the District's Wet Weather Facilities is also subject to a Consent Decree effective as of September 22, 2014. Except where expressly authorized by permit, sewer system overflows and the discharge of partially treated or untreated wastewater that reach the surface waters of the U.S. are violations of the Clean Water Act and are subject to fines by the SWRCB and the Regional Board.

In the last five years, the District has had fines imposed for unauthorized discharges and permit violations under its NPDES permits for the Wastewater System on certain occasions, which has resulted in fines totaling approximately \$848,000. These fines related primarily to wet weather events.

In October 2021, a significant unauthorized discharge occurred at the Point Isabel Wet Weather Facility during a large storm. The discharge consisted of 12.2 million gallons of chlorinated effluent and 4.3 million gallons of partially treated effluent. The District investigated the cause of the discharge and has implemented several corrective actions, including an updated comprehensive dechlorination dosing procedure and program. The fine for this discharge was issued in July 2022. The total fine for this incident was \$816,000 and is included in the aggregate total of \$848,000 described above.

In addition to the incidents described above, the District has also self-reported to the Regional Board eight sanitary sewer overflows between 2021 and 2025, which were all above 10,000 gallons. Six of the sanitary sewer overflows were related to an unusually large storm event that occurred on December 31, 2022. The Regional Board has not taken enforcement actions with respect to these six sanitary sewer overflows since the District demonstrated proper operation of the Wastewater System and the cause of the overflows was primarily weather-related. For the two remaining overflows, the District has paid stipulated penalties of \$25,000.

Two effluent limit violations occurred in January 2026 at the District Wet Weather Facilities. As of the date of this Official Statement, no penalties have been assessed for these incidents. Corrective actions have been taken to prevent reoccurrence of the violations.

The District does not expect that any fines required to be paid by the District in connection with sanitary sewer overflows and other instances of violations under the District's existing permits that the District is aware of will have a material adverse effect on the District's finances or operations.

The District has had no NPDES effluent limit permit violations at its Main Wastewater Treatment Plant since August 1999.

The Main Wastewater Treatment Plant is also subject to a Major Facility Review Permit (also known as a Title V permit) issued by the BAAD pursuant to Title V of the Clean Air Act, the California Health & Safety Code, and BAAD regulations. The District has had five violations issued for non-compliance with the Title V permit during the last five years. Three of the violations were for the improper release of digester gas to the atmosphere, one was for a nitrogen oxides exceedance on an emissions check on a cogeneration engine, and one was for being late on annual tests on the District's gasoline dispensing facility. Fines for two of the violations noted above were imposed by BAAD in the last five years, totaling \$20,000 in the aggregate. Several corrective actions have been implemented by the District, including equipment upgrades, standard operating procedure updates, and other actions, to prevent the reoccurrence of the incidents that resulted in such violations.

Litigation Relating to the District's Wet Weather Facilities NPDES Permit. On January 12, 2007, the SWRCB on its own motion for review issued a draft order (the "Draft SWRCB Remand Order") reviewing the District's 2005 Wet Weather Facilities NPDES Permit (Regional Board Order No. R2-2005-0047) and concluding that the 2005 Wet Weather Facilities NPDES Permit and time schedule order (Regional Board Order No. R2-2005-0048, the "TSO") approved in connection with the issuance of the Wet Weather Facilities NPDES Permit by the Regional Board in September 2005 were inconsistent with the mandates of the Clean Water Act (33 U.S.C. §1251 et seq.) and the implementing USEPA Regulations (40 C.F.R. Part 123). The Draft SWRCB Remand Order concluded that the District's 2005 Wet Weather Facilities NPDES Permit failed to implement secondary treatment requirements and to ensure compliance with applicable water quality standards. Following a public hearing held on May 1, 2007, the SWRCB approved the Draft SWRCB Remand Order with slight modifications (SWRCB Order No. WQ 2007-0004, the "SWRCB Remand Order") and remanded the 2005 Wet Weather NPDES Permit and the TSO to the Regional Board for revisions consistent with the SWRCB Remand Order.

On January 14, 2009, the Regional Board issued the District a subsequent Wet Weather Facilities NPDES permit (Regional Board Order No. R2-2009-0004), effective for the five-year period January 14, 2009 through January 13, 2014. Previous permits issued by the Regional Board allowed the District to discharge flows from its three Wet Weather Facilities during heavy storm events, following primary treatment and disinfection, as part of a regional solution to help prevent sewer overflows on streets in the East Bay communities. This approach was consistent with USEPA policy at the time the Wet Weather Facilities were constructed. The 2009 permit, however, was more stringent and prohibited the District from discharging any flows from its Wet Weather Facilities to San Francisco Bay even during heavy storm events. Recognizing that discharges from the Wet Weather Facilities cannot be immediately halted without causing sewer overflows, the Regional Board simultaneously issued a Cease and Desist Order ("CDO," Regional Board Order No. R2-2009-0005) requiring the District to develop a plan for eliminating discharges from the Wet Weather Facilities at the earliest possible date. The CDO noted that the time schedules therein accounted for the considerable uncertainty in determining effective measures to achieve compliance and may be revisited. The inability of the District to meet the terms of the new Wet Weather Facilities NPDES permit also prompted the USEPA, the SWRCB and the Regional Board to seek judicial entry of a Stipulated Order memorializing the compliance plan and rendering it enforceable. Towards that end, a Stipulated Order for Preliminary Relief (the "SO") was negotiated among the District and the USEPA, the SWRCB, the Regional Board and the U.S. Department of Justice. After negotiations were completed, the regulatory agencies initiated a lawsuit against the District on January 15, 2009 (*United States of America, et al. v. East Bay Mun. Util. Dist.*, No. CV 09-0186 RS (N.D. Cal.)) and simultaneously filed the proposed SO for the Court's approval. The SO was approved by the Court and became effective on July 22, 2009.

The objective of the SO was to develop remedial measures to address the excess wet weather flow issues. It was intended as an interim remedy and was designed to develop information to tailor a final remedy for inclusion in a final Consent Decree that was anticipated to fully and finally resolve the litigation. The SO required the District, among other things, to initiate a number of programs, including: (i) a flow monitoring and data assessment program, including the monitoring of flows to the District's interceptor system from the participating agencies that discharge into the District's interceptors (see "Wastewater Facilities" above), the modeling of peak flows under design storm conditions, and the development of alternative sets of capacity flow limits; (ii) a private sewer lateral regional ordinance program requiring the District to develop, adopt and implement a regional ordinance setting standards for the performance of lateral sewer pipes that extend from privately-owned structures to the participating agencies' collection systems and requiring property owners to obtain private sewer lateral compliance certificates at specified junctures, such as upon sale of property, upon obtaining building permits, and upon requests for changes in District water meter size; (iii) a private lateral incentive program requiring the District to provide \$2 million per year in incentives to encourage private lateral inspection and replacement; (iv) an interceptor system

asset management program to develop protocols for interceptor condition assessment, including an inspection of the entire system within five years and annual repairs and reporting; and (v) development of a collection system asset management template through an interactive process among the District, the participating agencies and regulators.

The SO programs represented the first phase in the development of a long-term solution to address peak wet weather discharges. In parallel to the litigation and SO involving the District, the participating agencies that cause and contribute to the District's Wet Weather Facility discharges entered into their own SO with the USEPA, the SWRCB, the Regional Board and the U.S. Department of Justice, which was approved by the Court in a related lawsuit and became effective on September 6, 2011. The activities undertaken by the participating agencies under their parallel SO yielded further information and progress toward development of a long-term solution.

In January 2013, the District and the participating agencies began joint settlement negotiations with the USEPA, the SWRCB, the Regional Board and the U.S. Department of Justice with a goal of adopting a long-term Consent Decree and resolving both parallel lawsuits, which were consolidated. The negotiators for all parties reached tentative agreement on a proposed Consent Decree, which was approved for execution by their respective approving officials in July 2014. On July 28, 2014, the proposed Consent Decree was lodged with the federal court by the regulatory agencies, and the terms of the proposed Consent Decree were publicly released. On September 22, 2014, the U.S. District Court entered the Consent Decree, which became effective the same day. The final Consent Decree supersedes the SO and lays out a program of work by the District and the participating agencies designed to result in reducing peak wet weather flows over time to the point that the District's Wet Weather Facilities would no longer discharge during storm events smaller than a pre-determined rainfall event. Once the program of work is complete, it is anticipated that, in most storms, the District's Wet Weather Facilities would be used only to provide temporary storage of peak flows which would be drained back to the District's Main Wastewater Treatment Plant for secondary treatment and discharge.

The Consent Decree is expected to be in effect for approximately 22 years. The Consent Decree requires the District and the participating agencies to demonstrate by mid-2036 that sufficient work has been performed on their regional wastewater facilities to eliminate discharges from the District's Wet Weather Facilities except during storm events of exceptional magnitude. Under the terms of the Consent Decree, the participating agencies are required to rehabilitate approximately 500 miles of their local wastewater collection systems to reduce infiltration and inflow. The District is required to, among other things: (i) continue the regional private sewer lateral ordinance program developed pursuant to the SO; (ii) upgrade segments of its interceptors; (iii) develop and implement a regional technical support program to identify inflow sources within the participating agencies' regional collection systems and assist in prioritizing them for repair by the participating agencies; and (iv) design and implement a plan to evaluate performance through flow monitoring and modeling and to report to the regulatory agencies on the overall progress toward achieving the Consent Decree mandates. The Consent Decree requires the District and the participating agencies to meet certain pre-established interim benchmark percentage reductions for Wet Weather Facility discharges (8 and 16 years into the Consent Decree term, which occurred in September 2022 and will occur September 2030, respectively). Failure to achieve any of these targets would result in additional flow monitoring obligations under the Consent Decree and may also result in revisions to the work plan developed under the Consent Decree. Work plan revisions could include additional work obligations for the District and/or the participating agencies. If and when work plan revisions become necessary, the Consent Decree parties would negotiate the nature and scope of such revisions and, if additional expenditures are required to implement the revisions, each party's share of such expenditures. In connection with the September 2022 review of District Wet Weather Facilities discharges, the District was found to have met the interim benchmark percentage reductions for Wet Weather Facility discharges prescribed under the Consent Decree.

The District's identified goal in developing the Consent Decree was to achieve a plan that serves the interests of the District and its ratepayers by adequately reducing wet weather flows while ensuring any necessary financial investments are apportioned and scheduled in the most cost-effective and equitable manner possible. The District currently estimates that the cost of implementation of the programs and activities required to be undertaken by the District under the Consent Decree (exclusive of certain interceptor improvements which the District would expect to budget and undertake in the normal course of its long-term capital improvement program) will average approximately \$5 million per year over the life of the Consent Decree, portions of which are ongoing projects or programs included in the current capital and operating budgets. Under the terms of the Consent Decree, the District and the participating agencies paid certain civil penalties, the District's share of which was \$201,600. The Consent Decree provides for the possible future imposition of financial penalties on the District and/or the participating agencies in the event of failure to perform the required work or meet a deadline established under the Consent Decree, for sanitary sewers overflows from District facilities which reach waters under Clean Water Act jurisdiction, and for wet weather facilities discharges which do not meet effluent limits for specified pollutants or occur after the Consent Decree's deadlines. The Consent Decree states that payment of stipulated penalties is in addition to any other rights or remedies available by reason of a failure to comply with the requirements of the Consent Decree or other applicable laws, regulations, or permits.

Future Statutory and Regulatory Compliance. As noted above, the construction and operation of wastewater facilities and the discharge of wastewater are highly regulated activities. Federal, State and local standards and regulations are subject to change. Changes in the scope and standards for regulation of wastewater systems, such as the District's Wastewater System, may lead to more stringent operating requirements and the imposition of future administrative or judicial orders issued by federal or State regulators or a court. Compliance with future requirements and orders that may be adopted could impose substantial additional costs on the Wastewater System. Furthermore, claims against the Wastewater System for failure to comply with applicable laws and regulations could be significant. The District is actively involved with major wastewater industry associations and routinely monitors and participates in the regulatory process in order to ensure that a "sound science" approach is applied in determining the need, and (if deemed necessary) implementation approach, for potential regulatory changes. However, no assurance can be given that the laws and regulations currently in effect will not change or that the Wastewater System will always be able to obtain all required operating permits or that the cost and/or impact of compliance with applicable laws, regulations or orders will not adversely affect the finances or operations of the District's Wastewater System.

Wastewater often contains large amounts of nitrogen and phosphorus, known as nutrients. There is data indicating that there are potential impairment issues in the San Francisco Bay related to the excess nitrogen, a significant portion of which come from wastewater treatment plants. Excessive nutrients are a major contributor to harmful algal bloom (or "red tide"), which cause a depletion in dissolved oxygen levels and could result in the death of aquatic species. The San Francisco Bay experienced harmful algal bloom in 2022 and 2023.

The District is a principal agency of the Bay Area Clean Water Agencies ("BACWA"), a joint powers agency, formed under the California Government Code by the five largest wastewater treatment agencies in the San Francisco Bay Area, presently supporting a multi-year work plan to study possible impairment of the San Francisco Bay due to nutrients. BACWA is also engaged in an effort with the Regional Board that resulted in the development of a watershed-based permit for all of the San Francisco Bay wastewater agencies in order to provide a level of regulatory certainty for the timeframe of the study. The NPDES permit (Regional Board Order No. R2-2014-0014), which became effective on July 1, 2014, required wastewater agencies to monitor and evaluate approaches to reduce nutrient discharges, and provided financial support to fund regional scientific studies investigating nutrient impacts to San Francisco Bay. This permit expired on June 30, 2019 and was replaced with a second nutrient watershed NPDES

permit (Order No. R2-2019-0017) on July 1, 2019. This second permit includes total inorganic nitrogen (“TIN”) discharge load targets for each BACWA agency (based on each agency’s previous TIN load to the San Francisco Bay).

On July 10, 2024, the Regional Board approved a third nutrient watershed NPDES permit (Order No. R2-2024-0013). The third nutrient watershed NPDES permit took effect on October 1, 2024, which replaced the second nutrient watershed NPDES permit. This third permit requires all wastewater treatment plants discharging into the San Francisco Bay to reduce dry season TIN loads to the San Francisco Bay by 40% regionwide compared to 2022 loads. Wastewater treatment plants will have ten years to complete the necessary improvements to comply with the reduction requirements of the third nutrient watershed permit. The third nutrient watershed permit also includes interim and final effluent seasonal water-quality based effluent limitations for specific entities that discharge effluent in the San Francisco Bay. Compliance with such limitations is determined seasonally based on the discharges from May 1 to September 30. The District’s interim effluent limit is 11,000 kilograms (“kg”) per day of TIN, and such limit will remain applicable to the District through September 30, 2034. On October 1, 2034, the final effluent limitations are scheduled to take effect. Under the third nutrient permit, the District’s final effluent limit is 3,300 kg per day of TIN, which represents a 65% reduction from the District’s 2022 TIN load. The third nutrient permit also includes provisions that require dischargers to provide annual reports regarding compliance with the limitations on TIN content in effluent, progress on reducing TIN loads in effluent and other specified information relating to TIN reduction and measures taken and planned to be taken by the discharger. District staff is currently evaluating options to ensure the District’s future TIN discharge requirements will be met. In 2020, the District began a biological nutrient reduction (“BNR”) pilot study to explore nutrient removal options that would utilize the District’s existing secondary treatment process. The BNR pilot study has demonstrated the ability to significantly reduce the TIN load in District effluent. In 2025, the District expanded the BNR pilot study to a full scale treatment program, with 50% of the secondary treatment process being operated for BNR. The District is also evaluating additional facilities that will need to be constructed to reliably meet the effluent nutrient limitations in the third nutrient watershed permit as part of the Nutrients Master Plan Update (“NMPU”) project. Depending on the measures that the District determines are necessary to comply with the limitations on nutrient discharge that are in the third nutrient watershed permit, a significant capital investment by the District may be necessary in connection with the implementation of additional nutrient removal infrastructure. The District currently expects nutrient compliance investments to be addressed within the existing CIP forecast, subject to refinement through the NMPU. The NMPU is evaluating the most cost-effective solutions to reliably meet the nutrient load limits in the third watershed permit. The solutions being evaluated include a variety of enhancements to the full-scale BNR program, improvements to the primary treatment process to divert nutrients to the digesters, addition of a new sidestream process that would remove nitrogen returned from the dewatering process to the secondary treatment system, and a tertiary nutrient removal process downstream of the secondary treatment system. The NMPU will also look at the long-term outlook for future nutrient regulations to ensure that nutrient removal processes implemented in the near term are compatible with future, more stringent nutrient limits.

Per- and polyfluoroalkyl substances (“PFAS”) are synthetic chemical substances with properties that do not break down in the environment. Due to their water-resistant properties, they are commonly used in cleaners, textiles, papers, paint, firefighting foam and insulation. There are currently no federal or state regulations establishing maximum concentration levels of PFAS in wastewater. However, in recent years, federal and state agencies have undertaken a variety of efforts towards the development of legislation, laws and regulations regarding PFAS, focused on limiting levels of PFAS in drinking water sources. SWRCB’s Division of Drinking Water has established notification and response levels for the detection of certain PFAS in drinking water and, in 2024, the USEPA established maximum contaminant levels for certain PFAS detected in drinking water.

In April 2024, USEPA finalized a rule (40 C.F.R. Part 302) (the “CERCLA PFAS Rule”) which designates PFAS as hazardous substances under the Comprehensive Environmental Response, Compensation, and Liability Act. Although the CERCLA PFAS Rule does not exempt wastewater treatment facilities, the USEPA enforcement discretion policy, which was concurrently released in April 2024, states that the USEPA does not intend to pursue response actions from publicly-owned treatment works. The enactment of future state or federal regulations regarding PFAS in wastewater could impact the permitted end uses for the District’s biosolids and increase the costs associated with biosolids management. In addition, if maximum concentration levels of PFAS in wastewater effluent are established by future state or federal regulations, the District expects that the additional effluent treatment processes necessary to comply with such regulations would increase treatment costs. The District is continuing to support research to better understand the sources contributing PFAS to wastewater and conducts outreach to reduce PFAS at the source.

Resource Recovery

In 2001, the District initiated a pilot program to provide revenue enhancement for the Wastewater System through the utilization of excess dry weather capacity at its Main Wastewater Treatment Plant to accept trucked waste from outside the District’s service area. The District’s resource recovery program currently accepts more than 100 daily deliveries of various trucked liquid and solid waste streams from outside the service area of Special District No. 1 for disposal in an environmentally-sound manner. High-strength trucked wastes are discharged into underground tanks, processed, and anaerobically co-digested with biosolids. Low-strength trucked wastes are discharged into underground tanks and processed through the entire treatment process. High-strength wastes provide an additional source of methane gas for use in the District’s power generation plant at the Main Wastewater Treatment Plant (see “– Power Generation/Energy Recovery” below). All trucked-in wastes generate an additional source of revenue for the Wastewater System through the collection of tipping fees charged to the trucked waste haulers. See also “WASTEWATER SYSTEM FINANCES – Resource Recovery Revenues.”

Related Litigation. On April 1, 2021, Waste Management of California (“WMAC”) filed a lawsuit against the District alleging the District had breached an agreement with WMAC to receive and process commercial food waste at a facility to be constructed by the District. WMAC’s suit asserted that the District’s failure to build the facility and receive its food waste caused WMAC to incur damages in the form of additional hauling and processing costs and lost revenues. WMAC sought damages for its increased processing costs for the ten-year contractual period of July 1, 2016 through June 30, 2025. Additionally, WMAC sought to have the District defend and indemnify it against a \$24,000,000 liquidated damages assessment against it by the City of Oakland, which asserts in part that WMAC breached its own contractual obligations to the City of Oakland regarding the processing of organic waste. The District disputed that it has any obligation to defend or indemnify WMAC. On February 24, 2023, the District entered into a settlement agreement with WMAC. Pursuant to the terms of the settlement agreement, the District paid WMAC \$15,000,000, and WMAC released all past and future claims related to District’s alleged breach of its agreement with WMAC, except the settlement preserved WMAC’s indemnity claim related to the liquidated damages assessed against WMAC by the City of Oakland. It is the District’s position that the period during which WMAC could assert a claim for indemnification by the District for liquidated damages WMAC may ultimately be obligated to pay to the City of Oakland expired in December 2024 and no liability is reserved related to this matter. On October 31, 2025, WMAC filed suit against the City of Oakland in Alameda County Superior Court which asks the court to invalidate the City of Oakland’s liquidated damages assessment and declare WMAC’s entitlement to certain contractual modifications. WMAC’s lawsuit alleges the liquidated damages primarily arose from the District’s alleged contractual breach. As of the date of this Official Statement, WMAC has neither sued the District nor reasserted its indemnity claim against the District. In the event that WMAC does assert or renew any claims against the District, the District believes it has meritorious defenses based on the statute of limitations and other

grounds. The District is unable to predict the outcome of the dispute between the WMAC and the City of Oakland or any related litigation between WMAC and the District that may ensue.

Power Generation/Energy Recovery

In addition to biosolids, another wastewater treatment byproduct is methane gas, which is produced by the sludge digestion process. The District currently operates a 10.8 megawatt (“MW”) power generation plant fueled by the methane gas produced at the Main Wastewater Treatment Plant, consisting of three 2.1 MW engines installed in 1985 and an additional 4.5 MW turbine installed in 2011, which is utilized to supply energy to operate the Main Wastewater Treatment Plant. As a result of the installation of the additional turbine in 2011, the District is able to generate more electric energy than is required to operate the Main Wastewater Treatment Plant, making the District’s Main Wastewater Treatment Plant one of the first net electricity producing wastewater facilities in the United States. Electrical energy produced in excess of that needed for plant operations is sold through the utility grid, currently under a ten-year power purchase agreement expiring on June 30, 2035. The ability to generate power to operate the Main Wastewater Treatment Plant facility reduces the District’s exposure to electricity cost volatility in its Wastewater System operations and provides additional revenue through the sale of electricity and associated renewable energy credits.

Climate Change

The effects of global climate change are expected to increase the risk of inundation at low-lying wastewater facilities as sea levels rise. In addition, higher intensity storms are expected in California as a result of climate change, which are projected to result in potentially higher peak wet weather flow events. The District completed a Wastewater Climate Change Plan in June 2020. The Wastewater Climate Change Plan was an expansion of the District’s efforts to assess the impact of climate change on the Wastewater System facilities and operations and propose responses to such impacts. The Wastewater Climate Change Plan included an assessment of the District’s contribution to greenhouse gas (“GHG”) emissions, mitigation measures to reduce GHG emissions, an assessment of the District’s vulnerability to climate change impacts and adaptation strategies to be implemented by the District.

The Wastewater Climate Change Plan builds upon the District’s other climate change policies and the District’s Strategic Plan. The District’s Strategic Plan identifies the goals, strategies, objectives, and key performance indicators and guides District staff in setting priorities and allocating resources. The Strategic Plan is reviewed and updated every two years. In 2008, the District incorporated climate change into its Strategic Plan. The District prepared a Climate Action Plan in 2021 that focused on sustainability and resilience, and acknowledges impacts and vulnerabilities, and includes mitigation measures and adaptation strategies to manage changing climate and its impact on the District’s water resources. The District updated the Climate Action Plan in 2024.

In addition, the District adopted a Sustainability and Resilience Policy, which sets forth an overarching objective for the District to consider environmental, social, and economic impacts in the District’s policies, programs, and work practices. It also establishes a specific objective for the District to identify and implement projects and plans that mitigate climate change impacts and reduce GHG emissions.

The District also adopted a policy (Policy 7.07) to promote energy efficient practices within the District’s Wastewater and Water Systems, service area and watersheds, minimize reliance on fossil fuels, diversify its energy sources, reduce energy costs, and strive to achieve a goal of being carbon neutral for direct and indirect GHG emissions. To support this policy, the District adopted GHG reduction goals of achieving carbon neutrality by 2030 for the Water System and the Wastewater System, by prioritizing actual emission reductions and applying emissions credits to residual emissions that cannot be eliminated or are

outside of the District's control. Emerging GHG issues, such as process emissions related to wastewater treatment and discharge, are to be estimated and reported based on the most recent methodology available but are not included in District goals.

In furtherance of the District's objective of reducing GHG, the District utilizes anaerobic digestion to treat the solids from the wastewater treatment process, which produces biogas. This biogas is combusted and converted to energy. The District's Wastewater System resource recovery program, which has operated since 2002, creates additional renewable energy by accepting trucked-in organic wastes. The program reduces GHG emissions in three ways. First, the enclosed anaerobic process produces methane, which is then combusted to produce renewable energy and carbon dioxide. Without this process, the available disposal methods for some of these wastes would result in the uncontrolled releases of methane gas, which has 30 times more global warming potential than carbon dioxide. Second, combustion of methane generates renewable electricity, which displaces fossil fuel-based electricity and associated GHG emissions. Third, anaerobic digestion residuals, or biosolids, are land applied whereas carbon is partially sequestered in the soil.

In its operations, for light-duty applications, the District is investing in more zero emission vehicles (ZEVs). Every passenger vehicle in the District's fleet is either a hybrid or ZEV. For its medium and heavy-duty fleet, the District has transitioned to nearly 100% renewable diesel vehicles, which is manufactured using organic materials such as waste animal fat or used cooking oil. Renewable diesel reduces GHG emissions when compared to petroleum-based diesel and has other benefits such as lower tailpipe particulate emissions.

In connection with the preparation of the Wastewater Climate Change Plan, the District performed a climate impact vulnerability assessment of the Wastewater System facilities to identify the facilities most at risk, when such facilities are expected to be impacted by sea level rise and other climate change impacts, the investments required to mitigate such risks, and the timing of such investments. The primary climate impact identified by the climate impact vulnerability assessment was sea level rise, due to proximity of the District's facilities to the San Francisco Bay shoreline. Secondary risks identified by the climate impact vulnerability assessment included more intense rainfall events, which could increase peak wet weather flows in District interceptor sewer pipelines, and drought, which could reduce sewer flows due to water conservation in response to drought.

The District expects that the impact of sea level rise will be moderate for several decades, until the sea level rises by more than three feet, which is not expected to occur until the year 2100. In the near term, the District projects the impact of sea level rise will be limited to temporary shallow flooding of access roads to District facilities. The District implemented climate change design guidelines, which determine the appropriate elevation to install sensitive equipment, such as electrical and control panels, to avoid damaging equipment from temporary flooding.

The District is undertaking sea level rise mitigation measures through a cooperative, regional approach with other jurisdictions, agencies, and land owners. A cooperative approach allows the District to pool resources with other jurisdictions, agencies, and land owners and to develop multi-benefit projects that, in addition to mitigating sea level rise, could provide benefits such as habitat creation, water quality improvement and recreational access expansion for the public. Accordingly, the District participates in regional groups that focus on climate change mitigation and adaptation, such as the Bay Area Climate Action Network (BayCAN) and the Oakland-Alameda Adaptation Committee to collaborate with other jurisdictions and agencies in the region, identify potential projects, and work toward securing State and federal funding for implementation of sea level rise mitigation projects.

The District is mitigating the impact of more intense rainfall events by implementing an I&I reduction program, which is a partnership with the District's tributary agencies, which are cities that own sewer collection systems that flow into the District's interceptor system. The District's efforts under the I&I program, including identifying sources of I&I and correcting them, work to reduce peak wet weather flows and groundwater infiltration. Groundwater infiltration could increase in areas adjacent to the San Francisco Bay shoreline, where rising sea levels are expected to proportionally raise surrounding groundwater levels.

Reduced flows in the District's collection system as a result of water conservation in response to drought conditions could result in sewage with a higher concentration of certain constituents. A higher concentration of such constituents can potentially increase corrosion of concrete, which requires the inspection of sewer pipes and concrete basins, as well as regular rehabilitation projects, which are included in the District's Capital Improvement Program.

Seismic Matters; Natural Disasters

Seismic Considerations. The District is located in a seismically active region of California. The Hayward Fault runs through the entire western portion of the service area and the Calaveras Fault runs through the southeastern portion of the District. The Concord Fault is located several miles to the east of the District and the San Andreas Fault is located to the west.

The District commissioned a seismic evaluation study, completed in 1994, that examined the potential impacts on the District's Wastewater System of various magnitudes of earthquakes along the Hayward Fault. The study found that many of the Wastewater System facilities are located on poor soil and could be affected by liquefaction and settlement. Although structures supported on pile foundations should withstand the liquefaction with minimal structural damage, piping and electric conduit penetrating into basement walls of these structures could be sheared, effectively causing loss of function in the facility. The study further concluded that, in the event of the largest credible earthquake measuring 7.5 on the Richter scale from the Hayward Fault, approximately half of the facilities at the Main Wastewater Treatment Plant would suffer significant damage, that three of the District's 15 pump stations could possibly experience loss of function and that interceptor blockage could lead to sewage backup into the San Francisco Bay or onto city streets. A major earthquake could also adversely impact the economy of the District's wastewater service area.

In response to the 1994 seismic evaluation study, the District initiated a multi-year Wastewater Seismic Repairs Program, which focused on the retrofit of all the facilities that, if a failure occurred, would endanger life and/or public health. All of the high priority projects identified in the 1994 seismic evaluation study have been completed. Each of the operations center, sludge dewatering building, primary sedimentation blower building and oxygenation tank control buildings have been seismically retrofitted. The District has also made seismic improvements through other capital upgrade projects.

In 2016, the District began work on an update to the 1994 seismic evaluation study focused on the Main Wastewater Treatment Plant facilities. The update was completed in 2018 and evaluated seismic performance under current industry standards and codes, which changed greatly since the 1994 seismic evaluation study, and developed recommendations for mitigating seismic risk based on such updated standards and codes. The design and maximum earthquake levels are equivalent to approximately magnitude 6.4 and magnitude 7.3 on the Hayward Fault, respectively. Findings of the seismic evaluation update study indicate that a large number of Main Wastewater Treatment Plant facilities may sustain significant damage in the event of a large earthquake and not meet life safety performance criteria. Evaluations and risk assessments were performed to support the prioritization of further seismic evaluations and mitigation improvements.

Following the completion of the seismic evaluation update study, the District performed geotechnical investigations for seismic hazard mitigation, and additional evaluations and conceptual retrofit designs for 25 high priority facilities. In 2021, the District began the design phase for seismic retrofits for (1) a group of personnel buildings referred to as the “Main Wastewater Treatment Plant Support Facilities,” and (2) the maintenance center. The near-final design (90% design) for these projects was completed in October 2024 and the final design is expected to be completed by June 2026.

In 2023, the District began a planning and preliminary design phase for seismic improvements to the influent pump station. The initial design phase for the project was completed in November 2025 and final design is expected to be completed by September 2026.

In 2024, the District began the design phase for seismic improvements to the Main Wastewater Treatment Plant administration and laboratory building. The District subsequently determined that this project would have significantly higher costs and construction risks than the District had previously anticipated. As a result, the District intends to perform an alternative evaluation to determine whether the construction of a new administration and laboratory building would be a more cost effective solution.

Despite the completed and continuing seismic work in the event of significant earthquake damage to the Wastewater System and/or the District’s service area, there can be no assurance that Adjusted Net Wastewater Revenues would be sufficient to pay the principal of and interest on any outstanding Wastewater System Revenue Bonds.

Natural Disasters. California is subject to geotechnical and extreme weather conditions which represent potential safety hazards, including expansive soils, wildfires, floods, high winds and areas of potential liquefaction and landslide. Identified hazards that pose a risk to the District’s service area include, but are not limited to, earthquake, adverse weather, drought, flood, landslides, liquefaction, tsunamis and wildfires. Natural disasters, severe weather-related events (which have become increasingly common), or man-made disasters or accidents, could cause significant damage to or failure of Wastewater System infrastructure or otherwise interrupt operation of the Wastewater System and thereby impair the ability of the District to generate Wastewater Revenues. The severity and/or frequency of natural disaster occurrences may be exacerbated by the impacts of climate change.

The Wastewater System service area is located primarily in Alameda County, with a small portion of the service area located in Contra Costa County. Wildland fires, particularly wildland/urban interface fires, have historically occurred in Alameda and Contra Costa Counties. Wastewater System facilities used for the conveyance of wastewater collected from the participating agencies generally consist of pipelines, interceptors and pump stations, which are not typically vulnerable to damage by wildfires. The above ground facilities within the Wastewater System, such as the Main Wastewater Treatment Plant and the Wet Weather Facilities, are designed to be tolerant to damage by wildfires through the use of fire resistant material where possible, such as concrete, steel and masonry blocks. Additionally, the Main Wastewater Treatment Plant and the Wet Weather Facilities are not located in a designated fire hazard zone by the California Department of Forestry and Fire Protection (CalFire).

See “CERTAIN RISK FACTORS – Natural Disasters and Casualty Risks” in the front part of this Official Statement.

Security and Emergency Preparedness; Cybersecurity

Security and Emergency Preparedness. The District has a security program that provides for a secure work place; maintains safe and reliable water supply and wastewater services; and prevents or mitigates potential damage or loss of assets from internal and external threats. The District’s Security Office

manages the security program which includes assessment, capital, operational and coordination elements. These efforts are guided by the Security Vulnerability Assessment (SVA), the Risk and Resilience Assessment required under the America's Water Infrastructure Act of 2018, water/wastewater industry experience, actual experience at District facilities, and industry standards/guidelines. The program's systems, procedures, and personnel are designed to deter, detect, delay and assess potential criminal actions.

The District has a Security Operations Control Center (the "SOCC") that is staffed seven days a week, 24 hours a day. The SOCC uses a centralized security system to monitor access controls, video cameras and recorders, and access alarms. The SOCC monitors alarms, assesses conditions using the security system, and dispatches security and law enforcement response, as needed, for alarms and reports of suspicious circumstances or crimes at District facilities. The SOCC monitors and controls access (for some facilities) at water and wastewater treatment, administrative and maintenance facilities, its storage yards and service centers, and the reservoirs and pumping plants in its water distribution system. District security includes an internal security staff and security contractors. Contract security officers are also used to supplement automated access controls at certain key facilities.

The District maintains an active emergency preparedness program that includes an Emergency Operations Plan to help manage the District's critical operations during any emergency and protect people, property, and the environment. The District maintains a Business Continuity Program Plan to minimize impacts to critical business functions and enhance its capability to recover operations expediently and successfully following a disruptive incident. Pursuant to State law, District employees are sworn disaster service workers, and key staff are trained to use California's Standardized Emergency Management System (referred to as SEMS) and the National Incident Management System (referred to as NIMS) in response to emergencies and security incidents. As part of its Emergency Operations Plan, the District maintains two strategically located emergency operations centers and a mobile emergency command center, and has in place an emergency operations team to lead emergency response activities.

Cybersecurity. The District, like many other large public and private entities, relies on extensive and complex technologies to conduct its operations. Cybersecurity threats include, but are not limited to, hacking, phishing, executive impersonation, denial of service, malware, ransomware and other attacks on information systems, networks, and data. Cybersecurity incidents could result from unintentional events or from deliberate attacks by unauthorized entities, nation state actors, or individuals attempting to gain access to the District's systems for the purposes of misappropriating assets or information or causing operational disruption and damage. Cyberattacks are becoming more sophisticated and the threats continually evolve. Attacks directed at the District's critical Wastewater System operations and facilities could damage distribution and storage assets, cause operational malfunctions and outages, and result in costly recovery and remediation efforts.

The District's cybersecurity program leverages a layered, defense-in-depth approach to maintain the confidentiality, integrity, and availability of the District's business information systems, data, and water and wastewater control systems. There are dedicated District information technology (IT) and operational technology (OT) Security and third-party staff who perform a variety of functions, including intrusion detection and prevention, incident response, monitoring for malware, vulnerabilities, and anomalous network traffic, promoting cybersecurity awareness to District staff through training, including new employee cybersecurity awareness training and regular email phishing exercises, and auditing the environment to ensure that configurations remain consistent with security objectives as well as implementing new security controls as needed to stay ahead of continually evolving security threats. Third-party audits and vulnerability assessments are also utilized by the District to identify any potential areas of improvement for the overall cybersecurity program. The District maintains a backup data center to facilitate recovery of critical business systems after a disaster.

Insurance

The District uses a combination of self-funding/self-insuring and insurance coverage in the District's risk management program. The program provides protection for the District's buildings and facilities, including their contents and equipment, from fire, explosion and related perils, including flood. The District's insurance program does not currently include earthquake coverage. The District's current reserves, self-insured retentions, deductibles, and insurance are described below.

The District self-insures liability claims up to \$10 million for bodily injury and property damage that may arise from the District's operations, including but not limited to use of its property, facilities, or vehicles. The District also maintains fidelity protection against fraudulent acts of its employees.

The District maintains reserves of approximately \$11.6 million for liability self-insurance and \$8.9 million for workers' compensation claims that may arise from the District's water and wastewater systems' operations. See also "WASTEWATER SYSTEM FINANCES – Financial Management Policies."

Selected current insurance coverages include the following:

- \$90 million of general and automobile liability insurance, subject to a \$10 million per occurrence self-insured retention for both the Water System and the Wastewater System;
- Statutory limits of excess workers' compensation coverage, subject to a \$5 million self-insured retention for both the Water System and the Wastewater System;
- \$300 million in coverage for "all risk" property insurance, subject to a \$500,000 deductible, with exclusions, such exclusions encompass earthquake, flood, (see special flood sublimit referenced below) and certain properties (excluded properties include various Pardee facilities, dams, reservoirs, containment basins, ponds, lakes, dikes, levees, water shafts, power tunnels, penstocks, flumes, piers, wharves, canals, tail race, draft tube, discharge tunnel, under and above-ground pipes and aqueducts (with the exception of \$2.5 million in flood coverage for above-ground aqueducts);
- \$25 million in coverage for flood perils (except for areas within the FEMA-designated 100-year floodplain in which a \$10 million limit is applicable), subject to a \$1.5 million minimum deductible per occurrence, except 5% of the total insurable property values at the time of the loss at each location involved in the loss subject to a minimum deductible of \$1.5 million for any occurrence in areas of 100-year flooding as defined by FEMA, all such flood insurance excluding coverage for underground property and pipelines. The policy provides \$2.5 million coverage for distribution pipes including distribution systems, raw water transmission aqueducts, service laterals (including meters), distribution aqueducts, pressure regulators, cathodic protection systems and hydrants;
- \$50 million in coverage for boiler and machinery insurance, subject to a \$25,000 deductible; and
- \$10 million in coverage for crime insurance for protection against fraudulent acts of employees (except for "faithful performance" claims in which a \$10 million limit is applicable), subject to a \$25,000 deductible.

Insurance limits maintained by the District are subject to change. The District evaluates its insurance program annually in connection with the scheduled policy renewals (which generally occur on or about March 31 of each year). The District may modify the current configuration of commercial

insurance and self-insurance retention limits as it deems appropriate depending on market conditions and assessments by the District as to risk exposure.

In December 2025, the Board authorized the formation of Public Insurance for Enterprise Risk, Inc. (“PIER”), a single-parent captive insurance company, which will operate as a separate legal entity from the District. PIER was formed in March 2026 and is domiciled in Utah. PIER is planned to initially insure specific District risks, such as general and automobile, employment practices and public officials liability above District’s \$10 million self-insured retention. The District believes that the establishment of PIER will enable the District to more efficiently manage the District’s insurance costs. The District expects to provide funding for PIER through an initial deposit made from District reserves in the amount of approximately \$1.39 million and then through annual deposits of approximately \$1.07 million.

Capital Improvement Program

Since Fiscal Year 2002, the District has implemented a biennial budget. The budget is presented to the Board for consideration for the two ensuing Fiscal Years. The biennial budget planning process includes a review of projected long-term (10 years) facilities needs and the development of a capital expenditure forecast. Facility renewal, replacement, and expansion needs included in the Capital Improvement Program (the “CIP”) are identified through a combination of master plans, condition assessments, and regulatory compliance. The District’s capital steering committee for the Wastewater System evaluates all capital projects under the capital steering committee’s project prioritization framework to determine project prioritization. Project scopes are also defined (*e.g.*, replacement of aging mechanical or electrical equipment, seismic upgrades, or other defined scopes). The capital steering committee additionally provides ongoing review and monitoring of all projects’ budgets, consider potential adjustments to the project prioritization in order to manage the CIP between budget cycles, and provides input in addressing any major variances or unanticipated developments in connection with the management of large projects.

The identified facility needs and the recommendations of the capital steering committee are considered during the biennial update to the CIP. The most recent CIP update was completed in 2025 in connection with developing the biennial budget for Fiscal Years 2026 and 2027, which was approved by the Board on June 10, 2025. The CIP update included a ten-year capital expenditure forecast.

In the CIP forecast developed in conjunction with the biennial budget, the District is continuing its focus on investments in general improvements and rehabilitation work. For the initial five-year period covering Fiscal Years 2026 through 2030, CIP cash expenditures are projected to aggregate approximately \$496 million, a 48% increase over the prior five-year CIP. The increase is primarily driven by additional capital investment related to managing nutrients, in addition to the District’s work to improve buildings that serve multiple treatment processes, including seismic retrofits, as well as rehabilitation work on sewer interceptors and pump stations. Additional major work is expected to include a new dewatering process that will entirely replace the existing one, and other major work will focus on preliminary and secondary treatment, which includes rehabilitation of concrete structures such as secondary reactor tanks and channels, the oxygen production plant, and secondary clarifiers. This strategy is reflected in the substantial portion of the CIP expenditure forecast dedicated to maintaining infrastructure.

Table 5 below summarizes the District’s projected CIP cash expenditures for Fiscal Years 2026 through 2030 by major initiatives as forecasted in the biennial budget for Fiscal Years 2026 and 2027.

Estimated Sources of Funds for Capital
Improvement Program Expenditures

<i>Funding Sources</i>	<i>(Millions)</i>	<i>% of Total</i>
Revenues	\$221.4	44.6%
Bond Proceeds ⁽¹⁾	240.0	48.4
Grants	<u>34.7</u>	<u>7.0</u>
Total	\$496.1	100.0%

⁽¹⁾ See footnote 11 to Table 18 for additional information regarding the District’s currently projected bond issuances to finance the District’s CIP expenditures.

Source: The District.

Included in the CIP for Fiscal Years 2026 through 2030 as reflected in the biennial budget for Fiscal Years 2026 and 2027 are the major endeavors described below:

Main Wastewater Treatment Plant. This category furthers the District’s objectives to improve the infrastructure at the Main Wastewater Treatment Plant to ensure reliable, high-quality service. Work focuses on rehabilitating the digesters, concrete structures, and treatment process facilities; upgrading the

resource recovery receiving station; rehabilitating sections of the sewer interceptors; and identifying long-term solutions to managing nutrient levels.

Additional planned CIP work to the Main Wastewater Treatment Plant includes projects relating to the rehabilitation and upgrade of assets associated with wastewater receiving, screening, pumping, and trash and grit removal to keep wastewater flowing from the interceptor system into the Main Wastewater Treatment Plant before primary treatment and the seismic retrofitting of the influent pump station.

The CIP work also includes planned projects relating to the rehabilitation and upgrade of structures associated with wastewater treatment including the oxygen production plant where liquid oxygen is produced, the oxygen reactors where oxygen is mixed with wastewater and the secondary clarifiers. The rehabilitation to these facilities will be undertaken in phases to allow the Main Wastewater Treatment Plant to remain operational during such rehabilitation work.

A major component of the CIP is the replacement of the dewatering building, which will include the replacement of the existing structure and implementation of new feed pumps, dewatering equipment, cake storage hoppers, polymer feed equipment, and odor control facilities. The existing dewatering building is expected to continue to be used for the secondary solids thickening process and improvements will be made including upgrades to the building's odor control system and seismic retrofits.

CIP work also includes work relating to the replacement of aging equipment and the improvement of the seismic performance and reliability of the electrical power distribution and control systems at the Main Wastewater Treatment Plant to prevent outages and optimize processes to meet regulations. Two phases of seismic improvements have been identified for the electrical system at the Main Wastewater Treatment Plant. The first phase is planned to address immediate needs, such as improved bracing and supports for electrical distribution lines between the main substation and the power generation plant. The second phase is planned to address reliability needs following completion of an Electrical Master Plan for the District.

The District also has planned projects relating to the rehabilitation and improvement of the utility systems at the Main Wastewater Treatment Plant, including wash-down water, drains and site work, including landscaping and paving. The CIP work also includes a multi-phase project to improve and replace hypochlorite piping around the Main Wastewater Treatment Plant. The District plans to assess and improve the wash-down water pumps and piping, including the surge and cathodic protection systems.

The CIP also includes projects relating to the rehabilitation and upgrade of facilities associated with trucked waste which provides additional feedstock to produce biogas. Odor control improvements are planned to be implemented that include a new three-stage treatment system serving the fats, oils, and grease and high strength waste receiving stations and blend tanks. Another component of the project consists of creating a new de-gritting facility for trucked waste.

The rehabilitation of portions of the power generation station equipment, piping, controls, and related components to improve utilization of biogas produced in the digesters to generate renewable electricity and produce heat for the digesters is also included in the CIP. The project is intended to increase the reliability of the power generation components in both normal operation and during grid power outages to improve overall plant reliability.

Upgrades to the digestion process at the Main Wastewater Treatment Plant to convert sludge from primary and secondary treatment, as well as high strength waste, into biogas and biosolids for beneficial use are included in the CIP. In connection with the upgrades to the digestion process, the District plans to rehabilitate three of its current digesters and to install two new digester gas covers and storage systems.

These digesters will also be seismically retrofitted to prevent catastrophic collapse in the event of an earthquake.

Remote Facilities. This category includes two key initiatives: (i) Interceptors and Pump Stations project: work to rehabilitate five gravity interceptors, as well as force mains and pump stations that convey wastewater from the satellite agencies to the Main Wastewater Treatment Plant, and to improve access to these facilities for maintenance and repairs; and (ii) Wet Weather Facilities project: mandated work related to the inflow and infiltration, and maintaining the Wet Weather Facilities for reliable performance during wet weather events.

Interceptor rehabilitation includes the underground piping, select maintenance holes and tie-in structures. Pipe rehabilitation will be conducted on the older interceptors that have not been addressed recently. Pump station rehabilitation includes the rehabilitation of equipment, piping, and access improvements to several stations.

The Wet Weather Facilities project includes conducting mandated work related to the I&I program and maintaining the Wet Weather Facilities for reliable performance during wet weather events. This project includes the ongoing implementation of the regional private sewer lateral ordinance, flow modeling, and reporting, as required by the Consent Decree. The Wet Weather Facilities project includes the rehabilitation of chemical tanks, wet well liner repair and concrete restoration at the District's Wet Weather Facilities.

System-Wide Improvements. The system-wide improvements category consists of capital improvements vital to wastewater conveyance and treatment that are not limited to a single treatment process. Projects in this category include work on buildings that serve multiple treatment processes, the periodic replacement of capital equipment, applying protective coatings plant-wide, and replacing hardware and software.

Construction-Related Risks. Construction projects for the Wastewater System are subject to ordinary construction risks and delays applicable to projects of their kind, including but not limited to (i) inclement weather affecting contractor performance and timeliness of completion, which could affect the costs and availability of, or delivery schedule for, equipment, components, materials, labor or subcontractors; (ii) contractor claims, underperformance or nonperformance; (iii) failure of contractors to execute within the contract price; (iv) work stoppages or slowdowns; (v) failure of contractors to meet schedule terms; (vi) errors or omissions in contract documents requiring change orders; (vii) the occurrence of a major seismic event; or (viii) unanticipated project site conditions, including the discovery of hazardous materials on the site or other issues regarding compliance with applicable environmental standards, and other natural hazards or seismic events encountered during construction. Construction bids may also be higher than anticipated for budgeting purposes, including due to inflation, tariffs and supply chain issues. In addition, Wastewater System construction projects may require scheduling system shutdowns to avoid impacting services and many shutdown windows are inflexible. Increased construction costs or delays could impact the Wastewater System's financial condition in general and the implementation of its CIP in particular.

WASTEWATER SYSTEM FINANCES

Basis of Accounting

The District reports operations on a Fiscal Year basis (currently July 1 through June 30). Enterprise funds are used to account for operations that are financed and operated in a manner similar to private business enterprises, where the costs of providing goods and services to the general public are financed or

recovered primarily through user charges. Enterprise funds are accounted for using the accrual basis of accounting. The accounting policies of the District conform to generally accepted accounting principles for municipal water and wastewater utilities. The accounts are maintained substantially in accordance with the Uniform System of Accounts prescribed for investor-owned and major municipally-owned water and wastewater utilities.

Sources of Funds

The District finances its wastewater operations with rates and charges and a share of the county-wide real property tax levy. The Wastewater System's principal source of revenues is dry weather user charges billed directly to customers of the participating agencies. In Fiscal Year 2025, dry weather user charges of \$101.9 million provided approximately 57.4% of the Wastewater System's \$177.7 million total sources of funds. Wet weather facilities charges collected on the property tax bills issued by Alameda and Contra Costa Counties accounted for approximately 20.4% of the total sources of funds of the Wastewater System and are designed to recapture the cost of financing the District's facilities to handle wet weather related I&I, including wet weather facilities, interceptors, pumping stations and storage basins. The District's resource recovery program generated approximately 8.4% of the Wastewater System's total sources of funds in Fiscal Year 2025.

Table 7 summarizes the District's Wastewater System sources of funds for the five most recent Fiscal Years ended June 30, 2025. The sources of funds in Table 7 include certain funds which do not constitute Adjusted Net Wastewater Revenues for purposes of funds pledged under the Indenture. Adjusted Net Wastewater Revenues include all charges received for, and all other income and receipts derived by the District from, the operation of the Wastewater System or arising from the Wastewater System, which includes, without limitation, the District's dry weather user charges, wet weather facilities charges, wastewater capacity fees and resource recovery program revenues, as well as investment income, less Operation and Maintenance Costs. Property taxes are applied to reduce Operation and Maintenance Costs and are not pledged to the repayment of the Wastewater System Revenue Bonds. See "– Property Tax Revenues" below. Certain grants and contributions earned on construction which are restricted to use for specified purposes are not included in Adjusted Net Wastewater Revenues for purposes of the Indenture. Only Adjusted Net Wastewater Revenues are pledged to the payment of the Wastewater System Revenue Bonds. See "SECURITY FOR THE SERIES 2026 BONDS – Pledge of Adjusted Net Wastewater Revenues" in the front part of this Official Statement. Comparative summaries of the Wastewater System's historical operating results and debt service coverage ratios for each of the last five Fiscal Years appear in Table 17 under "– Historical Operating Results."

Table 7
WASTEWATER SYSTEM SOURCES OF FUNDS
Five Fiscal Years Ended June 30, 2025
(Millions)

	<i>Fiscal Year Ending June 30</i>				
	<i>2021</i>	<i>2022</i>	<i>2023</i>	<i>2024</i>	<i>2025</i>
Operating Revenue and Other Income:					
Dry Weather User Charges	\$ 81.1	\$ 84.6	\$ 87.7	\$ 94.1	\$101.9
Wet Weather Facilities Charges	28.3	29.4	30.7	33.3	36.2
Resource Recovery	12.3	13.7	16.7	15.1	15.0
Interest ⁽¹⁾	0.3	0.3	2.7	4.2	5.0
Taxes	6.9	7.4	8.1	8.7	9.0
Other Revenues ⁽²⁾	<u>3.2</u>	<u>3.9</u>	<u>4.2</u>	<u>4.2</u>	<u>4.4</u>
Total Revenues	\$ 132.1	\$ 139.4	\$ 150.1	\$ 159.7	\$171.6
Capital Contributions:					
Wastewater Capacity Fees	\$ 7.2	\$ 6.4	\$ 7.1	\$ 3.5	\$ 5.4
Earned contributions on construction	0.0	0.0	0.0	0.0	0.0
Grants and reimbursements	<u>0.3</u>	<u>0.0</u>	<u>0.0</u>	<u>0.3</u>	<u>0.8</u>
Total Contributions	\$ 7.5	\$ 6.4	\$ 7.1	\$ 3.9	\$ 6.2
TOTAL⁽³⁾	<u>\$ 139.6</u>	<u>\$ 145.9</u>	<u>\$ 157.2</u>	<u>\$ 163.5</u>	<u>\$177.7</u>

(1) Includes interest earnings on Wastewater System Fund.

(2) Other Revenues includes amounts received from the sale of energy to the utility grid and various other revenues. Other Revenues excludes certain reimbursements and other receipts applied directly to operating expenses. Other Revenues also do not include interest subsidy payments received by the District in each year in connection with its Series 2010B Bonds which are Build America Bonds.

(3) Totals may not add due to rounding.

Source: The District.

Rates and Charges

The District's rates and rate structure are established by the District's Board after a public hearing process, and are not subject to regulation by any other agency. Under California law, the imposition of, or any increase in, a property-related fee or charge, including fees and charges for ongoing wastewater service, is subject to specified procedural requirements (including notice, hearing and protest procedures). In addition, pursuant to California law, all such property-related fees and charges are required to meet certain substantive standards, including that such fees and charges must be proportional to the cost of providing service. See "CONSTITUTIONAL AND STATUTORY LIMITATIONS ON TAXES AND APPROPRIATIONS AND FEES AND CHARGES – Proposition 218" in the front part of this Official Statement for a discussion of the procedural and substantive requirements to which the District's rate increases are subject.

From Fiscal Year 2021 through Fiscal Year 2025, total annual residential wastewater charges imposed by the District have increased by an average of approximately 5.77% per Fiscal Year. The overall average rate increase, which includes the rate increases for all customer classes and rate components (including District treatment and disposal charges, wet weather facilities charges and San Francisco Bay Pollution Prevention Fee), over the same period was approximately 5.80%. The District's most recent increases in wastewater service rates and charges included the adoption on June 10, 2025 of overall rate increases of 8.50% and 8.50% for Fiscal Years 2026 and 2027, respectively.

Table 8 sets forth a history of the average residential rate increases and overall average rate increases for all customers enacted by the District for the five Fiscal Years 2021 through 2025, and the average residential and overall average rate increases as adopted by the Board on June 10, 2025 for Fiscal Years 2026 and 2027.

**Table 8
HISTORY OF WASTEWATER
RATE INCREASES⁽¹⁾**

<i>Fiscal Year</i>	<i>Average Residential Rate Increase⁽¹⁾</i>	<i>Overall Average Rate Increase⁽²⁾</i>
2021	3.95%	4.00%
2022	3.91	4.00
2023	4.07	4.00
2024	8.46	8.50
2025	8.44	8.50
2026 ⁽³⁾	8.38 ⁽³⁾	8.50 ⁽³⁾
2027 ⁽³⁾	8.36 ⁽³⁾	8.50 ⁽³⁾

⁽¹⁾ Residential average rate increase includes wastewater treatment and disposal charges, wet weather facilities charges, and San Francisco Bay Pollution Prevention Fee.

⁽²⁾ Overall average rate increase includes wastewater treatment and disposal charges and wet weather facilities charges for all customer classes (including residential).

⁽³⁾ The adopted rate increase for Fiscal Year 2026 is effective on bills issued on and after July 1, 2025 and the adopted rate increase for Fiscal Year 2027 will be effective on bills issued on and after July 1, 2026.

Source: The District.

Table 9 shows the rate schedule effective July 1, 2025 for Fiscal Year 2026, and the rate schedule to be effective July 1, 2026 for Fiscal Year 2027 as approved by the Board on June 10, 2025. The District believes that the current rate structure is consistent with federal and State regulations, which require generally that wastewater charges be proportionate to the operation, maintenance and replacement costs associated with providing service for each discharger or class of dischargers. See also Table 18 under “– Projected Operating Results” for a description of projected future rate increases.

**Table 9
WASTEWATER SYSTEM RATES AND CHARGES**

	<i>Effective July 1, 2025</i>	<i>Effective July 1, 2026</i>	
Residential Charge:			
Service Charge (per account)	\$ 10.08	\$ 10.94	per month
Strength Charge (per dwelling)	10.49	11.38	per month
Flow Charge	1.82	1.97	per unit, to a maximum of 9 units (1 unit = 748 gallons)
San Francisco Bay Pollution Prevention Fee (per dwelling)	0.20	0.20	per month
Non-Residential Charge:			
Service Charge (per account)	10.08	10.94	per month
Treatment Charge	1.89-25.84	2.05-28.04	per unit, depending on the nature of the business
San Francisco Bay Pollution Prevention Fee	5.48	5.48	per month
Minimum Monthly Charge:			
Apartment Buildings (5 or more dwellings)	62.53	67.84	per month
All others	10.08	10.94	per month
Permit Accounts:			
Flow Charge	1.83	1.99	per unit
COD	0.19	0.21	per pound of discharge
Suspended Solids	0.78	0.85	per pound of discharge
Wet Weather Facilities Charge:			
Small lot (0-5,000 sq. ft.)	159.90	173.48	per year per lot
Medium lot (5,001-10,000 sq. ft.)	249.72	270.94	per year per lot
Large lot (>10,000 sq. ft.)	570.70	619.20	per year per lot

Source: The District.

Comparison of Wastewater System Charges

Annual charges of various Bay Area wastewater service providers for single family residences discharging 4.0 units of wastewater per month (as determined based upon metered water consumption) are shown in Table 10. One unit equals 748 gallons of wastewater. Charges for cities served by the District include both the cities’ charge for collection and the District charge for treatment and disposal. Charges for these cities include costs of sewer rehabilitation programs, now underway, to reduce wet weather infiltration and inflow into their collection systems. The District rates also reflect an additional wet weather facilities

charge (based on lot size: for Fiscal Year 2026 is \$159.90 for lots from 0 to 5,000 square feet) to pay the cost of the wet weather program.

Table 10
COMPARATIVE ANNUAL WASTEWATER CHARGES⁽¹⁾
Single Family Residences 4.0 Units/Month
Rates to be Effective Rates as of July 1, 2025⁽²⁾⁽³⁾

City of Vallejo	\$1,223
City of Richmond	1,121
East Bay Municipal Utility District⁽⁴⁾	1,052
City of Pinole	1,027
City and County of San Francisco	968
City of Livermore	909
West Contra Costa Sanitary District	815
Central Contra Costa Sanitary District	754
Delta Diablo Sanitary District - Bay Point	706
City of San Leandro	685
Union Sanitary District	636
City of San Jose	605
City of Pleasanton	540
Dublin San Ramon Services District	530
Oro Loma Sanitary District	487

⁽¹⁾ Includes collection and treatment charges.

⁽²⁾ Unless otherwise noted, the table reflects charges based on rates applicable as of the indicated date regardless of characterization as base rates or other characterization.

⁽³⁾ Rates have been obtained from publicly available sources and have not been independently verified by the District.

⁽⁴⁾ Monthly charges vary by metered water consumption. The District portion of the charge assumes a monthly wastewater discharge of 4.0 units for an annual charge of \$496.50, based on rates for Fiscal Year 2026 (including the \$159.90 wet weather facilities charge for small lots), plus the City of Oakland’s community collection charge of \$555.60 per year throughout the wastewater service area. Reflects the District’s rates for Fiscal Year 2026 as adopted on June 10, 2025.

Source: The District.

Wastewater User Charge Revenues and Number of Accounts by User Type

Table 11 on the following page sets forth a breakdown of the District’s dry weather user charge revenues and number of accounts by customer class for the Fiscal Year ended June 30, 2025.

Table 11
WASTEWATER DRY WEATHER USER CHARGE REVENUES
AND NUMBER OF ACCOUNTS BY USER TYPE
Fiscal Year ended June 30, 2025

<i>Type of Customer</i>	<i>User Charge Revenues⁽¹⁾</i>	<i>Percent of Revenues</i>	<i>Number of Accounts⁽²⁾</i>	<i>Percent of Accounts</i>
Residential	\$55,335,275	54.3%	161,552	89.1
Commercial	38,689,518	38.0	17,020	9.4
Industrial	3,101,137	3.0	812	0.4
Public	<u>4,816,825</u>	<u>4.7</u>	<u>1,952</u>	<u>1.1</u>
Total ⁽³⁾	<u>\$101,942,754</u>		<u>181,336</u>	<u>100.00</u>

⁽¹⁾ Dry weather user charges collected on the water bill includes permit fees, pollution prevention fees and late fees. Does not include wet weather facilities charges, resource recovery treatment fees or private sewer lateral compliance certificate fees.

⁽²⁾ This table referred to number of connections in certain of the District’s prior disclosure documents. The data presented is more accurately referred to as number of accounts and the table and this column has been re-labeled accordingly. The data presented is on a basis consistent with the presentation in the District’s prior disclosure documents.

⁽³⁾ Totals may not add due to rounding.

Source: The District.

Billing and Collection Procedures

General; History of Delinquencies. All wastewater service customers are billed by the District bimonthly for dry weather user charges, with the exception of the 365 largest accounts, which are billed monthly. Billing is staggered throughout the billing cycle by geographic location within the District. If an overdue wastewater account is not paid after appropriate customer notification, a lien may be placed on the property or water service may be restricted.

The District considers its historical rates of payment delinquency, service discontinuance for non-payment, and write-offs for uncollectible accounts to be low by water industry standards for urban areas. In light of the temporary suspension of discontinuance of service for non-payment implemented as part of the COVID-19 response, the District has experienced an increase in past due accounts and payment delinquencies in recent years. See “– COVID-19 Effects” below.

Write-offs for uncollectible accounts for the last five Fiscal Years are set forth in Table 12.

[Remainder of page intentionally left blank.]

Table 12
WASTEWATER CHARGES UNCOLLECTIBLE REVENUES⁽¹⁾
Last Five Fiscal Years

<i>Fiscal Year Ended June 30</i>	<i>Uncollectible Revenues</i>	<i>Percent of Gross Billings</i>
2021	\$140,230	0.18%
2022	231,168	0.28
2023	436,710	0.50
2024	532,622	0.57
2025	681,135	0.67

⁽¹⁾ The increase in uncollectible revenues beginning in Fiscal Year 2023 reflects the resumption of discontinuation of service for non-payment for commercial customers in the Fall of 2022 and an increase in closed accounts. See “–*COVID-19 Effects*” below.

Source: The District.

COVID-19 Effects. To help mitigate the economic impact of COVID-19 on its customers, beginning in March 2020, the District restored water service to single-family residential customers in occupied residences whose service was discontinued for non-payment during the state of emergency, and suspended the discontinuance of water services due to non-payment. On December 31, 2021, the suspension of discontinuation of service for non-payment was ended and the District resumed discontinuation of service for non-payment of commercial customers in the Fall of 2022. For the District’s single-family residential accounts, the suspension of discontinuation of service due to non-payment remained in effect through September 2024. To reduce the total number of delinquencies, the District has in place extended payment plans for past due water and wastewater charges and a Customer Assistance Program, which helps reduce the costs of water and wastewater services to qualified low-income customers. As described below, in October 2024, the District implemented the Residential Non-Payment Policy which involves the utilization of flow restrictors or property liens to recover delinquent charges. Beginning in July 2025, if a flow restrictor has been removed and the customer subsequently defaults on their payment plan or submits a returned check, the account will proceed to full shutoff.

The District was allocated approximately \$8.196 million (net of administrative costs recovered) under the SWRCB’s California Water and Wastewater Arrearage Payment Program (“CWWAPP”) to aid the Wastewater System accounts that had fallen behind during the period of March 4, 2020 through December 31, 2022, which was credited towards arrearages. In addition to the CWWAPP, \$116 million in funds was allocated from the American Rescue Plan Act to the California Department of Community Services and Development for the Low-Income Household Water Assistance Program (“LIHWAP”) to provide benefit payments for eligible households with service disconnected or pending shut-off. Under the program, customers that sought assistance were required to apply directly through the LIHWAP and if approved, benefit payments were made to the District to be applied as a bill credit to the applicable customer account to pay down the customer’s water and wastewater bills. Benefit payments to eligible customers were provided under LIHWAP through March 2024. The District received approximately \$3.2 million in benefits payments through the LIHWAP that were applied as bill credits to customer accounts for water and wastewater amounts due.

During the period of suspension of discontinuation of service for nonpayment, the District experienced an increase in the amount of bills that are 100 days or more past their payment date. From Fiscal Year 2019 to Fiscal Year 2024, the number of accounts delinquent for more than 100 days for water and/or wastewater charges increased from 1% of customers to approximately 3.7% of customers. As of February 2026, the number of accounts delinquent for more than 100 days for water and/or wastewater charges

decreased to approximately 1.4% of customers. The aggregate amount of water and wastewater charges past due for more than 100 days was approximately \$8.1 million as of February 2026 (representing approximately 0.84% of total receivables as of such date).

At the beginning of Fiscal Year 2025, the District initiated a plan to implement the collection process, which included analyzing arrearage data, preparing notifications, engaging its Public Affairs department, and making necessary system changes for the launch of the District's Residential Non-Payment Policy, which was implemented on October 1, 2024. The District identified accounts with balances over \$2,000 (with a total arrearage of \$8.5 million for water and wastewater in the aggregate) and mailed out the 2nd and 3rd batches of postcards to approximately 7,664 customers. These customers were mailed a postcard in multiple languages, informing them their bill was past due and urging them to contact the District to make arrangements. The postcard also included information about available assistance programs. A follow-up written notice indicating the District's intent to install a flow restrictor is then mailed to non-responsive customers in batches of 500. If no payment or payment plan is arranged, an urgent service interruption notice will be mailed seven days before installation of a flow restrictor, and a door hanger will be left at the property until the flow restrictor is installed. In March 2025, the Board authorized the District to proceed to full shutoff if a restrictor has been removed and the customer subsequently defaults on their payment plan or submits a returned check. This addition to the policy was implemented in July 2025. As of February 2026, the District recovered approximately \$6.37 million in arrearages from these accounts. Additionally, the District observed a 53.1% increase in payment plans established for this group since the program's inception in October 2024.

Wastewater Capacity Fees

The District assesses a Wastewater Capacity Fee on each new Wastewater System customer or each existing Wastewater System customer that increases demand for treatment processing on or after July 1, 1984. The Wastewater Capacity Fee is a one-time charge based on the annual average wastewater volume and strength. In Fiscal Year 2026, the Wastewater Capacity Fee for a single family residence is \$3,125. The fees for multi-family dwellings are \$1,712 per dwelling unit 500 sq. ft. or less and \$2,192 per dwelling unit greater than 500 sq. ft. For most non-residential customers with water meters one and a half inches and smaller, the fees range from \$4,647 to \$94,298 based on meter size and expected wastewater strength. The Wastewater Capacity Fee for other applicants is based on an analysis of the applicant's expected wastewater flow and strength. In Fiscal Year 2025, total Wastewater Capacity Fee revenues received by the District totaled \$5.4 million.

The District has engaged a consultant to review its current Wastewater Capacity Fees and is currently evaluating potential modifications to its methodology for determining the Wastewater Capacity Fees. Under the proposed modifications to the methodology, the Wastewater Capacity Fee would be calculated based on the capacity of a customer's meter, as opposed to expected annual water use/wastewater discharge and would no longer take into account the strength of the wastewater discharge. The District expects to file a rate report setting forth the proposed Wastewater Capacity Fees for Fiscal Year 2027 in May 2026 and expects for the Board to consider such Wastewater Capacity Fees at a public hearing scheduled to be held in June 2026. If adopted, the proposed modifications are expected to result in the collection of a lower annual amount of Wastewater Capacity Fee revenues than the District has historically collected. The projected Wastewater Capacity Fees for Fiscal Years 2027 through 2030 set forth in Table 18 under "– Projected Operating Results" assume the adoption of the proposed modifications to the Wastewater Capacity Fee methodology and that Wastewater Capacity Fee revenues will be approximately 50% lower in each year than the amounts that were assumed in the District Financial Forecast for Fiscal Years 2027 through 2030 that were developed in connection with the District biennial budget for 2026 and 2027.

Resource Recovery Revenues

As described under “THE WASTEWATER SYSTEM – Resource Recovery,” the District accepts trucked waste from outside its Wastewater System service area for disposal at the Main Wastewater Treatment Plant through its resource recovery program. Waste generators interested in disposing of trucked waste at the District’s facilities are required to obtain a permit from the District (either directly or by utilizing an approved hauler possessing a District permit). Tipping fees are charged by the District for waste streams delivered by truck for disposal based upon type of waste and volume or weight. Types of customers include food processors, wineries, breweries, and industrial wastewater brokers and haulers. The District has approximately 310 permit holders bringing in both regular deliveries such as septage and brine and limited-term deliveries from facilities experiencing temporary shut-downs of their onsite treatment plants.

In Fiscal Year 2025, total resource recovery program revenues received by the District from tipping fees totaled \$15.0 million. For budgeting purposes, the District assumes resource recovery program revenues will be less in future years than currently generated due to increased competition from wastewater facilities that are beginning trucked waste acceptance programs that will be located closer to waste generators.

Property Tax Revenues

The District’s share of the countywide 1% *ad valorem* property tax levy allocated to Special District No. 1 has provided approximately 5.1% to 5.3% of the revenues of the Wastewater System in each of the past five Fiscal Years for the District. The District’s share of the countywide 1% *ad valorem* property tax levy allocated to Special District No. 1 is not pledged as a source of payment for the Wastewater System Revenue Bonds, although such amounts are applied to pay Wastewater Operation and Maintenance Costs in accordance with the Indenture.

Table 13 shows a five-year record of assessed valuations, secured roll levies and delinquencies for the taxable property included within Special District No. 1. Assessed valuations are expressed by county assessors as “full cash value” as defined by Article XIII A of the State Constitution. The tax levy shown is the District’s allocated share of the maximum *ad valorem* tax levy by each county of 1% of full cash value.

Pursuant to California Revenue and Taxation Code Sections 4701 *et seq.*, Contra Costa County and Alameda County each maintain a reserve fund for the purpose of guaranteeing 100% of the secured levies of the electing governmental jurisdictions for which such county collects taxes (commonly referred to as the “Teeter Plan”). The District has elected to participate in Contra Costa County’s Teeter Plan program but has elected not to participate in Alameda County’s Teeter Plan program. Consequently, the District is exposed to the effect of delinquencies in collections only for property located in Alameda County.

A Teeter Plan remains in effect unless the board of supervisors of the county that has established a Teeter Plan orders its discontinuance or unless, prior to the commencement of any fiscal year of such county, such board of supervisors receives a petition for its discontinuance joined in by a resolution adopted by at least two-thirds of the participating revenue districts within the county, in which event such board of supervisors is to order the discontinuance of the Teeter Plan effective at the commencement of the subsequent fiscal year. If the Board of Supervisors of Contra Costa County, or in the event that the District elects to participate in Alameda County’s Teeter Plan, the Board of Supervisors of Alameda County, is to order the discontinuance of the Teeter Plan, only those secured property taxes actually collected would be allocated to political subdivisions (including the District) for which such county acts as the tax-levying or tax-collecting agency.

Table 13
TAXABLE PROPERTY WITHIN THE WASTEWATER SYSTEM

(1) Net of all exemptions except homeowner's exemptions, the taxes on which are paid by the State. All valuations are stated on a 100% of full cash value basis as defined by law. Assessed valuations shown include redevelopment project area incremental valuations.

(2) Minor differences in assessed valuation numbers from amounts previously reported can occur from time to time due to a change in source data used.

(3) Net basis excluding all exemptions. Levies reflect the tax reductions effected by the adoption of Article XIII A of the State Constitution in 1978, the "Jarvis-Gann Initiative." For Alameda County, receipts include District's share of prior years' delinquencies when collected.

(4) Amounts apply to Alameda County only since Contra Costa County guarantees 100% payment of the District's secured roll levy. The delinquency percentages are calculated based on the two counties' secured roll levies.

Sources: Reports of the Auditor-Controller's Offices of Alameda and Contra Costa Counties, table data as compiled by the District.

From time to time, legislation has been enacted as part of the State budget to provide for the reallocation of local governments' shares of the countywide 1% *ad valorem* tax, including by shifting a portion of the property tax revenues collected by the counties from special districts (such as the District) to school districts or other governmental entities. Subsequently, certain amendments to the State Constitution have been enacted to reduce the State Legislature's authority over local revenue sources by placing restrictions on, among other things, the State's access to local governments' property tax revenues. For example, on November 2, 2004 voters within the State approved Proposition 1A, which prevented the State from reducing local government's share of the 1% *ad valorem* property tax below levels in effect as of November 3, 2004, except in the case of fiscal emergency. Proposition 1A provided that in the case of fiscal emergency, the State could borrow up to 8% of local property tax revenues to be repaid within three years. Following the exercise by the State of its authority to borrow such local property tax revenues as part of the 2009-10 State budget act, on November 2, 2010, voters within the State approved Proposition 22, which prohibits any future action by the State Legislature to take, reallocate or borrow money raised by local governments for local purposes, and prohibits changes in the allocation of property taxes among local governments to aid State finances or pay for State mandates. Proposition 22 thereby effectively repealed the provisions of Proposition 1A allowing the State to borrow local property tax revenues from local governments, and prohibits any such future borrowing.

There can be no assurances that legislation or voter initiatives enacted or approved in the future will not reduce or eliminate the District's share of the 1% countywide *ad valorem* property tax revenues. See also "CONSTITUTIONAL AND STATUTORY LIMITATIONS ON TAXES AND APPROPRIATIONS AND FEES AND CHARGES" in the front part of this Official Statement.

The tax rolls for property located within the District’s Wastewater System service area for the Fiscal Year ended June 30, 2025, aggregated a total assessed valuation of approximately \$166.0 billion, including redevelopment project areas incremental valuations of which the taxes payable were due to the redevelopment agency. In 2011, the State enacted legislation commonly referred to as “AB1X 26,” which required the dissolution of California redevelopment agencies and the dissolution and winding up of the operations of those agencies, which dissolution occurred on February 1, 2012. AB1X 26 provides a framework for the management of the remaining obligations of the dissolved redevelopment agencies by their respective successor agencies and oversight boards to oversee those successor agencies. Pursuant to AB1X 26, tax increment will continue to flow to the payment of “enforceable obligations” (such as tax allocation bonds) of the dissolved redevelopment agencies.

Grants and Reimbursements

The District periodically receives grants for specific projects. In addition, the District from time to time receives certain reimbursements for capital costs, primarily in connection with facility relocations. In Fiscal Year 2025, the District received \$0.8 million in grants and facility relocation reimbursements for the Wastewater System. The District’s biennial budget for Fiscal Years 2026 and 2027 includes \$4.2 million and \$11.6 million in grants for Fiscal Year 2026 and Fiscal Year 2027, respectively. Grants and facility relocation reimbursements received are treated as capital contributions and are not included in Adjusted Net Wastewater Revenues for purposes of the Indenture.

Operation and Maintenance Costs

The primary component of the District’s Wastewater System Operation and Maintenance Costs is labor costs, including wages, salaries and benefits. See also “– Employees’ Retirement System.” Operation and Maintenance Costs also include materials, supplies and services such as treatment chemicals and sludge disposal costs, and other general and administrative expenses.

Outstanding Debt

Table 14 shows Wastewater System debt outstanding as of March 1, 2026. As provided in the Municipal Utility District Act, prior to the exercise by the District of its power to issue Wastewater System revenue bonds, a preliminary resolution is adopted by the Board declaring its intention to authorize the issuance of revenue bonds and specifying, among other things, the maximum principal amount of bonds then proposed to be issued (excluding refunding bonds) pursuant to such resolution. As of March 1, 2026 (prior to the Series 2026 Bonds being issued), the District has \$114,435,000 of remaining authorized but unissued Wastewater System revenue bonds under Resolution No. 33781-10 adopted on September 14, 2010, pursuant to which the Board declared its intention to authorize the issuance of up to \$200,000,000 of Wastewater System revenue bonds, from time to time in one or more series. The issuance of revenue bonds by the District is not subject to prior voter approval, although such resolutions of intention to authorize the issuance of bonds are subject to a 60-day referendum period (which, with respect to Resolution No. 33781-10, expired without challenge). The District may from time to time adopt other resolutions authorizing the issuance of additional Wastewater System revenue bonds and may incur other Parity Debt, subject to the satisfaction of the conditions set forth in the Indenture. See “SECURITY FOR THE SERIES 2026 BONDS – Issuance of Additional Wastewater System Revenue Bonds and Parity Debt; Junior and Subordinate Obligations” in the front part of this Official Statement.

From time to time, the District applies for and is granted loan funds from the SWRCB under the Clean Water State Revolving Fund loan program. The SWRCB loans (“State Loans”) are low-interest loans made by the SWRCB to fund various water quality infrastructure projects. The District may in the future apply for additional State Loans. The SWRCB requires all future debt issued by agencies involved in loan

contracts under the Clean Water State Revolving Fund loan program to be issued on a parity with or subordinate to the State Loans. The District currently has no outstanding State Loans for the Wastewater System. Any future State Loans would likely constitute Parity Debt under the Indenture.

Pursuant to the authority of the Municipal Utility District Act, the Board has declared its intention to authorize the issuance of short-term indebtedness of the District (which may include commercial paper notes and/or other forms of bonds, notes or other evidences of short-term indebtedness, including bank credit) in a maximum outstanding principal amount not exceeding the lesser of (1) the annual average of the District's total revenue for the three preceding years or (2) 25% of the District's total outstanding bonds issued pursuant to Chapters 6, 7 and 8 of the Municipal Utility District Act (which includes District revenue bonds). The District determined the maximum authorized principal amount of short-term indebtedness (including short-term indebtedness of both the Water System and the Wastewater System) pursuant to the above limit to be an amount not to exceed \$726,792,500 of June 30, 2025. The District currently maintains a commercial paper note program for the benefit of the Wastewater System and the District's Water System. The District currently has no commercial paper outstanding under such program that was issued for the benefit of the Wastewater System.

The District may from time-to-time issue commercial paper notes for the benefit of the Wastewater System under its current commercial paper program. Any commercial paper notes issued by the District for the benefit of the Wastewater System under its traditional commercial paper program (and the District's repayment obligation for amounts borrowed, if any, under any applicable liquidity facility therefor), would be payable from and secured by a pledge of Adjusted Net Wastewater Revenues on a basis subordinate to the Wastewater System Revenue Bonds and Parity Debt.

(1) Debt service is calculated on a cash basis.

(2) Reflects the refunding of all of the Series 2010B BABs. See "PLAN OF FINANCE" in the front part of this Official Statement.

(3) Fiscal Year 2026 includes gross interest payable before application of any cash subsidy received by the District from the United States Treasury relating to the Series 2010B Bonds ("BABs Interest Subsidy Payments") less the refunded interest.

(4) Totals may not add due to rounding.

Financial Management Policies

The District has detailed management policies that include guidelines for debt, capital planning, investments, derivatives, and formal reserves. It is the current Board-approved policy of the District to seek to maintain a debt service coverage ratio of 1.6 times on its outstanding Wastewater System Revenue Bonds and to fund no more than 65% of its capital program over each five-year planning period from proceeds of debt. The debt policy also limits unhedged variable rate debt to 25% of the total debt portfolio. Derivatives use is governed by a comprehensive derivatives policy and related set of procedures with guidelines for counterparties, termination, and risk exposure. The District's current policy target for debt service coverage is higher than that required by the rate covenant under the Indenture and may be changed at the Board's discretion. See "SECURITY FOR THE SERIES 2026 BONDS – Rate Covenant" in the front part of this Official Statement.

In accordance with its current cash reserves policy, the District budgets for a number of formal reserves for the Wastewater System, including the following:

- a working capital reserve of at least three times monthly net operating and maintenance expenses (which reserve amount was approximately \$27.1 million as of June 30, 2025);
- a self-insurance liability program reserve in an amount based upon established actuarially determined funding guidelines or, if not yet available at the end of the fiscal year, 1.15 times the prior year reserve target (which reserve amount was approximately \$1.6 million as of June 30, 2025);
- a workers' compensation program reserve in an amount based upon established actuarially determined funding guidelines or, if not yet available at the end of the fiscal year 1.15 times the prior year reserve target (which amount was approximately \$1.2 million as of June 30, 2025); and
- a contingency/rate stabilization reserve of at least 5% of operating and maintenance expenses (which contingency/rate stabilization reserve is included in the Rate Stabilization Fund provided for in the Indenture (see "SECURITY FOR THE SERIES 2026 BONDS – Pledge of Adjusted Net Wastewater Revenues" in the front part of this Official Statement)).

The aggregate reserves maintained by the District for these four formal reserves for the Wastewater System as of June 30, 2025 was approximately \$62.0 million, which satisfies or exceeds each reserve policy target level.

The current investment policy dictates investment criteria, reporting, and administrative requirements. See "– District Investment Policy" below.

District Investment Policy

Funds of the District are invested in accordance with the Government Code of the State, the Municipal Utility District Act and the District's investment policy. The four primary investment criteria set forth in the District's written investment policy are (in order of priority): (1) safety; (2) liquidity; (3) yield; and (4) diversification. In order to keep funds available to meet commitments, the District's investment policy provides that the maturity date (or put provision) of individual investments shall not exceed five years and that the average maturity of the portfolio shall not exceed 900 days. Investments permitted by the District's current investment policy include U.S. Treasury Obligations, U.S. Government Agencies Obligations, State of California's Local Agency Investment Fund (LAIF), a Local Government Investment Pool (LGIP), including the California Asset Management Program (CAMP) and the Investment Trust of California (CalTRUST), Money Market Mutual Funds, Certificates of Time Deposit, Negotiable Certificates of Deposit, Commercial Paper, Medium Term Corporate Notes, Repurchase Agreements and

Municipal Obligations, limited to California issuers, including the State of California. Monies in the funds and accounts held by the Trustee under the Indenture may be invested only in Investment Securities, as defined therein. The District does not enter into reverse repurchase agreements or otherwise borrow for purposes of investing. The District does not invest in highly volatile derivatives and other such securities. The District has in the past entered into interest rate swap transactions to hedge interest rate exposure on outstanding variable rate Wastewater System Revenue Bonds.

Pursuant to the District’s investment policy, all securities purchased from dealers and brokers are held in safekeeping by the District’s custodial bank. All transactions require delivery of the security prior to payment for the security (delivery vs. payment). Collateral, when required, would only be in U.S. Treasury or U.S. Government Agencies Obligations, with a Master Repurchase Agreement on file with the District. Trade confirmations are reviewed for conformity to the original transaction by an individual other than the one who originated the transaction. On a monthly basis, a report listing transactions is submitted to the General Manager and the District’s Board; and on a quarterly basis, an investment report is submitted to the General Manager and the Finance/Administration Committee of the District’s Board. This quarterly report includes the type of investment, issuer, date of maturity, par and dollar amount invested for all securities, investments and moneys held by the District, and provides an investment summary by security type, percent of the portfolio, investment yield and the remaining period of investment to maturity.

Cash and Investments

The District’s cash and investments are segregated by restricted and unrestricted amounts. Restricted cash and investments generally include bond proceeds and debt service reserve funds, developer advances and capital contributions, and other miscellaneous restricted amounts. As of June 30, 2025, the breakdown between restricted and unrestricted amounts for the Wastewater System is as follows:

Table 16
WASTEWATER SYSTEM
CASH AND INVESTMENTS
(As of June 30, 2025)
(Thousands)

Cash and investments included in current and unrestricted assets	\$131,820
Cash and investments included in restricted assets	<u>1,039</u>
Total cash and investments	<u>\$132,859</u>

See also “– *Cash and Investment by Fund*” in the Management’s Discussion and Analysis included in APPENDIX B – “EAST BAY MUNICIPAL UTILITY DISTRICT AUDITED FINANCIAL STATEMENTS FOR THE YEARS ENDED JUNE 30, 2025 AND 2024.” Additional information regarding the District’s investment portfolio may also be found in Note 2 in the District’s financial statements included in APPENDIX B – “EAST BAY MUNICIPAL UTILITY DISTRICT AUDITED FINANCIAL STATEMENTS FOR THE YEARS ENDED JUNE 30, 2025 AND 2024.”

Audited Financial Statements

A copy of the Basic Financial Statements of the District for the Years ended June 30, 2024 and 2025, together with the report of the District's Independent Accountants, Lance, Soll & Lunghard, LLP, and the Independent Auditors' Report on Internal Control Over Financial Reporting and on Compliance and Other Matters Based on an Audit of Financial Statements Performed in Accordance with *Government Auditing Standards* are included as Appendix B to this Official Statement, and should be read in their entirety.

Historical Operating Results

The summary of operating results for Fiscal Years 2021 through 2025 contained in Table 17 is derived from information from the audited financial statements for such Fiscal Years and is qualified in its entirety by reference to such statements, including the notes thereto. See also "INDEPENDENT ACCOUNTANTS" in the front part of this Official Statement.

(1) Calculated in accordance with the Indenture as footnoted.

(2) Wastewater Revenues exclude grant receipts, taxes and certain reimbursements.

(3) Other Revenues also includes revenues received from the sale of energy to the utility grid of \$662,514 in Fiscal Year 2021, \$665,936 in Fiscal Year 2022, \$965,348 in Fiscal Year 2023, \$1,015,415 in Fiscal Year 2024 and \$778,734 in Fiscal Year 2025.

(4) Excludes depreciation and amortization expenses. Also reflects certain adjustments for non-cash pension and OPEB expenses.

(5) Wastewater Operation and Maintenance Costs exclude those expenses paid from the share of the 1% countywide *ad valorem* tax levy allocated to Special District No. 1.

(6) Net of BABs Interest Subsidy Payments. In accordance with amendments to the Indenture which became effective on June 14, 2017, commencing in Fiscal Year 2018, BABs Interest Subsidy Payments received and due to the District are treated as an offset to interest paid by the District on the 2010B Bonds.

(7) Includes outstanding Wastewater System commercial paper notes and interest only with no principal amortization. From time-to-time, the District has elected to pay down the principal amount of commercial paper notes then outstanding. In December 2022, the District paid down outstanding Wastewater System commercial paper notes in full and terminated its extendable municipal commercial paper program.

(8) Includes a \$15,000,000 one-time payment made by the District in Fiscal Year 2023 to settle certain District litigation. See "THE WASTEWATER SYSTEM – Resource Recovery – *Related Litigation*."

District Management’s Discussion of Fiscal Year 2025 Operating Results

As reflected in the preceding table summarizing the District’s operating revenues operating expenses and debt service coverage ratios for the five Fiscal Years ended June 30, 2021 through June 30, 2025, recent fiscal years have been characterized by annual rate increases leading to generally stable-to-increasing revenues and debt service coverage above the District’s policy target of 1.60 times. Wastewater Revenues increased approximately \$13.4 million from \$154.5 million in Fiscal Year 2024 to \$167.9 million in Fiscal Year 2025. The increase reflects a stable customer base, rate increases, and year-over-year growth in Wastewater Capacity Fees. Property tax receipts increased in Fiscal Year 2025, growing approximately \$300,720, or 3.5% year-over-year.

Operating expenses increased from approximately \$90.8 million in Fiscal Year 2024 to \$98.4 million in Fiscal Year 2025. The higher operating expenses in Fiscal Year 2025 were due in part to higher costs related to sewer lines and pumping and higher treatment plant operating costs.

Net Wastewater Revenues increased from approximately \$72.4 million in Fiscal Year 2024 to approximately \$78.5 million in Fiscal Year 2025.

Parity lien debt service coverage in Fiscal Year 2025 was approximately 2.63 times, reflecting the growth in revenues which more than offset higher expenses. This is an increase from the prior Fiscal Year’s coverage level of 2.50 times. Debt service coverage was above 2.00 times in four of the five years between Fiscal Year 2021 and Fiscal Year 2025, with Fiscal Year 2023 coverage being below 2.00 times. Debt service coverage was below 2.00 times in Fiscal Year 2023 primarily due to a one-time \$15.0 million settlement payment made in connection with the settlement of certain District litigation, which was included in operating expenses in such fiscal year.

The Rate Stabilization Fund provides the District with a tool to maintain stable revenues and policy level coverage in future years. The Rate Stabilization Fund totaled \$32 million as of June 30, 2025.

See also “Management’s Discussion and Analysis” contained in APPENDIX B – “EAST BAY MUNICIPAL UTILITY DISTRICT AUDITED FINANCIAL STATEMENTS FOR THE YEARS ENDED JUNE 30, 2025 AND 2024.”

Projected Operating Results

In the preparation of the projections in this section, the District has made certain assumptions with respect to conditions that may occur in the future. While the District believes these assumptions are reasonable for the purpose of the projections, they are dependent on future events. See the footnotes to Table 18 below for relevant assumptions, including assumed future average annual rate increases in wastewater rates. See also “– Discussion of Projected Operating Results for Fiscal Year 2026” and “– Discussion of Budget Projections for Fiscal Years 2027 through 2030” for a discussion of potential impacts. Some assumptions inevitably will not materialize and unanticipated events and circumstances may occur. To the extent actual future factors differ from those assumed by the District or provided to the District by others or unanticipated events or circumstances occur, the actual results will vary from those forecasted, and such variations may be material. The projected information has not been compiled, reviewed or examined by the District’s independent accountants. Dollar amounts are rounded.

Table 18 sets forth the projected operating results and calculation of the debt service coverage ratios for the Wastewater System for the current and next five Fiscal Years. Projected results for Fiscal Year 2026 were originally developed in connection with the District’s biennial budget for 2026 and 2027, and were subsequently updated in connection with the District’s Mid-Year Budget and Performance Report that was presented to the Board on February 24, 2026 (the “Mid-Year Budget and Performance Report”) to reflect

actual results experienced through December 31, 2025 and expectations as of such date for the remainder of Fiscal Year 2026. Projected results for Fiscal Year 2027 through Fiscal Year 2030 were initially developed in connection with the District’s biennial budget for Fiscal Years 2026 and 2027 and subsequently updated in connection with the Mid-Year Budget and Performance Report to reflect updated projected interest earnings, the receipt of lower Wastewater Capacity Fee revenues due to a change in the methodology for calculating such fees beginning in Fiscal Year 2027, and updated projected annual debt service. The District’s biennial budget and rate increases for Fiscal Years 2026 and 2027 were approved and adopted by the Board on June 10, 2025. In the preparation of the projected operating results and five-year forecast, the District has taken into account limited growth in the service area and the expectations for the future economic environment at that time. See also “– Discussion of Projected Operating Results for Fiscal Year 2026” and “– Discussion of Budget Projections for Fiscal Years 2027 through 2030” below.

The District does not expect that growth will significantly bolster net revenues. As such, maintaining the District’s policy target of at least 1.60 times for debt service coverage on its Wastewater System Revenue Bonds will require annual rate increases. The projection period reflects overall rate increases of 8.50% and 8.50% for Fiscal Years 2026 and 2027, respectively. Annual rate increases of 8.00%, 8.00% and 7.00% are assumed for Fiscal Years 2028, 2029 and 2030, respectively. Any such rate increases will be subject to Board approval. Projected Operating Expenses incorporate salary and benefit expectations. The District is currently evaluating potential modifications to its methodology for calculating the Wastewater Capacity Fee that could result in lower Wastewater Capacity Fee revenues beginning in Fiscal Year 2027. See “WASTEWATER SYSTEM FINANCES – Wastewater Capacity Fees.” The projections set forth in the table below incorporate the potential reduction in Wastewater Capacity Fee revenues. A higher level of capital spending (to be funded from a combination of cash and bond proceeds) is planned over the forecast period to fund the District’s CIP, which is largely comprised of improvements to the Main Wastewater Treatment Plant and other system-wide improvements. See “THE WASTEWATER SYSTEM – Capital Improvement Program.”

⁽¹⁾ Totals may not add due to rounding.

⁽²⁾ Fiscal Year 2026 projected results are based upon the District's biennial budget for Fiscal Years 2026 and 2027 which was approved by the Board on June 10, 2025, as subsequently updated in connection with the District's Mid-Year Budget and Performance Report to reflect actual results through December 31, 2025. For a discussion of expected operating results for Fiscal Year 2026 based upon performance to date, see "– Discussion of Projected Operating Results for Fiscal Year 2026" below.

⁽³⁾ Fiscal Years 2027 through 2030 projected results as derived from the District's Ten-Year Financial Forecast originally prepared in connection with the biennial budget for Fiscal Years 2026 and 2027 which was approved by the Board on June 10, 2025, and subsequently updated in connection with the District's Mid-Year Budget and Performance Report to reflect higher interest earnings than previously projected, to incorporate a potential decrease in Wastewater Capacity Fee revenues due to a change in the methodology for the calculation of the Wastewater Capacity Fees, and to update projected annual debt service.

(Footnotes to Table 18 continue on the following page.)

(Footnotes to Table 18 continued from prior page.)

- (4) Wastewater Revenues exclude grant receipts, taxes and certain reimbursements.
- (5) Reflects adoption of 8.5% annual rate increases for Fiscal Years 2026 and 2027, and assumes average annual rate increases of 8.00% in Fiscal Year 2028, 8.00% in Fiscal Year 2029 and 7.00% in Fiscal Year 2030. Any such assumed rate increases will be subject to Board approval. See “CONSTITUTIONAL AND STATUTORY LIMITATIONS ON TAXES AND APPROPRIATIONS” in the front part of this Official Statement.
- (6) Excludes non-cash change in fair market value of investments.
- (7) Beginning in Fiscal Year 2027, reflects the incorporation of proposed modifications to the methodology for calculating the Wastewater Capacity Fee being evaluated by the District. See “WASTEWATER SYSTEM FINANCES – Wastewater Capacity Fees.” As of the date of this Official Statement, the Board has not approved the proposed modifications.
- (8) Other Revenue includes estimated collections from power sales and inspection fees from the private sewer laterals program.
- (9) Assumes approximately 4.3% average annual increases in Operating Expenses between Fiscal Years 2027 and 2030.
- (10) Wastewater Operation and Maintenance Costs excludes those expenses paid from *ad valorem* taxes.
- (11) In light of the potential effect of ongoing sequestration, the District has assumed cash receipts of approximately 33% of the interest payable on the Series 2010B Bonds (94% of the BABs Interest Subsidy Payments of 35% provided for under the American Recovery and Reinvestment Act of 2009) for Fiscal Years 2026 through 2030. The Series 2010B Bonds will be refunded in full in connection with the issuance of the Series 2026 Bonds. See “PLAN OF FINANCE” in the front part of this Official Statement. Assumes the issuance of additional Wastewater System Revenue Bonds of approximately \$40 million in Fiscal Year 2026, \$35 million in Fiscal Year 2027, \$50 million in Fiscal Year 2028, \$50 million in Fiscal Year 2029, and \$65 million in Fiscal Year 2030. The actual size and timing of future debt issuances undertaken by the District will be determined by the District based on market considerations and other factors.
- (12) The District does not anticipate issuing commercial paper in Fiscal Years 2026 through 2030.

Source: The District.

Discussion of Projected Operating Results for Fiscal Year 2026

Total Wastewater System revenues for Fiscal Year 2026 are projected to be \$174.0 million, or 1.8% higher than the Fiscal Year 2026 budget, as amended. The largest sources of revenue are Dry Weather User Charges and Wet Weather User Charges. The combined sources are projected to total \$149.2 million, which is on target with the Fiscal Year 2026 budget, as amended. Fiscal Year 2026 operating expenses on a budgetary basis (prior to certain adjustments made for purposes of calculating debt service coverage) are approximately 5.4% below the Fiscal Year 2026 budget, as amended, due in part to projected unspent contingency. Total debt service for Fiscal Year 2026 is projected to be approximately \$31.0 million. (as calculated in accordance with the Indenture). Parity debt service coverage is projected to be 2.40 times in Fiscal Year 2026.

As described, the projected operating results for Fiscal Year 2026 were developed in connection with the District’s biennial budget for 2026 and 2027, and were subsequently updated in connection with the District’s Mid-Year Budget and Performance Report to reflect actual results experienced through December 31, 2025 and expectations as of such date for the remainder of Fiscal Year 2026. The actual results may differ from those projected.

Discussion of Budget Projections for Fiscal Years 2027 through 2030

The projected financial results prepared by the District for Fiscal Years 2027 through 2030 as set forth in Table 18 above are based upon the District’s Financial Forecast for the period between Fiscal Years 2027 and 2030 as developed in connection with the District’s biennial budget for Fiscal Years 2026 and 2027 and as updated in connection with the District’s Mid-Year Budget and Performance Report. The forecast for Fiscal Year 2027 is based on year two of the District’s two-year budget for Fiscal Years 2026 and 2027 as updated in connection with the District’s Mid-Year Budget and Performance Report. The adopted biennial budget for Fiscal Years 2026 and 2027 was approved by the Board on June 10, 2025. In conjunction with the Board’s approval of the District’s biennial budget, the Board adopted rate increases

for Fiscal Years 2026 and 2027, following a public hearing on the proposed rate increases held on June 10, 2025. See “– Rates and Charges” above.

The forecast for the period between Fiscal Years 2027 and 2030 is based on specified assumptions, reflected in the footnotes to Table 18 and outlined below. Based upon the base budget assumptions reflected in the District’s Financial Forecast for Fiscal Years 2027 through 2030 outlined below, revenues are forecast to increase by 6.1% annually over the period between Fiscal Years 2027 and 2030 as reflected in the budget forecasted amounts, while forecasted operating expenses are expected to grow by an average of approximately 4.3% per year and debt service increases by an average of 9.0% per year. Beginning in Fiscal Year 2027, the projected Wastewater Capacity Fee revenues reflect the incorporation of potential modifications to the District’s methodology for calculating the Wastewater Capacity Fee that are currently being evaluated by the District. The implementation of the proposed modifications are expected to result in lower Wastewater Capacity Fee revenues. The projected Wastewater Capacity Fees for Fiscal Years 2027 through 2030 reflected in Table 18 above assume that Wastewater Capacity Fee revenues will be approximately 50% lower in each year than the amounts that were included in the projections for Fiscal Years 2027 through 2030 prepared in connection with the District’s biennial budget for Fiscal Years 2026 and 2027 due to the implementation of the proposed modifications. As of the date of this Official Statement, the proposed modifications to the Wastewater Capacity Fee methodology have not been approved by the Board. See “WASTEWATER SYSTEM FINANCES – Wastewater Capacity Fees.”

Capital cash flow spending was projected at \$496 million over the five-year period between Fiscal Years 2026 and 2030. Projected capital expenditures are directed at sustained reinvestments in physical infrastructure. Planned capital projects include treatment plant infrastructure improvements, interceptor rehabilitation, odor control improvements and digester upgrades. The average percentage of capital funded from debt is projected at 48% over the five-year period between Fiscal Years 2026 and 2030, lower than the financial policy maximum of 65%. Revenue bond debt service coverage is projected to meet or exceed the 1.6x policy target each year and increase annually throughout the period. In Fiscal Year 2026, revenue bond debt service coverage is projected to be 2.40x. Debt service coverage is projected to remain relative steady, at 2.29x, 2.32x, 2.36x, and 2.33x, in Fiscal Years 2027, 2028, 2029 and 2030, respectively. Reserve balances, including the Rate Stabilization Fund reserve, are projected to meet or exceed the policy reserve levels throughout the five-year period. Total reserves are projected at over \$100 million in each year, and the Rate Stabilization Fund reserve is projected to remain at \$32 million throughout the projection period.

The projected financial results prepared by the District for the period covering Fiscal Years 2027 through 2030 is based on certain assumptions, which the District believes to be reasonable, incorporating among other factors a slight decrease in the volume of treatment flow due to lower water use in recent years. The assumed overall increases to treatment rates and wet weather charges for Fiscal Year 2027 is 8.50%, consistent with the adopted budget and Proposition 218 notice. Overall rate increases of 8.00%, 8.00% and 7.00% per annum are assumed for each of Fiscal Years 2028, 2029 and 2030, respectively. Assumed rate increases in such years will be subject to Board approval.

Employees’ Retirement System

General. The District has a contributory retirement system covering substantially all of its employees (including the Water System and Wastewater System). The East Bay Municipal Utility District Employees’ Retirement System (the “Retirement System”) was established in 1937 to administer a single-employer, contributory, defined benefit pension plan (the “Plan”) to provide retirement, disability, survivorship and post-employment health insurance benefits (“HIB”) for eligible directors, officers and employees of the District. The Plan is funded by contributions from its members and from the District, and from investment earnings on Plan assets. The payment of benefits earned by Plan members of the Retirement System is an obligation of the District. Employees of the District are also covered by Social Security.

The Retirement System is administered by a Retirement Board composed of three members appointed by the District Board, two members elected by and from the active membership and one (non-voting) member elected by and from the retired membership of the Retirement System. Ordinance No. 40 of the District, effective October 1, 1937, as amended (the “Retirement System Ordinance”), assigns the authority to establish Plan benefit provisions to the District Board.

Contributions to the Retirement System are made by the members and the District. Each member’s contribution is based upon a percentage of that member’s covered compensation. The employee contribution rates for 1955/1980 Plan members (*i.e.*, employees first hired prior to January 1, 2013) are prescribed in the Retirement System Ordinance and may be adjusted by the District Board solely pursuant to the terms of a negotiated collective bargaining agreement or MOU with employee bargaining units. Pursuant to applicable provisions of the California Public Employees’ Pension Reform Act of 2013 as codified (“PEPRA”), 2013 Tier members (*i.e.*, employees first hired on or after January 1, 2013) are required to contribute at least 50% of the “normal cost” rate. The District employees’ contribution rate for 1955/1980 Plan members (which includes a 0.09% contribution to the HIB) is 8.75%, effective since April 18, 2016. The District employees’ contribution rate for 2013 Tier members (which also includes a 0.09% contribution to the HIB) is established by the District Board, and such rates are based upon actuarial valuations. The current (Fiscal Year 2026) District employees’ contribution rate for 2013 Tier members (including the 0.09% contribution to the HIB) is 10.17%, which has been effective since July 1, 2025. The employees’ contribution rate to the HIB is scheduled to increase to 0.40% effective January 1, 2026, to 0.70% effective January 1, 2027, and to 1.00% effective January 1, 2028.

The District (employer) contributions are based upon percentages of the aggregate amount of members’ covered compensation. Employer contribution percentages are established by the District Board. Such percentages are based upon actuarial valuations. The District’s employer contribution percentage for 1955/1980 Plan members has been established at 49.86% for Fiscal Year 2026 (including a 4.43% contribution to the HIB) and has been established at 40.15% for 2013 Tier members (including a 4.22% contribution to the HIB). Based upon the June 30, 2025 funding valuation reports prepared by the actuary, for Fiscal Year 2027, the recommended District employer contribution percentage for 1955/1980 Plan members is 43.58% to the Pension and 5.76% to the HIB, and for 2013 Tier members is 34.20% to the Pension and 5.71% to the HIB. (As part of the HIB Plan changes for employees retiring or terminating on or after July 28, 2025, employee and employer contributions to the HIB Plan for the 2013 Tier are now calculated by the actuary based on unlimited payroll, that is, without applying the limit on pensionable compensation used for the Pension Plan. Therefore, beginning with Fiscal Year 2027, the contribution rates for the Pension and HIB Plans are based on different payroll measures and are reported separately.) The June 30, 2025 funding valuation reports, which provide the recommended contribution rates for Fiscal Year 2027, were presented by the actuary to the Retirement Board at its January 29, 2026 meeting. The District Board adopted the recommended contribution rates at its February 24, 2026 Board meeting.

The District estimates that approximately 86% of the District’s annual contributions are attributable to the Water System and approximately 14% are attributable to the Wastewater System.

As of June 30, 2025, collectively for the Water and Wastewater Systems, there were 2,001 active (non-retired) Plan members, 424 terminated Plan members entitled to but not yet receiving benefits (*i.e.*, inactive members) and 2,235 retirees and beneficiaries receiving benefits.

Table 19 sets forth the number of active (non-retired) and inactive members, total Retirement System assets, District and Member contributions and retirement allowances paid in the five Fiscal Years 2021 through 2025.

Table 19
RETIREMENT SYSTEM
Active (Non-Retired) and Inactive Members, Total Retirement System Assets,
District and Member Contributions and Allowances Paid
Five Fiscal Years Ended June 30, 2025⁽¹⁾

Fiscal Year Ended June 30	Active (Non-Retired) and Inactive Members⁽²⁾	Total Retirement System Assets⁽³⁾	District Contribution⁽⁴⁾	Member Contributions	Allowances Paid From Retirement Plan⁽⁵⁾
2021	2,223	\$2,328,722,000	\$ 90,624,000	\$19,336,000	\$130,472,000
2022	2,255	2,058,923,000	102,285,000	21,127,000	139,281,000
2023	2,336	2,255,307,000	106,523,000	22,088,000	149,786,000

2025	2,425	2,826,084,000	122,754,000	24,737,000	167,316,000

(1) Includes Health Insurance Benefit.

(2) Includes active plan members and terminated plan members entitled to but not yet receiving benefits.

(3) Market value as of June 30 of such Fiscal Year as shown in the audited financial statements of the Retirement System.

(4) The District estimates that approximately 86% of the District's annual contributions are attributable to the Water System and approximately 14% are attributable to the Wastewater System.

(5) Includes benefits paid and refunds of contributions.

Source: Segal Actuarial Valuation and Review of Pension Plan Benefits Reports.

The Retirement System is an integral part of the District and, as noted above, the District appoints the majority of the governing body of the Retirement System and provides for its funding. Accordingly, the Retirement System's operations are reported as a Pension and Other Employee Benefit Trust Fund in the District's basic financial statements. The Retirement System also issues separately available financial statements on an annual basis. Such financial statements can be obtained from the District at 375 Eleventh Street, Oakland, California 94607.

The Governmental Accounting Standards Board ("GASB") issued Statements 67 and 68 affecting the reporting of net pension liabilities for accounting purposes, and Statements 74 and 75 affecting the reporting of net other post-employment healthcare benefits ("OPEB") liabilities for accounting purposes. Statements 67 and 74 are for plan reporting, and Statements 68 and 75 are for employer reporting. The information needed to comply with Statements 67 and 74 was provided by the actuary, The Segal Group, Inc. ("Segal"), in separate reports (*i.e.*, separate from the pension and health insurance benefits funding valuation reports) dated January 14, 2025, and the information needed to comply with Statements 68 and 75 was provided by the actuary in separate reports dated June 16, 2025 and March 18, 2025, respectively (for employer reporting as of June 30, 2025, based on a June 30, 2024 measurement date). The GASB Statements require shorter periods for recognition of non-investment gains/losses and actuarial assumption changes, as well as for recognition of investment gains/losses. The GASB Statements provide for a complete separation between financial reporting and funding requirements for pension and health insurance benefit plans. Under the GASB Statements, the District is required to report the Net Pension Liability (*i.e.*, the difference between the Total Pension Liability and the Pension Plan Fiduciary Net Position or market value of assets) and the Net OPEB Liabilities (*i.e.*, the difference between the Total OPEB Liability and the OPEB Plan Fiduciary Net Position or market value of assets) in its financial statements. See Note 11 and the Required Supplementary Information in the audited financial statements of the District included in APPENDIX B – "EAST BAY MUNICIPAL UTILITY DISTRICT AUDITED FINANCIAL STATEMENTS FOR THE YEARS ENDED JUNE 30, 2025 AND 2024" for additional information regarding the Net Pension Liability and the Net OPEB Liability of the District for the Retirement System.

The discussion below also includes information reflected in the GASB Statements 67 and 74 actuarial valuation reports as of June 30, 2025, prepared by Segal and dated January 21, 2026. These reports were presented to the Retirement Board at its January 29, 2026 meeting, and were adopted by the District Board at its February 24, 2026 Board meeting.

It should be noted that the amounts set forth in this discussion of the District's Retirement System, including, for example, actuarial accrued liabilities and funded ratios, are based upon numerous demographic and economic assumptions, including investment return rates, inflation rates, salary increase rates, cost of living adjustments, postemployment mortality, active member mortality, and rates of retirement. Prospective purchasers of the District's bonds are cautioned to review and carefully assess the reasonableness of the assumptions set forth in the documents that are cited as the sources for such information. In addition, prospective purchasers of the District's bonds are cautioned that such sources and the underlying assumptions are made as of their respective dates, and are subject to change. Prospective purchasers of the District's bonds should also be aware that some of the information presented in this discussion of the Retirement System contains forward-looking statements and the actual results of the Retirement System may differ materially from the information presented herein.

Benefits. All regular full-time employees (as well as certain job share and intermittent employees) of the District are members of the Plan. In accordance with the Retirement System Ordinance, eligible employees become members of the Plan on the first day they are physically on the job. Retirement plan benefits are generally determined by a formula based on the employee's highest two years of compensation (highest 36 months for 2013 Tier members) and the length of employment with the District. Benefits adopted by the District vest in part with members after five years of continuous full-time employment. Vested members who terminate employment may elect a refund of their contributions or leave them in the Plan until eligible to receive benefits.

In addition to retirement benefits, the District provides post-employment health benefits assistance, administered by the Retirement System, for employees who retire from the District or their surviving spouses. As of June 30, 2025, there were 1,957 participants receiving these healthcare benefits. For participants entering the Retirement System prior to July 1, 1996, a monthly allowance of up to \$450 (up to \$550 for married retirees and retirees with domestic partners) is paid to retirees with at least five years of full-time service to reimburse the retiree-paid medical expenses (including any health, dental or long-term care insurance premiums paid by the retiree for his or her self, and current spouse or domestic partner, or any health, dental or long-term care insurance premiums paid by the eligible surviving spouse or domestic partner of a retiree). Effective July 1, 1996, a 20-year vesting schedule for full benefits was implemented for all new employees. Effective January 1, 1999, retired members who had separated from the District prior to their retirement and who had at least five years of service also become eligible for the post-employment healthcare benefits based on the same vesting schedule. As discussed below, the District Board made changes to the Retirement System Ordinance that affect the benefits that certain District employees in the Retirement System are eligible for.

In November 2025, the District Board amended the Retirement System Ordinance to, among other revisions, revise the provisions of the Retirement System Ordinance relating to HIB to reflect the agreement made with the District's bargaining units reflected in the MOUs that the District entered into with the bargaining units in July 2025. See "THE DISTRICT – Employees and Employee Relations." Under the amendments, for participants entering the Retirement System prior to July 1, 1996 who retired before July 28, 2025, a monthly allowance of up to \$450 (up to \$550 for married retirees and retirees with domestic partners) is paid to retirees with at least five years of full-time service to reimburse the retiree-paid medical expenses (including any health, dental or long-term care insurance premiums paid by the retiree for his or her self, and current spouse or domestic partner, or any health, dental or long-term care insurance premiums paid by the eligible surviving spouse or domestic partner of a retiree). For such participants, a 20-year

vesting schedule applies, which is also applicable to retired members who had separated from the District prior to their retirement and who had at least five years of service.

Under the amendments to the Retirement System Ordinance, a new tier of HIB was created for active members who retire on or after July 28, 2025. Effective January 1, 2026, members who retire for service or disability on or after July 28, 2025 or who terminated District employment and elect on or after July 28, 2025 to keep their accumulated contributions within the Retirement System, and have at least five years of full-time service are eligible to receive a monthly payment to reimburse the retiree the retiree-paid medical expenses (including any health, dental or long-term care insurance premiums paid by the retiree for his or her self, and current spouse or tax-dependent registered domestic partner, or any health, dental or long-term care insurance premiums paid by the eligible surviving spouse or tax-dependent registered domestic partner of a retiree) in an amount up to the monthly premium amount charged pursuant to the District's Kaiser senior advantage health insurance couple coverage, both Medicare eligible, as of January 1, 2026, adjusted annually by the annual percentage change in monthly healthcare premiums as set forth in the index identified in the Retirement System Ordinance, as adjusted pursuant to the terms of Retirement System Ordinance; provided that any such annual adjustment may not be greater than 3% or less than 0%. The minimum HIB reimbursement amount can be no less than \$605 per month for those members who retire for service or disability on or after July 28, 2025. For employees first hired before January 1, 2013 who retire on or after July 28, 2025 (or hired after January 1, 2013 who have established reciprocity that qualifies them for the 1980 Retirement plan) or who terminated District employment and elected on or after July 28, 2025 to keep their accumulated contributions within the Retirement System and have at least five years of continuous full-time service, a tiered vesting schedule that provides for full benefits upon achieving 20-years of continuous District service. For employees hired after January 1, 2013 and members of the PEPRA retirement tier who retire on or after July 28, 2025 or who terminated District employment and elected to keep their accumulated contributions within the Retirement System on or after July 28, 2025 and have at least five years of full-time service, a tiered vesting schedule that provides full benefits upon achieving 15-years of continuous District service.

Actuarial Assumptions and Funding Policy. Under the Retirement System Ordinance, the District is required to have an actuarial study performed at least every two years, but the District's current policy is to have an actuarial study performed each year. The most recent actuarial study of the Retirement System, including the pension and the HIB trusts, was performed by Segal, as of June 30, 2025. That actuarial study was presented by the actuary to, and accepted by, the Retirement Board at its January 29, 2026 meeting, and was adopted by the District Board at its February 24, 2026 Board meeting.

The actuarial report provides a basis for the District Board's decision regarding the rate of contributions by the District to the Retirement System, including both the pension and the HIB trusts. The District makes its contribution using rates determined by its outside actuaries.

To calculate the required contribution for each Fiscal Year, assumptions are made about future events that affect the amount and timing of benefits to be paid and assets to be accumulated. Each year actual experience is measured against the assumptions. If overall experience is more favorable than anticipated (an actuarial gain), the contribution requirement will decrease from the previous year. On the other hand, the contribution requirement will increase if overall actuarial experience is less favorable than assumed (an actuarial loss). If assumptions are changed, the contribution requirement is adjusted to take into account a change in experience anticipated for all future years.

In addition, under the Retirement System Ordinance, the District is required to have an actuarial experience study conducted no less frequently than every four years in order to review the mortality, service and compensation experience of the members, retired members and beneficiaries of the Retirement System, over the study period. The experience study provides the factual information upon which the outside actuary makes recommendations to the District regarding the economic and demographic assumptions that provide

the basis for the actuarial valuation of the assets and liabilities of the Retirement System. Changes in the assumptions approved by the Retirement Board as an outcome of the experience study and recommendations of the actuary will impact the actuarial accrued liabilities of the Retirement System and may affect future recommended contribution rates.

A summary of the funding method and assumptions utilized in the actuarial study as of June 30, 2025, based on the assumptions adopted by the Board resulting from the July 1, 2020 through June 30, 2024 actuarial experience study report dated November 13, 2024 are described below.

Funding Method. The Plan's funding policy provides for periodic District contributions at actuarially determined amounts sufficient to accumulate the necessary assets to pay benefits when due as specified by the Retirement System Ordinance. The Entry Age Cost Method is used for this purpose. Under the Entry Age Cost Method, there are two components to the total contributions: (i) the normal cost, which is the amount of contributions required to fund the benefit allocated to the current year of service (associated with active employees only), and (ii) an amortization payment on any unfunded actuarial accrued liability ("UAAL"). The normal cost is calculated on an individual basis where the entry age normal cost is calculated as the sum of the individual normal costs. The UAAL (past service liability) is amortized as a level percentage of payroll on a closed basis over the amortization periods described below. The actuarial accrued liability is calculated on an individual basis and is based on costs allocated as a level percentage of compensation.

Amortization Periods. The UAAL is currently being funded using a layered approach. Each layer of the UAAL established prior to July 1, 2011 is being funded over a separate decreasing 30-year period, starting from the date the layer was originally established. On or after July 1, 2011, changes in the UAAL attributable to plan amendments are amortized over separate decreasing 15-year periods; changes in the UAAL attributable to assumption or method changes are amortized over separate decreasing 25-year periods; and changes in the UAAL attributable to actuarial gains/losses (*i.e.*, the extent to which actual overall experience deviates from the assumptions) are amortized over separate decreasing 20-year periods. On or after July 1, 2021, assumption and method changes are amortized over separate decreasing 20-year periods. Under the layered approach, any new UAAL layer that emerges between the prior and the current actuarial valuation (due to deviations between actual and expected actuarial experience, changes in actuarial assumptions used to measure the liabilities or other factors) will be determined and factored into the District's contribution rates so that it will be paid off after its respective amortization period described above.

Actuarial Value of Assets (Asset Smoothing Method). Methods used to compute District contribution requirements include a five-year smoothing of the difference between the actual market return and the expected return on the market value of the assets (with further adjustments as may be required to keep the smoothed assets within 30% of market value). The impact of this will result in a "smoothed" valuation value of assets (or "Actuarial Value of Assets") that is higher or lower than the market value of the assets depending on whether the amount that is being smoothed is either a net deferred loss or a net deferred gain.

Actuarial Assumptions. A number of assumptions are used to calculate the costs of the Plan and to compute contribution requirements for the Plan. The principal assumptions used in preparing the pension plan and HIB funding valuation reports as of June 30, 2025 and the pension plan financial reporting (*i.e.*, GASB Statement 67) valuation report as of June 30, 2025 include:

1. Investment rate of return: 6.75%.
2. Inflation rate: 2.50%.
3. Interest credited to member contributions: 6.75%.

4. Projected salary increases: Range from 9.25% to 3.75% for the 1955/1980 Plan and from 9.50% to 3.75% for the 2013 Tier, based on time from hire (includes inflation at 2.50% plus across the board salary increase of 0.50% plus merit and promotion increases).
5. Cost of living adjustments for pension benefits: 2.75%.
6. Increase in HIB maximum monthly allowance: For the \$450/\$550 maximum monthly allowance, the Plan does not provide for an automatic increase and no such increase is assumed in the valuation. For the indexed maximum monthly allowance, a 3.00% annual increase is assumed.
7. Additional assumptions: Additional assumptions were used regarding rates of termination from active membership, post-retirement mortality, active member mortality, disability rates and rates of retirement.

Contribution History. The schedule of District contributions for each of the pension plan and the HIB plan for the last five Fiscal Years are shown in Table 20:

Table 20
RETIREMENT SYSTEM
History of Contributions
Five Fiscal Years Ended June 30, 2025
(Dollar Amounts in Thousands)

Pension Plan:

<i>Fiscal Year Ended June 30</i>	<i>Contributions as a Percentage of Covered Payroll⁽¹⁾</i>	<i>Actuarially Determined Contribution</i>	<i>Actual Contribution</i>	<i>Percentage Contributed</i>
2021	35.73% ⁽²⁾	\$ 79,252	\$ 79,252	100%
2022	39.07	91,393	91,393	100
2023	38.62	95,103	95,103	100
2024	39.75	105,111	105,111	100
2025	40.29	110,869	110,869	100

Health Insurance Benefit:

<i>Fiscal Year Ended June 30:</i>	<i>Contributions as a Percentage of Covered Payroll⁽¹⁾</i>	<i>Actuarially Determined Contribution</i>	<i>Actual Contribution</i>	<i>Percentage Contributed</i>
2021	5.13% ⁽²⁾	\$11,372	\$11,372	100%
2022	4.66	10,892	10,892	100
2023	4.64	11,420	11,420	100
2024	4.63	12,231	12,231	100
2025	4.32	11,885	11,885	100

⁽¹⁾ This rate represents the aggregate rate for the 1955/1980 Plan and the 2013 Tier, based on the District's actual contributions expressed as a percentage of the actual pensionable payroll amounts reported by the Retirement System.

⁽²⁾ Based on the higher contribution rates adopted by the Retirement Board carried over from the June 30, 2017 valuation, rather than the actuarially determined contribution rates from the June 30, 2019 valuation.

Source: Segal GASBS 67 Actuarial Valuation for the Pension Plan as of June 30, 2025 and GASBS 74 Actuarial Valuation for the Health Insurance Benefit Plan as of June 30, 2025.

As reflected in the funding actuarial study and shown (rounded to the nearest thousand dollars) in Table 21, the combined Actuarial Accrued Liability for pension and HIB benefits at June 30, 2025 was \$3,443,252,079 and the Actuarial Value of Assets was \$2,673,176,540, resulting in an Unfunded Actuarial Accrued Liability of \$770,075,539 and a funded ratio of the Plan under the Entry Age Cost Method of 77.6%. As described above, the Actuarial Value of Assets has been calculated using a five-year smoothing of the difference between the actual market return and the expected return on the market value of the assets. The valuation was performed in accordance with generally accepted actuarial principles and practices and the District’s funding policy that was last reviewed with the Retirement Board in 2022. The assumptions and methods used for funding purposes meet the parameters set by Actuarial Standards of Practice (ASOPs).

Table 21 sets forth the Actuarial Accrued Liability, Actuarial Value and Market Value of Assets, the Unfunded Actuarial Accrued Liability, and Funded Ratios as of June 30 of each of the Fiscal Years 2021 through 2025.

Table 21
RETIREMENT SYSTEM
(Pension Plan and HIB Combined)

Unfunded Actuarial Accrued Liability and Funded Ratios
Five Fiscal Years Ended June 30, 2025 ⁽¹⁾
(Dollar Amounts in Thousands)

<i>Fiscal Year Ended June 30</i>	<i>Actuarial Accrued Liability (AAL)</i>	<i>Actuarial Value of Assets</i>	<i>Market Value of Assets</i>	<i>Unfunded Actuarial Liability (UAAL)⁽²⁾</i>	<i>Funded Ratio on Actuarial Value</i>	<i>Funded Ratio on Market Value</i>
2021	\$2,728,641 ⁽³⁾	\$2,097,712	\$2,328,722	\$630,928	76.9%	85.3%
2022	2,966,722 ⁽⁴⁾	2,216,124	2,058,923	750,599	74.7	69.4
2023	3,126,057 ⁽⁵⁾	2,314,460	2,255,307	811,597	74.0	72.1
2024	3,278,485 ⁽⁶⁾	2,461,215	2,517,031	817,270	75.1	76.8
2025	3,443,252 ⁽⁷⁾	2,673,177	2,826,084	770,076	77.6	82.1

⁽¹⁾ Dollars rounded to nearest thousand.

⁽²⁾ The District estimates that approximately 86% of the UAAL is attributable to the Water System and approximately 14% is attributable to the Wastewater System. The UAAL is determined based on the Actuarial Value of Assets.

⁽³⁾ Of this amount, \$123,027 is attributable to the HIB liabilities.

⁽⁴⁾ Of this amount, \$130,951 is attributable to the HIB liabilities.

⁽⁵⁾ Of this amount, \$131,627 is attributable to HIB liabilities.

⁽⁶⁾ Of this amount, \$134,756 is attributable to the HIB liabilities.

⁽⁷⁾ Of this amount, \$172,415 is attributable to the HIB liabilities.

Source: Segal Actuarial Valuation reports.

As of June 30, 2025, the market value of the combined pension and HIB plan’s assets was \$2,826,084,000 and the projected benefit obligation (“PBO”) was \$3,380,819,000, resulting in a funded ratio of the plan under the PBO basis of 83.6%. Under the plan provisions, determination of the funded ratio on a PBO basis is required and certain cost of living adjustments in excess of 3% for pension benefits may be granted when the funded ratio of the plan is 85% or higher as calculated on the PBO basis.

Schedule of Funding Progress. The District reports the schedule of funding progress for each of the pension plan and the post-employment healthcare plan (HIB), based on the results of the funding valuations. The schedule of funding progress presents multi-year trend information that shows whether the

actuarial value of plan assets is increasing or decreasing over time relative to the actuarial accrued liabilities for benefits.

The schedule of funding progress for the pension plan is set forth in Table 22.

Table 22
PENSION PLAN
Schedule of Funding Progress
(Dollar Amounts in Thousands)

<i>Actuarial Valuation Date June 30</i>	<i>Actuarial Value of Assets</i>	<i>Actuarial Accrued Liability (AAL)</i>	<i>Unfunded AAL (UAAL)</i>	<i>Funded Ratio</i>	<i>Covered Payroll⁽¹⁾</i>	<i>UAAL as a Percentage of Covered Payroll</i>
2021	\$2,045,503	\$2,605,614	\$560,111	78.5%	\$224,392	249.6%
2022	2,158,463	2,835,771	677,308	76.1	241,538	280.4
2023	2,251,691	2,994,429	742,738	75.2	262,273	283.2
2024	2,391,378	3,143,728	752,350	76.1	273,428	275.2
2025	2,594,679	3,270,837	676,159	79.3	286,463	236.0

⁽¹⁾ Projected payroll based on valuation results.

Source: Segal Actuarial Valuation and Review of Pension Plan as of June 30, 2025.

The schedule of funding progress for the post-employment healthcare plan is set forth in Table 23.

The retiree health liabilities reported in the actuarial funding study as of June 30, 2025 (and shown in Table 23 below) will not match those required to be used for GASB reporting purposes as shown in Table 25. The retiree health liabilities as reflected in the funding study have not been adjusted to include the implicit retiree rate subsidy as required under GASB reporting requirements. (Note that when premiums for active employees are determined on a pooled basis with premiums for retirees under age 65, a significant accounting obligation may exist even though the retiree under age 65 contributes most or all of the blended premium cost of the plan. The average costs for retirees if determined on a stand-alone basis is likely to exceed the average cost for the whole group, leading to an implicit subsidy for these retirees. The GASB accounting standard requires the employer to identify and account for this implicit subsidy as well as any explicit subsidies the employer may provide.) In addition, the liabilities for GASB reporting purposes for the HIB portion of the obligations shown in Table 25 were determined based upon a lower discount rate (*i.e.*, 6.32% for June 30, 2025 and 5.58% for June 30, 2024) than the 6.75% investment rate of return, respectively, used in Segal prefunding studies. The liabilities calculated for GASB reporting purposes shown in Table 25 are therefore higher than those reflected in the actuarial studies as of June 30, 2025 and June 30, 2024 and described above.

Table 23
POST-EMPLOYMENT HEALTH INSURANCE BENEFIT (HIB)
Schedule of Funding Progress
(Dollar Amounts in Thousands)

⁽¹⁾ Projected payroll based on valuation results.

Source: Segal Actuarial Valuation and Review of Health Insurance Benefits (HIB) as of June 30, 2021 through 2025.

Net Pension Liability. Under GASB Statement 67, the pension plan is required to disclose the Net Pension Liability for financial reporting purposes. When measuring pension liability, GASB uses the same actuarial cost method (Entry Age Cost Method) and the same type of discount rate (expected return on assets) as the District uses for funding. This means that the Total Pension Liability (“TPL”) measure for financial reporting is determined on the same basis as the District’s AAL measure for funding. The Net Pension Liability (hereinafter, “NPL”) is equal to the difference between the TPL and the Plan Fiduciary Net Position. The Plan Fiduciary Net Position is equal to the market value of assets and therefore, the NPL measure is the same as the UAAL calculated on a market value basis. The NPL as of June 30, 2025 and June 30, 2024 is set forth in Table 24.

Table 24
PENSION PLAN
Net Pension Liability
(Dollar Amounts in Thousands)

	<u>June 30, 2025</u>	<u>June 30, 2024</u>
Total Pension Liability	\$ 3,270,837	\$ 3,143,728
Plan Fiduciary Net Position	(2,743,096)	(2,445,611)
Net Pension Liability	\$ 527,741	\$ 698,117
Plan Fiduciary Net Position as a % of the Total Pension Liability	83.87%	77.79%

Source: Segal GASBS 67 Actuarial Valuation for the Pension Plan as of June 30, 2025.

The NPL was measured as of June 30, 2025 and 2024. The Plan Fiduciary Net Position (plan assets) was valued as of the measurement date, while the TPL was determined based upon the results of the funding actuarial valuations as of June 30, 2025 and 2024, respectively. It should be noted that for GASB Statement 68 purposes, the NPL for the reporting date of June 30, 2025 is based upon results as of the June 30, 2024 measurement date and those results are not adjusted or rolled forward. Therefore, the information as of June 30, 2024 set forth above is the same as that reported in the District’s audited financial statements as of June 30, 2025. See paragraph (2) of the Required Supplementary Information included in Appendix B.

The discount rate used to determine the TPL was 6.75% as of June 30, 2025 and June 30, 2024, following the same assumptions used by the Retirement System in the pension funding valuations as of June 30, 2025 and June 30, 2024. It should be noted that, according to GASB, the discount rate used for

financial reporting purposes should be based on the long-term expected rate of return on a retirement system’s investments, just as it is for funding. However, GASB requires that this assumption should be net of investment expenses but not net of administrative expenses (*i.e.*, without reduction for administrative expenses). Currently, the District’s investment return assumption used for the annual funding valuation is developed net of both investment and administrative expenses.

Net OPEB Liability. Under GASB Statement 74, the OPEB plan is required to disclose the Net OPEB Liability for financial reporting purposes. When measuring OPEB liability, GASB uses the same actuarial cost method (Entry Age Cost Method) and the same expected return on plan assets as the District uses for funding. This means that the Total OPEB Liability (“TOL”) measure for financial reporting is determined on the same basis as the District’s AAL measure for funding, with the exception discussed above for the implicit subsidy. The Net OPEB Liability (“NOL”) is equal to the difference between the TOL and the OPEB Plan Fiduciary Net Position. The OPEB Plan Fiduciary Net Position is equal to the market value of assets. The NOL reflects all investment gains and losses as of the measurement date. The Net OPEB Liability as of June 30, 2025 and June 30, 2024 is set forth in Table 25.

Table 25
HEALTH INSURANCE BENEFIT PLAN
Net OPEB Liability
(Dollar Amounts in Thousands)

	June 30, 2025	June 30, 2024
Total OPEB Liability	\$220,176	\$189,880
Plan Fiduciary Net Position	(82,988)	(71,420)
Net OPEB Liability	\$137,188	\$118,460
Plan Fiduciary Net Position as a % of the Total OPEB Liability	37.69%	37.61%

Source: Segal GASBS 74 Actuarial Valuation for the Health Insurance Benefit Plan as of June 30, 2025.

The NOL was measured as of June 30, 2025 and 2024. The Plan Fiduciary Net Position (plan assets) was valued as of the measurement date, while the Total OPEB Liability was determined based upon the results of the funding actuarial valuations as of June 30, 2025 and 2024, respectively, with the exception of the discount rate noted below. In addition, the implicit subsidy benefit payments are valued based on the age-based costs. It should be noted that for GASB Statement 75 purposes, the NOL for the reporting date of June 30, 2025 is based upon results as of the June 30, 2024 measurement date and those results are not adjusted or rolled forward. Therefore, the information as of June 30, 2024 set forth above is the same as that reported in the District’s audited financial statements as of June 30, 2025. See paragraph (6) of the Required Supplementary Information included in Appendix B.

The discount rate used to determine the TOL and NOL was 6.32% as of June 30, 2025 and 5.58% as of June 30, 2024. It should be noted that, according to GASB, the discount rate used for financial reporting purposes as of June 30, 2025 is a blend of the assumed investment return on plan assets (*i.e.*, 6.75% for the June 30, 2025 valuation) and the rate for 20-year, tax-exempt general obligation municipal bonds with an average rating of AA/Aa or higher (*i.e.*, 5.20% as of June 30, 2025). Projected benefit payments are discounted by the plan investment return assumption of 6.75% until June 30, 2064. Benefit payments after June 30, 2064 are then discounted by the 20-year municipal bond rate of 5.20%. The 6.32% discount rate used in the GASB Statement 74 actuarial valuation as of June 30, 2025 is the blended discount rate reflecting benefits discounted by the plan investment return assumption rate and the bond rate.

Proposed Legislation. Legislation has been introduced in the California legislature (Assembly Bill 1383 (“AB 1383”)) that, as drafted, would modify certain provisions of PEPRA, specifically with respect

to raising the employee compensation limits that may be applied for purposes of calculating defined pension benefits for certain retirement system members. If enacted, such a change in applicable law would be expected to increase future pension liabilities and contribution rate requirements for public retirement systems. The District is unable to predict whether AB 1383 will be enacted, or if enacted, whether AB 1383 will be enacted in its present form, and what the ultimate effect will be on the District's Retirement System.

Additional information concerning the Retirement System may be found in APPENDIX B – “EAST BAY MUNICIPAL UTILITY DISTRICT AUDITED FINANCIAL STATEMENTS FOR THE YEARS ENDED JUNE 30, 2025 AND 2024.”

INDEPENDENT AUDITORS' REPORT

To the Board of Directors
East Bay Municipal Utility District
Oakland, California

Report on the Audit of the Financial Statements

Opinions

We have audited the accompanying financial statements of each major fund and the aggregate remaining fund information of the East Bay Municipal Utility District, (hereafter, the District), as of and for the year ended June 30, 2025, and the related notes to the financial statements, which collectively comprise the District's basic financial statements as listed in the table of contents.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of each major fund and the aggregate remaining fund information of the District as of June 30, 2025, and the respective changes in financial position, and cash flows thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinions

We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, and the State Controller's Minimum Audit Standards for California Special Districts. Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the District and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Emphasis of Matter

Change in Accounting Principle

As described in Note 1 to the financial statements, in 2025, the District adopted new accounting guidance, GASB Statement No. 101, *Compensated Absences*. Our opinion is not modified with respect to this matter.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

To the Board of Directors
East Bay Municipal Utility District
Oakland, California

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the District's ability to continue as a going concern for twelve months beyond the financial statement date, including any currently known information that may raise substantial doubt shortly thereafter.

Auditors' Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinions. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with generally accepted auditing standards, *Government Auditing Standards*, and the State Controller's Minimum Audit Standards for California Special Districts will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with generally accepted auditing standards, *Government Auditing Standards*, and the State Controller's Minimum Audit Standards for California Special Districts we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the District's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the District's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis and required pension and other post-employment benefits schedules as listed on the table of contents be presented to supplement the basic financial statements. Such information is the responsibility of management and, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial

To the Board of Directors
East Bay Municipal Utility District
Oakland, California

statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Supplementary Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the District's basic financial statements. The accompanying combining and individual fund financial statements and schedules (supplementary information) are presented for purposes of additional analysis and are not a required part of the basic financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. The information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the supplementary information is fairly stated, in all material respects, in relation to the basic financial statements as a whole.

Summarized Comparative Information

We have previously audited the financial statements of the District for the year ended June 30, 2024, and expressed an unmodified audit opinion on those financial statements in our report dated October 9, 2024. In our opinion, the summarized comparative information presented herein as of and for the year ended June 30, 2024, is consistent, in all material respects, with the audited financial statements from which it has been derived.

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our report dated November 17, 2025, on our consideration of the District's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the District's internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering District's internal control over financial reporting and compliance.

EAST BAY MUNICIPAL UTILITIES DISTRICT

Management's Discussion and Analysis For the Years Ended June 30, 2025 and 2024

This section presents management's analysis of the East Bay Municipal Utility District's (the District) financial condition and activities as of and for the year ended June 30, 2025. Management's Discussion and Analysis (MD&A) is intended to serve as an introduction to the District's basic financial statements.

This information should be read in conjunction with the audited financial statements that follow this section. The District, as the primary governmental entity, includes within the financial statements, the financial position, and activities of the District's Employees' Retirement System (Employees' Retirement System) as a component unit. The Employees' Retirement System issues its own financial statements and MD&A under separate cover. Significant matters pertaining to the Employees' Retirement System have been included in the notes to the financial statements as deemed appropriate.

The information in this MD&A is presented under the following headings:

- Organization and Business
- Overview of the Basic Financial Statements
- Financial Analysis
- Capital Assets
- Debt Administration
- Request for Information

ORGANIZATION AND BUSINESS

The District provides water and wastewater services to industrial, commercial, residential, and public authority users. The Water System collects, transmits, treats, and distributes high quality water to approximately 60% (332 square miles) of the developed area within Alameda and Contra Costa counties of California and serves a population of about 1.4 million. The Wastewater System intercepts and treats wastewater from residences and industries within an 88-square-mile service area including the communities of Alameda, Albany, Berkeley, El Cerrito, Emeryville, Kensington, Oakland, Piedmont, and parts of Richmond serving a population of about 740,000. The District recovers the costs of service primarily through user fees.

OVERVIEW OF THE BASIC FINANCIAL STATEMENTS

The District's basic financial statements are comprised of two components: (1) Fund Financial Statements and (2) Notes to Basic Financial Statements. The report also contains other required supplementary information in addition to the basic financial statements.

Fund Financial Statements. A fund is a grouping of related accounts that is used to maintain control over resources that have been segregated for specific activities or objectives. The District, like other special purpose governments, uses fund accounting to ensure and demonstrate compliance with financial-related legal requirements.

Proprietary Funds. The District's proprietary funds consist of two enterprise funds, the Water System, and the Wastewater System. Enterprise funds are used to account for operations that are financed and operated in a manner similar to private business enterprises – where the intent of the governing body is that the costs (including depreciation and amortization) of providing goods or services to the general public on a continuing basis be financed or recovered primarily through user charges.

The District's proprietary fund statements include:

The *Statement of Net Position* presents information on the District's assets and deferred outflows, and liabilities and deferred inflows, with the difference between the two reported as *net position*. Over time, increases or decreases in net position may serve as a useful indicator of whether the financial position of the District is improving or deteriorating.

EAST BAY MUNICIPAL UTILITIES DISTRICT

Management's Discussion and Analysis For the Years Ended June 30, 2025 and 2024

While the Statement of Net Position provides information about the nature and amount of resources and obligations at year-end, the *Statement of Revenues, Expenses, and Changes in Net Position* presents the results of the District's operations over the course of the fiscal year and information as to how the net position changed during the year. This statement can be used as an indicator of the extent to which the District has successfully recovered its costs through user fees and other charges. All changes in net position are reported during the period in which the underlying event giving rise to the change occurs, regardless of the timing of the related cash flows. Thus, revenues and expenses are reported in this statement for some items that will result in cash flows in future fiscal periods, such as delayed collection of operating revenues and the expense of employee earned but unused vacation leave.

The *Statement of Cash Flows* presents changes in cash and cash equivalents resulting from operational, capital, noncapital, and investing activities. This statement summarizes the annual flow of cash receipts and cash payments, without consideration of the timing of the event giving rise to the obligation or receipt and excludes noncash accounting measures of depreciation or amortization of assets.

Fiduciary Funds. Fiduciary funds are used to account for resources held for the benefit of parties outside the government. The District's fiduciary funds consists of the Pension and Other Employee Benefit Trust fund and the Custodial fund. The Pension and Other Employee Benefit Trust is maintained to account for assets held by the Employees' Retirement in a trustee capacity for vested and retired employees. The Custodial fund is used to account for monies held for Dublin San Ramon Services District (DSRSD)/EBMUD Recycled Water Authority (DERWA) and Freeport Regional Water Authority (FRWA), joint power authorities the District provides accounting and investing services for; and monies held in external investment pools. The accounting used for fiduciary funds is much like that used for the proprietary funds.

Notes to Basic Financial Statements. The notes provide additional information that is essential to a full understanding of the data provided in the basic financial statements. The notes to basic financial statements can be found on pages 29 to 101 of this report.

Other Information. In addition to the basic financial statements and accompanying notes, this report also presents *certain required supplementary information* concerning the District's progress in funding its obligation to provide pension and other post-employment healthcare benefits to its employees. Such required supplementary information can be found on pages 104 to 110 of this report.

FINANCIAL ANALYSIS

Financial Highlights

In fiscal year 2025, EBMUD continued to effectively manage its finances and strengthen its financial position by adopting sufficient water and wastewater rates to fund capital infrastructure improvements and to maintain strong financial performance. The following results of operations indicate a continuing strong and stable fiscal position.

The total assets and deferred outflows of the District exceeded the total liabilities and deferred inflows by \$3.5 billion (*net position*).

Net position increased by \$338 million or 11% during the fiscal year.

Capital assets increased by \$414 million or 6% to \$6.8 billion.

Operating revenue increased by \$91 million or 11% to \$917 million.

Operating expense increased by \$11 million or 2% to \$661 million.

Non-operating net income increased by \$28 million or 308% to \$19 million.

Capital contributions decreased by \$13 million or 16% from the prior fiscal year.

EAST BAY MUNICIPAL UTILITIES DISTRICT

Management's Discussion and Analysis For the Years Ended June 30, 2025 and 2024

Financial Position

In the current year, the District's total net position increased by \$338 million or 11% during the fiscal year. The Water System's net position increased by \$299 million or 11% and the Wastewater System's net position increased by \$39 million or 8%. Current and other assets increased by \$69 million or 7%. Capital assets, net of accumulated depreciation and amortization, increased by \$414 million or 6%. By far the largest portion of the District's net position, 96% or \$3.3 billion, represents its investment in capital assets necessary to provide services.

In the previous fiscal year, the District's total net position increased by \$240 million or 8% during the fiscal year. The Water System's net position increased by \$212 million or 9% and the Wastewater System's net position increased by \$28 million or 6%. Current and other assets increased by \$50 million or 6%. Capital assets, net of accumulated depreciation and amortization, increased by \$409 million or 7%. By far the largest portion of the District's net position, 97% or \$3.0 billion, represents its investment in capital assets necessary to provide services.

Table 1 shows the District's net position for the fiscal years ended June 30, 2025, 2024, and 2023:

	2025	2024	Variance	%
Current and other assets	\$ 1,027,784	\$ 959,236	\$ 68,548	7%

Results of Operations

In the current fiscal year, the District's total operating revenue of \$917 million for the year increased by \$91 million and total operating expense of \$661 million for the year increased by \$11 million. The change in net position (including capital contributions) increased from \$243 million in the previous fiscal year to \$338 million in the current fiscal year. With restatement and prior period adjustments required by GASB Statement No. 100, the District's total net position increased from \$3,115 million to \$3,453 million during the current fiscal year.

The major components of the District's results of operations in the current fiscal year were:

- Water revenue increased by \$84 million or 13% primarily due to an 8.5% rate increase at the beginning of fiscal year 2025 and an increase in billed water consumption.
- Wastewater revenue increased by \$8 million or 7% due to an 8.5% rate increase at the beginning of fiscal year 2025.
- Power revenue decreased by \$3 million or 19% due to below average runoff leading to lower hydropower generation in the current fiscal year but still exceeded the total budgeted amount for fiscal year 2025.
- Wet weather facilities charges increased by \$3 million or 9% due to an 8.5% rate increase at the beginning of fiscal year 2025.
- Total operating expense increased by \$11 million, primarily reflecting an increase of \$13 million in raw water expense. Other major increases in operating expense were increases of \$12 million in depreciation, \$7 million in water treatment and distribution, \$4 million in general administration, \$4 million in financial and risk management, \$3 million in sewer lines and pumps, and \$3 million in sewer treatment plant operations. Offsetting these increases was a decrease of \$37 million in pension expense due to a higher return on the market value of pension plan assets versus the assumption rate used in the actuarial valuation.
- Net nonoperating expense decreased by \$28 million, primarily due to a \$33 million decrease in interest and amortization of bond expenses offset by a \$6 million decrease in investment income. Included in non-operating net expense is investment income (loss) and the net change in the fair value of investments which were \$25 million and (\$2) million respectively in the current fiscal year, and \$22 million and \$7 million respectively in the prior fiscal year.

EAST BAY MUNICIPAL UTILITIES DISTRICT

Management's Discussion and Analysis For the Years Ended June 30, 2025 and 2024

- Capital contributions decreased by \$13 million, primarily due to a decrease in earned standard service installments, which were offset by increases of \$11 million in System Capacity Charges (SCC) and \$2 million in Wastewater Capacity Fees (WCF). Grants and other reimbursements decreased by \$2 million due to a decrease in state grants monies received and a decrease in Proposition 1 passthrough grant reimbursements. Page 14 contains additional capital contributions information.

In the previous fiscal year, the District's total operating revenue of \$826 million for the year increased by \$45 million and total operating expense of \$650 million for the year increased by \$51 million. The change in net position (including capital contributions) increased from \$222 million in the fiscal year 2023 to \$243 million in the fiscal year 2024. With restatement and prior period adjustments required by GASB Statement No. 100, the District's total net position increased from \$2,874 million to \$3,115 million during fiscal year 2024.

The major components of the District's results of operations in fiscal year 2024 were:

- Water revenue increased by \$43 million or 7% primarily due to an 8.5% rate increase at the beginning of fiscal year 2024.
- Wastewater revenue increased by \$5 million or 5% due to an 8.5% rate increase at the beginning of fiscal year 2024 offset by a reduction from the resource recovery program.
- Power revenue decreased by \$6 million or 26% due to lower hydropower prices and sales in fiscal year 2024.
- Wet weather facilities charges increased by \$3 million or 8% due to an 8.5% rate increase at the beginning of fiscal year 2024.
- Total operating expense increased by \$51 million, primarily reflecting increases of \$20 million in pension expense due to a lower return on the market value of pension plan assets versus the assumption rate used in the actuarial valuation. Other major increases in operating expense were increases of \$20 million in general and administration, \$8 million in water treatment and distribution, \$7 in depreciation, and \$4 million in sewer treatment plant operations. Offsetting these increases was a decrease of \$16 million in raw water due to ease of drought restrictions in fiscal year 2023 resulting in a decrease in water purchases from other agencies.
- Net nonoperating expense decreased by \$24 million, primarily due to a \$7 million increase in investment income resulting from higher interest rates earned, \$7 million increase in taxes and subventions, and a \$16 million increase in other income; offset by a \$6 million increase in interest and amortization of bond expenses. Included in non-operating net expense is investment income (loss) and the net change in the fair value of investments which were \$22 million and \$7 million respectively fiscal year 2024, and \$16 million and \$6 million respectively in fiscal year 2023.
- Capital contributions increased by \$3 million, primarily due to an increase in earned standard service installments, which was offset by decreases in System Capacity Charges (SCC) and Wastewater Capacity Fees (WCF) from a decrease in large development projects. Grants and other reimbursements increased by \$1 million due to an increase in state grants monies received and a decrease in Proposition 1 passthrough grant reimbursements. Page 15 contains additional capital contributions information.

EAST BAY MUNICIPAL UTILITIES DISTRICT

Management's Discussion and Analysis For the Years Ended June 30, 2025 and 2024

Liquidity

The District had \$637 million in combined current and noncurrent District Cash and Investments as of June 30, 2025, an increase of \$70 million compared to \$567 million as of June 30, 2024. Components of cash and investments for the year ended June 30, 2025 were:

- Water System total combined current and noncurrent cash and investments increased by \$52 million compared to the same date of the previous fiscal year. Cash and cash equivalents increased by a net \$9 million compared to the prior year. This was primarily due to an increase of \$49 million from operating activities and an increase of \$1 million from noncapital and related financing activities, offset by decreases of \$16 million from the net proceeds of securities in investing activities and \$25 million from capital and related financing activities. Net increase (decrease) in noncurrent investments decreased by \$4 million primarily due to reallocation of investments between short-term and long-term.
- Wastewater System total combined current and noncurrent cash and investments increased by \$18 million compared to the same date in the previous fiscal year. Cash and cash equivalents increased by a net \$2 million compared to the prior year. This was primarily due to increases of \$9 million from capital and related financing activities, \$3 million from the net proceeds of securities in investing activities, and \$1 million from noncapital and financing activities, which were offset by a decrease of \$11 million from operating activities. Net increase (decrease) in noncurrent investments decreased by \$5 million, also primarily due to reallocation of investments between short-term and long-term.

Table 3 shows the District's cash flow for the fiscal years ended June 30, 2025, 2024, and 2023:

	2025	2024	Variance	%
Cash and cash equivalents:

Cash and Investments by Fund

In fiscal years 2025 and 2024, total cash and investments available for operating and capital activities are reported in current and noncurrent assets as unrestricted and restricted funds. Significant activities in the current fiscal year were as follows: Water System increased \$4 million in working capital and \$39 million in capital reserve to fund capital projects. Wastewater System increased \$1 million in working capital and \$16 million in capital reserves to fund capital projects and equipment replacements.

In the previous fiscal year, significant activities were as follows: Water System increased \$17 million in working capital and \$23 million in capital reserve to fund capital projects. Wastewater System increased \$4 million in working capital and \$15 million in capital reserves to fund capital projects and equipment replacements.

Operating and capital reserves are components of unrestricted cash and investments. Individual funds within operating and capital reserves are funded pursuant to board policy but are unrestricted as to use. The unrestricted reserve balances indicate the District's ability to meet unanticipated revenue declines or expenditure increases. Unrestricted reserves are committed by the Board of Directors. This is distinct from restricted reserves which are legally constrained by law or by third party. For additional information, see Note 1H to the financial statements.

EAST BAY MUNICIPAL UTILITIES DISTRICT

**Management's Discussion and Analysis
For the Years Ended June 30, 2025 and 2024**

Capital Contributions

Capital contributions primarily consist of System Capacity Charges (SCCs) and Wastewater Capacity Fees (WCFs). In addition, the District collects fees and charges from applicants when the District's facilities need to be relocated during construction projects. The District also receives state and federal grants to fund capital projects.

The Water System's SCCs consist of charges collected from all applicants who request a new water service connection or a larger water meter size. These charges vary depending on geographic region. The SCC pays for the applicant's share of District capital facilities, including those that serve the entire water system such as the aqueducts and raw water facilities, regional facilities such as treatment plants and distribution facilities, and future water supply upgrades needed to meet long-term increases in water demand created by new customers. The portion of the SCC that pays for the future water supply is restricted and the remainder is unrestricted.

The Wastewater System's WCFs are treated as unrestricted funds and pay for the applicant's share of Wastewater facilities including the main wastewater treatment plant, interceptors, and wet weather facilities.

Capital contributions decreased by \$13 million, primarily due to a decrease in earned standard service installments, which were offset by increases of \$11 million in SCC and \$2 million in WCF fees. Grants and other reimbursements decreased by \$2 million due to a decrease in state grants monies received and a decrease in Proposition 1 passthrough grant reimbursements.

Table 5 shows the District's capital contributions received for the fiscal years ended June 30, 2025, 2024, and 2023:

* In fiscal year 2023, the District received a total of \$37 million for the California Extended Water and Wastewater Arrearage Payment Program (CWWAPP) from the State Water Resources Control Board of which \$36 million was to assist with accounts receivable on past due customer accounts and \$1 million was for administrative costs. Unapplied amounts totaling \$18.7 million and unused funds for administrative costs of \$0.7 million, totaling \$19.4 million were returned in October 2024.

EAST BAY MUNICIPAL UTILITIES DISTRICT

Management's Discussion and Analysis For the Years Ended June 30, 2025 and 2024

CAPITAL ASSETS

The District had \$6.8 billion (net of accumulated depreciation and amortization) invested in a broad range of utility capital assets as of June 30, 2025. Total capital assets were \$6.4 billion as of June 30, 2024. The investment in capital assets includes land, buildings, improvements, water treatment plants, filter plants, aqueducts, water transmission and distribution mains, water storage facilities, pump stations, water reclamation facilities, wastewater and wet weather treatment facilities, machinery and equipment. It also includes lease and subscription-based information technology agreements (SBITAs), right to use assets. In the current fiscal year, capital assets increased by \$414 million or 6% over the prior fiscal year. In fiscal year 2024, capital assets increased by \$409 million or 7% over fiscal year 2023. Annual changes are consistent with the District's capital improvement program.

The Water System had \$5.9 billion (net of accumulated depreciation) invested in a broad range of utility capital assets as of June 30, 2025. The investment in capital assets includes land, buildings, improvements, water treatment plants, filter plants, aqueducts, water transmission and distribution mains, water storage facilities, power generation, pump stations, water reclamation facilities, machinery, equipment, and leases and SBITAs, right to use assets.

The Wastewater System had \$882 million (net of accumulated depreciation) invested in a broad range of utility capital assets as of June 30, 2025. The investment in capital assets includes land, buildings, improvements, power generation, wastewater and wet weather treatment facilities, machinery, equipment, and SBITAs, right to use assets.

Table 6 shows the District's capital assets for the fiscal years ended June 30, 2025, 2024, and 2023:

EAST BAY MUNICIPAL UTILITIES DISTRICT

Management's Discussion and Analysis For the Years Ended June 30, 2025 and 2024

The District's net revenue, long-term debt, and contributions from customers are used to finance capital investments. More detailed information about the District's capital assets is presented in Note 3 to the basic financial statements. This year's major capital expenditures included:

Water System:

Treatment plant upgrades	\$	499,972
Pipeline rebuild		108,454
Service lateral replacements		83,655
Pumping plant rehabilitation		73,520
Reservoir rehab/maintenance		59,388
Mokelumne aqueduct 2 & 3 relining		42,304
Large diameter pipelines		29,866
Fuel facility improvements		23,102
Pressure zone improvements		19,706
Pipeline relocations		17,158
Building facilities improvements		16,149
Dam operational upgrades		15,834
Upcountry wastewater treatment improvements		15,539
Open cut reservoir program		15,373
West of hills master plan		13,497
Small capital improvements		13,473
Raw water infrastructure		12,544
Water loss control		12,392
Mokelumne aqueducts recoating		11,173
East bayshore		11,032

Wastewater System:

Digesters	\$	32,313
General wastewater		25,565
Secondary		22,164
Utilities and sitework		12,212
Power generation and biogas		12,076
Interceptors and pump stations		11,524
Preliminary treatment		11,309
Wet weather facilities		10,053
Electricals and controls		8,240
Resource recovery		4,287
Dewatering		1,640
Nutrients		843
Effluent discharge		843
Pump station master plan update		300
Primary treatment		161

EAST BAY MUNICIPAL UTILITIES DISTRICT

Management's Discussion and Analysis For the Years Ended June 30, 2025 and 2024

DEBT ADMINISTRATION

The District had total long-term debt outstanding of \$3.4 billion as of June 30, 2025, a 4% increase from June 30, 2024. Total long-term debt outstanding was \$3.3 billion as of June 30, 2024, a 4% increase from June 30, 2023. Components of the District's long-term debt portfolio as of June 30, 2025 are:

- The Water System had total long-term debt outstanding of \$3.0 billion.
- The Wastewater System had total long-term debt outstanding of \$376 million.

Table 7 shows the District's long-term debt outstanding for the fiscal years ended June 30, 2025, 2024, and 2023:

Table 7

Totals	\$ 2,929,578	\$ 2,799,410	\$ 368,501	\$ 357,837	\$ 3,298,079	\$ 3,157,247	\$ 140,832	4%

**Includes unamortized bond premium and discount. For Water System, the unamortized bond premium was \$222 million, \$217 million, and \$198 million as of June 30, 2025, 2024 and 2023, respectively. For Wastewater System, the net of unamortized bond premium and discount was \$20 million, as of June 30, 2025, 2024 and 2023.

It is the policy of the District to maintain a reasonable balance between debt and current revenue financing of capital projects. The following targets provide the framework for financing capital projects:

Debt Service Coverage Ratio: Maintain an annual revenue bond debt service coverage ratio of at least 1.6 times. As of June 30, 2025, the coverage ratio for Water was 2.61 and for Wastewater was 2.63; the overall District ratio was 2.61.

Debt-Funded Capital Spending: Limit debt-funded capital to no more than 65% of the total capital program over each five-year planning period. As of June 30, 2025, the percentage of debt-funded capital spending for Water was 33% and for Wastewater was 30%; the overall District percentage was 32%.

EAST BAY MUNICIPAL UTILITIES DISTRICT

**Management’s Discussion and Analysis
For the Years Ended June 30, 2025 and 2024**

Extendable Commercial Paper and Un-hedged Variable Rate Debt: Maintain an annual limit of 25% of outstanding long-term debt. As of June 30, 2025, the percentage of extended commercial paper and un-hedged variable rate debt compared to total outstanding long-term debt for Water was 9% and for Wastewater was 0%; the overall District percentage was 8%.

Revenue-supported debt authorization for the District can be approved by the District’s Board of Directors, subject to a referendum process. As of June 30, 2025, the Water System had \$934 million, and the Wastewater System had \$114 million in authorized but unissued revenue bonds.

In prior years, the District defeased certain debt issues by placing proceeds of new bonds in an irrevocable trust to provide for all future debt service payments on the refunded bonds. Accordingly, the trust account assets and the liability for the defeased debt are not included in the District’s financial statements. On June 30, 2025, \$174 million of outstanding bonds are considered defeased.

The District’s credit ratings are outlined in Table 8.

Table 8
Credit Ratings
Water and Wastewater
June 30, 2025

District debt by type	Rating by		
	Standard & Poor’s	Moody’s Investors Service	Fitch
Water system:			
Fixed Rate Revenue Bonds	AAA	Aaa	AA+
Commercial Paper Notes	A-1+	P-1	-
Wastewater system:			
Fixed Rate Revenue Bonds	AAA	Aa1	AA+

For detailed credit rating by bond issue, please visit our website at <http://www.ebmud.com>.

Additional information on the District’s long-term debt can be found in Note 7 to the financial statements.

REQUEST FOR INFORMATION

This financial report is designed to provide ratepayers and creditors with a general overview of the District’s finances and demonstrate the District’s accountability for the monies it receives. If you have any questions about this report or need additional information, please contact: the Controller, Accounting Division, P.O. Box 24055, MS402, Oakland, California 94623-1055 or visit our website at <http://www.ebmud.com>.

EAST BAY MUNICIPAL UTILITY DISTRICT
Notes to Basic Financial Statements
For the Years Ended June 30, 2025 and 2024
(Dollars in Thousands)

NOTE 1: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A. Description of the Primary Government

The East Bay Municipal Utility District (the District) was formed in May 1923 under the provisions of the Municipal Utility District Act of 1921. The District is comprised of two financially independent entities: the Water System and the Wastewater System. These two entities are governed by the same elected seven-member Board of Directors who determines such matters as rates and charges for services, approval of contracts, and District policies. The Water System provides administrative and other support services to the Wastewater System. These costs are charged to the Wastewater System.

B. Description of the Component Unit

The District's Employees' Retirement System (the Employees' Retirement System or the Plan) has been reported as a Pension and Other Employee Benefit Trust fund (a fiduciary fund) in the accompanying basic financial statements and is discretely presented. The System provides retirement, disability, survivorship, and post-employment health insurance benefits for eligible directors, officers, and employees of the District. The System is administered by a Retirement Board composed of three members appointed by the Board of Directors of the District, two members elected by and from the active membership, and one (nonvoting) member elected by and from the retired membership of the System. Retirement Ordinance No. 40 (Ordinance) assigns the authority to establish Plan benefit provisions to the District's Board of Directors.

Copies of the audited financial statements of the Employees' Retirement System may be obtained by writing to the Controller, P.O. Box 24055, MS402, Oakland, CA 94623 or by visiting our website at <http://www.ebmud.com>.

C. Basis of Presentation

The accounts of the District are organized and operated on a fund basis. The operations of each fund are accounted for with a separate set of self-balancing accounts that comprise its assets, deferred outflows, liabilities, deferred inflows, net position, revenues, and expenses.

The basic financial statements include prior year comparative information. A complete presentation of the prior year information can be found in the District's financial statements for the year ended June 30, 2024.

The District reports on the following major proprietary (enterprise) funds:

The **Water System** is engaged in the collection, transmission, and distribution of water to communities within Alameda and Contra Costa counties of California.

The **Wastewater System** is engaged in the interception and treatment of wastewater from residences and industries in the California communities of Alameda, Albany, Berkeley, Emeryville, Oakland, Piedmont, and the Stege Sanitary District.

Additionally, the District reports the following fiduciary fund:

The **Pension and Other Employee Benefit Trust** is used to account for the resources held by the Employees' Retirement System which provides retirement, disability, and survivorship benefits for eligible directors, officers, and employees of the District.

EAST BAY MUNICIPAL UTILITY DISTRICT
Notes to Basic Financial Statements
For the Years Ended June 30, 2025 and 2024
(Dollars in Thousands)

NOTE 1: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

The **Custodial Funds** are used to account for monies held for Bay Area Clean Water Agencies (BACWA), Dublin San Ramon Services District (DSRSD)/EBMUD Recycled Water Authority (DERWA), Freeport Regional Water Authority (FRWA) and Upper Mokelumne River Watershed Authority (UMRWA), joint power authorities the District provides accounting and investing services for; and monies held in external investment pools. See Note 2.K for additional information.

Enterprise funds are used to account for operations that are financed and operated in a manner similar to private business enterprises – where the intent of the governing body is that the costs (expenses, including depreciation) of providing goods or services to the general public on a continuing basis be financed or recovered primarily through user charges. The Pension and Other Employee Benefit Trust fund is maintained to account for assets held by the Employees' Retirement System in a trustee capacity.

D. Basis of Accounting

Proprietary funds and the Pension and Other Employee Benefit Trust fund are accounted for on a flow of economic resources measurement focus, using the accrual basis of accounting. Under this method, all assets, deferred outflows, liabilities, and deferred inflows associated with operations are included on the statement of net position, and revenues are recorded when earned and expenses are recorded at the time liabilities are incurred.

Proprietary funds distinguish *operating* revenues and expenses from *non-operating* items. Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with a proprietary fund's principal ongoing operations. The principal operating revenues of the District are charges to customers for sales and services. The District also recognizes wet weather facilities charges as operating revenue. Operating expenses for enterprise funds include the cost of sales and services, administrative expenses, and depreciation on capital assets. All revenues and expenses not meeting this definition are reported as non-operating revenues and expenses.

When both restricted and unrestricted resources are available for use, it is the District's policy to use restricted resources first, then unrestricted resources as they are needed.

In addition, the accounting policies of the District conform to accounting policies generally accepted in the United States of America for water utilities. The accounts are maintained substantially in accordance with the Uniform System of Accounts for Water Utilities followed by investor-owned and major municipally owned water utilities.

Statement of Net Position – The statement of net position is designed to display the financial position of the District. The District's fund equity is reported as net position, which is broken down into three categories defined as follows:

- Net investment in capital assets – This component of net position consists of capital assets, net of accumulated depreciation/amortization and reduced by the outstanding balances of any bonds, notes, or other borrowings that are attributable to the acquisition, construction, or improvement of those assets and related deferred inflows and outflows.
- Restricted – This component of net position consists of constraints placed on net position use through external constraints imposed by creditors (such as through debt covenants), grantors, contributors, or law or regulations of other governments. It also pertains to constraints imposed by law or constitutional provisions or enabling legislation.
- Unrestricted – This component of net position consists of net assets that do not meet the definition of "restricted" or "net investment in capital assets."

EAST BAY MUNICIPAL UTILITY DISTRICT
Notes to Basic Financial Statements
For the Years Ended June 30, 2025 and 2024
(Dollars in Thousands)

NOTE 1: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Statement of Revenues, Expenses, and Changes in Net Position – The statement of revenues, expenses, and changes in net position is the operating statement for proprietary funds. Revenues are reported by major source. This statement distinguishes between operating and non-operating revenues and expenses and presents a separate subtotal for operating revenues, operating expenses, and other income.

E. Use of Estimates and Assumptions

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

F. Capital Assets

Utility Plant – at Original Cost

The cost of additions to utility plant and replacement of retired units of property are capitalized. Cost includes material, direct labor and fringe benefits, transportation, and such indirect items as engineering, supervision, and interest during construction based on the interest rate on outstanding debt of the system in the prior fiscal year as allowed by GASB 76. Repairs, maintenance, and minor purchases of equipment are charged to expenses as incurred.

The depreciated cost of capital assets, plus removal costs, less salvage, is charged to expense upon retirement.

Water Supply Management Program

Costs incurred in this program are debt funded and capitalized in construction in progress. These costs are transferred to utility plant upon completion of the project and depreciated over their useful life. Debt service costs on the debt used to finance the program are recovered in future through connection fees and rates and charges for service to those benefiting from the program.

Preliminary Survey and Investigation Costs

The District capitalizes initial costs incurred to study and evaluate certain potential long-term capital projects. These costs are transferred to property, plant and equipment upon completion of the project and are depreciated over the life of the asset. In the event the project is abandoned, these costs are expensed.

Contract Water Rights

The District has contracted with the U.S. Bureau of Reclamation for water deliveries from the Central Valley Project (CVP) and shall continue so long as EBMUD pays applicable rates and charges consistent with applicable law. Payments under the contract include reimbursement for operation and maintenance costs based on the amounts of water delivered to EBMUD, the Operation & Maintenance Deficit (EBMUD's current balance is \$2,750), and prepayment of allocated capital costs for CVP storage and conveyance facilities (EBMUD's current estimated allocation is \$1,278). The Water Enterprise Fund capitalized the two components.

G. Depreciation and Amortization

Depreciation and amortization of capital assets is computed on a straight-line basis using the estimated service lives of the related assets (5 to 100 years).

NOTE 1: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

H. Restricted Assets

The District segregates cash and investments into funds that are “Restricted” and “Unrestricted.” Funds are “restricted” when limitations on use of the resources are imposed by creditors, grantors, contributors, laws or regulations of other governments, or imposed by law through constitutional provision or by enabling legislation. “Unrestricted” resources are committed by the Board of Directors through the passage of a resolution, or constrained for a specific purpose by committees or officials with authority delegated by the Board. The exception is the Reserve for Capital Projects which is anticipated but not committed or constrained to be used for the District’s capital improvement program.

Unrestricted cash and investments are further categorized into Operating and Capital Reserves:

Operating Reserves:

- Rate Stabilization Fund (RSF) reserve is established by Policy 4.02, as adopted by the Board of Directors in the biennial budget, to maintain at least 20% of projected annual water volume revenues for Water and at least 5% of annual operating and maintenance expenses for Wastewater. Funding of the RSF is consistent with the District’s Bond indentures. In fiscal year 2014, the District combined the Rate Stabilization Fund referenced in the Bond indentures and the Contingency and Rate Stabilization Reserve referenced in Policy 4.02 into a single Rate Stabilization Fund reserve to enhance transparency.
- Working Capital reserve is established by Policy 4.02, as adopted by the Board of Directors in the biennial budget, to maintain at least three times the District’s monthly net operating and maintenance expenses.
- Self-insurance reserve is established by Policy 4.02, as adopted by the Board of Directors in the biennial budget, to maintain a level based on the Actuarial Self-Insured Retention (SIR) funding recommendation for the following year’s discounted loss and allocated loss adjustment expenses (ALAE) funding guidelines. Reserve amount should be calculated at a high (85%) confidence level. If an actuarial study is not available before close of the prior fiscal year end, the reserve shall equal 1.15 times the prior year reserve.
- Workers’ compensation reserve is established by Policy 4.02, as adopted by the Board of Directors in the biennial budget, to maintain a level based on the Actuarial SIR funding recommendation for the following year’s discounted loss and ALAE funding guidelines. Reserve amount should be calculated at a high (85%) confidence level. If an actuarial study is not available before close of the prior fiscal year end, the reserve shall equal 1.15 times the prior year reserve.

Capital Reserves:

- Reserve for Capital Projects comprises the resources available for cash funding of the District’s capital improvement program as projected in conjunction with the biennial budget.
- Reserve Funded CIP (Wastewater) balance is a specific designation [Board Motion No. 029-94] used to fund wet and dry weather eligible construction projects.
- Vehicle Replacement Fund [Board Motion No. 030-94] is financed by deposits based on internal user rate charges, and used to reimburse operational expenditures and vehicle replacement purchases.
- Equipment Replacement Fund was established by the District with the implementation of the Wastewater Capacity Fees effective July 1, 1984. The balance in this account represents funds set aside for future wastewater department equipment replacements.

EAST BAY MUNICIPAL UTILITY DISTRICT
Notes to Basic Financial Statements

(Dollars in Thousands)

NOTE 1: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Restricted funds include the following:

- Debt funded construction funds are the proceeds of bond or commercial paper issues that are restricted for use on eligible projects in the District's capital program.
- Capitalized interest fund is restricted by the District's bond indenture for the purpose of defraying that bond issue's debt service payments for a specified period.
- Bond Interest and Redemption fund is utilized in order for the District to transfer funds to the Trustee for the payment of principal and interest on the outstanding bonds one business day prior to the date such payment is due as required under the District's bond indentures. The District uses the Bond Interest and Redemption Fund to segregate funds accumulated for such payments. In addition, under certain of the interest rate swap agreements related to the District's outstanding bonds, the District is required to post collateral to the swap counterparty to the extent that the District's total exposure for termination payments under the swap agreement exceeds the threshold amount specified in the applicable swap agreement. The District also uses the Bond Interest and Redemption Fund to segregate District funds held by the applicable custodian to satisfy this collateral posting obligation.
- Debt Service Reserve fund is created and required to be maintained at a specified level in connection with certain series of the District's outstanding bonds and state loans. Amounts in a Bond Reserve Fund may only be used (a) for the payment of principal and interest on the related series of bonds in the event the District fails to transfer the required payment from the related system Revenue Fund (the respective designated part of the General Fund) (b) for the payment or redemption of all of the related series of bonds then outstanding or (c) for the payment of the final principal and interest payments on the related series of bonds.
- Funds received for construction reflect advances received from applicants for work to be performed by the District and the unspent future water supply component of system capacity charges. This fund is used for the construction of major facilities, applicant requested services, and the design and construction of water supply improvement program projects.
- FERC partnership fund of \$2 million was established January 11, 1999, in compliance with Federal Energy Regulatory Commission (FERC) order which brought resolution to its Mokelumne River Proceeding. The District manages the fund and income derived from investing the funds to provide operating support to the Joint Settlement Agreement with US Fish and Wildlife and California Fish and Game to protect the Mokelumne River Ecosystem from Pardee Reservoir to the Delta. The principal and any unused earnings shall remain the property of the District and will revert to the District upon expiration of the agreement in March 2031 or upon withdrawal of any party to the agreement.

Monetary Reserve represents money on deposit in the name of the District with the Automated Power Exchange Inc. (APX) in accordance with the terms and conditions of the Automated Power Exchange Inc. California Master Service Agreement of July 15, 1999, entered between the District and APX for the sale and purchase of electric power. The funds held on deposit shall be withdrawn by the Depository and Clearing Agent in the event that sufficient funds are not deposited in the District settlement account to cover power exchange transactions.

I. Deferred Amount on Bond Refunding

Gains and losses incurred in connection with debt refunding transactions are deferred and amortized over the shorter of the life of the refunded debt or the new debt.

EAST BAY MUNICIPAL UTILITY DISTRICT
Notes to Basic Financial Statements
For the Years Ended June 30, 2025 and 2024
(Dollars in Thousands)

NOTE 1: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

J. Cash and Cash Equivalents

For purposes of the statement of cash flows, the District considers all highly liquid investments with original maturities of three months or less at the date of purchase to be cash equivalents.

K. District Investments

Investments are stated at fair value. Included in investment income (loss) is the net change in the fair value of investments, which consists of the realized gains or losses and the unrealized appreciation (depreciation) of those investments.

Measurement of the fair value of investments is based upon quoted market prices, if available. The estimated fair value of investments that have no quoted market price is determined based on equivalent yields for such securities or for securities of comparable maturity, quality, and type as obtained from market makers.

Each of the financial instruments invested in by the District represents a potential concentration of credit risk. However, as the portfolio and the components of the various instruments are diversified, and issuers of securities are dispersed throughout many industries and geographic locations, the concentrations of credit risk are limited.

L. Retirement System Investments

Investments are reported at fair value. Securities and bonds traded on a national or international exchange are valued at the last reported sales price at current exchange rates. Investments that have no quoted market price are reported at estimated fair value, which is determined based on yields equivalent for such securities or for securities of comparable maturity, quality, and type as obtained from market makers. Measurement of the fair value of real estate investments is estimated by the investment managers and reflects both internal and independent appraisals of real estate properties.

The System presents in the Statements of Changes in Fiduciary Net Position the net change in the fair value of its investments, which consists of the realized gains or losses and the unrealized appreciation (depreciation) on those investments. Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date.

Each of the financial instruments invested in by the System represents a potential concentration of credit risk. However, as the portfolio and the components of the various instruments are diversified and issuers of securities are dispersed throughout many industries and geographical locations, the concentrations of credit risk are limited.

The System invests in a combination of stocks, bonds, fixed income securities, real estate, and other investment securities. These investments are exposed to various risks, such as interest rate and market risks. Due to the level of risk associated with certain investment securities, it is at least reasonably possible that changes in the values of investment securities will occur in the near term and those such changes could materially affect the amounts reported in the Statement of Fiduciary Net Position.

Retirement Board policies permit the System to use investments of the Plan to enter into securities lending transactions, which are loans of securities to broker-dealers and other entities for collateral with a simultaneous agreement to return collateral for the same securities in the future. The Plan's securities custodian is an agent in lending the Plan's securities for cash collateral, U.S. government securities, and irrevocable letters of credit of 102% for domestic securities and 105% for international securities lent.

As of June 30, 2025, the System had no credit risk exposure to borrowers because the amounts the System owed the borrowers exceeded the amounts the borrowers owed the System. Contracts with the lending agent require them to indemnify the System under certain circumstances if the borrowers fail to return the securities (and if the collateral is inadequate to replace the securities lent) or fail to pay the System for income distributions by the securities issuers

EAST BAY MUNICIPAL UTILITY DISTRICT
Notes to Basic Financial Statements
For the Years Ended June 30, 2025 and 2024
(Dollars in Thousands)

NOTE 1: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

while the securities are on loan. The risk of any loss of collateral or investment of cash collateral (including a loss of income or principal, or loss of market value thereon) lies with the System, except for losses resulting from negligence or intentional misconduct of the agent in performing the duties allocated under the securities lending agreement with respect to collateral. During the year ended June 30, 2025, there were no violations of legal or contractual provisions, and no borrower or lending agent default losses known to the securities lending agent.

In lending securities, cash collateral is invested in the lending agent's short-term investment pool, which as of June 30, 2025, had a weighted average maturity of 15 days. The relationship between the maturities of the investment pool and the Plan's loans is affected by the maturities of the securities loans made by other entities that use the agent's pool, which the System cannot determine. Cash collateral may also be invested separately in term loans, in which case the maturity of the collateral investment generally matches the term of the loan. Noncash collateral cannot be pledged or sold unless the borrower defaults. All securities loans can be terminated on demand by either the lender or the borrower, although the average term of overall loans for the System was approximately 308 days. There are no dividends or coupon payments owing on the securities lent. Cash received as collateral on securities lending transactions is reported as an asset of the System with a corresponding liability.

As of June 30, 2025, the fair value of securities on loan was \$132,196. The total cash and noncash collateral held by the Plan's custodian to secure these securities on loan was valued at \$134,426 (all cash collateral).

M. Material and Supplies

Material and supplies inventories are valued at cost, which approximates market, using the average-cost method.

N. Revenue

Water billings include charges for water flow, elevation, and a monthly meter charge. Customer water meters are read on a cyclical basis throughout a monthly or bimonthly period. Bills are rendered and revenue is recognized in the period that meters are read.

Wastewater treatment billings are a combination of flow, strength charges, and a monthly service charge. Customer bills are rendered on a cyclical basis throughout a monthly or bimonthly period, and revenue is recognized in the period in which bills are rendered.

Wet weather facilities charges are designed to finance the operating and capital costs related to wet weather sewage flows and are billed annually on the property tax bill.

O. Deferred Outflows/Inflows of Resources

In addition to assets, the statement of net position will sometimes report a separate section for deferred outflows of resources. This separate financial statement element, deferred outflows of resources, represents a consumption of net assets that applies to a future period(s) and so will not be recognized as an outflow of resources (expense/expenditure) until then.

In addition to liabilities, the statement of net position will sometimes report a separate section for deferred inflows of resources. This separate financial statement element, deferred inflows of resources, represents an acquisition of net assets that applies to a future period(s) and so will not be recognized as an inflow of resources (revenue) until that time.

P. Implementation of Governmental Accounting Standards Board (GASB) Pronouncements

GASB Statement No. 101 – *Compensated Absences*. The primary objective of this statement is to better meet the information needs of financial statement users by updating the recognition and measurement guidance for compensated absences. That objective is achieved by aligning the recognition and measurement guidance under a unified model and by amending certain previously required disclosures.

EAST BAY MUNICIPAL UTILITY DISTRICT
Notes to Basic Financial Statements
For the Years Ended June 30, 2025 and 2024
(Dollars in Thousands)

NOTE 1: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

This statement requires that liabilities for compensated absences be recognized for (1) leave that has not been used and (2) leave that has been used but not yet paid in cash or settled through noncash means. A liability should be recognized for leave that has not been used if (a) the leave is attributable to services already rendered, (b) the leave accumulates, and (c) the leave is more likely than not to be used for time off or otherwise paid in cash or settled through noncash means. Leave is attributable to services already rendered when an employee has performed the services required to earn the leave. Leave that accumulates is carried forward from the reporting period in which it is earned to a future reporting period during which it may be used for time off or otherwise paid or settled. In estimating the leave that is more likely than not to be used or otherwise paid or settled, a government should consider relevant factors such as employment policies related to compensated absences and historical information about the use or payment of compensated absences. However, leave that is more likely than not to be settled through conversion to defined benefit postemployment benefits should not be included in a liability for compensated absences.

This statement requires that a liability for certain types of compensated absences, including parental leave, military leave, and jury duty leave, not be recognized until the leave commences. This statement also requires that a liability for specific types of compensated absences is not recognized until the leave is used. This statement requires disclosure in notes to financial statements of descriptive information about accounting changes and error corrections, such as their nature. In addition, information about the quantitative effects on beginning balances of each accounting change and error correction should be disclosed by reporting unit in a tabular format to reconcile beginning balances as previously reported to beginning balances as restated.

This statement also establishes guidance for measuring a liability for leave that has not been used, generally using an employee's pay rate as of the date of the financial statements. A liability for leave that has been used but not yet paid or settled should be measured at the amount of the cash payment or non-cash settlement to be made. Certain salary-related payments that are directly and incrementally associated with payments for leave also should be included in the measurement of the liabilities.

With respect to financial statements prepared using the current financial resources measurement focus, this statement requires that expenditures be recognized for the amount that normally would be liquidated with expendable available financial resources.

GASB Statement No. 102 – *Certain Risk Disclosures*. The primary objective of this statement is to provide users of government financial statements with essential information about risks related to a government's vulnerabilities due to certain concentrations or constraints.

This statement defines a concentration as a lack of diversity related to an aspect of a significant inflow of resources or outflow of resources. A constraint is a limitation imposed on a government by an external party or by formal action of the government's highest level of decision-making authority. Concentrations and constraints may limit a government's ability to acquire resources or control spending.

This statement requires a government to assess whether a concentration or constraint makes the primary government reporting unit or other reporting units that report a liability for revenue debt vulnerable to the risk of a substantial impact. Additionally, this Statement requires a government to assess whether an event or events associated with a concentration or constraint that could cause the substantial impact have occurred, have begun to occur, or are more likely than not to begin to occur within 12 months of the date the financial statements are issued.

If a government determines that those criteria for disclosure have been met for a concentration or constraint, it should disclose information in notes to financial statements in sufficient detail to enable users of financial statements to understand the nature of the circumstances disclosed and the government's vulnerability to the risk of a substantial impact.

EAST BAY MUNICIPAL UTILITY DISTRICT
Notes to Basic Financial Statements
For the Years Ended June 30, 2025 and 2024
(Dollars in Thousands)

NOTE 1: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

The disclosure should include descriptions of the following:

- The concentration or constraint.
- Each event associated with the concentration or constraint that could cause a substantial impact if the event had occurred or had begun to occur prior to the issuance of the financial statements.
- Actions taken by the government prior to the issuance of the financial statements to mitigate the risk.

Q. Fair Value Measurements

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The District categorizes its fair value measurements within the fair value hierarchy established by generally accepted accounting principles. The fair value hierarchy categorizes the inputs to valuation techniques used to measure fair value into three levels based on the extent to which inputs used in measuring fair value are observable in the market.

Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2 inputs are inputs – other than quoted prices included within level 1 – that are observable for an asset or liability, either directly or indirectly.

Level 3 inputs are unobservable inputs for an asset or liability.

If the fair value of an asset or liability is measured using inputs from more than one level of the fair value hierarchy, the measurement is considered to be based on the lowest priority level input that is significant to the entire measurement.

R. Leases

Lessee: The District is a lessee primarily in land and buildings. The District recognizes a lease liability and an intangible right-to-use lease asset in the proprietary fund financial statements.

At the commencement of a lease, the District initially measures the lease liability at the present value of payments expected to be made during the lease term. Subsequently, the lease liability is reduced by the principal portion of lease payments made. The lease asset is initially measured as the initial amount of the lease liability, adjusted for lease payments made at or before the lease commencement date, plus certain initial direct costs. Subsequently, the lease asset is amortized on a straight-line basis over its useful life. Key estimates and judgments related to leases include how the District determines (1) the discount rate it uses to discount the expected lease payments to present value, (2) lease term, and (3) lease payments.

- The District uses the interest rate charged by the lessor as the discount rate. When the interest rate charged by the lessor is not provided, the District generally uses its estimated incremental borrowing rate as the discount rate for leases.
- The lease term includes the noncancellable period of the lease. Lease payments included in the measurement of the lease liability are composed of fixed and purchase option payments that the District is reasonably certain to exercise.

The District monitors changes in circumstances that would require a remeasurement of its leases and will remeasure the lease asset and liability if certain changes occur that are expected to significantly affect the amount of the lease liability.

EAST BAY MUNICIPAL UTILITY DISTRICT
Notes to Basic Financial Statements
For the Years Ended June 30, 2025 and 2024
(Dollars in Thousands)

NOTE 1: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Lease assets are reported with other capital assets and lease liabilities are reported with other liabilities on the statement of net position.

Lessor: The District is a lessor in real estate used for billboard, telecom, and land purposes. The District recognizes a lease receivable and a deferred inflow of resources in the proprietary fund financial statements.

At the commencement of a lease, the District initially measures the lease receivable at the present value of payments expected to be received during the lease term. Subsequently, the lease receivable is reduced by the principal portion of lease payments received. The deferred inflow of resources is initially measured as the initial amount of the lease receivable, adjusted for lease payments received at or before the lease commencement date. Subsequently, the deferred inflow of resources is recognized as revenue over the life of the lease term.

Key estimates and judgments include how the District determines (1) the discount rate it uses to discount the expected lease receipts to present value, (2) lease term, and (3) lease receipts.

- The District uses its estimated incremental borrowing rate as the discount rate for leases.
- The lease term includes the noncancellable period of the lease. Lease receipts included in the measurement of the lease receivable is composed of fixed payments from the lessee.

The District monitors changes in circumstances that would require a remeasurement of its lease, and will remeasure the lease receivable and deferred inflows of resources if certain changes occur that are expected to significantly affect the amount of the lease receivable.

S. Subscription-Based Information Technology Arrangements

The District is a subscriber for a noncancellable subscription of information technology services. The District recognizes a subscription liability and an intangible right-to-use subscription asset (subscription asset) in the proprietary fund financial statements.

At the commencement of a subscription, the District initially measures the subscription liability at the present value of payments expected to be made during the subscription term. Subsequently, the subscription liability is reduced by the principal portion of subscription payments made. The subscription asset is initially measured as the initial amount of the subscription liability, adjusted for subscription payments made at or before the subscription commencement date, plus certain initial direct costs. Subsequently, the subscription asset is amortized on a straight-line basis over its useful life. Key estimates and judgments related to subscriptions include how the District determines (1) the discount rate it uses to discount the expected subscription payments to present value, (2) lease term, and (3) subscription payments.

- The District uses the interest rate charged by the vendor as the discount rate. When the interest rate charged by the vendor is not provided, the District generally uses its estimated incremental borrowing rate as the discount rate for subscriptions.
- The subscription term includes the noncancellable period of the subscription. Subscription payments included in the measurement of the subscription liability are composed of fixed payments that the District is reasonably certain to exercise.

Subscription assets are reported with other capital assets and subscription liabilities are reported with other liabilities on the statement of net position.

B. District Enterprise Fund Investments Authorized by the California Government Code and the District's Investment Policy

The District's Investment Policy and the California Government Code allow the District to invest in the following, provided the credit ratings of the issuers are acceptable to the District; and approved percentages and maturities are not exceeded. The table below also identifies certain provisions of the California Government Code, or the District's Investment Policy where the District's Investment Policy is more restrictive and provides information as to the limitations as they relate to interest rate risk, credit risk and concentration risk.

Authorized Investment Type	Maximum Maturity	Minimum Credit Quality	Maximum in Portfolio	Maximum Investment in One Issuer/Fund
U.S. Treasury Bonds, Notes and Bills	5 Years	N/A	up to 100%	N/A
U.S. Government Agency and U.S. Government-Sponsored Enterprise Obligation	5 Years	N/A	up to 100%	40% in each Agency
State of California Local Agency Investment Fund (LAIF Pool)	N/A	N/A	per Sec. 16429.1 \$75,000	N/A
California Asset Management Program (CAMP)	N/A	AAAm/AA-f	40%	20%
Investment Trust of California (CalTRUST)	N/A	AAAm/AA-f	40%	20%
Money Market Mutual Funds	N/A	AAAm	20%	5%
Certificates of Time Deposit	1 Year	AA-	20%	\$250
Negotiable Certificates of Deposit	5 Years	AA-	20%	\$250
Commercial Paper	270 Days	A-1+ and A	20%	5% of portfolio or 10%
Medium Term Corporate Notes	5 Years	AA- and A	20%	5%
Repurchase Agreements	270 Days	N/A	20%	N/A
Municipal Bonds	5 Years	AA- and A	20%	5%
Municipal Notes	N/A	SP-1+	20%	5%

The District does not enter into reverse repurchase agreements.

EAST BAY MUNICIPAL UTILITY DISTRICT
Notes to Basic Financial Statements
For the Years Ended June 30, 2025 and 2024
(Dollars in Thousands)

NOTE 2: CASH AND INVESTMENTS (CONTINUED)

C. District Enterprise Fund Investments Authorized by Debt Agreements

The District must maintain required amounts of cash and investments with trustees or fiscal agents under the terms of certain debt issues. These funds are unexpended bond proceeds or are pledged reserves to be used if the District fails to meet its obligations under these debt issues. The California Government Code requires these funds to be invested in accordance with District resolutions, bond indentures or State statutes. The table below identifies the investment types that are authorized for investments held by fiscal agents. The table also identifies certain provisions of these debt agreements:

Authorized Investment Type	Minimum Credit Quality
Repurchase Agreements	Top Four Short Term Rating Category
U.S. Treasury Bonds, Notes and Bills	N/A
U.S. Government Agency and U.S. Government-Sponsored Enterprise Obligation	N/A
State Obligations	Not lower than the District's bond rating
Commercial Paper	Top Rating Category
Negotiable Certificates of Deposit	FDIC insured or collateralised
Time Certificates of Deposits - Banks or Savings and Loans	FDIC insured or collateralised
Corporate Notes (up to 3 years)	Top Short-Term Rating Category
Corporate Bonds (longer than 3 years)	Not lower than District's bond rating
Variable Rate Obligations	Top Short-Term Rating Category
Cash Sweep Agreements	Top Rating Category
Guaranteed Investment Contract	Not lower than District's bond rating
Shares of Beneficial Interest	Top Rating Category

D. Employees Retirement System Authorized Investment Strategy

The System's Statement of Investment Policy and Procedures authorizes the System to invest in financial instruments in four broad investment categories: equity, fixed income, real estate, and covered calls. These financial instruments can include, but are not limited to, corporate bonds, commercial paper, U.S. government securities, common and preferred stock, real estate investment trusts, and mutual funds. Fixed income investments may include futures and options contracts in order to provide added flexibility in managing the fixed income portfolio. The following is a summary of the System's Statement of Investment Policy and Procedures adopted by the System on January 20, 2022.

The Retirement Board is authorized to designate multiple investment managers to manage the assets under their supervision subject to the laws of the State of California and the investment guidelines established by the Retirement Board. Allocation of assets to the investment managers are determined by the Retirement Board to accommodate changing conditions and laws.

EAST BAY MUNICIPAL UTILITY DISTRICT
Notes to Basic Financial Statements
For the Years Ended June 30, 2025 and 2024
(Dollars in Thousands)

NOTE 2: CASH AND INVESTMENTS (CONTINUED)

At the May 23, 2024 Retirement Board meeting, the Retirement Board took action to adopt a new investment portfolio asset allocation shown below.

US Equity	35%
Non-US Equity	25%
Core Fixed-Income	20%
Non-Core Fixed-Income	12.5%
Private Debt	5.0%
Real Estate	2.5%

The Retirement System is in the process of implementing the new asset allocations adopted in 2024. As of June 30, 2025 the System's interim asset allocation is shown below.

US Equity	35%
Non-US Equity	25%
Core Fixed-Income	20%
Non-Core Fixed-Income	10%
Covered Calls	7.5%
Real Estate	2.5%

The Director of Finance is authorized to transfer assets as provided in the System's Statement of Investment Policy and Procedures. The Director of Finance is further authorized to withdraw assets from assigned managers as necessary to efficiently meet operating needs.

The core fixed income target allocation (20% of the total portfolio) will primarily consist of U.S. denominated fixed income securities.

The non-core fixed income target allocation (10% of the total portfolio) will primarily consist of U.S. denominated fixed income securities. It is expected that this allocation may have a material allocation to below investment grade securities.

The domestic equity allocation target (35% of the total portfolio) will consist of the allocation to securities that corresponds to the weight of securities within the Russell 3000 Index.

The covered calls target allocation (7.5% of the total portfolio) consists of a Chicago Board Options Exchange S&P 500 BuyWrite Index (the "BXM Index") active non-replication strategies and their underlying domestic equity portfolios.

The international equity target allocation (25% of the total portfolio) will consist of an allocation to non-US equity securities benchmarked to the MSCI ACWI ex US Index.

The real estate target allocation (2.5% of the total portfolio) will consist of an equity (ownership) in a core real estate fund.

The asset allocation does allow for the fact that at any time equity and fixed income managers may have transactional cash on hand and the District will maintain enough cash as working capital to effectively meet cash flow demands on the system. However, there is no specific allocation for cash as all investable cash is allocated to specific investment mandates.

June 30, 2025 marks the midpoint of the portfolio transition. The subsequent stages of portfolio transition will involve elimination of the Covered Calls allocation, the addition of the 5.0% Private Debt allocation and an increase of 2.5% to the Non-Core Fixed-Income allocation. The transition is expected to be completed by July 1, 2026.

NOTE 2: CASH AND INVESTMENTS (CONTINUED)

E. Fair Value Hierarchy

The District categorizes its fair value measurements within the fair value hierarchy established by generally accepted accounting principles. The hierarchy is based on the valuation inputs used to measure fair value of the assets. Level 1 inputs are quoted prices in an active market for identical assets; Level 2 inputs are significant other observable inputs; and Level 3 inputs are significant unobservable inputs. The California Local Agency Investment Fund is exempt from classification for fair value hierarchy.

District Enterprise Funds:

The following is a summary of the fair value hierarchy of the fair value of investments of the District as of June 30, 2025:

Investment Type	Level 1	Level 2	Total
Investments by Fair Value Level:			
U.S. Government-Sponsored Enterprise Agencies:			
Non-callable	\$ -	\$ 52,349	\$ 52,349
Callable	-	-	-
U.S. Treasury Bills	307,280	-	307,280
Total Investments at Fair Value	\$ 307,280	\$ 52,349	359,629
Investments Measured at Net Asset Value Per Share:			
California Asset Management Program			91,244
Investments Measured at Amortized Cost:			
California Local Agency Investment Fund			46,547
Mutual Funds (U.S. Securities)			118,073
Total Investments			615,493
<i>Cash in banks</i>			21,575
Total District Cash and Investments			\$ 637,068

In fiscal year 2025, U.S. Treasury Bills totaling \$307,280, is classified in Level 1 of the fair value hierarchy, and is valued using quoted prices in active markets. The U.S. Government-Sponsored Enterprise Agency securities totaled \$52,349 is classified in Level 2 of the fair value hierarchy, and is valued using matrix pricing techniques maintained by various pricing vendors. Matrix pricing is used to value securities based on the securities' relationship to benchmark quoted prices.

Fair value is defined as the quoted market value on the last trading day of the period. These prices are obtained from various pricing sources by our custodian bank.

F. Interest Rate Risk

Interest rate risk is the risk that changes in market interest rates will adversely affect the market value of an investment. Normally, the longer the maturity of an investment, the greater the sensitivity of its market value to changes in market interest rates. The District generally manages its interest rate risk by holding investments to maturity.

Information about the sensitivity of the market values of the District's and System's investments (including investments held by bond trustees) to market interest rate fluctuations is provided by the following table that shows the distribution of the District's investments by maturity or earliest call date.

EAST BAY MUNICIPAL UTILITY DISTRICT
Notes to Basic Financial Statements
For the Years Ended June 30, 2025 and 2024
(Dollars in Thousands)

NOTE 2: CASH AND INVESTMENTS (CONTINUED)

The District and System are participants in the Local Agency Investment Fund (LAIF), which is regulated by California Government Code Section 16429 under the oversight of the Treasurer of the State of California. The value of the pool shares in LAIF is determined on an amortized cost basis, which is different from the fair value of its position in the pool. The District and System's investments with LAIF at June 30, 2025 and 2024 included a portion of the pool funds invested in Structured Notes and Asset-Backed Securities. These investments included the following:

- Structured Notes are debt securities (other than asset-backed securities) whose cash-flow characteristics (coupon rate, redemption amount, or stated maturity) depend upon one or more indices and/or that have embedded forwards or options.
- Asset-Backed Securities, the bulk of which are mortgage-backed securities, entitle their purchasers to receive a share of the cash flows from a pool of assets, such as principal and interest repayments from a pool of mortgages (such as Collateralized Mortgage Obligations) or credit card receivables.

As of June 30, 2025 and 2024, the District had investments of \$46,547 and \$35,299, respectively, and System had investments of \$5,829 and \$3,517, respectively, invested in LAIF, which invested 3.81% and 3.00% of the pooled investment funds in Structured Notes and Asset-Backed Securities. The LAIF fair value factor of 1.001198310 and 0.996316042 as of June 30, 2025 and 2024, respectively was used to calculate the fair value of the investments in LAIF.

The Plan's investments include the following investments that are highly sensitive to interest rate fluctuations to a greater degree than already indicated above as of June 30, 2025 and 2024:

	Fair Value at Year End <u>June 30, 2025</u>
<u>Highly Sensitive Investments</u>	
Government Mortgage - Backed Securities	\$ 194,572
Commercial Mortgage - Backed Securities	3,271
	Fair Value at Year End <u>June 30, 2024</u>
<u>Highly Sensitive Investments</u>	
Government Mortgage - Backed Securities	\$ 193,119
Commercial Mortgage - Backed Securities	4,212

G. Credit Risk

Credit risk is the risk that an issuer of an investment will not fulfill its obligation to the holder of the investment. This is measured by the assignment of a rating by a nationally recognized statistical credit rating organization.

H. Concentration Risk

Significant District investments in the securities of any individual issuers, other than U.S. Treasury securities, LAIF, and mutual funds, are set forth below as of June 30, 2025.

Reporting Unit	Issuer	Investment Type	Reported Amount
District-Wide	FHLB	Federal Agency Securities	\$ 27,380
Major Funds: Water System	FHLB	Federal Agency Securities	27,380

The District has no significant investments in the securities of any individual issuers, other than U. S. Treasury securities, and mutual funds as of June 30, 2024.

System Pension Trust Fund:

As of June 30, 2025, and June 30, 2024, the District did not have investments in any one organization exceeding 5% of the System's investments.

The District held demand deposits (overdrafts) amounting to \$3,867 and \$4,478 on behalf of the System as of June 30, 2025 and 2024, respectively. The financial institution which holds these deposits is required by state law to maintain collateral pools against all public deposits they hold.

I. Foreign Currency Risk

System Pension Trust Fund:

Foreign currency risk is the risk that changes in foreign exchange rates will adversely affect the fair values of an investment or deposit. At June 30, 2025 the value of foreign currency investments were not significant to the investments as a whole.

The Fund's investment policy permits investments in Non-US Equity of up to 25%, the Fund's current position is not significant.

EAST BAY MUNICIPAL UTILITY DISTRICT
Notes to Basic Financial Statements
For the Years Ended June 30, 2025 and 2024
(Dollars in Thousands)

NOTE 2: CASH AND INVESTMENTS (CONTINUED)

Foreign currency risk is the risk that changes in foreign exchange rates will adversely affect the fair values of an investment or deposit. Presented below in US dollars is the fair market value of the System's foreign investments at June 30, 2024:

<u>Foreign Currency</u>	<u>Market Value</u>
Danish Krone	\$ 56
Euro	21

The Fund's investment policy permits investments in Non-US Equity of up to 25%. The Fund's current position is 0.003%.

J. Custodial Credit Risk

Custodial credit risk for *cash on deposits* is the risk that, in the event of the failure of a depository financial institution, a government will not be able to recover its deposits or will not be able to recover collateral securities that are in the possession of an outside party. The custodial credit risk for *investments* is the risk that, in the event of the failure of the counterparty (e.g., broker-dealer) to a transaction, the District or System will not be able to recover the value of its investment or collateral securities that are in the possession of another party.

California Law requires banks and savings and loan institutions to pledge government securities with a market value of 110% of the District's cash on deposit, or first trust deed mortgage notes with a market value of 150% of the deposit, as collateral for these deposits. Under California Law this collateral is held in a separate investment pool by another institution in the District's name and places the District ahead of general creditors of the institution.

The District and System invest in individual investments and in investment pools. Individual investments are evidenced by specific identifiable *securities instruments*, or by an electronic entry registering the owner in the records of the institution issuing the security, called the *book entry* system. In order to increase security, the District and System employs the Trust Department of a bank or trustee as the custodian of certain District and System managed investments, regardless of their form.

As of June 30, 2025 and 2024, the Plan's brokers/dealers held \$0 in cash exposed to custodial credit risk.

K. Partnership Funds

California Asset Management Program (CAMP) – the District is a participant in the CAMP. CAMP is an investment pool offered by the California Asset Management Trust (the Trust). The Trust is a joint powers authority and public agency created by the Declaration of Trust and established under the provisions of the California Joint Exercise of Powers Act (California Government Code Sections 6500 et seq., or the "Act") for the purpose of exercising the common power of CAMP participants to invest certain proceeds of debt issues and surplus funds. CAMP investments are limited to investments permitted by subdivisions (a) to (n), inclusive, of Section 53601 of the California Government Code. The District reports its investments in CAMP at the fair value amounts provided by CAMP, which is the same as the value of the pool share in accordance with GASB 72 requirements. At June 30, 2025, the fair value was approximate to the District's cost. As of June 30, 2025, the District investment in CAMP is \$91,244.

L. Joint Powers Authority

DSRSD/EBMUD Recycled Water Authority - On June 28, 1995, the Dublin San Ramon Services District (DSRSD) and East Bay Municipal Utility District (District) entered into a Joint Powers Agreement (JPA) and established the DSRSD/EBMUD Recycled Water Authority (DERWA) with the purpose of creating a recycled water program in the San Ramon and Livermore-Amador Valleys. The JPA governing body is not substantially the same as the District and its independent Board consists of two directors, each from the DSRSD and District. The JPA books and records are being maintained separately from DSRSD and the District. The DSRSD and District made member contributions

EAST BAY MUNICIPAL UTILITY DISTRICT

For the Years Ended June 30, 2025 and 2024
(Dollars in Thousands)

NOTE 2: CASH AND INVESTMENTS (CONTINUED)

to fund the JPA start-up and continue to fund capital projects at the request of the JPA on an as needed basis. Although DERWA has a significant relationship with the District, DERWA does not provide services solely to the District, and therefore is not considered a component unit of the District.

Freeport Regional Water Authority - The Freeport Regional Water Project (FRWP) is a regional water supply project undertaken by the District in partnership with the Sacramento County Water Agency (SCWA). In February 2002, with the support of the United States Bureau of Reclamation, the District and SCWA formed the Freeport Regional Water Authority (FRWA) under a joint powers agreement to develop the FRWP. The FRWP provides the permanent infrastructure to allow the District to receive water deliveries pursuant to the Long-Term Renewal Central Valley Project Contract at a new point of diversion along the Sacramento River. In addition to providing the District up to 100 MGD of supplemental water in dry years, the FRWP can provide up to 85 MGD to SCWA in all years. The District's share of the facilities is recorded as Investment in JPA and is presented on the statement of net position.

NOTE 3: CAPITAL ASSETS

A. Summary

The District capitalizes all assets with a historical cost of at least five thousand dollars and a useful life of at least three years. Contributed capital assets are valued at their estimated acquisition value on the date contributed.

The purpose of depreciation is to spread the cost of capital assets equitably among all customers over the life of these assets, so that each customer's bill includes a pro rata share of the cost of these assets. The amount charged to depreciation expense each year represents that year's pro rata share of depreciable capital assets.

Depreciation of all capital assets in service, excluding land, is charged as an expense against operations each year and the total amount of depreciation taken over the years, called accumulated depreciation, is reported on the statement of net position as a reduction in the book value of the capital assets.

Capital assets are depreciated using the straight – line method of depreciation, which means the cost of the asset is divided by its expected useful life in years and the result is charged to expense each year until the asset is fully depreciated. The useful life of the District leases and subscriptions are based on lease agreements and SBITAs contracts, respectively. The District has assigned the useful lives listed below to capital assets:

Utility plant:	Years
Source of supply	25-100
Raw water transmission and storage	20-100
Interception and outfall	60-75
Pumping	25-75
Treatment	20-75
Distribution	25-75
Power generation	25-75
Equipment	5-20
Plant structures	25-75
Other	5-40

Other	29,830	38,001	2,857	12,051	32,687	50,052
Total	\$ 92,289	\$ 90,931	\$ 20,359	\$ 26,100	\$ 112,648	\$ 117,031

NOTE 5: COMPENSATED ABSENCES

Compensated absences as of June 30, 2025 and 2024, are included on the statement of net position separately from accounts payable and accrued expenses. In previous years, trends have shown that the District employees utilize the accruals annually, therefore, amounts payable are accrued and reported as a current liability on the financial statements.

The changes in compensated absences were as follows:

	Water System		Wastewater System		Total	
	June 30, 2025	June 30, 2024	June 30, 2025	June 30, 2024	June 30, 2025	June 30, 2024
Beginning Balance	\$ 43,431	\$ 42,858	\$ 7,192	\$ 6,881	\$ 50,623	\$ 49,739
Net change	421	573	7	311	428	884
Ending Balance	\$ 43,852	\$ 43,431	\$ 7,199	\$ 7,192	\$ 51,051	\$ 50,623

NOTE 6: COMMERCIAL PAPER NOTES

The District's Board of Directors has authorized the issuance of short-term indebtedness of the District in a maximum principal amount of up to the lesser of either the average of the total annual revenue for the three preceding years or 25% of the District's total outstanding bonds. Under this authority the District has established two commercial paper programs: an extendable commercial paper program and a traditional commercial paper program. The proceeds from the issuance of commercial paper under these programs are restricted as to use. Under the programs, which must be authorized by the Board of Directors every seven years by resolution subject to the right of referendum, the Water System or the Wastewater System may issue commercial paper and bank notes at prevailing interest rates for periods of not more than 270 days from the date of issuance. The program was last authorized on April 27, 2021.

The District initially established its extendable commercial paper program in March 2009. Under the extendable commercial paper program, no liquidity support agreement with a commercial bank is needed. Instead, the District limits the term of the extendable commercial paper to 120 days, and the investor agrees to extend the maturity of their investment by 150 days at a higher interest rate in the event of a failure to place new commercial paper notes to pay maturing notes, which is expected to provide the District sufficient time to find a replacement investor or refund the extendable commercial paper with a different form of debt to repay the investor.

EAST BAY MUNICIPAL UTILITY DISTRICT
Notes to Basic Financial Statements
For the Years Ended June 30, 2025 and 2024
(Dollars in Thousands)

NOTE 6: COMMERCIAL PAPER NOTES (CONTINUED)

As of June 30, 2025, there are no outstanding balances in Water and Wastewater Series extendable commercial paper notes under this program.

The District established its current traditional commercial paper program in December 2015. As of June 30, 2025, \$241 million in Water Series and \$0 in Wastewater Series commercial paper notes were outstanding under this program. The Water Series commercial paper notes included the terms of 61 to 182 days and interest rates ranging from 2.65% to 2.90% as of June 30, 2025, and the terms of 59 to 219 days and interest rates ranging from 3.53% to 3.85% as of June 30, 2024.

To provide liquidity for the Water Series notes issued under the traditional commercial paper program, the District maintains two liquidity support facilities with commercial banks: a standby letter of credit in the amount of \$121 million and a revolving credit agreement in the amount of \$120 million as of June 30, 2025. Borrowings by the Water System for commercial paper notes and bank notes under the traditional commercial paper program cannot exceed the aggregate amount available under these agreements. Draws under the liquidity support facilities are restricted to pay principal on maturing Water Series commercial paper notes. There were no borrowings under the liquidity support facilities as of June 30, 2025. The liquidity support facilities expire on May 4, 2029, and June 28, 2028, respectively, and are subject to extension at the request of the District upon agreement by the issuing bank.

There were no unused proceeds of commercial paper notes as of June 30, 2025. It is the District's practice to use the commercial paper programs as a portion of the District's long-term variable rate debt exposure.

NOTE 7: LONG-TERM DEBT

A. Composition and Changes

The District generally incurs long-term debt to finance projects or purchase assets which will have useful lives equal to or greater than the related debt. The District's debt issues and transactions are summarized below and discussed in detail thereafter.

NOTE 7: LONG-TERM DEBT (CONTINUED)

B. Description of the District's Long-Term Debt Issues

Revenue-supported debt can be authorized by the District's Board of Directors, subject to a referendum process.

The net revenues of the Water System are pledged toward the repayment of the Water Revenue Bonds and the State Water Resources Control Board (SWRCB) Parity Loans of the Water System. The net revenues of the Wastewater System are pledged toward the repayment of the Wastewater Revenue Bonds of the Wastewater System.

The District is subject to certain revenue bond covenants on outstanding debt which require the setting of rates and charges to yield net revenues of the respective Water System or Wastewater System, as applicable, equal to at least 110% of the current annual debt service requirements for all revenue bonds and other parity obligations of the respective Water System or Wastewater System. The District has designated \$182 million (\$150 million for the Water System and \$32 million for the Wastewater System) of operating reserves as a rate stabilization fund, which is available to satisfy the coverage requirements for debt service in future years. There have never been any draws for this purpose.

Upon the occurrence and continuation of an event of default under the Water System Revenue Bond Indenture or Wastewater System Revenue Bond indenture, the principal amounts of (and accrued interest on) the respective system's revenue bonds can be accelerated and declared immediately due and payable by the registered bondholders of a majority in aggregate principal amount of the then outstanding bonds upon written notice delivered to the District. Failure to pay debt service when due and the occurrence of certain insolvency or bankruptcy-related events are events of default. Failure to observe or perform the covenants and agreements under the Indenture for a period of 60 days after written notice of such failure is given to the District is also an event of default unless the District has taken all action reasonably possible to remedy such failure within 60 days and the District diligently proceeds to remedy the failure. A default by the District under any agreement governing Parity Debt which continues after the applicable grace period, if any, is also an event of default.

Water System Revenue Bonds Issuance and Refunding during the Fiscal Year

2025 Water System Revenue Bonds, Series 2025A (Green Bonds) – The District issued \$259 million principal amount of Water System Revenue Bonds Series 2025A on May 15, 2025, to provide additional moneys to finance (by reimbursement to the District of) a portion of the costs of various improvements to the District's Water System, and pay the costs incidental to the issuance of the Series 2025A Bonds. The Water System Revenue Bonds Series 2025A are special limited obligations of the District and are payable solely from and secured by a pledge of the Adjusted Net Water Revenues of the District. The Adjusted Net Water Revenues generally consist of the District's Water Revenues (adjusted for deposits to and withdrawals from the Rate Stabilization Fund) remaining after the payment of all Water Operation and Maintenance Costs. Principal payments commence on June 1, 2040, and are payable annually on June 1 thereafter. Interest payments are payable on June 1st and December 1st of each year, commencing December 1, 2025.

2025 Water System Revenue Refunding Bonds, Series 2025B – The District issued \$479 million principal amount of Water System Revenue Refunding Bonds Series 2025B on May 15, 2025, to (i) refund a portion of the District's (a) Outstanding Water System Revenue Refunding Bonds, Series 2015A, (b) Outstanding Water System Revenue Bonds, Series 2015B, and (c) Outstanding Water System Revenue Bonds, Series 2015C, and (ii) pay costs incidental to the issuance of the Series 2025B Bonds. The Water System Revenue Refunding Bonds Series 2025B are special limited obligations of the District and are payable solely from and secured by a pledge of the Adjusted Net Water Revenues of the District. The Adjusted Net Water Revenues generally consist of the District's Water Revenues (adjusted for deposits to and withdrawals from the Rate Stabilization Fund) remaining after the payment of all Water Operation and Maintenance Costs. Principal payments commence on June 1, 2026, and are payable annually on June 1 thereafter. Interest payments are payable on June 1st and December 1st of each year, commencing December 1, 2025.

EAST BAY MUNICIPAL UTILITY DISTRICT
Notes to Basic Financial Statements
For the Years Ended June 30, 2025 and 2024
(Dollars in Thousands)

NOTE 7: LONG-TERM DEBT (CONTINUED)

The refunding of Water System Revenue Bonds Series 2015A, 2015B, and 2015C created an economic gain of \$36 million.

Wastewater System Revenue Bonds Issuance during the Fiscal Year

2025 Wastewater System Revenue Bonds, Series 2025A (Green Bonds) – The District issued \$29 million principal amount of Wastewater System Revenue Bonds, Series 2024A on May 22, 2025, to provide additional moneys to finance (by reimbursement to the District of) a portion of the costs of various improvements to the District's Wastewater System, and pay the costs incidental to the issuance of the Series 2025A Bonds. The Wastewater System Revenue Bonds Series 2025A are special limited obligations of the District and are payable solely from and secured by a pledge of the Adjusted Net Wastewater Revenues of the District. The Adjusted Net Wastewater Revenues generally consist of the District's Wastewater Revenues (adjusted for deposits to and withdrawals from the Rate Stabilization Fund) remaining after the payment of all Wastewater Operation and Maintenance Costs. Principal payments commence on June 1, 2041, and are payable annually on June 1 thereafter. Interest payments are payable on June 1st and December 1st of each year, commencing December 1, 2025.

2025 Wastewater System Revenue Refunding Bonds, Series 2025B – The District issued \$48 million principal amount of Wastewater System Revenue Refunding Bonds Series on May 22, 2025, to (i) refund all of the District's Outstanding Wastewater System Revenue Refunding Bonds, Series 2015A-1, and (ii) pay costs incidental to the issuance of the Series 2025B Bonds. The Wastewater System Revenue Refunding Bonds Series 2025B are special limited obligations of the District and are payable solely from and secured by a pledge of the Adjusted Net Wastewater Revenues of the District. The Adjusted Net Wastewater Revenues generally consist of the District's Wastewater Revenues (adjusted for deposits to and withdrawals from the Rate Stabilization Fund) remaining after the payment of all Wastewater Operation and Maintenance Costs. Principal payments commence on June 1, 2027, and are payable annually on June 1 thereafter. Interest payments are payable on June 1st and December 1st of each year, commencing December 1, 2025.

The refunding of Wastewater System Revenue Bonds Series 2015A-1 created an economic gain of \$7 million.

Prior-Year Defeasances

In prior years, the District defeased certain debt issues by placing proceeds of new bonds in an irrevocable trust to provide for all future debt service payments on the refunded bonds. Accordingly, the trust account assets and the liability for the defeased debt are not included in the District's financial statements. On June 30, 2025, \$174 million of outstanding bonds are considered defeased.

NOTE 8: LEASES

A. Leases Payable, Lessee

As of June 30, 2025, the District had 16 active leases. The leases have payments that range from \$1 to \$223 and interest rates that range from 0.3870% to 2.5830%. As of June 30, 2025, the total combined value of the lease liability is \$1,561, the total combined value of the short-term lease liability is \$374. The combined value of the right to use asset, as of June 30, 2025 of \$2,494 with accumulated amortization of \$1,045 is included within the lease class activities table found below. The leases had \$0 of variable payments and \$0 of other payments, not included in the lease liability, within the fiscal year.

Amount of Lease Assets by Major Classes of Underlying Asset

Asset Class	As of Fiscal Year-end	
	Lease Asset Value	Accumulated Amortization
Buildings	\$ 1,760	\$ 791
Infrastructure	507	184
Land	227	70
Total Leases	\$ 2,494	\$ 1,045

NOTE 10: NET POSITION

Net Position is the excess of all the District's assets and deferred outflows over all its liabilities and deferred inflows, regardless of fund. Net Position is divided into three captions. These captions apply only to Net Position and are described below:

Net Investment in Capital Assets describes the portion of Net Position which is represented by the current net book value of the District's capital assets, less the outstanding balance of any debt issued to finance these assets and any related deferred outflows and inflows.

Restricted describes the portion of Net Position which is restricted as to use by the terms and conditions of agreements with outside parties, governmental regulations, laws, or other restrictions which the District cannot unilaterally alter. These principally include developer fees received for use on capital projects, debt service requirements, and fees charged for the provision of future water resources.

Unrestricted describes the portion of Net Position which is not restricted to use.

NOTE 11: EMPLOYEES' RETIREMENT PLAN

A. Description

The Employees' Retirement System is a single-employer, contributory, defined benefit pension plan (the Plan) which provides retirement, disability, survivorship, and post-employment healthcare benefits for eligible directors, officers, and employees of the District. The Plan is administered by a Retirement Board composed of three members appointed by the District's Board of Directors and two members elected by and from the active membership of the Plan, and a nonvoting member elected by the retirees of the Plan. Retirement Ordinance No. 40 assigns the authority to establish Plan benefit provisions to the District's Board of Directors. A stand-alone financial report of the Employees' Retirement System is available. Please send request to the Controller, Accounting Division, P.O. Box 24055, MS 402, Oakland, CA 94623-1055 or visit the District website at <http://www.ebmud.com>.

All regular full-time employees of the District are members of the Plan in addition to certain job share and intermittent employees. In accordance with the ordinance governing the System, eligible employees become members on the first day they are physically on the job. Members become vested in the Plan after five years of continuous full-time employment. Vested members who terminate employment may elect a refund of their contributions or leave them in the Plan until eligible to receive benefits.

EAST BAY MUNICIPAL UTILITY DISTRICT
Notes to Basic Financial Statements
For the Years Ended June 30, 2025 and 2024
(Dollars in Thousands)

NOTE 11: EMPLOYEES' RETIREMENT PLAN (CONTINUED)

The Plan is funded by contributions from its members and from the District. District contribution percentages are recommended by the Retirement Board; employee contribution rates are established by the Board of Directors pursuant to the Ordinance, giving consideration to actuarial recommendations and prospective changes in factors which affect funding.

B. Retirement Benefits and Allowances

Within the Pension Plan, there are two tiers in effect currently, the 1980 Plan and the 2013 Plan. Employees who became Members of the Retirement System prior to January 1, 2013, or who have reciprocal membership prior to January 1, 2013, are in the 1980 Plan (1980 Plan Members). Employees who became Members on or after January 1, 2013, or who have reciprocal membership after January 1, 2013 are in the 2013 Plan (2013 Plan Members).

1980 Plan Members may elect voluntary reduced service retirement upon attaining the age of 54 and completing 5 years of continuous full-time employment. Members may elect voluntary unreduced service retirement upon attaining the age of 62 and completing 5 years of continuous full-time employment or age 65 without restriction. Members who continue to work upon attaining the normal retirement age of 65 continue to contribute to the Plan, and at the time they retire, computation of their retirement allowance is based upon their compensation and length of service as of the date of retirement. Service retirement allowances are computed by formulas specified in the Ordinance and are based on date of employment, length of employment, age at date of retirement, and compensation earned during employment.

2013 Plan Members may elect voluntary reduced service upon attaining the age of 52 and completing 5 years of continuous full-time employment. Members may elect voluntary unreduced service retirement upon attaining the age of 67 and completing 5 years of continuous full-time employment. Members who continue to work upon attaining the normal retirement age of 67 continue to contribute to the Plan, and at the time they retire, computation of their allowance is based upon their compensation and length of service as of the date of retirement. Service retirement allowances are computed by formulas specified in the Ordinance and are based on length of service, age at retirement, and compensation earned during employment.

C. Postemployment Healthcare Cost

In addition to retirement benefits, the District provides post-employment health benefits assistance (administered by the Employees' Retirement System) for employees who retire from the District or their surviving spouses. As of June 30, 2024 (date of latest actuarial valuation), there were 1,915 participants receiving these health care benefits.

Effective July 1, 1996, a 20-year vesting schedule for full benefits was implemented for all new participants. Eligible participants are reimbursed up to \$450 per month for service members and up to \$550 for members with a spouse or registered domestic partner for any combined health, dental, or long-term care insurance premiums paid by the participant or his/her surviving spouse. Effective July 1, 1999, retirees may be reimbursed up to the designated maximum for the combined health insurance premiums for themselves, their current spouses, or registered domestic partners. The benefits were funded entirely by the District on an actuarial basis up until June 17, 2002. Effective June 18, 2002, a portion of the post-employment healthcare benefit costs is recovered through employee contributions. The actual benefits paid in cash to retirees were \$9,777 and \$9,824 for the years ended June 30, 2025 and 2024, respectively.

EAST BAY MUNICIPAL UTILITY DISTRICT
Notes to Basic Financial Statements
For the Years Ended June 30, 2025 and 2024
(Dollars in Thousands)

NOTE 11: EMPLOYEES' RETIREMENT PLAN (CONTINUED)

Membership in the OPEB Plan consisted of the following as of June 30, 2024, the measurement date of the latest actuarial valuation:

Retirees and beneficiaries receiving benefits	1,915
Terminated plan members entitled to but not yet receiving benefits	407
Active plan members	<u>1,974</u>
Total	<u>4,296</u>

D. Actuarial Assumptions and Funding Policy

The Plan's funding policy provides for periodic District contributions at actuarially determined amounts sufficient to accumulate the necessary assets to pay benefits when due as specified by ordinance. The individual entry age normal method is used to determine the normal cost for other post-employment benefits (OPEB) and service cost for pension, and the OPEB unfunded actuarial accrued liability (past service liability) is amortized as a level percentage of future payroll over 30 years open period.

District adopted contribution rates for the year ended June 30, 2025 are as follows:

1980 Plan:

Pension plan:

Employer service cost	19.17%
Toward unfunded pension liability	25.42%

Other post-employment benefits:

Employer normal cost	0.86%
Unfunded actuarial accrued liability	3.57%

2013 Plan:

Pension plan:

Employer service cost	10.38%
Toward unfunded pension liability	25.42%

Other post-employment benefits:

Employer normal cost	0.70%
Unfunded actuarial accrued liability	3.57%

Notes to Basic Financial Statements
For the Years Ended June 30, 2025 and 2024
(Dollars in Thousands)

NOTE 11: EMPLOYEES' RETIREMENT PLAN (CONTINUED)

Significant assumptions used to compute contribution requirements from the latest unaudited actuarial are as follows:

Valuation date	June 30, 2024
Actuarial cost method	Entry Age Normal Cost Method
Amortization method	Level percent of payroll
Remaining amortization period	Prior to July 1, 2011, the UAAL from plan changes, assumption changes, and experience gains/losses were amortized over separate decreasing 30-year amortization periods. On or after July 1, 2011, any new UAAL resulting from plan changes are amortized over separate decreasing 15-year periods; assumption and method changes are amortized over separate decreasing 25-year periods (prior to July 1, 2021); and experience gains/losses are amortized over separate decreasing 20-year periods. On or after July 1, 2021, assumption and method changes are amortized over separate decreasing 20-year periods.
Assets valuation method	Market value of assets less unrecognized returns in each last five years. Unrecognized return is equal to the difference between the actual market return and the expected return on the market value, and is recognized over a five year period, further adjusted, if necessary, to be within 30% of the market value.
Actuarial assumptions:	
Net Investment Return	6.75%, net of Pension Plan investment expense, including inflation
Average projected salary increases*	Ranges from 3.75% to 9.25% based on time from hire
Inflation rate	2.50%
Cost-of-living adjustments	2.75% per annum
Mortality	Pre-retirement: Pub-2010 General Employee Amount-Weighted Above-Median Mortality Tables, projected generationally with the two-dimensional mortality improvement scale MP-2020. Post-retirement: <i>Healthy Members</i> - Pub-2010 General Healthy Retiree Amount-Weighted Above-Median Mortality Tables with rates increased by 5% for males, projected generationally with the two-dimensional mortality improvement scale MP-2020. <i>Disabled Members</i> - Pub-2010 Non-Safety Disabled Retiree Amount-Weighted Mortality Tables with rates increased by 5% for males, projected generationally with the two-dimensional mortality improvement scale MP-2020. <i>Beneficiaries</i> - Pub-2010 Contingent Survivor/Retiree Amount-Weighted Above-Median Mortality Tables with rates increased by 5% for males and females, projected generationally with the two-dimensional mortality improvement scale MP-2020.

*Includes inflation of 2.50% plus "across-the-board" salary increase of 0.50% plus merit and promotional increases that vary based on time from hire.

NOTE 11: EMPLOYEES' RETIREMENT PLAN (CONTINUED)

E. Contributions Required and Contributions Made

Contributions for the years ended June 30, 2025, and June 30, 2024, based on the June 30, 2024, actuarial valuation (latest available and includes amounts for post-employment healthcare benefits), were as follows:

	<u>2025</u>			<u>2024</u>
	<u>Pension</u>	<u>Healthcare Benefit Plan</u>	<u>Total</u>	
Regular contributions:				
District contributions	\$ 110,869	\$ 11,885	\$ 122,754	\$ 117,342
Member contributions	24,463	249	24,712	23,853
	<u>135,332</u>	<u>12,134</u>	<u>147,466</u>	<u>141,195</u>
Other contributions:				
Member buybacks	25	-	25	24
	<u>\$ 135,357</u>	<u>\$ 12,134</u>	<u>\$ 147,491</u>	<u>\$ 141,219</u>

Regular District and member contributions in fiscal year 2025 represent an aggregate of 44.46% and 8.96% of covered payroll, respectively. The District's contributions include amounts for post-employment healthcare benefits at a rate of 4.30% of covered payroll. The actual payroll for the District employees covered by the Plan for the year ended June 30, 2025, was \$276,094, which was 90.69% of the total District payroll of \$304,426.

The total District contributions of \$122,754 is comprised of the normal cost of \$48,795 and the unfunded actuarial accrued liability of \$73,959.

Regular District and member contributions in fiscal year 2024 represent an aggregate of 44.07% and 8.97% of covered payroll, respectively. The District's contributions include amounts for post-employment healthcare benefits at a rate of 4.59% of covered payroll. The actual payroll for the District employees covered by the Plan for the year ended June 30, 2024, was \$266,278 which was 91.08% of the total District payroll of \$292,365.

The total District contributions of \$177,342 is comprised of the normal cost of \$45,939 and the unfunded actuarial accrued liability of \$71,403.

Member buyback contributions relate to prior years' service credits for Plan participants. The Plan was amended in 1998 for limited temporary construction workers and in 2003 for intermittent employees to allow current members, who previously worked for the District in a status which did not qualify for membership in the System, to establish retirement service credit for prior service with payments over a period of two to eight years.

F. Net Pension Liability

The net pension liability (the Plan's liability determined in accordance with GASB 68 less the fiduciary net position) as of June 30, is as shown below:

	<u>2025</u>	<u>2024</u>
Total Pension Liability	\$ 3,143,728	\$ 2,994,429
Plan Fiduciary Net Position	(2,445,611)	(2,194,142)
Employer Net Pension Liability	<u>\$ 698,117</u>	<u>\$ 800,287</u>
Plan Fiduciary Net Position as a		
Percentage of Total Pension Liability	77.79%	73.27%
Covered Payroll	\$ 264,426	\$ 246,231
Liability as a Percentage of Covered Payroll	264.01%	325.02%

EAST BAY MUNICIPAL UTILITY DISTRICT
Notes to Basic Financial Statements
For the Years Ended June 30, 2025 and 2024
(Dollars in Thousands)

NOTE 11: EMPLOYEES' RETIREMENT PLAN (CONTINUED)

The actuarial assumptions used in the June 30, 2024 valuation were based on the July 1, 2020 through June 30, 2024 Actuarial Experience Study report dated November 13, 2024. Actuarial valuation of the ongoing System involves estimates of the reported amounts and assumptions about the probability of occurrence of events far into the future. Examples include assumptions about future employment mortality and future salary increases. Amounts determined regarding The net pension liability are subject to continual revision as actual results are compared with past expectations and new estimates are made about the future. The Schedule of Employers' net pension liability presents multi-year trend information about whether the plan fiduciary net positions are increasing or decreasing over time relative to the total pension liability. These schedules are presented in the Required Supplementary Information section. The net pension liability was measured as of June 30, 2024 and 2023, while the total pension liability was determined based upon the results of the actuarial valuations as of June 30, 2024 and 2023, respectively.

For the year ended June 30, 2025, the District recognized pension expense as follows:

	<u>Water</u>	<u>Wastewater</u>	<u>Total</u>
Contributions made after measurement date	\$ (95,029)	\$ (15,840)	\$ (110,869)
Current year changes in the net pension liability:			
Service cost	51,637	8,675	60,312
Interest on total pension liability	172,225	28,934	201,159
Member contributions	(341)	341	-
Projected earnings on investments	(126,140)	(21,192)	(147,332)
Difference in expected and actual earnings	(21,754)	(3,654)	(25,408)
Other	36,727	5,751	42,478
Total current year activity	<u>112,354</u>	<u>18,855</u>	<u>131,209</u>
Total pension expense	<u>\$ 17,325</u>	<u>\$ 3,015</u>	<u>\$ 20,340</u>

At June 30, 2025, the District reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

	<u>Deferred Outflows of Resources</u>			<u>Deferred Inflows of Resources</u>		
	<u>Water</u>	<u>Wastewater</u>	<u>Total</u>	<u>Water</u>	<u>Wastewater</u>	<u>Total</u>
Pension contributions subsequent to measurement date	\$ 95,029	\$ 15,840	\$ 110,869	\$ -	\$ -	\$ -
Differences between expected and actual experiences	57,310	9,628	66,938	50,424	8,471	58,895
Changes of assumption	50,598	8,501	59,099	-	-	-
Change in proportion and difference between employer contributions and proportionate share of contributions	518	1,882	2,400	1,882	518	2,400
Net difference between projected and actual earnings on pension plan investments	-	-	-	9,259	1,556	10,815
Total	<u>\$ 203,455</u>	<u>\$ 35,851</u>	<u>\$ 239,306</u>	<u>\$ 61,565</u>	<u>\$ 10,545</u>	<u>\$ 72,110</u>

EAST BAY MUNICIPAL UTILITY DISTRICT
Notes to Basic Financial Statements
For the Years Ended June 30, 2025 and 2024
(Dollars in Thousands)

NOTE 11: EMPLOYEES' RETIREMENT PLAN (CONTINUED)

A total of \$110,869 was reported as deferred outflows of resources related to contributions subsequent to the measurement date and will be recognized as a reduction of the net pension liability in the year ended June 30, 2025. Other amounts reported as deferred outflows of resources and deferred inflows of resources related to pensions will be recognized as pension expense as follows:

Year Ended June 30	Water	Wastewater	Total
2026	\$ 5,648	\$ 1,159	\$ 6,807
2027	64,314	11,114	75,428
2028	(12,577)	(1,670)	(14,247)
2029	(13,039)	(1,743)	(14,782)
2030	2,515	606	3,121
	<u>\$ 46,861</u>	<u>\$ 9,466</u>	<u>\$ 56,327</u>

The long-term expected rate of return on pension plan investments was determined using a building-block method in which best-estimates ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighing the expected future real rates of return by the target asset allocation percentage and by adding expected inflation.

The target allocation and projected arithmetic real rates of return, after deducting inflation, but before investment expenses, used in the derivation of the long-term expected investment rate of return assumption for each major asset class are summarized below:

Asset Class	Target Allocation	Long-Term Expected Arithmetic Real Rate of Return
Domestic Large Cap Equity	32.55%	5.80%
Domestic Small Cap Equity	2.45%	6.59%
Developed International Large Cap Equity	18.00%	6.44%
Emerging Markets Equity	7.00%	8.32%
Core Bonds	20.00%	2.27%
High-Yield Bonds	7.50%	4.62%
Bank Loans	5.00%	4.43%
Real Estate	2.50%	4.54%
Private Debt	5.00%	6.63%
Total	<u>100.00%</u>	

The discount rates used to measure the total pension liability was 6.75% as of June 30, 2024, and June 30, 2023. The projection of cash flows used to determine the discount rate assumed plan member contributions will be made at the current contribution rate and that employer contributions will be made at rates equal to the actuarially determined contribution rates. For this purpose, only employer contributions that are intended to fund benefits of current plan members and their beneficiaries are included. Projected employer contributions that are intended to fund the service costs of future plan members and their beneficiaries, as well as projected contributions from future plan members, are not included. Based on those assumptions, the Pension Plan's fiduciary net position was projected to be available to make all projected future benefit payments for current plan members. Therefore, the long-term expected rate of return on Pension Plan investments was applied to all periods of projected benefit payments to determine the total pension liability as of both June 30, 2024 and June 30, 2023.

(Dollars in Thousands)

NOTE 11: EMPLOYEES' RETIREMENT PLAN (CONTINUED)

Changes in net pension liability for fiscal year ended June 30, 2025 were as follows:

	Increase (Decrease)		
	Total Pension Liability (a)	Plan Fiduciary Net Position (b)	Net Pension Liability (c) = (a) - (b)
Beginning Balance	\$ 2,994,429	\$ 2,194,142	\$ 800,287
Changes Recognized during the Measurement Period:			
Service cost	60,312	-	60,312
Interest on total pension liability	201,159	-	201,159
Difference between expected and actual experience	11,737	-	11,737
Changes of assumptions	25,307	-	25,307
Contributions from the employer	-	105,111	(105,111)
Contributions from the employee	-	23,637	(23,637)
Net investment income	-	274,375	(274,375)
Benefit payments, including refunds of employee contributions	(149,216)	(149,216)	-
Administrative expenses	-	(2,438)	2,438
Net Changes during the Measurement Period	149,299	251,469	(102,170)
Ending Balance	\$ 3,143,728	\$ 2,445,611	\$ 698,117

In accordance with GASB 67 regarding the disclosure of the sensitivity of the net pension liability to changes in the discount rate, the following table presents the net pension liability of the Plan as of June 30, 2024, calculated using the discount rate of 6.75% as well as what the Plan's net pension liability would be if it were calculated using a discount rate that is 1-percentage-point lower (5.75%) or 1- percentage-point higher (7.75%) than the current rate:

	1% Decrease (5.75%)	Current Discount (6.75%)	1% Increase (7.75%)
Net Pension Liability	\$ 1,110,905	\$ 698,117	\$ 356,956

G. Net OPEB Liability

The net OPEB liability (The Plan's liability determined according to GASB 74) as of June 30, is shown below:

	2024	2023
Total OPEB Liability	\$ 189,880	\$ 193,546
Plan Fiduciary Net Position	(71,420)	(61,165)
Employer Net OPEB Liability	\$ 118,460	\$ 132,381

Plan Fiduciary Net Position as a		
Percentage of Total OPEB Liability	37.61%	31.60%

The actuarial assumptions used in the June 30, 2024 valuation were based on the results of an experience study dated November 13, 2024) for the period from July 1, 2020 through June 30, 2024, the June 30, 2022 Economic Assumptions Review report (dated November 8, 2022), and the Retiree Health assumptions letter (dated November 14, 2024). These are the same as the assumptions used in the June 30, 2024 funding actuarial valuation for EBMUDERS except the discount rate is calculated as a blend of the investment return on plan assets and municipal bond rate in accordance with GASB 74, and implicit subsidy benefit payments are valued based on the age-based costs and separate spousal participation assumptions.

EAST BAY MUNICIPAL UTILITY DISTRICT
Notes to Basic Financial Statements
For the Years Ended June 30, 2025 and 2024
(Dollars in Thousands)

NOTE 11: EMPLOYEES' RETIREMENT PLAN (CONTINUED)

A summary of the actuarial assumptions as of the latest actuarial valuation is shown below:

Valuation date	June 30, 2024
Actuarial cost method	Entry Age Cost Method
Amortization method	Level percent of payroll
Remaining amortization period	Plan changes, assumption changes, and experience gains/losses prior to July 1, 2011 are amortized over separate decreasing 30-year amortization periods. On or after July 1, 2011, plan changes are amortized over separate decreasing 15-year periods; assumption changes are amortized over separate decreasing 25-year periods; and experience gains/losses and retiree health assumption changes are amortized over separate decreasing 20-year periods. The amortization methodology described above was first applied beginning with the June 30, 2021 valuation, which determined the ADC for fiscal year ending June 30, 2022.
Assets valuation method	Market value of assets less unrecognized returns in each of the last five years. Unrecognized return is equal to the difference between the actual market return and the expected return on the market value, and is recognized over a five year period, further adjusted, if necessary, to be within 30% of the market value.
Actuarial assumptions:	
Net Investment Return	6.75%, net of OPEB Plan investment expense, including inflation
Average projected salary increases*	Ranges from 3.75% to 9.50% based on time from hire
Inflation rate	2.50%
Health Care Trend	Non-Medicare: Actual premium increases for 2023-2024, then 7.375% graded down to 4.50% over 12 years. Medicare: Actual premium increases for 2023-2024, then 6.375% graded down to 4.50% over 8 years.
HIB increases	0.00%
Mortality	<i>Pre-retirement: Pub-2010 General Employee Headcount-Weighted Above-Median Mortality Tables, projected generationally with the two-dimensional mortality improvement scale MP-2020.</i> <i>Post-Retirement Healthy Members - Pub-2010 General Healthy Retiree Headcount-Weighted Above-Median Mortality Tables with rates increased by 5% for males, projected generationally with the two-dimensional mortality improvement scale MP-2020.</i> <i>Post-Retirement Disabled Members - Pub-2010 Non-Safety Disabled Retiree Headcount-Weighted Mortality Tables with rates increased by 5% for males, projected generationally with the two-dimensional mortality improvement scale MP-2020.</i> <i>Beneficiaries - Pub-2010 Contingent Survivor Headcount-Weighted Above-Median Mortality Tables with rates increased by 5% for males and females, projected generationally with the two-dimensional mortality improvement scale MP-2020.</i>

*Includes inflation of 2.50% plus across the board salary increase of 0.50% plus merit and promotion increases that vary based on time from hire.

EAST BAY MUNICIPAL UTILITY DISTRICT
Notes to Basic Financial Statements
For the Years Ended June 30, 2025 and 2024
(Dollars in Thousands)

NOTE 11: EMPLOYEES' RETIREMENT PLAN (CONTINUED)

The long-term expected rate of return on OPEB plan investments was determined using a building-block method in which best-estimates ranges of expected future real rates of return (expected returns, net of OPEB plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighing the expected future real rates of return by the target asset allocation percentage and by adding expected inflation and subtracting expected investment expenses and a risk margin.

The target allocation and projected arithmetic real rates of return, after deducting inflation, but before investment expenses, used in the derivation of the long-term expected investment rate of return assumption for each major asset class are summarized below:

<u>Asset Class</u>	<u>Target Allocation</u>	<u>Long-Term Expected Arithmetic Real Rate of Return</u>
Domestic Large Cap Equity	32.55%	5.80%
Domestic Small Cap Equity	2.45%	6.59%
Developed International Large Cap Equity	18.00%	6.44%
Emerging Market Equity	7.00%	8.32%
Core Bonds	20.00%	2.27%
High-Yield Bonds	7.50%	4.62%
Bank Loans	5.00%	4.43%
Real Estate	2.50%	4.54%
Private Debt	5.00%	6.63%
Total	100.00%	

The municipal bond rates used to determine the blended discount rate, as discussed below, were 3.93% and 3.65% which are based on the 20-year municipal bond rate for the Bond Buyer 20-Bond GO Index as of June 30, 2024 and June 30, 2023, respectively.

The discount rates used to measure the total OPEB liability were 5.58% and 5.23% as of June 30, 2024 and June 30, 2023, respectively. The projection of cash flows used to determine the discount rate assumed plan member contributions will be made at the current contribution rate and that employer contributions will be made at rates equal to the actuarially determined contribution rates for the \$450/\$550 HIB Subsidy excluding the implicit subsidy that will continue to be paid on a pay-as-you-go basis. For this purpose, only employer contributions that are intended to fund benefits of current plan members and their beneficiaries are included. Projected employer contributions that are intended to fund the service costs of future plan members and their beneficiaries, as well as projected contributions from future plan members, are not included. Only the implicit subsidies for current members were included as employer contributions since the employer is funding the implicit subsidy on a pay-as-you go basis.

Based on those assumptions, the OPEB Plan's fiduciary net position was projected to be sufficient to make projected future benefit payments for current plan members through June 30, 2051. Payments after that date would be funded by employer assets. Therefore, the long-term expected rate of return on OPEB Plan investments (6.75%) was applied to periods of projected benefit payments through June 30, 2051, and the 20-year municipal bond rate (3.93%) was applied to periods after June 30, 2051, to determine the total OPEB liability.

EAST BAY MUNICIPAL UTILITY DISTRICT

(Dollars in Thousands)

NOTE 11: EMPLOYEES' RETIREMENT PLAN (CONTINUED)

Change in Net OPEB liability for fiscal year ended June 30, 2025 were as follows:

	Increase (Decrease)		
	Total OPEB Liability (a)	Plan Fiduciary Net Position (b)	Net OPEB Liability (c) = (a) - (b)
Beginning Balance	\$ 193,546	\$ 61,165	\$ 132,381
Changes Recognized during the Measurement Period:			
Service cost	5,865	-	5,865
Interest on total OPEB liability	10,101	-	10,101
Difference between expected and actual experience	291	-	291
Changes of assumptions	(7,224)	-	(7,224)
Contributions from the employer	-	12,231	(12,231)
Contributions from the employee	-	240	(240)
Net investment income	-	7,676	(7,676)
Administrative expenses	-	(68)	68
Benefit payments, including implicit subsidies*	(12,699)	(12,699)	-
Other**	-	2,875	(2,875)
Net Changes during the Measurement Period	(3,666)	10,255	(13,921)
Ending Balance	<u>\$ 189,880</u>	<u>\$ 71,420</u>	<u>\$ 118,460</u>

* Sum of cash benefit payments (\$9,824) and estimated implicit subsidy benefit payments (\$2,875) for 2024.

* Sum of cash benefit payments (\$9,705) and estimated implicit subsidy benefit payments (\$2,480) for 2023.

** The total employer contributions for estimated implicit subsidy

In accordance with GASB 74 regarding the disclosure of the sensitivity of the net OPEB liability to changes in the discount rate, the following table presents the net OPEB liability of the Plan as of June 30, 2024, calculated using the discount rate of 5.58% as well as what the Plan's net OPEB liability would be if it were calculated using a discount rate that is 1-percentage-point lower (4.58%) or 1-percentage-point higher (6.58%) than the current rate:

	1% Decrease (4.58%)	Current Discount (5.58%)	1% Increase (6.58%)
Net OPEB Liability	\$ 137,676	\$ 118,460	\$ 102,023

Additionally, in accordance with GASB 74 regarding disclosure of the sensitivity of the net OPEB liability to changes in the trend rate (only applied to implicit subsidy and not the \$450/\$550 cash subsidy), the following table presents the net OPEB liability of the Plan as of June 30, 2024, calculated using the current trend rates as well as what the Plan's net OPEB liability would be if it were calculated using a trend rate that is 1-percentage-point lower or 1-percentage-point higher than the current rate:

	1% Decrease	Current Trend	1% Increase
Net OPEB Liability	\$ 114,715	\$ 118,460	\$ 122,776

NOTE 11: EMPLOYEES' RETIREMENT PLAN (CONTINUED)

H. Public Employees' Pension Reform Act (PEPRA)

Assembly Bill 340 (AB 340) created the Public Employees' Pension Reform Act (PEPRA) that implemented new benefit formulas and final compensation periods. PEPRA also implemented new contribution requirements for employees hired on or after January 1, 2013, who meet the definition of a new member under PEPRA. In the System, Members covered under PEPRA are 2013 Plan Members.

The table below provides the details of the 2013 Plan provisions in accordance with PEPRA.

Benefit Formula	2.5% at age 67
Final Compensation Period	Average of last 3 years
Employer Normal Cost Contribution Rate as a Percentage Payroll	10.38% of Reportable Compensation
Member Normal Cost Contribution Rate as a Percentage of Payroll	9.41% of Reportable Compensation

The employer contribution rate listed above was in effect as of June 30, 2025. In accordance with the provisions of PEPRA, the member contribution rate shown above was originally set at 50 percent of the expected total normal cost rate for the benefits that will apply to new members on January 1, 2013. Under PEPRA, the member contributions rate is adjusted when the normal cost deviates by 1% or more from the original PEPRA valuation in 2013. The member contribution rate was last adjusted on July 1, 2021. The total normal cost rate for 2013 Plan Members for fiscal year 2025 is 19.79% of payroll.

NOTE 12: RISK MANAGEMENT

The District has purchased commercial insurance for general, property, public officials' liability and workers' compensation. During the fiscal year ended June 30, 2025, the District paid \$4,023 for current year coverage.

The District's liability, property, and workers' compensation risks are insured by commercial insurance carriers, all of which are subject to the District's self-insurance retentions, which vary by type of coverage.

Selected other coverages are:

Coverage	Policy Limit	Self-insurance retention
Workers' Compensation	Statutory Limit	\$5,000
All risk property (except flood)	\$200,000	500
Flood	25,000	1,500
Liability	90,000	10,000 Water/ 10,000 Wastewater
Crime	10,000	25
Boiler and Machinery	25,000	25
Pardee and Camanche Dams	25,000	25
Main Wastewater Treatment Plant	25,000	25

EAST BAY MUNICIPAL UTILITY DISTRICT
Notes to Basic Financial Statements
For the Years Ended June 30, 2025 and 2024
(Dollars in Thousands)

NOTE 12: RISK MANAGEMENT (CONTINUED)

Settled claims have not exceeded the District's policy limits in any of the past five fiscal years.

Claim expenses and liabilities are recorded when it is probable that a loss has occurred, and the amount of that loss can be reasonably estimated. As of June 30, 2025, the amount of these liabilities was \$61,153. This amount (which has not been discounted) has been actuarially determined and includes an estimate of incurred but not reported losses. Changes in the reported liability are as follows:

	<u>2025</u>	<u>2024</u>
Liability at beginning of year	\$ 55,739	\$ 52,407
Current year claims and changes in estimates	17,116	13,327
Payments of claims	<u>(11,702)</u>	<u>(9,995)</u>
Liability at end of year	<u>\$ 61,153</u>	<u>\$ 55,739</u>
Estimated liability:		
Due within one year	\$ 14,026	\$ 12,897
Due in more than one year	<u>47,127</u>	<u>42,842</u>
	<u>\$ 61,153</u>	<u>\$ 55,739</u>

NOTE 13: KNOWN ENVIRONMENTAL LIABILITIES

GASB Statement No. 49, Accounting and Financial Reporting for Pollution Remediation Obligations, provides guidance on accounting and financial reporting for pollution remediation obligations to address the current or potential detrimental effects of existing pollution by participating in pollution remediation activities. Pollution remediation activities include: pre-cleanup activities, cleanup activities, external government oversight and enforcement, and operation and maintenance of the remedy. The following is a summary of the District's known environmental liabilities as of September 9, 2025, that may meet the requirements of GASB Statement No. 49:

- Under a National Pollutant Discharge Elimination System (NPDES) permit issued by the San Francisco Regional Water Quality Control Board, discharges from the District's wet weather facilities are prohibited. In 2014, the District signed a Consent Decree on this matter that focuses on the excess wet weather flow entering the District's system and allows discharges to continue while work to reduce them is performed. The Consent Decree requires the District and its seven satellite agencies to do a range of work to reduce flows, including working with property owners to address leaks in their private sewer laterals. In 2022, the District achieved interim compliance by exceeding the required benchmarks for reductions in discharge volumes from the wet weather facilities. The Consent Decree is expected to be in place until 2036. The District's cost to meet the requirements in the Consent Decree is approximately \$5 million/year.
- In summer 2016, the Central Valley Regional Water Quality Control Board (CVRWQCB) requested that the District produce a technical report to reexamine the groundwater network at the Camanche North Shore (CANS) and Camanche South Shore (CASS) Wastewater Treatment Plants including the effectiveness of existing monitoring wells and hydraulic connections between the wastewater ponds and the aquifers. The technical report for CANS was provided in March 2017. The CVRWQCB stated in its winter 2018 response that it agreed with the CANS recommendations in the technical report and subsequently required the District to submit a work plan for new well installations as well as conduct additional monitoring. In May 2018, the District submitted its response to the CVRWQCB, including the work plan for the new CANS wells.

EAST BAY MUNICIPAL UTILITY DISTRICT
Notes to Basic Financial Statements
For the Years Ended June 30, 2025 and 2024
(Dollars in Thousands)

NOTE 13: KNOWN ENVIRONMENTAL LIABILITIES (CONTINUED)

The District never received formal approval on the CANS workplan. In March 2022, the District submitted a proposal to the CVRWQCB for an updated CANS groundwater monitoring well network that would enhance the groundwater quality monitoring. The proposal requests that the CVRWQCB's review of the on-file 2018 workplan for new well installations be put on hold until the new network was considered. Once the new proposal is approved, it will result in the installation of five new wells better strategically located, in addition to reducing the network from the current nine wells to a total of six. The District is awaiting a response from CVRWQCB. In August 2018, the District submitted a required technical memorandum for CASS. In September 2018, the District submitted an assessment report for the cap on the closed CASS landfill also required by the CVRWQCB. The CVRWQCB has not responded to either submittal. The CVRWQCB requested additional analysis for the CASS facility which is ongoing. It is possible that the CVRWQCB could mandate the District to construct wastewater treatment pond upgrades. At the preliminary planning stage, it was estimated that the cost would be approximately \$6.6 million to upgrade the existing facilities or, alternatively, approximately \$7.8 million to construct a joint wastewater project with Amador County. In September 2023, the District conducted a condition assessment of the CASS wastewater treatment plant's groundwater monitoring well network. The existing wells are ending their life span, so the District took a proactive approach to determine if network improvements are available for better groundwater quality monitoring. The District reviewed the assessment findings and recommendations and will propose a workplan for this site to the CVRWQCB after we receive feedback from them on the outstanding CANS site proposal.

- The Alameda County Department of Environmental Health (ACDEH) requested that the District conduct site investigations at the Adeline Maintenance Center (AMC) Shops to define the extent of petroleum hydrocarbons in soil and groundwater associated with former underground storage tanks (USTs). The District completed site investigations in accordance with an approved work plan in 2009. The results indicated that elevated concentrations of petroleum hydrocarbons remain in soil and groundwater in localized areas near the former USTs. In June 2016, the ACDEH then requested that the District conduct a Sensitive Receptor Survey for the AMC Shops parcel and that all environmental data collected during previous investigations be posted to the State's GeoTracker website, after which a meeting would be scheduled to agree upon final actions necessary to obtain regulatory closure of the site under the State Water Resources Control Board's (SWRCB) Low Threat Closure Policy. The ACDEH met with the District in July 2018 to discuss next steps towards site closure. In 2021, the ACDEH requested a Site Conceptual Model and Workplan to help address data gaps for the site. Both were delivered to the ACDEH. The work was conducted, and sampling results were delivered to the ACDEH in the summer of 2023. The ACDEH reviewed the results and recommended further delineation of the groundwater plume. The District produced and submitted a new workplan and the County has approved it. The additional delineation work was completed in the fall of 2024. The additional data collected indicates that the groundwater, soil and soil vapor impacts have been adequately delineated, are limited in extent and potentially pose no significant risk to vapor intrusion at the site. ACDEH agreed with this assessment and has requested that the data collected in 2023 and 2024 be incorporated into an updated Conceptual Site Model with a Low-Threat Closure Evaluation, with a compliance date of December 1, 2025.
- In April 2023, the CVRWQCB requested that the District submit a workplan to address potential non-compliant discharges from watershed lands into Camanche Reservoir. The Lancha Plana Historic Area (Lancha Plana) is located in the north-east portion of Camanche Reservoir. The Lancha Plana pond, which has formed behind an earthen embankment, holds low-pH water from presumed historic mine workings upstream from the site. It is unknown who originally constructed the historic embankment or when. The pond is approximately a half-acre in size and has an average depth of approximately 6 to 8 feet which fluctuates based on precipitation. The earthen embankment has a spillway and has been observed to spill periodically during extreme rainfall events but dries up relatively quickly after rainfall ceases. The earthen embankment was flagged as a watch area by the District when it incurred minor damage that was discovered during extreme rainfall events in 2017 and in 2023.

EAST BAY MUNICIPAL UTILITY DISTRICT
Notes to Basic Financial Statements
For the Years Ended June 30, 2025 and 2024
(Dollars in Thousands)

NOTE 13: KNOWN ENVIRONMENTAL LIABILITIES (CONTINUED)

The District designed a phased embankment repair plan and submitted a workplan to the CVRWQCB for approval in August 2023. Phase I repair work was completed in October 2023. The embankment was routinely monitored and remained stable through the relatively average 2023-24 wet season. The District requested to leave the Phase I repairs in place, cancel Phase II work outlined in the workplan, conduct minor maintenance, and focus on monitoring the site, including water quality data from the pond during the next wet season. The CVRWQCB agreed to this proposal and requested a Completion Report by April 1, 2025. The District performed the minor maintenance issues and submitted the Completion Report to the CVRWQCB on March 27, 2025. The District will continue monitoring and sampling at the site and submitting monitoring reports to the CVRWQCB during the wet season on a monthly basis.

- In November 2022, the District removed a 12,000-gallon diesel Underground Storage Tank (UST) from its Fleet East Facility located in the City of Walnut Creek in accordance with regulatory requirements. The tank removal was part of an upgrade project at the vehicle maintenance facility. Required soils sampling and characterization were performed in association with the UST removal and results indicated that in a few locations the soil exceeded Environmental Screening Levels for Total Extractable Petroleum Hydrocarbons (TPH-d). In August 2023, the District prepared and submitted a UST Removal Report to the San Francisco Bay Regional Water Quality Control Board (SFRWQCB). The Fleet East Facility is currently under regulatory oversight of the SFRWQCB under Leaking Underground Storage Tank Cleanup Site (LUST) Case No. 07-0917. In response to their request, the SFRWQCB was provided with a detailed history of tank removals at the site. After review, they may require additional monitoring and/or remediation at the facility to obtain site closure. Ongoing sampling, monitoring, and potential remediation work may cost up to \$100,000 depending on the agreed upon scope.
- The District is currently managing two upcountry project sites with poly chlorinated biphenyl (PCB) contamination that require prescriptive remediation measures under the Federal Toxic Substances Control Act (TSCA) which is administered by the US Environmental Protection Agency. The two sites include Pardee Center Chemical Plant (Chemical Plant) and Mokelumne (Moke) Aqueduct Station No. 379 (Station No. 379). The District has retained a subject matter expert to facilitate the two remediation projects as the TSCA regulations are complex. PCBs were identified at the Chemical Plant during the facility material characterization study in preparation for the new lime building (Project), construction to commence in 2026. The PCB source was determined to be the window caulking in the old lime slake building that is flagged for demolition. Analytical data show that the PCBs have migrated from the caulking into the adjoining concrete, with impacts to the soil and local storm drainage system. Delineation of the site contamination is 95% complete. The remaining characterization samples will be collected prior to the start-up of the Project. Total costs incurred to date are \$175,000, with anticipated additional costs to complete the clean-up at up to \$250,000. Recoating of the pipeline at Station No. 379 is included in the Moke Aqueduct Recoating Project. Characterization of the existing coating detected PCBs, with follow-up soil analysis showing they had leached into the underlying soil. Remediation for this site requires an approval process through the United States Environmental Protection Agency, as it involves a water transport pipeline located within a water body, the Camanche Reservoir. The pipeline recoating is scheduled for October 2025, which will then be followed by the soil remediation. Total costs incurred to date are \$180,000, with anticipated additional costs to complete the clean-up at up to \$400,000.
- The District operates many facilities throughout Northern California that have NPDES permits, waste discharge requirements, and air permits. The total estimated liability for all known violations, excluding the items detailed above, is less than \$350,000.

EAST BAY MUNICIPAL UTILITY DISTRICT
Notes to Basic Financial Statements
For the Years Ended June 30, 2025 and 2024
(Dollars in Thousands)

NOTE 14: CONTINGENT LIABILITIES

In the normal course of operations, the District is a party to various claims, legal actions and complaints, including challenges over certain rates and charges. The ultimate outcome of these matters is not presently determinable. In the opinion of the District, these actions when finally adjudicated will not have a material adverse effect on the financial position of the District.

NOTE 15: COMMITMENTS AND CONTINGENCIES

Central Valley Project

In December 1970, the District entered into a contract with the US Bureau of Reclamation for access to up to 150,000 acre feet per year of Central Valley Project (CVP) water from a diversion point on the American River. The successor contract, the Long Term Renewal Contract, was executed in in April 2006 with a 40 year term. The Long Term Renewal Contract provides for delivery of up to 133,000 acre feet per year of CVP water in dry years to supplement the District's surface water supplies. Deliveries to the District are limited to a 165,000 acre foot total over any three successive dry years. In years in which the District takes delivery of CVP water, the District's allocated CVP capital cost and the District's operations and maintenance deficit balance will be paid down commensurately with the quantity of water delivered. For example, if the District had to take delivery of 80,000 acre feet in fiscal year 2015, the District's CVP capital and deficit balances would each be reduced by approximately 20%. The balances must be paid off by 2030.

NOTE 16: SUBSEQUENT EVENTS

The District is implementing a new tier of the Health Insurance Benefit (HIB), our retiree health insurance premium reimbursement program. This change follows the Board's ratification of the Memorandum of Understanding (MOU) on July 8, 2025. The new HIB plan design with the annual escalator will begin on January 1, 2026, for eligible retirees, subject to their vesting schedule percentage.

The District evaluated subsequent events for recognition and disclosure through November 17, 2025 the date on which these financial statements were available to be issued. Management concluded that no material subsequent events have occurred since June 30, 2025, that required recognition or disclosure in these financial statements other than the item mentioned above.

NOTE 17: PRIOR PERIOD ADJUSTMENTS

Correction and restatements of previously issued financial statements

During fiscal year 2025, the District wrote off costs related to trench soil removal, storage, management, and disposal in Water System. These costs were previously recorded in construction in progress. According to GASB Statement No. 100 paragraph 8, the District is required to restate previously issued fiscal year 2024 and 2023 financial statements for accurate financial reporting purposes.

As of June 30, 2024, the Water System's construction in progress was overstated by \$12,186. As of June 30, 2023, the Water System's construction in progress was overstated by \$9,264. In prior years this activity was capitalized as CIP for all projects, however after re-evaluation it was determined to be more appropriately reflected as maintenance for any projects already placed in service. The effect of the change in accounting principle is shown in the table below.

	June 30, 2024 as previously reported	Changes in accounting principle	June 30, 2024 as restated
<i>Proprietary fund net position</i>			
Water System	\$ 2,633,160	\$ (12,186)	\$ 2,620,974

	June 30, 2023 as previously reported	Changes in accounting principle	June 30, 2023 as restated
<i>Proprietary fund net position</i>			
Water System	\$ 2,417,769	\$ (9,264)	\$ 2,408,505

(3) Pension Plan

Schedule of Employer's Contributions:

Year ended June 30	Actuarially determined contributions	Contributions in relation to the actuarially determined contributions	Contributions deficiency (excess)	Covered payroll*	Contributions as a percentage of covered payroll
2016	\$ 65,218	\$ 65,218	-	\$ 174,586	37.36%
2017	67,096	67,096	-	182,032	36.86%
2018	71,221	71,221	-	193,717	36.77%
2019	74,033	74,033	-	203,541	36.37%
2020	77,645	77,645	-	215,110	36.10%
2021	79,252	79,252	-	221,809	35.73%
2022	91,393	91,393	-	233,940	39.07%
2023	95,103	95,103	-	246,231	38.62%
2024	105,111	105,111	-	264,426	39.75%
2025	110,869	110,869	-	276,094	40.16%

*Derived by dividing the contributions in relation to the actuarial determined contributions by the contributions as a percentage of covered employee payroll. These amounts may be different from the actual payroll of the District. In accordance with GASB 82, the covered payroll is defined as the payroll on which contributions to the pension plan are based. These amounts may be different from the actual payroll of the District. The actuarially determined contributions for the fiscal year ended June 30, 2025 are based on the reporting date. Years preceding fiscal year ended June 30, 2025 are based on the measurement date.

Required Supplementary Information
For the Year Ended June 30, 2025
(Dollars in thousands)

(8) Notes to Required Supplementary Information

The pension-related information presented in the required supplementary schedules was determined as part of the Pension actuarial valuation at the date indicated. Additional information as of the latest Pension actuarial valuation is as follows:

Valuation date	June 30, 2022
Actuarial cost method	Entry Age Normal Cost Method
Amortization method	Level percent of payroll
Remaining amortization period	Prior to July 1, 2011, the UAAL from plan changes, assumption changes, and experience gains/losses were amortized over separate decreasing 30-year amortization periods. On or after July 1, 2011, any new UAAL resulting from plan changes are amortized over separate decreasing 15-year periods; assumption and method changes are amortized over separate decreasing 25-year periods (prior to July 1, 2021); and experience gains/losses are amortized over separate decreasing 20-year periods. On or after July 1, 2021, assumption and method changes are amortized over separate decreasing 20-year periods.
Assets valuation method	The actuarial value of assets is equal to the market value (or fair value) of assets less unrecognized returns from each of the last five years. The unrecognized return each year is equal to the difference between the actual and expected returns on the market value of assets, recognized over a five-year period. The actuarial value of assets is further adjusted, if necessary, to be within 30% of the market value of assets.
Actuarial assumptions:	
Investment Rate of Return	6.75%, net of Pension Plan investment expense, including inflation
Average projected salary increases*	Ranges from 3.75% to 9.25% based on time from hire
Inflation rate	2.50%
Cost-of-living adjustments	2.75% per annum
Mortality	<i>Pre-retirement:</i> Pub-2010 General Employee Amount-Weighted Above-Median Mortality Tables, projected generationally with the two-dimensional mortality improvement scale MP-2020. <i>Post-retirement:</i> <i>Healthy Members</i> - Pub-2010 General Healthy Retiree Amount-Weighted Above-Median Mortality Tables with rates increased by 5% for males, projected generationally with the two-dimensional mortality improvement scale MP-2020. <i>Disabled Members</i> - Pub-2010 Non-Safety Disabled Retiree Amount-Weighted Mortality Tables with rates increased by 5% for males, projected generationally with the two-dimensional mortality improvement scale MP-2020. <i>Beneficiaries</i> - Pub-2010 Contingent Survivor/Retiree Amount-Weighted Above-Median Mortality Tables with rates increased by 5% for males and females, projected generationally with the two-dimensional mortality improvement scale MP-2020.

*Includes inflation of 2.50% plus "across-the-board" salary increase of 0.50% plus merit and promotional increases that vary based on time from hire.

(8) Notes to Required Supplementary Information (Continued)

The OPEB-related information presented in the required supplementary schedules was determined as part of the OPEB actuarial valuation at the date indicated. Additional information as of the latest OPEB actuarial valuation is as follows:

Valuation date	June 30, 2022
Actuarial cost method	Entry Age Normal Cost Method
Amortization method	Level percent of payroll
Remaining amortization period	Plan changes, assumption changes, and experience gains/losses prior to July 1, 2011 are amortized over separate decreasing 30-year amortization periods. On or after July 1, 2011, plan changes are amortized over separate decreasing 15-year periods; assumption changes are amortized over separate decreasing 25-year periods; and experience gains/losses and retiree health assumption changes are amortized over separate decreasing 20-year periods. The amortization methodology described above was first applied beginning with the June 30, 2021 valuation, which determined the ADC for fiscal year ending June 30, 2022.
Assets valuation method	Market value of assets less unrecognized returns in each of the last five years. Unrecognized return is equal to the difference between the actual market return and the expected return on the market value, and is recognized over a five year period, further adjusted, if necessary, to be within 30% of the market value.
Actuarial assumptions:	
Investment Rate of Return	6.75%, net of OPEB Plan investment expense, including inflation
Average projected salary increases*	Ranges from 3.75% to 9.25% based on years of service
Inflation rate	2.50%
Health care trend	Non-Medicare: Actual premium increases for 2022-2023, then 7.125% graded down to 4.50% over 11 years. Medicare: Actual premium increases for 2022-2023, then 6.125% graded down to 4.50% over 7 years.
HIB increases	0.00%
Mortality	<i>Pre-retirement</i> : Pub-2010 General Employee Headcount-Weighted Above-Median Mortality Tables, projected generationally with the two-dimensional mortality improvement scale MP-2020. <i>Post-Retirement Healthy Members</i> - Pub-2010 General Healthy Retiree Headcount-Weighted Above-Median Mortality Tables with rates increased by 5% for males, projected generationally with the two-dimensional mortality improvement scale MP-2020. <i>Post-Retirement Disabled Members</i> - Pub-2010 Non-Safety Disabled Retiree Headcount-Weighted Mortality Tables with rates increased by 5% for males, projected generationally with the two-dimensional mortality improvement scale MP-2020. <i>Beneficiaries</i> - Pub-2010 Contingent Survivor Headcount-Weighted Above-Median Mortality Tables with rates increased by 5% for males and females, projected generationally with the two-dimensional mortality improvement scale MP-2020.

*Includes inflation of 2.50% plus across the board salary increase of 0.50% plus merit and promotion increases that vary based on time from hire.

INDEPENDENT AUDITORS' REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH GOVERNMENT AUDITING STANDARDS

To the Board of Directors
East Bay Municipal Utility District
Oakland, California

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of each major fund, and the aggregate remaining fund information of the East Bay Municipal Utility District (hereafter, the District), as of and for the year ended June 30, 2025, and the related notes to the financial statements, which collectively comprise the District's basic financial statements, and have issued our report thereon dated November 17, 2025.

Report on Internal Control over Financial Reporting

In planning and performing our audit of the financial statements, we considered the District's internal control over financial reporting (internal control) as a basis for designing audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the District's internal control. Accordingly, we do not express an opinion on the effectiveness of the District's internal control.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements, on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected, on a timely basis. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or, significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses or significant deficiencies may exist that were not identified.

Report on Compliance and Other Matters

As part of obtaining reasonable assurance about whether the District's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the financial statements. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

To the Board of Directors
East Bay Municipal Utility District
Oakland, California

Purpose of This Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the District's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the District's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

APPENDIX C

SUMMARY OF CERTAIN PROVISIONS OF THE INDENTURE

The following is a summary of certain provisions of the Indenture (as amended and restated pursuant to the Twenty-First Supplemental Indenture, prior to the amendments and modifications set forth in the Twenty-Second Supplemental Indenture that the District intends to make to the Indenture). This summary is not to be considered a full statement of the terms of the Indenture and accordingly is qualified by reference thereto and is subject to the full text thereof. Capitalized terms not defined in this summary or elsewhere in the Official Statement have the respective meanings set forth in the Indenture. See also APPENDIX H – “PROPOSED CHANGES TO THE INDENTURE.”

Certain Definitions

“Accreted Value” means, with respect to any Capital Appreciation Indebtedness, the principal amount thereof plus the interest accrued thereon, compounded at the interest rate thereon on each date as specified in the Indenture.

“Act” means the Municipal Utility District Act, constituting Division 6 of the Public Utilities Code of the State of California, and all laws of the State of California amendatory thereof or supplemental thereto, including the Revenue Bond Law of 1941, as made applicable by Article 6a of Chapter 6 of said Division 6, and Article 11 of Chapter 3 of Part 1 of Division 2 of Title 5 of the Government Code of the State of California.

“Adjusted Net Wastewater Revenues” for any fiscal period means the sum of (a) the Wastewater Revenues for such fiscal period plus (b) the amounts, if any, withdrawn by the District from the Rate Stabilization Fund for treatment as Wastewater Revenues for such fiscal period, less the sum of (c) all Wastewater Operation and Maintenance Costs for such fiscal period, and (d) the amounts, if any, withdrawn by the District from Wastewater Revenues for such fiscal period for deposit in such Rate Stabilization Fund.

“Annual Debt Service” means, for any Fiscal Year, the aggregate amount of principal and interest on all Bonds and Parity Debt becoming due and payable during such Fiscal Year calculated using the principles and assumptions set forth under the definition of Debt Service.

“Assumed Debt Service” means, for any Fiscal Year, the aggregate amount of principal and interest which would be payable on all Bonds and Parity Debt if each Excluded Principal Payment were amortized for a period specified by the District (but no longer than thirty (30) years from the date of the issuance of the Bonds or Parity Debt to which such Excluded Principal Payment relates) on a substantially level debt service basis or other amortization basis provided by the District, calculated based on a fixed interest rate equal to the rate at which the District could borrow for such period, as certified by a certificate of a financial advisor or investment banker delivered to the Trustee, who may rely conclusively on such certificate, within thirty (30) days of the date of calculation.

“Bond Obligation” means, as of any given date of calculation, (1) with respect to any Outstanding Bond which is Current Interest Indebtedness, the principal amount thereof, and (2) with respect to any Outstanding Bond which is Capital Appreciation Indebtedness, the Accreted Value thereof.

“Bonds” means the bonds authorized by, and at any time Outstanding pursuant to, the Indenture.

“Business Day” means any day other than (1) a Saturday, Sunday, or a day on which banking institutions in the State of California or the State of New York are authorized or obligated by law or executive order to be closed, and (2) for purposes of payments and other actions related to Bonds secured by a letter of credit, a day upon which commercial banks in the city in which is located the office of the issuing bank at which demands for payment under the letter of credit are to be presented are authorized or obligated by law or executive order to be closed.

“Capital Appreciation Indebtedness” means Bonds and Parity Debt on which interest is compounded and paid less frequently than annually.

“Code” means the Internal Revenue Code of 1986, and the regulations applicable thereto or issued thereunder, as amended from time to time.

“Current Interest Indebtedness” means the Bonds and Parity Debt on which interest is paid at least annually.

“Debt Service” means, the amount of principal and interest becoming due and payable on all Bonds and Parity Debt provided, however, for the purpose of computing Debt Service:

(a) Excluded Principal Payments shall be excluded from such calculation and Assumed Debt Service shall be included in such calculation;

(b) if the Bonds or Parity Debt are Variable Rate Indebtedness, the interest rate thereon for periods when the actual interest rate cannot yet be determined shall be assumed to be equal to the average of the SIFMA Municipal Swap Index for the five (5) years preceding such date of calculation (provided, however, that if such index is no longer published, the interest rate on such Bonds or Parity Debt shall be calculated based upon such similar index as the District shall designate in writing to the Trustee) (the “Assumed SIFMA-based Rate”);

(c) principal and interest payments on Bonds and Parity Debt shall be excluded to the extent such payments are to be paid from amounts on deposit with the Trustee or another fiduciary in escrow or trust specifically therefor and to the extent that such interest payments are to be paid from the proceeds of Bonds or Parity Debt held by the Trustee or another fiduciary as capitalized interest;

(d) in determining the principal amount, payment shall (unless a different subsection of this definition applies for purposes of determining principal maturities or amortization) be assumed to be made in accordance with any amortization schedule established for such debt, including any Mandatory Sinking Account Payments or any scheduled redemption or payment of Bonds or Parity Debt on the basis of Accreted Value, and for such purpose, the redemption payment or payment of Accreted Value shall be deemed a principal payment and interest that is compounded and paid as Accreted Value shall be deemed due on the scheduled redemption or payment date of such Capital Appreciation Indebtedness;

(e) if any interest rate swap agreement is in effect with respect to, and the regularly scheduled payments thereunder are payable on a parity with, the Bonds or Parity Debt to which it relates, interest deemed to be payable on any such Bonds or Parity Debt with respect to which an interest rate swap agreement is in effect shall be based on the net economic effect expected by the District to be produced by the terms of such Bonds or Parity Debt and such interest rate swap agreement, including but not limited to the effects that (i) such Bonds or Parity Debt would, but for such interest rate swap agreement, be treated as Variable Rate Indebtedness instead shall be

treated as Bonds or Parity Debt bearing interest at a fixed interest rate, and (ii) such Bonds or Parity Debt would, but for such interest rate swap agreement, be treated as Bonds or Parity Debt bearing interest at a fixed interest rate instead shall be treated as Variable Rate Indebtedness; and accordingly, the amount of interest deemed to be payable on any Bonds or Parity Debt with respect to which an interest rate swap agreement is in force shall be an amount equal to the amount of interest that would be payable at the rate or rates stated in such Bonds or Parity Debt plus the amounts payable by the District under such interest rate swap agreement, minus the amounts receivable by the District under such interest rate swap agreement, and for the purpose of calculating as nearly as practicable such amounts, the following assumptions shall be made:

(1) if an interest rate swap agreement has been entered into by the District with respect to Bonds or Parity Debt providing for the payment of a net variable interest rate under such interest rate swap agreement with respect to such Bonds or Parity Debt by the District, the interest rate on such Bonds or Parity Debt for future periods when the actual interest rate cannot yet be determined shall be assumed (but only during the period the interest rate swap agreement is in effect) to be equal to the sum of (A) the fixed rate or rates stated in such Bonds or Parity Debt minus (B) the fixed rate paid by the counterparty of such interest rate swap agreement to the District, plus (C) the lesser of (x) the interest rate cap, if any, provided by a counterparty with respect to such interest rate swap agreement (but only during the period that such interest rate cap is in effect) and (y) the applicable variable interest rate calculated in accordance with paragraph (b) above; and

(2) if an interest rate swap agreement has been entered into by the District with respect to Bonds or Parity Debt providing for the payment of a fixed rate of interest to maturity or for a specific term under such interest rate swap agreement with respect to such Bonds or Parity Debt by the District, the interest on such Bonds or Parity Debt shall be included in the calculation of payments (but only during the period the interest rate swap agreement is in effect) by including for each period of calculation an amount equal to the amount of interest payable at the fixed interest rate pursuant to such interest rate swap agreement.

Notwithstanding any other paragraph of this definition of Debt Service, except as set forth in this paragraph (e), no amounts payable under any interest rate swap agreement (including termination payments) shall be included in the calculation of Debt Service;

(f) if any Bonds or Parity Debt are Variable Rate Indebtedness subject to tender for purchase and funds for the purchase price may be provided by a letter of credit, line of credit, revolving credit agreement, standby bond purchase agreement or other liquidity facility which, if drawn upon, could create a repayment obligation which has a lien on Adjusted Net Wastewater Revenues on parity with the lien of the Bonds or Parity Debt, then for purposes of determining the amounts of principal due in any Fiscal Year on such Bonds or Parity Debt, (i) the options or obligations of the owners of such Bonds or Parity Debt to tender the same for purchase or payment prior to the stated maturity or maturities shall be ignored and not treated as a principal maturity; and (ii) any repayment obligations of the District to the provider of such letter of credit, line of credit, revolving credit agreement, standby bond purchase agreement or other liquidity facility, other than its obligations on such Bonds or Parity Debt, shall be treated as Excluded Principal Payments; and

(g) if interest on any Bonds or Parity Debt is reasonably anticipated to be reimbursed to the District by the United States of America pursuant to Section 54AA of the Code, or any

future similar program, then interest payments with respect to such Bonds or Parity Debt shall be reduced by the amount of such interest reasonably anticipated to be paid or reimbursed by the United States of America.

“Excluded Principal Payments” means each payment of principal (or the principal component of lease or installment purchase payments) of Bonds or Parity Debt which the District determines on a date not later than the date of issuance thereof that the District intends to pay with moneys which are not Wastewater Revenues or Adjusted Net Wastewater Revenues but from the proceeds of future debt obligations of the District and the Trustee may rely conclusively on such determination of the District.

“Fiscal Year” means the period beginning on July 1 of each year and ending on the next succeeding June 30, or any other twelve-month period selected and designated as the official fiscal year period of the District, which designation shall be provided to the Trustee in a certificate of the District.

“Indenture” means the Wastewater System Revenue Bond Indenture, dated as of April 1, 1990, by and between the Trustee and the District, as originally executed or as it may from time to time be supplemented or amended by any Supplemental Indenture delivered pursuant to the provisions thereof.

“Information Services” means the Electronic Municipal Market Access (EMMA) system operated by the Municipal Securities Rulemaking Board; or, in accordance with then-current guidelines of the Securities and Exchange Commission, such other addresses and/or such other services providing information with respect to called bonds, or no such services, as the District may designate in a Request of the District delivered to the Trustee.

“Investment Securities” means the following:

(i) any bonds or other obligations which as to principal and interest constitute direct obligations of, or are unconditionally guaranteed by, the United States of America, including obligations of any of the Federal agencies and Federally sponsored entities set forth in clause (iii) below to the extent unconditionally guaranteed by the United States of America;

(ii) any certificates, receipts, securities or other obligations evidencing ownership of, or the right to receive, a specified portion of one or more interest payments or principal payments, or any combination thereof, to be made on any bond, note, or other obligation described above in clause (i);

(iii) obligations of the Federal National Mortgage Association, the Government National Mortgage Association, Federal Home Loan Banks and Federal Home Loan Mortgage Corporation;

(iv) obligations of any state, territory or commonwealth of the United States of America or any political subdivision thereof or any agency or department of the foregoing; provided that at the time of their purchase such obligations are rated not lower than their respective ratings on the Bonds by Moody’s (if Moody’s is then rating the Bonds) and Standard & Poor’s (if Standard & Poor’s is then rating the Bonds);

(v) any bonds or other obligations of any state of the United States of America or any political subdivision thereof (a) which are not callable prior to maturity or as to which irrevocable instructions have been given to the trustee of such bonds or their obligations by the obligor to give due notice of redemption and to call such bonds for redemption on the date or dates specified in such instructions, (b) which are secured as to principal and interest and

redemption premium, if any, by a fund consisting only of cash or bonds or other obligations of the character described above in clause (i), (ii) or (iii) which fund may be applied only to the payment of such principal of and interest and redemption premium, if any, on such bonds or other obligations on the interest payment dates and the maturity date or dates thereof or the specified redemption date or dates pursuant to such irrevocable instructions, as appropriate, (c) as to which the principal of and interest on the bonds and obligations of the character described above in clause (i), (ii) or (iii) which have been deposited in such fund along with any cash on deposit in such fund are sufficient to pay the principal of and interest and redemption premium, if any, on the bonds or other obligations described in this clause (v) on the interest payment dates and the maturity date or dates thereof or on the redemption date or dates specified in the irrevocable instructions referred to in subclause (a) of this clause (v), as appropriate, and (d) which have been rated not lower than their respective ratings on the Bonds by Moody's (if Moody's is then rating the Bonds) and Standard & Poor's (if Standard & Poor's is then rating the Bonds);

(vi) bonds, notes, debentures or other evidences of indebtedness issued or guaranteed by any corporation which are, at the time of purchase, rated by Moody's (if Moody's is then rating the Bonds) and Standard & Poor's (if Standard & Poor's is then rating the Bonds) in their respective highest short-term Rating Categories, or, if the term of such indebtedness is longer than three (3) years, rated not lower than their respective ratings on the Bonds by Moody's (if Moody's is then rating the Bonds) and Standard & Poor's (if Standard & Poor's is then rating the Bonds);

(vii) demand or time deposits or certificates of deposit, whether negotiable or nonnegotiable, issued by any bank or trust company organized under the laws of any state of the United States of America or any national banking association (including the Trustee), provided that such certificates of deposit shall be purchased directly from such a bank, trust company or national banking association and shall be either (1) continuously and fully insured by the Federal Deposit Insurance Corporation, or (2) continuously and fully secured by such securities and obligations as are described above in clauses (i) through (iv), inclusive, which shall have a market value (exclusive of accrued interest) at all times at least equal to the principal amount of such certificates of deposit and shall be lodged with the Trustee, as custodian, by the bank, trust company or national banking association issuing such certificates of deposit, and the bank, trust company or national banking association issuing each such certificate of deposit required to be so secured shall furnish the Trustee with an undertaking satisfactory to it that the aggregate market value of all such obligations securing each such certificate of deposit will at all times be an amount equal to the principal amount of each such certificate of deposit and the Trustee shall be entitled to rely on each such undertaking;

(viii) taxable commercial paper or tax-exempt commercial paper rated in their respective highest Rating Categories by Moody's (if Moody's is then rating the Bonds) and Standard & Poor's (if Standard & Poor's is then rating the Bonds);

(ix) variable rate obligations required to be redeemed or purchased by the obligor or its agent or designee upon demand of the holder thereof secured as to such redemption or purchase requirement by a liquidity agreement with a corporation and as to the payment of interest and principal either upon maturity or redemption (other than upon demand by the holder thereof) thereof by an unconditional credit facility of a corporation, provided that the variable rate obligations themselves are rated in their respective highest Rating Categories for its short-term rating, if any, and not lower than their respective ratings on the Bonds for its long-term rating, if any, by Moody's (if Moody's is then rating the Bonds) and Standard & Poor's (if Standard & Poor's is then rating the Bonds), and that the corporations providing the liquidity agreement and

credit facility have, at the date of acquisition of the variable rate obligation by the Trustee, an outstanding issue of unsecured, uninsured and unguaranteed debt obligations rated not lower than their respective ratings on the Bonds by Moody's (if Moody's is then rating the Bonds) and Standard & Poor's (if Standard & Poor's is then rating the Bonds);

(x) any repurchase agreement with any bank or trust company organized under the laws of any state of the United States or any national banking association (including the Trustee) having a minimum permanent capital of one hundred million dollars (\$100,000,000) and with short-term debt rated by Moody's (if Moody's is then rating the Bonds) and Standard & Poor's (if Standard & Poor's is then rating the Bonds) in their respective four highest short-term rating categories or government bond dealer reporting to, trading with, and recognized as a primary dealer by the Federal Reserve Bank of New York, which agreement is secured by any one or more of the securities and obligations described in clauses (i), (ii) or (iii) above, which shall have a market value (exclusive of accrued interest and valued at least monthly) at least equal to the principal amount of such investment and shall be lodged with the Trustee or other fiduciary, as custodian for the Trustee, by the bank, trust company, national banking association or bond dealer executing such repurchase agreement, and the entity executing each such repurchase agreement required to be so secured shall furnish the Trustee with an undertaking satisfactory to it that the aggregate market value of all such obligations securing each such repurchase agreement (as valued at least monthly) will be an amount equal to the principal amount of each such repurchase agreement and the Trustee shall be entitled to rely on each such undertaking;

(xi) any cash sweep or similar account arrangement of or available to the Trustee, the investments of which are limited to investments described in clauses (i), (ii), (iii), (iv) and (x) of this definition of Investment Securities and any money market fund, the entire investments of which are limited to investments described in clauses (i), (ii), (iii), (iv) and (x) of this definition of Investment Securities and which money market fund is rated in their respective highest Rating Categories by Moody's (if Moody's is then rating the Bonds) and Standard & Poor's (if Standard & Poor's is then rating the Bonds); provided that as used in this clause (xi) and clause (xii) investments will be deemed to satisfy the requirements of clause (x) if they meet the requirements set forth in clause (x) ending with the words "clauses (i), (ii) or (iii) above" and without regard to the remainder of such clause (x);

(xii) a guaranteed investment contract with a financial institution or insurance company which has at the date of execution thereof an outstanding issue of unsecured, uninsured and unguaranteed debt obligations or a claims paying ability rated not lower than their respective ratings on the Bonds by Moody's (if Moody's is then rating the Bonds) and Standard & Poor's (if Standard & Poor's is then rating the Bonds);

(xiii) shares of beneficial interest in diversified management companies investing exclusively in securities and obligations described in clauses (i) through (xii) of this definition of Investment Securities and which companies are rated in their respective highest Rating Categories by Moody's (if Moody's is then rating the Bonds) and Standard & Poor's (if Standard & Poor's is then rating the Bonds) or have an investment advisor registered with the Securities and Exchange Commission with not less than five years' experience investing in such securities and obligations and with assets under management in excess of \$500,000,000; and

(xiv) any investment approved by the Board for which confirmation is received from each rating agency then rating any of the Bonds that such investment will not adversely affect such agency's rating on such Bonds.

“Mandatory Sinking Account Payment” means the amount required to be deposited by the District in a sinking account for the payment of term Bonds.

“Maximum Annual Debt Service” means, the greatest amount of principal and interest becoming due and payable on all Bonds and Parity Debt in the Fiscal Year in which the calculation is made or any subsequent Fiscal Year calculated using the principles and assumptions set forth under the definition of Debt Service.

“Moody’s” means Moody’s Investors Service, a corporation duly organized and existing under and by virtue of the laws of the State of Delaware, and its successors and assigns, except that if such corporation shall be dissolved or liquidated or shall no longer perform the functions of a securities rating agency, then the term “Moody’s” shall be deemed to refer to any other nationally recognized securities rating agency selected by the District and not objected to by the Trustee.

“Opinion of Bond Counsel” means a written opinion of a law firm of national standing in the field of public finance selected by the District and not objected to by the Trustee.

“Outstanding,” when used at any particular time with reference to Bonds, means (subject to the provisions relating to disqualified bonds) all Bonds theretofore, or thereupon being, authenticated and delivered by the Trustee under the Indenture except (1) Bonds theretofore cancelled by the Trustee or surrendered to the Trustee for cancellation; (2) Bonds with respect to which all liability of the District shall have been discharged under the Indenture; and (3) Bonds for the transfer or exchange of or in lieu of or in substitution for which other Bonds shall have been authenticated and delivered by the Trustee pursuant to the Indenture.

“Owner” or **“Bondholder”** or **“Bondowner,”** whenever used with respect to a Bond, means the person in whose name such Bond is registered.

“Parity Debt” means any indebtedness, installment sale obligation, lease obligation or other obligation of the District for borrowed money or interest rate swap agreement having an equal lien and charge upon the Adjusted Net Wastewater Revenues and therefore payable on a parity with the Bonds (whether or not any Bonds are Outstanding).

“Person” means a corporation, firm, association, partnership, trust, or other legal entity or group of entities, including a governmental entity or any agency or political subdivision thereof.

“Rate Stabilization Fund” means the Rate Stabilization Fund initially created under Resolution No. 30051 of the District, adopted on January 26, 1982, as amended and supplemented from time to time; it being understood that all obligations of the District under such Resolution No. 30051 have ceased and been discharged, provided that, the Rate Stabilization Fund created thereunder has been continued for purposes of the Indenture.

“Rating Category” means (i) with respect to any long-term rating category, all ratings designated by a particular letter or combination of letters, without regard to any numerical modifier, plus or minus sign or other modifier and (ii) with respect to any short-term or commercial paper rating category, all ratings designated by a particular letter or combination of letters and taking into account any numerical modifier, but not any plus or minus sign or other modifier.

“Redemption Price” means with respect to any Bond (or portion thereof) the principal amount of such Bond (or portion thereof) plus the applicable premium, if any, payable upon redemption thereof pursuant to the provisions of such Bond and the Indenture.

“Revenue Fund” means the fund held in trust by the District to which the Adjusted Net Wastewater Revenues are required to be deposited.

“Series” whenever used with respect to Bonds, means all of the Bonds designated as being of the same series, authenticated and delivered in a simultaneous transaction, regardless of variations in maturity, interest rate, redemption and other provisions, and any Bonds thereafter authenticated and delivered upon transfer or exchange or in lieu of or in substitution for (but not to refund) such Bonds as provided in the Indenture.

“SIFMA Municipal Swap Index” means, on any date, a rate determined on the basis of the seven-day high grade market index of tax-exempt variable rate demand obligations, as produced by Municipal Market Data and published or made available by the Securities Industry & Financial Markets Association (formerly the Bond Market Association) (“SIFMA”) or by any Person acting in cooperation with or under the sponsorship of SIFMA and effective from such date.

“Standard & Poor’s” means Standard & Poor’s Corporation, a corporation duly organized and existing under and by virtue of the laws of the State of New York, and its successors and assigns, except that if such corporation shall be dissolved or liquidated or shall no longer perform the functions of a securities rating agency, then the term “Standard & Poor’s” shall be deemed to refer to any other nationally recognized securities rating agency selected by the District and not objected to by the Trustee.

“Variable Rate Indebtedness” means any indebtedness the interest rate on which is not fixed at the time of incurrence of such indebtedness, and has not at some subsequent date been fixed, at a single numerical rate for the entire term of the indebtedness.

“Wastewater Operation and Maintenance Costs” means the reasonable and necessary costs of maintaining and operating the Wastewater System, calculated on sound accounting principles, including (among other things) the reasonable expenses of management, repair and other expenses necessary to maintain and preserve the Wastewater System in good repair and working order, and reasonable amounts for administration, overhead, insurance, taxes and other similar costs, but excluding in all cases depreciation and obsolescence charges or reserves therefor and amortization of intangibles or other bookkeeping entries of a similar nature, and excluding all costs paid from the proceeds of taxes received by the District.

“Wastewater Revenues” means, all charges received for, and all other income and receipts derived by the District from, the operation of the Wastewater System, or arising from the Wastewater System, together with income from the investment of any moneys in any fund or account established under the Indenture; provided, however, there shall be excluded therefrom any amounts reimbursed to the District by the United States of America pursuant to Section 54AA of the Code, or any future similar program.

“Wastewater System” means the entire sewage disposal system of Special District No. 1 of the District and all of the facilities thereof, including all facilities for the disposal of sewage, sewage treatment works, wastewater disposal facilities, sludge treatment facilities, intercepting and outfall sewers, power generation facilities, and other facilities necessary or convenient for the collection, treatment or disposition of sewage and wastewater for Special District No. 1 of the District, together with all additions, betterments, extensions and improvements to said system or any part thereof.

Pledge of Revenues

The Bonds are revenue obligations of the District and are payable as to both principal and interest, and any premium upon redemption thereof, exclusively from the Adjusted Net Wastewater Revenues and other amounts held by the Trustee (except for amounts held in the Rebate Fund). The Adjusted Net Wastewater Revenues are pledged to the payment of Bonds and Parity Debt without priority or distinction of one over the other. Said pledge constitutes a first lien on the Adjusted Net Wastewater Revenues and such other amounts referred to in this paragraph.

Allocation of Adjusted Net Wastewater Revenues

The District is to transfer the moneys in the Revenue Fund, into the following respective funds, in the following amounts, in the following order of priority, the requirements of each such fund (including the making up of any deficiencies in any such fund resulting from lack of Adjusted Net Wastewater Revenues sufficient to make any earlier required deposit) at the time of deposit to be satisfied before any deposit is made to any fund subsequent in priority.

(1) Interest Fund. The District shall transfer to the Trustee and the Trustee shall set aside in the Interest Fund on or before the Business Day prior to each interest payment date therefor an amount equal to the interest becoming due and payable on the Outstanding Bonds which are Current Interest Indebtedness (excluding any interest for which there are moneys on deposit in the Interest Fund from the proceeds of any Series of Bonds or other source to pay such interest).

(2) Principal Fund; Sinking Accounts. The District shall transfer to the Trustee and the Trustee shall set aside in the Principal Fund on or before the Business Day prior to each principal or Sinking Account payment date therefor an amount equal to (a) the amount of Bond Obligation becoming due and payable on the Outstanding Serial Bonds, plus (b) the Mandatory Sinking Account Payments to be paid into the respective Sinking Accounts for the Term Bonds; provided that if the District certifies to the Trustee that any principal payments are expected to be refunded on or prior to their respective due dates or paid from excess amounts on deposit in a bond reserve fund upon such payment, no amounts need be set aside towards such principal to be so refunded or paid. All of the aforesaid Mandatory Sinking Account Payments shall be made without priority of any payment into any one such Sinking Account over any other such payment.

(3) Bond Reserve Funds. Upon the occurrence of any deficiency in any Bond Reserve Fund established under the Indenture for any Series of Bonds, the District shall transfer to the Trustee and the Trustee shall set aside in such Bond Reserve Fund an amount equal to the aggregate amount of each unreplenished prior withdrawal from the Bond Reserve Fund until there is on deposit in such Bond Reserve Fund an amount equal to the respective reserve requirement.

Any Adjusted Net Wastewater Revenues remaining after the foregoing transfers shall be held free and clear of the Indenture by the District and it may use and apply such Adjusted Net Wastewater Revenues for any lawful purpose of the District, including the redemption and purchase of Bonds.

If on any principal payment date, interest payment date or mandatory redemption date the amounts on deposit in the Interest Fund and Principal Fund, including the Sinking Accounts therein are insufficient to make such payments, the Trustee shall immediately notify the District of such deficiency and direct that the District transfer the amount of such deficiency to the Trustee on such payment date. The District covenants and agrees to transfer to the Trustee from any Adjusted Net Wastewater Revenues

in its possession the amount of such deficiency on the principal, interest or mandatory redemption date referenced in such notice.

Investments

All moneys in any of the funds and accounts held by the Trustee shall be invested, as directed by the District, solely in Investment Securities.

The District may and the Trustee shall, upon the Request of the District, enter into a financial futures or financial option contract with an entity the debt securities of which are rated in their respective highest short-term Rating Categories by Moody's and Standard & Poor's.

The District may and the Trustee shall, upon the Request of the District, and provided that the Trustee is supplied with an Opinion of Bond Counsel to the effect that such action is permitted under the laws of the State of California, enter into an interest rate swap agreement corresponding to the interest rate or rates payable on a Series of Bonds or any portion thereof and the amounts received by the District or the Trustee, if any, pursuant to such a swap agreement may be applied to the deposits required hereunder; in which case, the entity with which the District or the Trustee may contract for an interest rate swap is limited to entities the debt securities of which are rated in their respective highest short-term debt Rating Categories by Moody's and Standard & Poor's. If the District so designates, amounts payable under the interest rate swap agreement shall be secured by Adjusted Net Wastewater Revenues and other assets pledged hereunder to the Bonds on a parity basis therewith and, in such event, the District shall pay to the Trustee for deposit in the Interest Fund, at the times and in the manner provided in the Indenture, the amounts to be paid under such interest rate swap agreement, as if such amounts were additional interest due on the Bonds to which such interest rate swap agreement relates, and the Trustee shall pay to the other party to the interest rate swap agreement, to the extent required thereunder, amounts deposited in the Interest Fund for the payment of interest on the Bonds with respect to which such agreement was entered into.

Additional Bonds; Parity Debt

The District may issue Bonds and Parity Debt payable from Adjusted Net Wastewater Revenues and secured equally and ratably with Bonds previously issued, subject to the following specific conditions precedent to the issuance of any such additional Bonds or Parity Debt:

- (a) No Event of Default shall have occurred and then be continuing.
- (b) The aggregate principal amount of Bonds or Parity Debt shall not exceed any limitation imposed by law or by any Supplemental Indenture.
- (c) The District shall have placed on file with the Trustee a Certificate of the District certifying that the sum of: (1) the Adjusted Net Wastewater Revenues for any period of 12 consecutive months during the 18 months immediately preceding the date on which such additional Bonds or Parity Debt will become Outstanding; plus (2) 90% of the amount by which the District projects Adjusted Net Wastewater Revenues for such period of 12 months would have been increased had increases in rates, fees and charges during such period of 12 months been in effect throughout such period of 12 months; plus (3) 75% of the amount by which the District projects Adjusted Net Wastewater Revenues will increase during the period of 12 months commencing on the date of issuance of such additional Series of Bonds due to improvements to the Wastewater System under construction (financed from any source) or to be financed with the proceeds of such additional Series of Bonds, shall (4) have been at least equal to 1.1 times the

amount of Maximum Annual Debt Service on all Bonds and Parity Debt then Outstanding and the additional Bonds or Parity Debt then proposed to be issued.

Refunding Bonds

Refunding Bonds may be authorized and issued by the District without compliance with the provisions described above under “Additional Bonds; Parity Debt,” provided that Maximum Annual Debt Service on all Bonds and Parity Debt Outstanding following the issuance of such refunding Bonds is less than or equal to Maximum Annual Debt Service on all Bonds and Parity Debt Outstanding prior to the issuance of such refunding Bonds.

Covenants

Among other covenants the District has agreed as follows:

The District will not create any pledge, lien or charge upon any of the Adjusted Net Wastewater Revenues having priority over or having parity with the lien of the Bonds except only as described in the Indenture. The District will not issue any additional bonds under Resolution No. 30051 of the District, adopted on January 26, 1982.

The District will not take any action, or fail to take any action, if any such action or failure to take action would adversely affect the exclusion from gross income of the interest on the Bonds under Section 103 of the Code, if applicable. The District will not directly or indirectly use or permit the use of any proceeds of the Bonds or any other funds of the District, or take or omit to take any action that would cause the Bonds to be “arbitrage bonds” within the meaning of Section 148(a) of the Code, if applicable. To that end, the District will comply with all requirements of Section 148 of the Code to the extent applicable to the Bonds.

The District will, at all times while any of the Bonds remain Outstanding, fix, prescribe and collect rates, fees and charges in connection with the services and facilities furnished by the Wastewater System so as to yield Wastewater Revenues in each Fiscal Year sufficient so that the sum of the Adjusted Net Wastewater Revenues for such year shall be at least equal to 1.1 times the amount of Debt Service on all Bonds and Parity Debt Outstanding for such Fiscal Year.

The District will maintain and preserve the Wastewater System in good repair and working order at all times, and will operate the Wastewater System in an efficient and economical manner. Subject in each case to the condition that insurance is obtainable at rates deemed reasonable by the District and upon terms and conditions deemed reasonable by the District, the District will procure and maintain at all times: (a) insurance on the Wastewater System against such risks as and in such amounts as the District deems prudent taking into account insurance coverage for similar utilities, and (b) public liability insurance in such amounts as the District deems prudent taking into account insurance coverage for similar utilities.

Events of Default; Remedies

The following events are Events of Default under the Indenture:

(a) default in the due and punctual payment of the principal or Redemption Price of any Bond when and as the same shall become due and payable, whether at maturity as therein expressed, by proceedings for redemption, by declaration or otherwise, or default in the

redemption from any Sinking Account of any Bonds in the amounts and at the times provided therefor;

(b) default in the due and punctual payment of any installment of interest on any Bond when and as such interest installment shall become due and payable;

(c) if the District shall fail to observe or perform any covenant, condition, agreement or provision in the Indenture on its part to be observed or performed, other than as referred to in subsection (a) or (b), for a period of sixty (60) days after written notice, specifying such failure and requesting that it be remedied, has been given to the District by the Trustee; except that, if such failure can be remedied but not within such sixty (60) day period and if the District has taken all action reasonably possible to remedy such failure within such sixty (60) day period, such failure shall not become an Event of Default for so long as the District shall diligently proceed to remedy the same in accordance with and subject to any directions or limitations of time established by the Trustee;

(d) if any default shall exist under any agreement governing any Parity Debt and such default shall continue beyond the therein stated grace period, if any, with respect to such default;

(e) [reserved];

(f) if the District files a petition in voluntary bankruptcy, for the composition of its affairs or for its corporate reorganization under any state or Federal bankruptcy or insolvency law, or makes an assignment for the benefit of creditors, or admits in writing to its insolvency or inability to pay debts as they mature, or consents in writing to the appointment of a trustee or receiver for itself;

(g) if a court of competent jurisdiction shall enter an order, judgment or decree declaring the District insolvent, or adjudging it bankrupt, or appointing a trustee or receiver of the District, or approving a petition filed against the District seeking reorganization of the District under any applicable law or statute of the United States of America or any state thereof, and such order, judgment or decree shall not be vacated or set aside or stayed within 60 days from the date of the entry thereof; and

(h) if, under the provisions of any other law for the relief or aid of debtors, any court of competent jurisdiction shall assume custody or control of the District or of the Adjusted Net Wastewater Revenues, and such custody or control shall not be terminated within 60 days from the date of assumption of such custody or control.

If an Event of Default shall occur and be continuing, the District is to immediately transfer to the Trustee all Adjusted Net Wastewater Revenues held by it and received thereafter and the Trustee shall apply all Adjusted Net Wastewater Revenues and any other funds then held or thereafter received by the Trustee under any of the provisions of the Indenture (except as otherwise provided in the Indenture) as follows and in the following order:

(1) To the payment of any expenses necessary in the opinion of the Trustee to protect the interests of the Owners of the Bonds and Parity Debt, including the costs and expenses of the Trustee and the Bondholders in declaring such Event of Default, and payment of reasonable fees and expenses of the Trustee (including reasonable fees and disbursements of its counsel and other agents) incurred in and about the performance of its powers and duties under the Indenture;

(2) To the payment of the whole amount of Bond Obligation then due on the Bonds and Parity Debt (upon presentation of the Bonds and Parity Debt to be paid, and stamping thereon of the payment if only partially paid, or surrender thereof if fully paid) subject to the provisions of the Indenture, with interest on such Bond Obligation, at the rate or rates of interest borne by the respective Bonds and Parity Debt, to the payment to the persons entitled thereto of all installments of interest then due and the unpaid principal or Redemption Price of any Bonds and Parity Debt which shall have become due, whether at maturity or by call for redemption, in the order of their due dates, with interest on the overdue Bond Obligation and Parity Debt at the rate borne by the respective Bonds and Parity Debt, and, if the amount available shall not be sufficient to pay in full all the Bonds and Parity Debt due on any date, together with such interest, then to the payment thereof ratably, according to the amounts of principal or interest or Accreted Value (plus accrued interest) due on such date to the persons entitled thereto, without any discrimination or preference.

In each and every such case during the continuance of such Event of Default, the Owners of not less than a majority in aggregate principal amount of the Bonds at the time Outstanding shall be entitled, upon notice in writing to the District, to declare the principal of all of the Bonds then Outstanding, and the interest accrued thereon, to be due and payable immediately, and upon any such declaration the same shall become and shall be immediately due and payable.

This provision, however, is subject to the condition that if, at any time after the principal of the Bonds shall have been so declared due and payable, the District shall pay to or shall deposit with the Trustee a sum sufficient to pay all principal on such Bonds matured prior to such declaration and all matured installments of interest (if any) upon all the Bonds, and the reasonable expenses of the Trustee, and any and all other defaults known to the Trustee (other than in the payment of principal of and interest on the Bonds due and payable solely by reason of such declaration) shall have been made good or cured to the satisfaction of the Trustee, or provision deemed by the Trustee to be adequate shall have been made therefor, then, and in every such case, the Owners of not less than a majority in aggregate principal amount of the Bonds at the time Outstanding, by written notice to the District and to the Trustee, may, on behalf of the Owners of all the Bonds, rescind and annul such declaration and its consequences; but no such rescission and annulment shall extend to or shall affect any subsequent default, or shall impair or exhaust any right or power consequent thereon.

The Trustee is appointed (and the successive respective Owners of the Bonds, by taking and holding the same, shall be conclusively deemed to have so appointed the Trustee) to represent the Owners in the matter of exercising and prosecuting on their behalf such rights and remedies as may be available to such Owners under the provisions of the Bonds, the Indenture, the Act and applicable provisions of any other law. Upon any default or other occasion, giving rise to a right in the Trustee to represent the Bondholders, the Trustee may take such action as may seem appropriate and, upon the request in writing of Owners of not less than twenty-five percent (25%) in aggregate principal amount of Bonds then Outstanding, and upon being indemnified to its satisfaction therefor, shall proceed to protect or enforce its rights or the rights of such Owners by such appropriate actions as it shall deem most effectual to protect and enforce any such right.

No remedy conferred upon or reserved to the Trustee or to the Owners of the Bonds is intended to be exclusive of any other remedy or remedies, and each and every such remedy to the extent permitted by law, shall be cumulative and in addition to any other remedy given under the Indenture or now or hereafter existing at law or in equity or otherwise.

Amendments

The Indenture and the rights and obligations of the District, the Owners of the Bonds and the Trustee may be modified or amended at any time by a Supplemental Indenture, with the written consent of the Owners of a majority in the aggregate amount of Bonds then Outstanding. No such modification or amendment shall (a) extend the fixed maturity of any Bond or reduce the amount of principal thereof, or extend the time of payment or reduce the amount of any Mandatory Sinking Account Payment provided for the payment of any Bonds, or reduce the rate of interest thereon, or extend the time of payment of interest thereon, or reduce any premium payable upon the redemption thereof, without the consent of the Owner of each Bond so affected, or (b) reduce the aforesaid percentage of Bond Obligation the consent of the Owners of which is required to effect any such modification or amendment, or permit the creation of any lien on the Adjusted Net Wastewater Revenues and other assets pledged under the Indenture, or deprive the Owners of the Bonds of the lien created by the Indenture on such Adjusted Net Wastewater Revenues and other assets, without the consent of the Owners of all of the Bonds then Outstanding.

The Indenture may also be modified or amended at any time with the written consents of each provider of a letter of credit or a policy of bond insurance for the Bonds, provided that at such time the payment of all the principal of and interest on all Outstanding Bonds shall be insured by a policy or policies of municipal bond insurance or payable under a letter of credit the provider of which shall be a financial institution or association having unsecured debt obligations rated, or insuring or securing other debt obligations rated on the basis of such insurance or letters of credit, rated not lower than the respective ratings on the Bonds by Moody's (if Moody's is then rating the Bonds) or Standard & Poor's (if Standard & Poor's is then rating the Bonds).

The Indenture and the rights and obligations of the District, of the Trustee and the Owners of the Bonds may also be modified or amended at any time by a Supplemental Indenture, without the consent of any Bondholders but only to the extent permitted by law and only for any one or more of the following purposes:

- (1) to add to the covenants and agreements of the District or to surrender any right or power reserved to or conferred upon the District;
- (2) to make such provisions for the purpose of curing any omission or ambiguity, or of curing or correcting any defective provision contained in the Indenture, or in regard to questions arising under the Indenture, as the District may deem necessary or desirable, and which shall not materially and adversely affect the interests of the Owners of the Bonds;
- (3) to modify the Indenture in such manner as to permit qualification under the Trust Indenture Act of 1939, as amended, or any similar federal statute hereafter in effect, and to add such other terms, conditions and provisions as may be permitted by said act or similar federal statutes and which shall not materially and adversely affect the interests of the Owners of the Bonds;
- (4) to make modifications or adjustments necessary or desirable to provide for the issuance of Variable Rate Indebtedness, Capital Appreciation Indebtedness or Parity Debt, with such interest rate, payment, maturity and other terms as the District may deem desirable, subject to the provisions of the Indenture;
- (5) to provide for the issuance of Bonds in book-entry form or bearer form, provided that such provisions shall not materially and adversely affect the interest of the Owners of the Bonds;

(6) if the District agrees in a Supplemental Indenture to maintain the exclusion of interest on a Series of Bonds from gross income for purposes of federal income taxation, to make such provisions as are necessary or appropriate to ensure such exclusion;

(7) to provide for the issuance of an additional Series of Bonds pursuant to provisions of the Indenture; and

(8) for any other purpose that does not materially and adversely affect the interests of the Owners of the Bonds.

Defeasance

Bonds may be paid by the District in any of the following ways:

(a) by paying or causing to be paid the Bond Obligations of and interest on such Outstanding Bonds, as and when the same become due and payable;

(b) by depositing with the Trustee, an escrow agent or other fiduciary, in trust, at or before maturity, money or securities in the necessary amount to pay or redeem such Outstanding Bonds; or

(c) by delivering to the Trustee, for cancellation by it, such Outstanding Bonds.

Upon the deposit with the Trustee, escrow agent or other fiduciary, in trust, at or before maturity, of money or securities in the necessary amount to pay or redeem any Outstanding Bond (whether upon or prior to its maturity or the redemption date of such Bond), provided that, if such Bond is to be redeemed prior to maturity, notice of such redemption shall have been given or provision satisfactory to the Trustee shall have been made for the giving of such notice, then all liability of the District in respect of such Bond shall cease, terminate and be completely discharged, provided that the Owner thereof shall thereafter be entitled to the payment of the principal of and premium, if any, and interest on the Bonds, and the District shall remain liable for such payment, but only out of such money or securities deposited with the Trustee as aforesaid for their payments.

The District may at any time surrender to the Trustee for cancellation by it any Bonds previously issued and delivered, which the District may have acquired in any manner whatsoever, and such Bonds, upon such surrender and cancellation, shall be deemed to be paid and retired.

Whenever in the Indenture it is provided or permitted that there be deposited with or held in trust by the Trustee money or securities in the necessary amount to pay or redeem any Bonds, the money or securities so to be deposited or held may include money or securities held by the Trustee in the funds and accounts established pursuant to the Indenture and shall be:

(a) lawful money of the United States of America in an amount equal to the principal amount of such Bonds and all unpaid interest thereon to maturity, except that, in the case of Bonds which are to be redeemed prior to maturity and in respect of which notice of such redemption shall have been given or provision satisfactory to the Trustee shall have been made for the giving of such notice, the amount to be deposited or held shall be the principal amount or Redemption Price of such Bonds and all unpaid interest thereon to the redemption date; or

(b) Investment Securities described in clauses (i), (ii) or (v) of the definition thereof, the principal of and interest on which when due will, in the opinion of an independent certified

public accountant delivered to the Trustee (upon which opinion the Trustee may conclusively rely), provide money sufficient to pay the principal or Redemption Price of and all unpaid interest to maturity, or to the redemption date, as the case may be, on the Bonds to be paid or redeemed, as such principal or Redemption Price and interest become due, provided that, in the case of Bonds which are to be redeemed prior to the maturity thereof, notice of such redemption shall have been given as required by the Indenture or provision satisfactory to the Trustee shall have been made for the giving of such notice; provided, in each case, that the Trustee shall have been irrevocably instructed (by the terms of the Indenture or by Request of the District) to apply such money to the payment of such principal or Redemption Price and interest with respect to such Bonds.

APPENDIX D

PROPOSED FORM OF BOND COUNSEL OPINION

Upon the delivery of the Series 2026 Bonds, Stradling Yocca Carlson & Rauth LLP, Newport Beach, California, Bond Counsel, proposes to render its final approving opinion with respect to the Series 2026 Bonds in substantially the following form:

[Closing Date]

East Bay Municipal Utility District
Oakland, California

EAST BAY MUNICIPAL UTILITY DISTRICT (Alameda and Contra Costa Counties, California)

\$37,010,000
**Wastewater System Revenue Bonds,
Series 2026A (Green Bonds)**

\$130,980,000
**Wastewater System Revenue
Refunding Bonds, Series 2026B**

Ladies and Gentlemen:

We have acted as bond counsel to the East Bay Municipal Utility District (the “District”) in connection with the issuance of its \$37,010,000 aggregate principal amount of Wastewater System Revenue Bonds, Series 2026A (Green Bonds) (the “Series 2026A Bonds”) and \$130,980,000 aggregate principal amount of Wastewater System Revenue Refunding Bonds, Series 2026B (the “Series 2026B Bonds”) and, together with the Series 2026A Bonds, the “Series 2026 Bonds”). The Series 2026 Bonds are being issued pursuant to the Municipal Utility District Act (constituting Division 6 of the Public Utilities Code of the State of California, as amended), the Revenue Bond Law of 1941 as made applicable by Article 6a of Chapter 6 of Division 6 of the Municipal Utility District Act, as amended, and with respect to the Series 2026B Bonds, Article 11 of Chapter 3 of Part 1 of Division 2 of Title 5 of the Government Code of the State of California, as amended (collectively, the “Act”), and a Wastewater System Revenue Bond Indenture, dated as of April 1, 1990, by and between the District and U.S. Bank Trust Company, National Association, as trustee (the “Trustee”), as amended and restated pursuant to the Twenty-First Supplemental Indenture, dated as of March 1, 2024, and as otherwise supplemented and amended, including by the Twenty-Fourth Supplemental Indenture, dated as of May 1, 2026, by and between the District and the Trustee, relating to the Series 2026A Bonds, and the Twenty-Fifth Supplemental Indenture, dated as of May 1, 2026, by and between the District and the Trustee, relating to the Series 2026B Bonds (as so amended, restated and supplemented, the “Indenture”). Capitalized terms not otherwise defined herein shall have the meanings ascribed thereto in the Indenture.

In our capacity as bond counsel, we have reviewed the Act, the Indenture, the Tax Certificate executed and delivered by the District in connection with the issuance and delivery of the Series 2026 Bonds (the “Tax Certificate”), certifications of the District, the Trustee, and others, opinions of counsel to the District and the Trustee, and such other documents, opinions and instruments as we deemed necessary to render the opinions set forth herein.

We have assumed the genuineness of all documents and signatures presented to us. We have not undertaken to verify independently, and have assumed, the accuracy of the factual matters represented, warranted or certified in the documents, and of the legal conclusions contained in the opinions referred to in the second paragraph hereof. Furthermore, we have assumed compliance with all covenants and agreements in the Indenture and the Tax Certificate, including (without limitation) covenants and

agreements compliance with which is necessary to assure that future actions, omissions or events will not cause the interest on the Series 2026 Bonds to be included in gross income for federal income tax purposes. With respect to the opinions expressed herein, we call attention to the fact that the rights and obligations under the Series 2026 Bonds and the Indenture are subject to bankruptcy, insolvency, reorganization, arrangement, fraudulent conveyance, moratorium and other similar laws affecting creditors' rights, to the application of equitable principles, to the possible unavailability of specific performance or injunctive relief, to the exercise of judicial discretion in appropriate cases and to the limitations on legal remedies against public agencies in the State of California. Furthermore, the imposition of certain fees and charges by the District relating to the Wastewater System is subject to the provisions of Articles XIIC and XIID of the California Constitution.

By delivering this letter, we are not expressing any opinion with respect to any indemnification, contribution, liquidated damages, penalty (including any remedy deemed to constitute a penalty), right of set-off, arbitration, judicial reference, choice of law, choice of forum, choice of venue, non-exclusivity of remedies, waiver or severability provisions contained in the Series 2026 Bonds or the Indenture, nor are we expressing any opinion with respect to the state or quality of title to or interest in any assets described in or as subject to the lien of the Indenture or the accuracy or sufficiency of the description contained therein of, or the remedies available to enforce liens on, any assets thereunder.

Based upon the foregoing and subject to the limitations and qualifications herein specified, as of the date hereof, we are of the opinion, under existing law, that:

1. The Series 2026 Bonds constitute the valid and binding special limited obligations of the District.
2. The Indenture has been duly authorized, executed and delivered by, and constitutes the valid and binding obligation of, the District. The Indenture creates a valid pledge, to secure the payment of the principal of and interest on the Series 2026 Bonds, of the Adjusted Net Wastewater Revenues of the District, and certain other amounts held by the Trustee under the Indenture, as and to the extent set forth in the Indenture and subject to the provisions of the Indenture permitting the application thereof for the purposes and on the terms and conditions set forth therein.
3. The Series 2026 Bonds are special limited obligations of the District and are payable exclusively from and are secured by a pledge of Adjusted Net Wastewater Revenues of the District and certain other amounts held by the Trustee under the Indenture, as and to the extent set forth in the Indenture and subject to the provisions of the Indenture permitting the application thereof for the purposes and on the terms and conditions set forth therein. The general fund of the District is not liable, and neither the credit nor taxing power of the District is pledged, for the payment of the Series 2026 Bonds or the interest thereon.
4. Other bonds and parity debt of the District have been and may from time to time hereafter be issued under the Indenture which are payable from Adjusted Net Wastewater Revenues on a parity basis with the Series 2026 Bonds.
5. Interest on the Series 2026 Bonds is excluded from gross income for federal income tax purposes and is not an item of tax preference for purposes of calculating the federal alternative minimum tax imposed on individuals; however, with respect to applicable corporations as defined in Section 59(k) of the Internal Revenue Code of 1986, as amended (the "Code"), interest with respect to the Series 2026 Bonds might be taken into account in determining adjusted financial statement income for purposes of computing the alternative minimum tax imposed on such corporations.

6. The interest on the Series 2026 Bonds is exempt from State of California personal income tax.

7. The difference between the issue price of a Series 2026 Bond (the first price at which a substantial amount of the Series 2026 Bonds of a maturity are to be sold to the public) and the stated redemption price at maturity with respect to such Series 2026 Bond constitutes original issue discount. Original issue discount accrues under a constant yield method, and original issue discount will accrue to a Series 2026 Bond owner before receipt of cash attributable to such excludable income. The amount of original issue discount deemed received by a Series 2026 Bond owner will increase the Series 2026 Bond owner's basis in the applicable Series 2026 Bond. Original issue discount that accrues for the Series 2026 Bond owner is excluded from the gross income of such Series 2026 Bond owner for federal income tax purposes, is not an item of tax preference for purposes of calculating the federal alternative minimum tax imposed on individuals (as described in paragraph 5 above) and is exempt from State of California personal income tax.

8. The amount by which a Series 2026 Bond owner's original basis for determining loss on sale or exchange in the applicable Series 2026 Bonds (generally, the purchase price) exceeds the amount payable on maturity (or on an earlier call date) constitutes amortizable bond premium, which must be amortized under Section 171 of the Code; such amortizable bond premium reduces the Series 2026 Bond owner's basis in the applicable Series 2026 Bonds (and the amount of tax-exempt interest received), and is not deductible for federal income tax purposes. The basis reduction as a result of the amortization of bond premium may result in a Series 2026 Bond owner realizing a taxable gain when a Series 2026 Bond is sold by the owner for an amount equal to or less (under certain circumstances) than the original cost of the Series 2026 Bond to the owner.

The opinions expressed herein as to the exclusion from gross income of interest on the Series 2026 Bonds are based upon certain representations of fact and certifications made by the District and others and are subject to the condition that the District complies with all requirements of the Code, that must be satisfied subsequent to the issuance of the Series 2026 Bonds to assure that such interest will not become includable in gross income for federal income tax purposes. Failure to comply with such requirements of the Code might cause the interest to be included in gross income for federal income tax purposes retroactive to the date of issuance of the Series 2026 Bonds. The District has covenanted to comply with all such requirements.

The opinions expressed and the statements made herein are based on an analysis of existing laws, regulations, rulings and judicial decisions and cover certain matters not directly addressed by such authorities. Such opinions and statements may be adversely affected by actions taken or events occurring, including a change in law, regulation or ruling (or in the application or official interpretation of any law, regulation or ruling) after the date hereof. We have not undertaken to determine, or to inform any person, whether such actions are taken or such events occur, and we have no obligation to update this letter in light of such actions or events or for any other reason. The Indenture and the Tax Certificate permit certain actions to be taken or to be omitted if a favorable opinion of bond counsel is provided with respect thereto. No opinion is expressed herein as to the effect on the exclusion from gross income of interest for federal income tax purposes with respect to any Series 2026 Bonds if any such action is taken or omitted based upon the opinion or advice of counsel other than ourselves. Other provisions of the Code may give rise to adverse federal income tax consequences to particular Series 2026 Bond owners. Other than expressly stated herein, we express no other opinion regarding tax consequences with respect to the Series 2026 Bonds.

No opinion is expressed herein on the accuracy, completeness or sufficiency of the official statement relating to the Series 2026 Bonds or other offering material relating to the Series 2026 Bonds

and we expressly disclaim any duty to advise the owners of the Series 2026 Bonds with respect to matters contained in such official statement or other offering material.

This opinion is limited to the laws of the State of California and the federal laws of the United States. We assume no responsibility with respect to the applicability or the effect of the laws of any other jurisdiction.

Respectfully submitted,

APPENDIX E

DTC AND THE BOOK-ENTRY ONLY SYSTEM

The information in this Appendix E concerning The Depository Trust Company, New York, New York (“DTC”), and DTC’s book-entry system has been obtained from DTC and the District and the Trustee take no responsibility for the completeness or accuracy thereof. The District and the Trustee cannot and do not give any assurances that DTC, Direct Participants (as defined below) or Indirect Participants (as defined below) will distribute to the Beneficial Owners (a) payments of interest, principal or premium, if any, with respect to the Series 2026 Bonds, (b) certificates representing ownership interest in or other confirmation of ownership interest in the Series 2026 Bonds, or (c) redemption or other notices sent to DTC or Cede & Co., its nominee, as the registered owner of the Series 2026 Bonds, or that they will do so on a timely basis, or that DTC, Direct Participants or Indirect Participants will act in the manner described in this Appendix E. The District and the Trustee are not responsible or liable for the failure of DTC or any DTC Direct or Indirect Participant to make any payment or give any notice to a Beneficial Owner with respect to the Series 2026 Bonds or an error or delay relating thereto. The current “Rules” applicable to DTC are on file with the Securities and Exchange Commission and the current “Procedures” of DTC to be followed in dealing with DTC’s Direct and Indirect Participants are on file with DTC.

DTC will act as securities depository for the Series 2026 Bonds. The Series 2026 Bonds will be issued as fully-registered securities registered in the name of Cede & Co. (DTC’s partnership nominee) or such other name as may be requested by an authorized representative of DTC. One fully-registered certificate will be issued for each maturity of each Series of the Series 2026 Bonds, in the aggregate principal amount of such maturity, and will be deposited with DTC.

DTC, the world’s largest securities depository, is a limited-purpose trust company organized under the New York Banking Law, a “banking organization” within the meaning of the New York Banking Law, a member of the Federal Reserve System, a “clearing corporation” within the meaning of the New York Uniform Commercial Code, and a “clearing agency” registered pursuant to the provisions of Section 17A of the Securities Exchange Act of 1934. DTC holds and provides asset servicing for over 3.5 million issues of U.S. and non-U.S. equity issues, corporate and municipal debt issues, and money market instruments (from over 100 countries) that DTC’s participants (“Direct Participants”) deposit with DTC. DTC also facilitates the post-trade settlement among Direct Participants of sales and other securities transactions in deposited securities, through electronic computerized book-entry transfers and pledges between Direct Participants’ accounts. This eliminates the need for physical movement of securities certificates. Direct Participants include both U.S. and non-U.S. securities brokers and dealers, banks, trust companies, clearing corporations, and certain other organizations. DTC is a wholly-owned subsidiary of The Depository Trust & Clearing Corporation (“DTCC”). DTCC is the holding company for DTC, National Securities Clearing Corporation and Fixed Income Clearing Corporation, all of which are registered clearing agencies. DTCC is owned by the users of its regulated subsidiaries. Access to the DTC system is also available to others such as both U.S. and non-U.S. securities brokers and dealers, banks, trust companies, and clearing corporations that clear through or maintain a custodial relationship with a Direct Participant, either directly or indirectly (“Indirect Participants”). DTC has a S&P Global Ratings’ rating of AA+. The DTC Rules applicable to Direct and Indirect Participants are on file with the Securities and Exchange Commission. More information about DTC can be found at www.dtcc.com. The information on such website is not incorporated herein by reference.

Purchases of Series 2026 Bonds under the DTC book-entry system must be made by or through Direct Participants, which will receive a credit for the Series 2026 Bonds on DTC’s records. The ownership interest of each actual purchaser of each Series 2026 Bond (“Beneficial Owner”) is in turn to

be recorded on the Direct and Indirect Participants' records. Beneficial Owners will not receive written confirmation from DTC of their purchase. Beneficial Owners are, however, expected to receive written confirmations providing details of the transaction, as well as periodic statements of their holdings, from the Direct or Indirect Participant through which the Beneficial Owner entered into the transaction. Transfers of ownership interests in the Series 2026 Bonds are to be accomplished by entries made on the books of Direct and Indirect Participants acting on behalf of Beneficial Owners. Beneficial Owners will not receive certificates representing their ownership interests in the Series 2026 Bonds, except in the event that use of the book-entry system for the Series 2026 Bonds is discontinued.

To facilitate subsequent transfers, all Series 2026 Bonds deposited by Direct Participants with DTC are registered in the name of DTC's partnership nominee, Cede & Co., or such other name as may be requested by an authorized representative of DTC. The deposit of the Series 2026 Bonds with DTC and their registration in the name of Cede & Co. or such other DTC nominee do not effect any change in beneficial ownership. DTC has no knowledge of the actual Beneficial Owners of the Series 2026 Bonds; DTC's records reflect only the identity of the Direct Participants to whose accounts such Series 2026 Bonds are credited, which may or may not be the Beneficial Owners. The Direct and Indirect Participants will remain responsible for keeping account of their holdings on behalf of their customers.

Conveyance of notices and other communications by DTC to Direct Participants, by Direct Participants to Indirect Participants, and by Direct Participants and Indirect Participants to Beneficial Owners will be governed by arrangements among them, subject to any statutory or regulatory requirements as may be in effect from time to time. Beneficial Owners of the Series 2026 Bonds may wish to take certain steps to augment the transmission to them of notices of significant events with respect to the Series 2026 Bonds, such as redemptions, tenders, defaults, and proposed amendments to the Series 2026 Bond documents. For example, Beneficial Owners of the Series 2026 Bonds may wish to ascertain that the nominee holding the Series 2026 Bonds for their benefit has agreed to obtain and transmit notices to Beneficial Owners. In the alternative, Beneficial Owners may wish to provide their names and addresses to the registrar and request that copies of notices be provided directly to them.

Redemption notices shall be sent to DTC. If less than all of the Series 2026 Bonds are being redeemed, DTC's practice is to determine by lot the amount of the interest of each Direct Participant in such issue to be redeemed.

Neither DTC nor Cede & Co. (nor any other DTC nominee) will consent or vote with respect to the Series 2026 Bonds unless authorized by a Direct Participant in accordance with DTC's MMI Procedures. Under its usual procedures, DTC mails an Omnibus Proxy to the District as soon as possible after the record date. The Omnibus Proxy assigns Cede & Co.'s consenting or voting rights to those Direct Participants to whose accounts the Series 2026 Bonds are credited on the record date (identified in a listing attached to the Omnibus Proxy).

Payments of principal of, premium, if any, and interest on the Series 2026 Bonds will be made to Cede & Co., or such other nominee as may be requested by an authorized representative of DTC. DTC's practice is to credit Direct Participants' accounts upon DTC's receipt of funds and corresponding detail information from the District or the Trustee, on the payable date in accordance with their respective holdings shown on DTC's records. Payments by Direct or Indirect Participants to Beneficial Owners will be governed by standing instructions and customary practices, as is the case with securities held for the accounts of customers in bearer form or registered in "street name," and will be the responsibility of such Participant and not of DTC, the Trustee, or the District, subject to any statutory or regulatory requirements as may be in effect from time to time. Payment of principal of, premium, if any, and interest on the Series 2026 Bonds to Cede & Co. (or such other nominee as may be requested by an authorized representative of DTC) is the responsibility of the District or the Trustee, disbursement of such payments

to Direct Participants will be the responsibility of DTC, and disbursement of such payments to the Beneficial Owners will be the responsibility of Direct and Indirect Participants.

DTC may discontinue providing its services as securities depository with respect to the Series 2026 Bonds at any time by giving notice to the Trustee and the District. Under certain circumstances, in the event that a successor depository is not obtained, Series 2026 Bond certificates are required to be printed and delivered.

The District may decide to discontinue use of the system of book-entry transfers for the Series 2026 Bonds through DTC (or a successor securities depository). In that event, Series 2026 Bond certificates will be printed and delivered as provided in the Indenture. In addition, the following provisions would apply: the principal or redemption price of the Series 2026 Bonds will be payable upon presentation thereof, at the principal corporate trust office of the Trustee, in San Francisco, California; interest on the Series 2026 Bonds will be payable by check mailed on each interest payment date to the registered owners thereof as shown on the registration books of the Trustee as of the close of business on the 15th day of the calendar month immediately preceding the applicable interest payment date (the “record date”), except that in the case of an owner of \$1,000,000 or more in aggregate principal amount of Series 2026 Bonds, upon written request of such owner to the Trustee received at least 10 days prior to the record date for the payment of interest, specifying the account or accounts to which such payment shall be made (which request shall remain in effect until revoked by such owner in a subsequent writing delivered to the Trustee), such interest shall be paid in immediately available funds by wire transfer to such account or accounts on the following interest payment date; and the Series 2026 Bonds will be transferable and exchangeable on the terms and conditions provided in the Indenture.

The information in this Appendix E concerning DTC and DTC’s book-entry system has been obtained from sources the District believes to be reliable, but the District takes no responsibility for the accuracy thereof.

[THIS PAGE INTENTIONALLY LEFT BLANK]

APPENDIX F

FORM OF CONTINUING DISCLOSURE AGREEMENT

This Continuing Disclosure Agreement (this “Disclosure Agreement”), dated May 20, 2026, is executed and delivered by the East Bay Municipal Utility District (the “District”) and Digital Assurance Certification, LLC (the “Dissemination Agent”) in connection with the issuance of \$37,010,000 aggregate principal amount of Wastewater System Revenue Bonds, Series 2026A (Green Bonds) (the “Series 2026A Bonds”), and \$130,980,000 aggregate principal amount of Wastewater System Revenue Refunding Bonds, Series 2026B (the “Series 2026B Bonds” and together with the Series 2026A Bonds, the “Bonds”). The Bonds are being issued pursuant to a Wastewater System Revenue Bond Indenture, dated as of April 1, 1990, by and between the District and U.S. Bank Trust Company, National Association as successor trustee (the “Trustee”), as amended, restated and supplemented, including as supplemented by the Twenty-Fourth Supplemental Indenture, dated as of May 1, 2026, relating to the Series 2026A Bonds, and the Twenty-Fifth Supplemental Indenture, dated as of May 1, 2026, relating to the Series 2026B Bonds (as so amended, restated and supplemented, the “Indenture”). In connection therewith, the District and the Dissemination Agent covenant and agree as follows:

Section 1. Purpose of this Disclosure Agreement. This Disclosure Agreement is being executed and delivered by the District and the Dissemination Agent for the benefit of the Holders and Beneficial Owners of the Bonds and in order to assist the Participating Underwriter (as defined herein) in complying with Securities and Exchange Commission Rule 15c2-12(b)(5).

Section 2. Definitions. In addition to the definitions set forth above and in the Indenture, which apply to any capitalized term used in this Disclosure Agreement unless otherwise defined in this section, the following capitalized terms shall have the following meanings:

“Annual Report” shall mean any Annual Report provided by the District pursuant to, and as described in, Sections 3 and 4 of this Disclosure Agreement.

“Beneficial Owner” shall mean any person who (a) has the power, directly or indirectly, to vote or consent with respect to, or to dispose of ownership of, any Bonds (including persons holding Bonds through nominees, depositories or other intermediaries); or (b) is treated as the owner of any Bonds for federal income tax purposes.

“Disclosure Representative” shall mean the Director of Finance or the Treasury Manager of the District or a designee of the Director of Finance, or such other officer or employee as the District shall designate in writing to the Dissemination Agent from time to time.

“Dissemination Agent” shall mean Digital Assurance Certification, LLC, or any successor dissemination agent designated in writing by the District and which has filed a written acceptance of such designation.

“Financial Obligation” shall mean a (a) debt obligation; (b) derivative instrument entered into in connection with, or pledged as security or a source of payment for, an existing or planned debt obligation; or (c) guarantee of a debt obligation or any such derivative instrument; provided that “financial obligation” shall not include municipal securities as to which a final official statement (as defined in the Rule) has been provided to the MSRB consistent with the Rule.

“Holder” shall mean either the registered owners of the Bonds or, if the Bonds are registered in the name of The Depository Trust Company or another recognized depository, any applicable participant in such depository system.

“Listed Event” shall mean any of the events listed in Section 5(a) of this Disclosure Agreement.

“MSRB” shall mean the Municipal Securities Rulemaking Board established pursuant to Section 15B(b)(1) of the Securities Exchange Act of 1934 or any other entity designated or authorized by the Securities and Exchange Commission to receive reports pursuant to the Rule. Until otherwise designated by the MSRB or the Securities and Exchange Commission, filings with the MSRB are to be made through the Electronic Municipal Market Access (EMMA) website of the MSRB, currently located at <http://emma.msrb.org>.

“Official Statement” shall mean the final Official Statement of the District relating to the Bonds.

“Participating Underwriter” shall mean any of the underwriters of the Bonds listed on the cover page of the Official Statement required to comply with the Rule in connection with offering of the Bonds.

“Rule” shall mean Rule 15c2-12(b)(5) adopted by the SEC under the Securities Exchange Act of 1934, as the same may be amended from time to time.

“SEC” shall mean the United States Securities and Exchange Commission.

Section 3. Provision of Annual Reports.

(a) The District shall, or shall cause the Dissemination Agent to, not later than December 31 of each year in which the Bonds are outstanding, commencing with the Annual Report for Fiscal Year 2025-26 (which is due not later than December 31, 2026), provide to the MSRB an Annual Report which is consistent with the requirements of Section 4 of this Disclosure Agreement. The Annual Report must be submitted in electronic format, accompanied by such identifying information as prescribed by the MSRB. The Annual Report may be submitted as a single document or as separate documents comprising a package, and may cross-reference other information as provided in Section 4 of this Disclosure Agreement; *provided* that if the audited financial statements of the District are not available by the date required above for the filing of the Annual Report, the District shall submit the audited financial statements as soon thereafter as available. If the District’s Fiscal Year changes, the District shall give notice of such change in the same manner as for a Listed Event under Section 5(c) and the Annual Reports shall be provided to the MSRB no later than six months after the end of such Fiscal Year.

(b) If the District is unable to provide to the MSRB an Annual Report by the date required in subsection (a), the District shall send to the MSRB, in a timely manner, on or before such date a notice in substantially the form attached hereto as Exhibit A.

(c) The Dissemination Agent shall:

- (i) determine the electronic filing address of, and then-current procedures for submitting Annual Reports to, the MSRB each year prior to the date for providing the Annual Report; and
- (ii) file a report with the District and (if the Dissemination Agent is not the Trustee, the Trustee) certifying that the Annual Report has been provided to the MSRB pursuant to this Disclosure Agreement, and stating the date it was provided.

Section 4. Content of Annual Reports. The District’s Annual Report shall contain or include by reference the following categories or similar categories of information updated to incorporate

information for the most recent fiscal or calendar year, as applicable (the tables referred to below are those appearing in the Official Statement relating to the Bonds):

(a) The audited financial statements of the District for the prior Fiscal Year, prepared in accordance with Generally Accepted Accounting Principles, as promulgated, to apply to governmental entities from time to time by the Governmental Accounting Standards Board. If the District's audited financial statements are not available by the time the Annual Report is required to be filed pursuant to Section 3(a), the Annual Report shall contain unaudited financial statements in a format similar to the financial statements contained in the final Official Statement, and the audited financial statements shall be filed in the same manner as the Annual Report when they become available;

(b) A table showing Wastewater System sources of funds;

(c) A table showing Wastewater System rates and charges for the preceding Fiscal Year;

(d) A table showing average daily Wastewater flows of the Wastewater System for the preceding Fiscal Year;

(e) A table showing Outstanding Wastewater System debt as of the preceding Fiscal Year; and

(f) A table showing Wastewater System revenues, operating and maintenance expenses, debt service on Wastewater System revenue bonds and debt service coverage for the Wastewater System revenue bonds for the most recent Fiscal Year.

Financial and operating information relating to the District referenced in items 3(b)-(f) above may be updated from time to time, and such updates may involve displaying data in a different format or table or eliminating data that is no longer material.

Any or all of the items listed above may also be included by specific reference to other documents, including official statements of debt issues of the District or related public entities, which have been submitted to the MSRB or the SEC. If any document included by reference is a final official statement, it must be available from the MSRB. The District shall clearly identify each such other document so included by reference.

Section 5. Reporting of Significant Events.

(a) Pursuant to the provisions of this section, upon the occurrence of any of the following events (in each case to the extent applicable) with respect to the Bonds, the District shall give, or cause to be given by so notifying the Dissemination Agent in writing and instructing the Dissemination Agent to give, notice of the occurrence of such event, in each case, pursuant to Section 5(c) hereof:

1. principal or interest payment delinquencies;
2. non-payment related defaults, if material;
3. modifications to the rights of the Bondholders, if material;
4. optional, contingent or unscheduled calls, if material, and tender offers;
5. defeasances;

6. rating changes;
7. adverse tax opinions or the issuance by the Internal Revenue Service of proposed or final determinations of taxability, Notices of Proposed Issue (IRS Form 5701-TEB) or other material notices or determinations with respect to the tax status of the Bonds or other material events affecting the tax status of the Bonds;
8. unscheduled draws on the debt service reserves reflecting financial difficulties;
9. unscheduled draws on the credit enhancements reflecting financial difficulties;
10. substitution of the credit or liquidity providers or their failure to perform;
11. release, substitution or sale of property securing repayment of the Bonds, if material;
12. bankruptcy, insolvency, receivership or similar proceedings of the District, which shall occur as described below;
13. appointment of a successor or additional trustee or the change of name of a trustee, if material;
14. the consummation of a merger, consolidation, or acquisition involving the District or the sale of all or substantially all of the assets of the Wastewater System of the District other than in the ordinary course of business, the entry into a definitive agreement to undertake such an action or the termination of a definitive agreement relating to any such actions, other than pursuant to its terms, if material;
15. incurrence of a Financial Obligation of the District with respect to the Wastewater System, if material, or agreement to covenants, events of default, remedies, priority rights, or other similar terms of a Financial Obligation of the District with respect to the Wastewater System, any of which affects Holders of the Bonds, if material; or
16. default, event of acceleration, termination event, modification of terms, or other similar events under the terms of a Financial Obligation of the District with respect to the Wastewater System, any of which reflect financial difficulties.

For these purposes, (i) any event described in item 12 of this Section 5(a) is considered to occur when any of the following occur: the appointment of a receiver, fiscal agent, or similar officer for the District in a proceeding under the United States Bankruptcy Code or in any other proceeding under state or federal law in which a court or governmental authority has assumed jurisdiction over substantially all of the assets or business of the District, or if such jurisdiction has been assumed by leaving the existing governing body and officials or officers in possession but subject to the supervision and orders of a court or governmental authority, or the entry of an order confirming a plan of reorganization, arrangement, or liquidation by a court or governmental authority having supervision or jurisdiction over substantially all of the assets or business of the District; and (ii) the District intends to comply with the provisions hereof for the Listed Events described in subparagraphs (15) and (16) of this Section 5(a), and the definition of the “Financial Obligation” in Section 2, with reference to the Rule, any other applicable federal securities laws and guidance provided by the SEC in its Release No. 34-83885 dated August 20, 2018 (the “2018 Release”), any further amendments or written guidance provided by the SEC or its staff with respect to the amendments to the Rule effected by the 2018 Release.

(b) Upon receipt of notice from the District and instruction by the District to report the occurrence of any Listed Event, the Dissemination Agent shall provide notice thereof to the MSRB in accordance with Section 5(c) hereof. In the event the Dissemination Agent shall obtain actual knowledge of the occurrence of any of the Listed Events, the Dissemination Agent shall, immediately after obtaining such knowledge, contact the Disclosure Representative, inform such person of the event, and request that the District promptly notify the Dissemination Agent in writing whether or not to report the event pursuant to Section 5(c). For purposes of this Disclosure Agreement, “actual knowledge” of the occurrence of such Listed Event shall mean actual knowledge by the Dissemination Agent. The Dissemination Agent shall have no responsibility to determine the materiality, if applicable, of any of the Listed Events.

(c) The District, or the Dissemination Agent, if the Dissemination Agent has been instructed by the District to report the occurrence of a Listed Event, shall file a notice of such occurrence with the MSRB in a timely manner not more than ten (10) business days after the occurrence of the event.

Section 6. Termination of Reporting Obligation. The District’s obligations under this Disclosure Agreement shall terminate with respect to all Bonds upon the maturity, defeasance, prior redemption, acceleration or payment in full of all of the Bonds and with respect to any Bonds upon the maturity, defeasance, prior redemption or payment in full of such Bonds.

Section 7. Dissemination Agent. The District may, from time to time, appoint or engage a Dissemination Agent to assist it in carrying out its obligations under this Disclosure Agreement, and may discharge any such Dissemination Agent, with or without appointing a successor Dissemination Agent. If at any time there is not any other designated Dissemination Agent, the Trustee, upon notice from the District, shall be the Dissemination Agent. The Dissemination Agent shall have no duty or obligation to review or verify any information, disclosures or notices provided to it by the District pursuant to this Disclosure Agreement and shall not be deemed to be acting in any fiduciary capacity for the District, the Holders of the Bonds or any other party. The Dissemination Agent shall receive compensation for the services provided pursuant to this Disclosure Agreement.

Section 8. Amendment; Waiver. Notwithstanding any other provision of this Disclosure Agreement, the District and the Dissemination Agent may amend this Disclosure Agreement (and, to the extent that any such amendment does not materially change or increase its obligations hereunder, the Dissemination Agent shall agree to any amendment so requested by the District), and any provision of this Disclosure Agreement may be waived; *provided*, that the following conditions are satisfied:

(a) If the amendment or waiver relates to the provisions of Section 3(a), Section 4 or Section 5(a), it may only be made in connection with a change in circumstances that arises from a change in legal requirements, change in law, or change in the identity, nature or status of an obligated person with respect to the Bonds, or the type of business conducted;

(b) The undertaking, as amended or taking into account such waiver, would, in the opinion of nationally recognized bond counsel, have complied with the requirements of the Rule at the time of the original issuance of the Bonds, after taking into account any amendments or interpretations of the Rule, as well as any change in circumstances; and

(c) The amendment or waiver does not, in the opinion of nationally recognized bond counsel, materially impair the interests of the Holders or Beneficial Owners of the Bonds.

In the event of any amendment or waiver of a provision of this Disclosure Agreement, the District shall describe such amendment in the next Annual Report, and shall include, as applicable, a narrative explanation of the reason for the amendment or waiver and its impact on the type (or in the case of a change of accounting principles, on the presentation) of financial information or operating data being presented by the District. In addition, if the amendment relates to the accounting principles to be followed in preparing financial statements, (i) notice of such change shall be given in the same manner as for a Listed Event under Section 5(c), and (ii) the Annual Report for the year in which the change is made should present a comparison (in narrative form and also, if feasible, in quantitative form) between the financial statements as prepared on the basis of the new accounting principles and those prepared on the basis of the former accounting principles.

Section 9. Filings with the MSRB. All information, operating data, financial statements, notices and other documents provided to the MSRB in accordance with this Disclosure Agreement shall be provided in an electronic format prescribed by the MSRB and shall be accompanied by identifying information as prescribed by the MSRB.

Section 10. Additional Information. Nothing in this Disclosure Agreement shall be deemed to prevent the District from disseminating any other information, using the means of dissemination set forth in this Disclosure Agreement or any other means of communication, or including any other information in any Annual Report or notice of occurrence of a Listed Event, in addition to that which is required by this Disclosure Agreement. If the District chooses to include any information in any Annual Report or notice of occurrence of a Listed Event in addition to that which is specifically required by this Disclosure Agreement, the District shall have no obligation under this Disclosure Agreement to update such information or include it in any future Annual Report or notice of occurrence of a Listed Event.

Section 11. Default. In the event of a failure of the District or the Dissemination Agent to comply with any provision of this Disclosure Agreement, the Trustee may (and, at the request of any Participating Underwriter or the Holders of at least 25% of the aggregate principal amount of Outstanding Bonds and upon provision of indemnification satisfactory to the Trustee, shall), or any Holder or Beneficial Owner of the Bonds may take such actions as may be necessary and appropriate, including seeking mandate or specific performance by court order, to cause the District or the Dissemination Agent, as the case may be, to comply with its obligations under this Disclosure Agreement. A default under this Disclosure Agreement shall not be deemed an Event of Default under the Indenture, and the sole remedy under this Disclosure Agreement in the event of any failure of the District or the Dissemination Agent to comply with this Disclosure Agreement shall be an action to compel performance hereunder.

Section 12. Duties, Immunities and Liabilities of Dissemination Agent. The Dissemination Agent shall have only such duties as are specifically set forth in this Disclosure Agreement, and the District agrees to indemnify and save the Dissemination Agent, its officers, directors, employees and agents, harmless against any loss, expense and liabilities which it may incur arising out of or in the exercise or performance of its powers and duties hereunder, including the costs and expenses (including attorneys' fees) of defending against any claim of liability, but excluding any loss, expense and liabilities due to the Dissemination Agent's negligence or willful misconduct. The obligations of the District under this Section 12 shall survive resignation or removal of the Dissemination Agent and payment of the Bonds.

Section 13. Notices. Any notices or communications to or among any of the parties to this Disclosure Agreement may be given as follows:

To the District:

East Bay Municipal Utility District
375 Eleventh Street, MS 801
Oakland, California 94607-4240
Attention: Treasury Manager
Phone: 510-287-0248

To the Dissemination Agent:

Digital Assurance Certification, LLC
315 E. Robinson Street, Suite 300
Orlando, Florida 32801
Attention: DAC Support
Phone: 407-515-1100

Section 14. Beneficiaries. This Disclosure Agreement shall inure solely to the benefit of the District, the Dissemination Agent, the Participating Underwriter and the Holders and Beneficial Owners from time to time of the Bonds, and shall create no rights in any other person or entity.

Section 15. Counterparts. This Disclosure Agreement may be executed in several counterparts, each of which shall be an original and all of which shall constitute but one and the same instrument.

APPENDIX G

THE DISTRICT'S GREEN BOND GUIDANCE AND EXPECTED SERIES 2026A GREEN BOND PROJECTS

The District anticipates funding or reimbursing capital improvement program expenditures for the Wastewater System projects identified in the table below using proceeds of the Series 2026A Bonds. These projects were selected using the District's Guidance for Issuing Green Bonds, which was last approved by the District's Board on March 22, 2022. A complete copy of the District's Green Bond Guidance as approved by the District Board on March 22, 2022 is attached hereto.

The District's criteria are presented below in a numbered list for easier reference in the table on the following page.

1. Maintain water quality
2. Improve water use efficiency, including conservation through reduced water loss
3. Improve biodiversity and ecosystem quality
4. Protect against flooding
5. Reduce pollution
6. Improve resilience (adaptation) to climate change
7. Reduce the combustion of fossil fuels
8. Reduce greenhouse gas emissions
9. Implement "reduce, reuse, recycle" practices in preference to raw materials
10. Adhere to sustainable purchasing guidelines

[Remainder of page intentionally left blank]

**East Bay Municipal Utility District
Expected Series 2026A Green Bond Projects**

Project Name	Short Description	EBMUD Green Bond Criteria	Amount Funded
Interceptors and Pump Stations	Interceptors and Pump Stations include all capital improvements to rehabilitate aging gravity interceptors, force mains, and pump stations that convey wastewater from the satellite agencies to the Main Wastewater Treatment Plant (“MWWTP”). This includes projects that rehabilitate underground piping, appurtenances, maintenance holes and other buried structures, pumping equipment, electrical and instrumentation infrastructure, and associated buildings.	1, 2, 4, 5	\$15.2 million
Secondary Treatment	Secondary Treatment includes all capital improvements to renew existing infrastructure in the secondary treatment process area, which includes the secondary influent channels, mid-plant pump station, oxygen production plant, secondary reactor decks, mixed liquor channels, secondary clarifiers, return activated sludge and waste activated sludge pumping systems, and all associated equipment and appurtenances. This includes projects that are specifically required by new nutrient regulations.	1, 3, 5	\$13.0 million
Preliminary Treatment	Preliminary Treatment includes all capital improvements to the first stage of treatment processes applied to raw sewage flows conveyed to the MWWTP, including coarse screening, pumping, fine screening, and grit removal. Major projects include the IPS Resiliency Project and MWWTP Grit Dewatering Equipment Replacement projects.	1, 3, 5	\$6.5 million
Digesters	Digesters includes all capital improvements to renew and improve assets directly associated with digestion of solids separated in the liquid treatment process and the high strength waste blended with those separated solids via the Blend Tanks.	5, 6, 7, 9	\$5.3 million
		Total⁽¹⁾	\$40.0 million

⁽¹⁾ Totals may exceed the expected project fund deposit and may not add due to rounding.

Source: The District.

The proceeds of the Series 2026A Bonds (exclusive of amounts applied to pay costs of issuance and other costs related to the issuance of the Series 2026 Bonds) are to be allocated to costs of the projects identified above. Because proceeds of the Series 2026A Bonds will be applied to reimburse the District for prior expenditures made in connection with the projects identified above, the District does not intend to undertake any further tracking of and reporting on the use of the proceeds of the Series 2026A Bonds. See also “PLAN OF FINANCE” and “ESTIMATED SOURCES AND USES OF FUNDS” in the front part of this Official Statement and “THE WASTEWATER SYSTEM – Capital Improvement Program” in APPENDIX A – “THE EAST BAY MUNICIPAL UTILITY DISTRICT (THE WASTEWATER SYSTEM)” to this Official Statement.

The District’s Green Bond Guidance as most recently approved by the Board follows on the next page.

[Remainder of page intentionally left blank.]

Guidance for Issuing Green Bonds

This Guidance for Issuing Green Bonds is the framework the District will use when issuing bonds labeled as green bonds. As adopted by the District's Board of Directors in Policy 7.05 Sustainability and Resilience, it is the policy of the District to, "Provide reliable, high-quality drinking water and wastewater service through sustainable and resilient planning, design, and construction, operations, maintenance, rehabilitation, and disposal activities that manage long-term economic, environmental, and human resource benefits." Sustainability is defined in Policy 7.05 as, "practices that support environmental, economic, and social needs in a responsible manner to meet the needs of tomorrow. This triple bottom line approach seeks to minimize waste; conserve water, energy, and natural resources; promote long-term economic viability; and promote the safety and well-being of the District's employees, communities, and customers." Resilience is defined as, "the ability to prepare and plan for, absorb, recover from, and adapt to adverse events."

The District's commitment to the triple bottom line (in this instance, long-term economic viability) can be underscored by promoting the development of the green bond market through the responsible use of green bonds to finance its qualifying capital projects. This Guidance offers criteria that the District will use to evaluate projects for green bond funding that demonstrate a meaningful, quantifiable commitment to sustainability and resilience.

Green bonds are part of a broader trend to incorporate environmental, social and governance (ESG) factors into investment decisions. The market for ESG investments continues to evolve and there are multiple proposed standards or frameworks related to ESG investing or sustainable development, including the following:

- Green Bond Principles from the International Capital Market Association
- Sustainable Development Goals from the United Nations
- Climate Bonds Taxonomy from the Climate Bonds Initiative

As of the date of this Guidance, there is no single green bond standard mandated by a regulatory body nor universally accepted by investors. Accordingly, since 2015, the District has implemented its own set of green bond criteria, presented in the first column in the table on the following page. Projects identified as eligible for green bond funding by the District will be anticipated to further one or more of these criteria. Where relevant, the table on the following page also maps the District's criteria to principles, targets or green bond categories identified by the above-referenced frameworks in order to provide additional transparency to investors and the public. The mapping is shown only for additional context and no representation is made that the projects that fall under the District's criteria will necessarily fit the mapped criteria from other frameworks.

In selecting projects for green bond financing, District staff will focus on the projects that best meet the District's criteria and exclude those that appear marginal or that have unresolved sustainability issues.

Offering statements should provide project information and identify the most relevant criteria the project is expected to satisfy. Additionally, if debt is issued to prefund projects, the District will produce annual transparency reports on the use of proceeds of the green bonds. When debt is issued to reimburse the District for existing projects or capital expenses, no further reporting on use of proceeds is necessary. This Guidance can also be used, if appropriate, for refunding bonds, if information on the original projects funded by the bonds is sufficiently detailed for the evaluation criteria to be effectively used.

Board Approval: Board Motion No. 063-22 on March 22, 2022

Supersedes version approved under Board Motion No. 074-15 on April 28, 2015.

EBMUD Green Bond Criteria
and Mapping to Other Frameworks

EBMUD Green Bond Criteria	Green Bond Principles from the International Capital Market Association	Sustainable Development Goals from the United Nations	Climate Bonds Taxonomy from the Climate Bonds Initiative
Maintain water quality	Sustainable water and wastewater management	Target 6.1 - Safe and affordable drinking water	Water treatment [includes wastewater treatment facilities]
Improve water use efficiency, including conservation through reduced water loss	Sustainable water and wastewater management	Target 6.4 – Increase water-use efficiency	Water monitoring; Drought defence
Improve biodiversity and ecosystem quality	Terrestrial and aquatic biodiversity; Environmentally sustainable management of living natural resources and land use	Target 6.6 – Protect and restore water-related ecosystems	Ecological restoration / management
Protect against flooding	Sustainable water and wastewater management	Target 13.1 – Strengthen resilience and adaptive capacity to climate-related hazards	Water monitoring; Flood defence; Water storage
Reduce pollution	Pollution prevention and control	Target 6.3 – Improve water quality	Water treatment [includes wastewater treatment facilities]
Improve resilience (adaptation) to climate change	Climate change adaptation	Target 13.1 – Strengthen resilience and adaptive capacity to climate-related hazards	Water storage
Reduce the combustion of fossil fuels	Energy efficiency; Pollution prevention and control	Target 9.4 – Upgrade infrastructure	Depends on asset or project, e.g. Solar, Bio-Energy, or Transmission & Distribution
Reduce greenhouse gas emissions	Energy efficiency; Pollution prevention and control	Target 9.4 – Upgrade infrastructure	Depends on asset or project, e.g. Solar, Bio-Energy, or Transmission & Distribution
Implement “reduce, reuse, recycle” practices in preference to raw materials	Circular economy adapted products, production technologies and processes	Target 12.5 – Substantially reduce waste generation through prevention, reduction, recycling and reuse	Material Reuse; Material Recycling
Adhere to sustainable purchasing guidelines	Circular economy adapted products, production technologies and processes	Target 12.7 – Promote public procurement practices that are sustainable	N/A

Note: This table references quoted material from the source frameworks and as such, British English spelling and grammar conventions are left unchanged from the source texts.

APPENDIX H

PROPOSED CHANGES TO THE INDENTURE

The following is a summary of proposed amendments to the Original Subordinated Wastewater Revenue Bond Indenture as set forth in Twenty-Second Supplemental Indenture. This summary does not purport to be comprehensive and reference should be made to the Twenty-Second Supplemental Indenture for a full and complete statement of the provisions thereof.

The amendments described in this Appendix H will become effective on the date on which the consent of the Owners of a majority in principal amount of the Bonds then Outstanding has been obtained and a written certificate of the District to such effect has been delivered by the District to the Trustee (the “Amendments Effective Date”) as described under the caption “AMENDMENT AND RESTATEMENT OF THE INDENTURE; ADDITIONAL AMENDMENTS TO TAKE EFFECT IN THE FUTURE–Future Amendments to the Indenture” in the Official Statement. By the purchase and acceptance of the Series 2026 Bonds, the Owners and Beneficial Owners of the Series 2026 Bonds will be deemed to have consented to the proposed amendments to the Indenture by their purchase of the Series 2026 Bonds.

Capitalized terms used and not defined in this Appendix H will have the meanings ascribed thereto in Appendix C to the Official Statement under the heading “Certain Definitions.”

This Appendix H describes the modifications to existing definitions and provisions of the Indenture (as heretofore amended and restated) that will be effected through the proposed amendments. Set forth below is a comparison of the current provisions in the Indenture against the amendments to such provisions that will become effective on the Amendments Effective Date. In this Appendix H, blue underlining indicates additions and ~~red strikethrough~~ indicates deletions.

AMENDED PROVISIONS

Issuance of Bonds. The District may by Supplemental Indenture establish one or more Series of Bonds, payable from Adjusted Net Wastewater Revenues and secured by the pledge made under this Indenture equally and ratably with Bonds previously issued, and the District may issue, and the Trustee may authenticate and deliver to the purchasers thereof, Bonds of any Series so established, in such principal amount as shall be determined by the District, but only, with respect to each Series of Bonds, including the first Series of Bonds issued hereunder, upon compliance by the District with the provisions of Section 3.02 and any additional requirements set forth in said Supplemental Indenture and subject to the following specific conditions, which are hereby made conditions precedent to the issuance of any such additional Series of Bonds:

- (a) No Event of Default shall have occurred and then be continuing.
- (b) The aggregate principal amount of Bonds issued hereunder shall not exceed any limitation imposed by law or by any Supplemental Indenture.
- (c) The District shall have placed on file with the Trustee a Certificate of the District certifying that ~~the sum of either: (I)~~ the Adjusted Net Wastewater Revenues for any period of 12 consecutive months during the 18 months immediately preceding the date on which such additional Bonds or Parity Debt will become Outstanding; plus shall have been at least equal to 1.1 times the amount of Maximum Annual Debt Service on all Bonds and Parity Debt then Outstanding and the additional Bonds or Parity Debt then proposed to be issued, or (II) 90 percent of the projected Adjusted Net Wastewater Revenues for each of the three full Fiscal Years immediately succeeding

the date of issuance of such additional Bonds or Parity Debt in which interest is not capitalized in whole or in part from the proceeds of Bonds or Parity Debt shall be at least equal to 1.1 times the Annual Debt Service on all Bonds and Parity Debt to be Outstanding in such Fiscal Year. For purposes of the calculations described in clause (I) and clause (II) of this paragraph (c), the following amounts may be included in Adjusted Net Wastewater Revenues as so stated in the Certificate of the District: (1) an allowance for the amount by which the District projects Adjusted Net Wastewater Revenues for such Fiscal Year or such period of 12 months (as applicable) would have been increased had increases in rates, fees and charges during approved by the District prior to the issuance of such additional Bonds or Parity Debt but which was not in effect during all or part of such Fiscal Year or such period of 12 months (as applicable), been in effect throughout such Fiscal Year or such period of 12 months (as applicable); plus and (3) an allowance for 75 percent of the amount by which the District projects Adjusted Net Wastewater Revenues will increase (including as a result of an expected reduction in Wastewater Operation and Maintenance Costs) during the Fiscal Year or period of 12 months commencing on the date of issuance of such additional Series of Bonds (as applicable) due to improvements to the Wastewater System under construction (financed from any source) or to be financed with the proceeds of such additional Series of Bonds, shall (4) have been at least equal to 1.1 times the amount of Maximum Annual Debt Service on all Bonds and Parity Debt then Outstanding and the additional Bonds or Parity Debt then proposed to be issued or such Parity Debt, that are not reflected in Adjusted Net Wastewater Revenues for such Fiscal Years or such period of 12 months (as applicable).

Accounting Records and Financial Statements.

(A) The District will at all times keep, or cause to be kept, proper books of record and account, prepared in accordance with generally accepted accounting principles, in which complete and accurate entries shall be made of all transactions relating to the Adjusted Net Wastewater Revenues. Such books of record and account shall be available for inspection by the Trustee at reasonable hours and under reasonable circumstances.

(B) The District will furnish the Trustee, within one hundred and ~~twentyeighty~~ (120/180) days after the end of each Fiscal Year (or promptly following such later date upon which the audited financial statements of the District shall have become available), the financial statements of the District for such Fiscal Year, together with the report and opinion of an independent certified public accountant stating that the financial statements have been prepared in accordance with generally accepted accounting principles and that such accountant's examination of the financial statements was performed in accordance with generally accepted auditing standards and a Certificate of the chief financial officer of the District stating that no event which constitutes an Event of Default or which with the giving of notice or the passage of time or both would constitute an Event of Default has occurred and is continuing as of the end of such Fiscal Year, or specifying the nature of such event and the actions taken and proposed to be taken by the District to cure such default. Thereafter, a copy of such financial statements will be furnished to any owner of Bonds upon written request to the ~~District~~ Trustee.

Rates and Charges. ~~The~~ To the fullest extent permitted by law, the District will, at all times while any of the Bonds remain outstanding, fix, and prescribe ~~and collect~~ rates, fees and charges in connection with the services and facilities furnished by the Wastewater System so as to yield Wastewater Revenues which are reasonably expected in each Fiscal Year to be sufficient so that the Adjusted Net Wastewater Revenues for such ~~year~~ Fiscal Year shall be at least equal to 1.1 times the amount of Debt Service on all Bonds and Parity Debt for such Fiscal Year.

For avoidance of doubt, so long as the District has complied with its obligations set forth in the immediately preceding paragraph, the failure to produce or collect Adjusted Net Wastewater Revenues to meet the threshold set forth in such paragraph at the end of a Fiscal Year shall not constitute a default or an Event of Default, so long as the District has complied with the requirements set forth in the first paragraph of this Section at the commencement of the succeeding Fiscal Year.
