

Dear Neighbors,

3/18/16

#### Moraga Slide Update

Earlier this week EBMUD checked the water pipes on Augusta Drive. We found and fixed two laterals that had sheared from the water main due to the slide and installed leak detectors to alert us of new leaks in the area.

On Friday 3/18 and Saturday 3/19, crews will install an above ground water main on Augusta Drive from Merion Terrace to the end of the street along both sides of the street. The above ground water main will be a 2 inch steel pipe that will run along the gutter. Ramps will be installed for access to driveways. This will ensure continued water service.

Reminder: Do not irrigate your property to minimize water saturating the slope. During rains, control drainage from your property and direct it to an appropriate location (storm drain or engineered culvert).

EBMUD is working to keep the area safe. EBMUD and the Town of Moraga will continue to monitor the situation. For public safety, EBMUD will remove trees on the slope. EBMUD is working with environmental and geotechnical experts on next steps. If you observe a slide, on EBMUD lands, call us 24/7 (866) 403-2683 or contact the Town of Moraga at (925) 888-7040. If there is an emergency call 911.

We strongly encourage everyone to respect the trail closure signs and stay away from the unstable area.

If you have questions or concerns today please contact Michelle Blackwell, Community Affairs (510) 287-2053, [mblackwe@ebmud.com](mailto:mblackwe@ebmud.com). On Saturday and Sunday your contact is Sharla Sullivan at (510) 459-5930. After-hours call (866) 403-2683 and EBMUD dispatch will connect you with the standby contact. If there is an emergency, please contact 911. EBMUD will post information on [ebmud.com](http://ebmud.com) today.
