

**CAMANCHE BATTERY ENERGY STORAGE SYSTEM
ECONOMIC FEASIBILITY STUDY
REQUEST FOR PROPOSAL (WTD-125)**

QUESTIONS & ANSWERS

1. **Question:** Has there been any preliminary work done such as the interconnection application?

Answer: No, an interconnection application has not been completed.
2. **Question:** Does the consultant need to submit the permits or only estimate the permits needed?

Answer: Permit submission services are not in the scope of work for this RFP.
3. **Question:** Are there any existing environmental documents?

Answer: Any existing environmental documents will be provided to the selected consultant following NTP.
4. **Question:** Are there any sensitive environmental issues?

Answer: Any existing environmental documents will be provided to the selected consultant following NTP.
5. **Question:** Is PV included in the contracted services?

Answer: Yes. This is one of the project alternatives. See Page D-2 of the RFP.
6. **Question:** Is the District aware of tax incentives for the optional services?

Answer: The consultants should include applicable tax incentives in their proposal or project deliverables.
7. **Question:** Will power be exported?

Answer: The PV or PV-BESS systems for the Optional Services should be sized to minimize export.
8. **Question:** Should the consultant assume PPA or market price?

Answer: The RFP requires separate project cost estimates for a District-owned facility and PPA options for the Optional Services. See Page D-5 of the RFP.
9. **Question:** Will these slides be shared out later today/tomorrow?

Answer: Yes, these slides have been posted to ebud.com since May 16, 2025.

10. **Question:** Would firm selected for the studies be eligible for EPC of the projects (outside of the optional services)?

Answer: See Article 1.10 of the Professional Services Agreement that is included as Exhibit C of the RFP.
