A. SCC FOR STANDARD SERVICE

The below System Capacity Charges (SCC) are required of all applicants for water service to premises where installation of a service connection is required, including expanded service, as solely determined by the District. The SCC to be paid depends on the applicable meter size as determined by the District, based on water use information furnished by the applicant. The SCC shall apply for each new meter installed, regardless of the arrangement of water metering at the premises. The District reserves the right to determine the appropriate meter size to serve the applicant's projected demand. The District's decision regarding the applicable SCC shall be final.

Meter Size	System Capacity Charge
Residential Meters ≤1"	
≤1"	$19,527
Non-Residential Meters 5/8" to 1"	
5/8"	$19,527
3/4"	$29,291
1"	$48,818
All Meters >1"	
1-1/2"	$97,527
2"	$156,218
3"	$341,727
4"	$585,818
6"	$1,318,091
8"	$1,562,182

For service connections with meters larger than 8 inches, the District shall calculate the SCC as the unit cost for system capacity ($19,527 per meter equivalent unit[1]) multiplied

[1] Meter equivalent unit as described in the *April 2026 Water System Capacity Charge Study.*

by the number of meter equivalent units represented by that meter (installed meter hydraulic capacity[2] divided by the base meter capacity[3]).

B. MULTIPLE SINGLE-FAMILY DWELLINGS ON ONE PREMISES

Where two or more single-family dwellings are located on one premises, a separate SCC for each meter shall be applicable. The District shall determine the appropriate size of each meter according to the single-family dwelling served and all other water uses furnished through that meter. The SCC for each meter shall be determined separately in accordance with Section (A).

C. ACCESSORY DWELLING UNITS

With the creation of an accessory dwelling unit or junior accessory dwelling unit on a premises, SCC will apply as authorized by Chapter 13 of Division 1 of Title 7 of the Government Code. The SCC for each meter shall be determined in accordance with Section (A).

D. SEPARATE METERS FOR LANDSCAPE AREAS

An SCC in accordance with Section (A) shall be applicable for separate meters installed to serve landscape areas.

E. COMBINATION STANDARD AND FIRE SERVICE

Where a meter is installed to provide both standard service and a supply to a private fire protection system, the applicable SCC shall be based on the meter size required for standard service exclusive of the capacity for supplying the fire protection system as determined by the District based on plumbing code, fire protection code and water industry standards. The installation charges shown in Schedule D and all other rates and charges pertaining to the service shall be based on the actual size of the meter that is installed.

F. FIRE SERVICES, STANDBY SERVICES, AND RECYCLED WATER SERVICES

No SCC shall apply for standalone fire services, standby services (additional service connections for security of supply), and recycled water services.

G. CREDIT FOR EXISTING SERVICES

If new or expanded service(s) replace existing service(s) at a premises, a credit toward the new SCC will be applied based on the SCC value associated with the meter size and the premises designation of the eliminated service(s) (See Section A – SCC for

[2] Safe Maximum Operating Capacity per AWWA Standard C715-18(R22) Table 1.
[3] Safe Maximum Operating Capacity (maximum flow rate for intermittent service) for a 5/8” meter as defined in American Water Works Association (AWWA) Standard C700-24 (effective April 2025) Table 1 for displacement-type meters (meter sizes 5/8” to 2”).

Standard Service). For combination standard and fire service, SCC credits shall only apply to the domestic portion of the size of service.

SCC credit can only be applied to SCC charges and cannot be used to discount any other charges (such as installation charges).

The SCC credit for an existing service can only be applied to the premises where the existing service is located.

If the SCC value associated with the eliminated service(s) exceeds the SCC of the new or expanded service(s), the balance of the SCC shall not be refunded, credited, transferred, assigned, or otherwise applied to offset any other charge or fee.

If the SCC is paid and existing service(s) are to remain in service until a later time, the applicable credit for the existing service(s) will be provided when the existing service(s) are removed.

H. ADJUSTMENT OF SCC FOR WATER-CONSERVING LANDSCAPING ON PUBLICLY OWNED PROPERTY

The SCC for a water service connection exclusively for irrigation of landscaping on property owned by a public agency may be reduced or not required based on long-term water service needs after an initial planting establishment period of not more than three years (the “initial period”); provided that (1) the landscape plan incorporates drought-tolerant and other low-water-use planting materials on a major part of the landscaped area, and (2) the long-term water need would result in replacement of the initial water meter with a smaller meter or water service would be discontinued and removed at the end of the initial period, as solely determined by the District.

A public agency applying for water service under such conditions shall submit a written request to the District prior to the time of payment of the SCC. The request shall set forth in detail the facts supporting an adjustment of the SCC, shall include information and plans clearly describing the planting materials and irrigation system, and shall include data and calculations clearly demonstrating the estimated initial and long-term water needs.

If the District determines that the SCC can be based on a smaller meter or discontinuation of service after the initial period, the public agency shall enter into a water service agreement which provided for (1) payment of the reduced SCC prior to installation of service; (2) verification of the long-term need at the end of the period; and (3) payment of the additional SCC required if the initial meter is not to be replaced, if the replacement meter is larger than initially determined, or if water service is not discontinued and removed. If additional SCC payment is required, it shall be due and payable within 30 days of written notice from the District. The agreement shall be binding upon all subsequent owners of the property and shall be recorded.

Installation charges for the service connection shall be based on the meter size initially installed.

I. ADDITIONAL CHARGES FOR REGION 3D

For service connections within Region 3D (South of Norris Canyon Road outside Wiedemann Ranch, pumped zone), payment of the Post-2000 Component of $8,579 per 100 gallons per day and payment of the Regional Facilities Component of $2,502 per 100 gallons per day shall be required in addition to all other applicable fees and charges, including the applicable SCC as delineated in Section (A). Water use information shall be submitted by the applicant, and the average gallons per day used in the calculation shall be determined by the District.

4. **Any fees or charges** levied by other agencies for annexation proceedings such as the State Board of Equalization Filing Fees.

The above charges and the District Regulations Governing Water Service to Customers and the Schedule of Rates and Charges shall not be applicable to annexations which in the opinion of this Board present novel or unusual problems or situations or do not meet all the criteria set forth in Administrative Policy Statements approved by the Board dealing with annexations, and in all such instances the charges for the annexation shall be determined or approved by this Board at the time the terms and conditions for annexation are approved.

Multi-Family Premises – Dollars Per Dwelling Unit (DU)	
Each of the first 10 DU in a single structure	$4,182
Each additional DU in same structure	3,346

The above WDMF shall apply regardless of the arrangement of water metering or meter size at the premises; however, the District may limit the size and number of service connections to a combined capacity appropriate to the anticipated water use at the premises.

No additional WDMF shall be applicable for separate meters installed to provide irrigation for landscaping on the premises in the immediate area contiguous to the dwelling unit structures, provided such landscaped area is to be used exclusively by the residents. All other rates and charges shall be based on actual number and size of meters and does not apply to the requirements listed below.

A WDMF shall be applicable for separate meters installed to serve other water uses in the vicinity of the multi-family premises, such as irrigation of open space areas, parks, roadway medians, recreational facilities, and areas designated for public use. The WDMF shall be based on meter size as provided under E.1 above. If these other water uses are included in the water service connection to the multi-family premises, the District shall, for purposes of determining the applicable WDMF, determine the equivalent meter size for these uses based on plumbing code and water industry standards, as if there were a separate service connection.

4. The WDMF is payable for all connections within phased developments prior to release for construction, the distribution system pipelines and related appurtenances.

5. Water use in excess of 120 percent of the annual water budget[10] shall be subject to an Additional WDMF (on a per-occurrence basis). The Additional WDMF shall be determined by multiplying the amount of water used in excess of 100 percent of the annual water budget times the per gallon fee of $0.65 per gpd.

When a categorical waste is submitted for review, the District will determine the annual fee based on the District's reasonable estimated cost for the work including all analyses, engineering, materials, equipment, consumables, labor, and related expenses incidental to the permit administration. The District will notify the customer of the fee prior to permit issuance or renewal.

[2]For unusual waste reviews that require additional level of analysis and evaluation, the District will determine the reasonable estimated fee for the work including all analyses, engineering, materials, equipment, consumables, labor, and related expenses incidental to the waste evaluation. Schedule G

Wastewater Capacity Charges (WCC)

A. WASTEWATER CAPACITY CHARGES (WCC) FOR STANDARD SERVICE

The below Wastewater Capacity Charges (WCC) are required of all applicants for water service to premises within the District's wastewater service area where installation of a service connection is required, including expanded service, as solely determined by the District. The WCC to be paid depends on the applicable water meter size as determined by the District, based on water use information furnished by the applicant. The WCC shall apply for each new water meter installed. The WCC shall apply for each new water meter installed regardless of the arrangement of water metering at the premises and regardless of any wastewater diversion. The District reserves the right to determine the appropriate meter size(s) to serve the applicant's projected demand. The District's decision regarding the applicable WCC shall be final.

Meter Size	Wastewater Capacity Charge
Residential Meters ≤1"	
≤1"	$3,768
Non-Residential Meters 5/8" to 1"	
5/8"	$3,768
3/4"	$5,652
1"	$9,420
All Meters >1"	
1-1/2"	$18,840
2"	$30,144
3"	$65,939
4"	$113,039
6"	$254,338
8"	$301,438

For service connections with meters larger than 8 inches, the District shall calculate the WCC as the unit cost for system capacity ($3,768 per meter equivalent unit[1]) multiplied by

[1] Meter equivalent unit as described in the *April 2026 Wastewater Capacity Charge Study*.

the number of meter equivalent units represented by that meter (installed meter hydraulic capacity[2] divided by the base meter capacity[3]).

B. MULTIPLE SINGLE-FAMILY DWELLINGS ON ONE PREMISES

Where two or more single-family dwellings are located on one premises, a separate WCC for each meter shall be applicable. The District shall determine the appropriate size of each meter according to the single-family dwelling served and all other water uses furnished through that meter. The WCC for each meter shall be determined separately accordance with Section (A).

C. ACCESSORY DWELLING UNITS

With the creation of an accessory dwelling unit or junior accessory dwelling unit on a premises, WCC will be imposed only as authorized by Chapter 13 of Division 1 of Title 7 of the Government Code.

D. COMBINATION STANDARD AND FIRE SERVICE

Where a meter is installed to provide both standard service and a supply to a private fire protection system, the applicable WCC shall be based on the meter size required for standard service exclusive of the capacity for supplying the fire protection system as determined by the District based on plumbing code, fire protection code and water industry standards.

E. FIRE SERVICES, STANDBY SERVICES AND IRRIGATION-ONLY SERVICES

For fire services, standby services (additional service connections for security of supply), and irrigation-only services (no wastewater discharge), there shall be no WCC.

F. CREDIT FOR EXISTING SERVICES

If new or expanded service(s) replace existing service(s) at a premises, a credit toward the new WCC will be applied based on the SCC value associated with the meter size and the premises designation of the eliminated service(s) (See Section A – WCC for Standard Service). For combination standard and fire service, WCC credits shall only apply to the domestic portion of the size of service.

WCC credit can only be applied to WCC charges and cannot be used to discount any other charges (such as installation charges).

The WCC credit for an existing service can only be applied to the premises where the existing service is located.

[2] Safe Maximum Operating Capacity per AWWA Standard C715-18(R22) Table 1.
[3] Safe Maximum Operating Capacity (maximum flow rate for intermittent service) for a 5/8” meter as defined in American Water Works Association (AWWA) Standard C700-24 (effective April 2025) Table 1 for displacement-type meters (meter sizes 5/8” to 2”)

If the WCC value associated with the eliminated service(s) exceeds the WCC of the new or expanded service(s), the balance of the WCC shall not be refunded, credited, transferred, assigned, or otherwise applied to offset any other charge or fee.

If the WCC is paid and existing service(s) are to remain in service until a later time, the applicable credit for the existing service(s) will be provided when the existing service(s) are removed.

G. WCC for Unmetered Water

Discharges of Unmetered Water shall incur a WCC according to the following schedule.

Maximum Flow Rate	Wastewater Capacity Charge
≤20 gallons per minute (gpm)	$3,768
>20 gpm and ≤30 gpm	$5,652

Discharges of Unmetered Water at maximum flow rates greater than 30 gpm shall incur the WCC in Section(A) corresponding to the smallest meter size that has a Safe Maximum Operating Capacity[4] that is greater than the maximum flow rate for the discharge.

The District reserves the right to determine the appropriate maximum flow rate. The District's decision regarding the applicable WCC shall be final.

Discharges of Unmetered Water under a Limited-Term Discharge Permit will not be subject to a WCC.

[4] Safe Maximum Operating Capacity (maximum flow rate for intermittent service) as defined in American Water Works Association (AWWA) Standard C700-24 (effective April 2025) Table 1 for displacement-type meters (meter sizes 5/8" to 2"), AWWA Standard C702-24 (effective April 2025) Table 1 for compound meters (meter sizes 2" to 8") and AWWA Standard C715-18(R22) Table 1 for meters 10" and larger.

Public Records Act Fee Schedule

PUBLIC RECORDS ACT FEE SCHEDULE

EFFECTIVE 7/1/2026

INTRODUCTION

The District offers access to its records upon receipt of a request that reasonably describes an identifiable record. The following fee schedule has been established by the District to cover the costs for duplicating District documents, drawings, maps, recordings, and other records, as required by the Public Records Act.

Any questions or requests concerning District documents should be addressed to the Secretary of the District, East Bay Municipal Utility District, P.O. Box 24055, Oakland, California 94623-1055, emailed to SecOffice@ebmud.com, or by calling (510) 287-0404. Requests can also be sent via the portal at www.ebmud.com/about-us/public-records.

CHARGES

Pursuant to the Public Records Act, the District may recover the "direct costs of duplication" for disclosable public records, unless a different charge is provided by statute. The direct cost of duplication generally covers two types of expenses – materials & equipment costs and labor costs.

- Materials & Equipment costs generally include the capital cost of the equipment, the maintenance contract, paper supplies, and other necessary expenses that must be incurred to make the equipment operational.

- Labor costs ordinarily include the pro rata salary of the clerical or technical employee operating the equipment.

The total cost for providing copies is a combination of materials, labor for actual duplication time, equipment usage, and postage, if applicable. The direct cost of duplication may vary depending on the size and type of media requested and the kind of reproduction equipment required.

Photocopies of non-District materials are charged at the same rate as District materials.

Prices quoted in this fee schedule are subject to change. An estimate of cost will be provided upon request.

Any records sent outside for duplication will be billed as the actual cost of duplication by the outside vendor.

PAYMENT

For all requests, payment in advance is required before release of records. Acceptable methods of payment include cash or check (payable to East Bay Municipal Utility District). The District does not currently accept electronic payments.

Fee Type	Description	Amount
Deposit Requirement	For requests estimated to cost over $100 in duplication or query and compilation fees, a deposit in the amount of the estimated fee will be required before duplication.	Deposit equal to the estimated fee.

INSPECTION/DELIVERY/PICK UP

The requestor is entitled to inspect records and/or obtain copies of records during normal business hours (8:00 a.m. to 4:30 p.m., Monday through Friday).

If the requestor wishes records to be delivered, copies will be sent first class mail unless the requestor makes other arrangements for pick up or delivery with the Secretary's Office. Postage will be charged for copies mailed to the requestor.

Federal Express service is available if the requestor supplies a Federal Express account number.

[2] HUD FMR is the Housing and Urban Development Fair Market Rents Index, which is published by HUD before the start of each federal fiscal year. The mobilehome rental space fee shall be adjusted annually (fee adjustment) based on the following process. Starting with the 2025 Recreation Use Fee schedule, any percent increase shall be capped at 5 percent, provided however, that the cap may increase up to a maximum 10 percent in future years. The percent change in the HUD FMR index for 2-bedroom homes shall be averaged for Amador and Calaveras Counties and shall serve as the fee adjustment, up to the applicable cap for that year. Any balance remaining that was not applied due to the cap shall be carried and applied to the following year's fee adjustment, up to the applicable cap for that year. The applicable cap for a year shall be calculated based on the table below. As with all rates, fees, and charges, the District's Board of Directors may revise this process by Board action.

Mobilehome[1]	Guest Fee	Monthly	Per space	$75.00
Mobilehome[1]	Late Rent / Returned Check Fee	Each	Per space	$50.00

[1] Mobilehomes registered through Amador County receive a **$2.50 credit** on their monthly rent to reflect their payment of fire-related fees.

[2] HUD FMR Index is the **Housing and Urban Development Fair Market Rents Index**, which is published by HUD before the start of each federal fiscal year. The mobilehome rental space fee shall be adjusted annually (fee adjustment) based on the following process. Starting with the 2025 Recreation Use Fee schedule, any percent increase shall be capped at 5 percent, provided however, that the cap may increase up to a maximum 10 percent in future years. The percent change in the HUD FMR index for 2-bedroom homes shall be averaged for Amador and Calaveras Counties and shall serve as the fee adjustment, up to the applicable cap for that year. Any balance remaining that was not applied due to the cap shall be carried and applied to the following year's fee adjustment, up to the applicable cap for that year. The applicable cap for a year shall be calculated based on the table below. As with all rates, fees, and charges, the District's Board of Directors may revise this process by Board action. The annual fee cap is determined based on the carryforward balance from the previous year. If the carryforward balance is between 0 and 8 percent, the annual fee cap is 5 percent. If the carryforward balance is between 8 and 12 percent, the annual fee cap is 8 percent. If the carryforward balance exceeds 12 percent, the annual fee cap is 10 percent.
