

SCHEDULE G – WATER MAIN EXTENSION CHARGES

EFFECTIVE 7/1/2026

Activities associated with the charges in this schedule must comply with all applicable District Regulations Governing Water Service.

DEFINITIONS

Paved Conditions: Areas already paved and with existing utilities, curb, gutter, and asphalt in place. Paved conditions also include areas where more utilities than sanitary sewer or storm drains exist.

Unpaved Conditions: Areas where paving has not previously existed and the only existing utilities are sanitary sewer and storm drain. The conditions of the site must not include asphalt, curb, gutter, paving, or first or final lift.

A. District-Installed Mains (Less than 1,000 Feet)

The charge for District-installed main extensions less than 1,000 feet in length shall be based on the standard charges listed below.

This charge includes the cost of engineering, inspection, pipeline materials and appurtenances, and the installation of the required mains by the District in both unpaved and paved streets. It does not include fire hydrants or water service connections, which are covered by Schedules D, E, and F.

1. Base Charges

Charge Component	Amount
Basic Installation Charge	\$7,419

2. Linear Foot Charges (0-999 Feet)

Pipe Type	Charge per foot in Unpaved Conditions	Charge per foot in Paved Conditions
2-inch copper pipe	\$337	\$565
6-inch/8-inch ductile iron pipe	\$498	\$757
6-inch/8-inch earthquake resistant ductile iron pipe	\$502	\$760
12-inch ductile iron pipe	\$698	\$983
12-inch earthquake resistant ductile iron pipe	\$702	\$987

SCHEDULE G – WATER MAIN EXTENSION CHARGES

EFFECTIVE 7/1/2026

3. Special Conditions

The above charges apply to all District-installed mains except when there are unusual or special conditions, for example but not limited to traffic control, permit conditions, underground street utility congestion, known potential for archaeological or paleontological resources, contaminated soils, and streets with multi-layered surface types, which, in the opinion of the District, would result in the need for additional work and materials, including but not limited to hydraulic analysis, property rights evaluation, and/or clean soil utility corridor establishment. In such cases, the charge will be based on the District's reasonable estimated cost for the work including all engineering, material, equipment, consumables, labor, and related expenses incidental to the installation.

4. Pipe Sizes Greater Than 12 Inches

Charges for District-installed mains greater than 12-inches will be based on a District engineering cost estimate.

B. Applicant-Installed Mains (1,000 Feet and Over)

The charge for District-installed main extensions 1,000 feet and over in length shall be based on the standard charges listed below.

This charge includes the cost of engineering and inspection by the District. It does not include fire hydrants or water service connections, which are covered by Schedules D, E, and F.

1. Base Charges

Charge Component	Amount
Basic Installation Charge	\$7,459

2. Linear Foot Charges

Pipe Diameter	Charge (per foot)
6-8 inch	\$79
12-inch	\$93
16-inch and Larger	See Section B6

SCHEDULE G – WATER MAIN EXTENSION CHARGES

EFFECTIVE 7/1/2026

3. District-Supplied Materials

Item Category	Charge Basis
Pipe and fittings (valves, covers, blowoffs, appurtenances)	District Cost (including tax and shipping)

4. Special Conditions

The above charges apply to all Applicant-installed mains except when there are unusual or special conditions, for example but not limited to traffic control, permit conditions, underground street congestion, and streets with multi-layered surface types, which, in the opinion of the District, would result in the need for additional work and materials, including added testing and inspection, changes due to project revisions, property rights evaluation, site conditions or contaminated soil, and any construction by District forces to complete the installation. In such cases, the charge will be based on the District's reasonable estimated cost for the work including all engineering, material, equipment, consumables, labor, and related expenses incidental to the installation.

5. Credits (When Applicable)

Credits when pipe to be installed by the applicant is required by the District to be larger than the pipe size needed to serve the applicant or when applicant installs District improvements in conjunction with applicant-installed main extensions will be based on a District engineering cost estimate.

6. Pipe Sizes 16-inch and Larger

Charges for Applicant-installed mains 16-inches and larger will be based on a District engineering cost estimate.
