

SCHEDULE C – WASTEWATER DEPARTMENT INDUSTRIAL PERMIT FEES

EFFECTIVE 7/1/2026

The District shall charge the following annual fees for each permit type when a permit is issued or renewed.

Permit Type	Description	Annual Fee
Wastewater Discharge Permit	A written document that contains general and specific requirements governing onsite management, pretreatment, and discharge of wastewater to the community sewer. A Wastewater Discharge Permit is issued to a significant industrial user; which means an industrial user that warrants a control mechanism as determined by the District, or to a discharger that the District determines requires a permit to establish disposal charges based on flow and strength. The Wastewater Discharge Permit fee applies to Groundwater Permits (a permit issued for discharge of groundwater on an ongoing basis).	\$3,652
Wastewater General Permit	A Wastewater Discharge Permit issued to a group of industrial users that have the same or substantially similar types of operations, discharge the same types of wastes, require the same effluent limitations, require the same or similar monitoring, and in the opinion of the District are more appropriately controlled under a general control mechanism than under individual control mechanisms.	\$1,795
Estimation Permit	A permit issued to a discharger that demonstrates at least 20 percent of its metered water consumption is not discharged to the community sewer. The volume diverted will not be subject to the wastewater disposal charges.	\$1,425
Limited Term Discharge Permit	Permits for temporary discharges of unmetered water during a specified term.	\$3,235
