

# **San Pablo Clearwell & Rate Control Station Replacement Project Update**

**Public Meeting  
June 11, 2020, 6 pm**

# Overview

- Welcome from Director Andy Katz
- Message from Supervisor John Gioia
- Message from Chief Schuld & Ofc Harms
- Goals of the project
- Project Timeline
- Current Status
- What can you expect
- Future Landscaping and Site Improvements
- Questions & Postings

# About San Pablo Clearwell

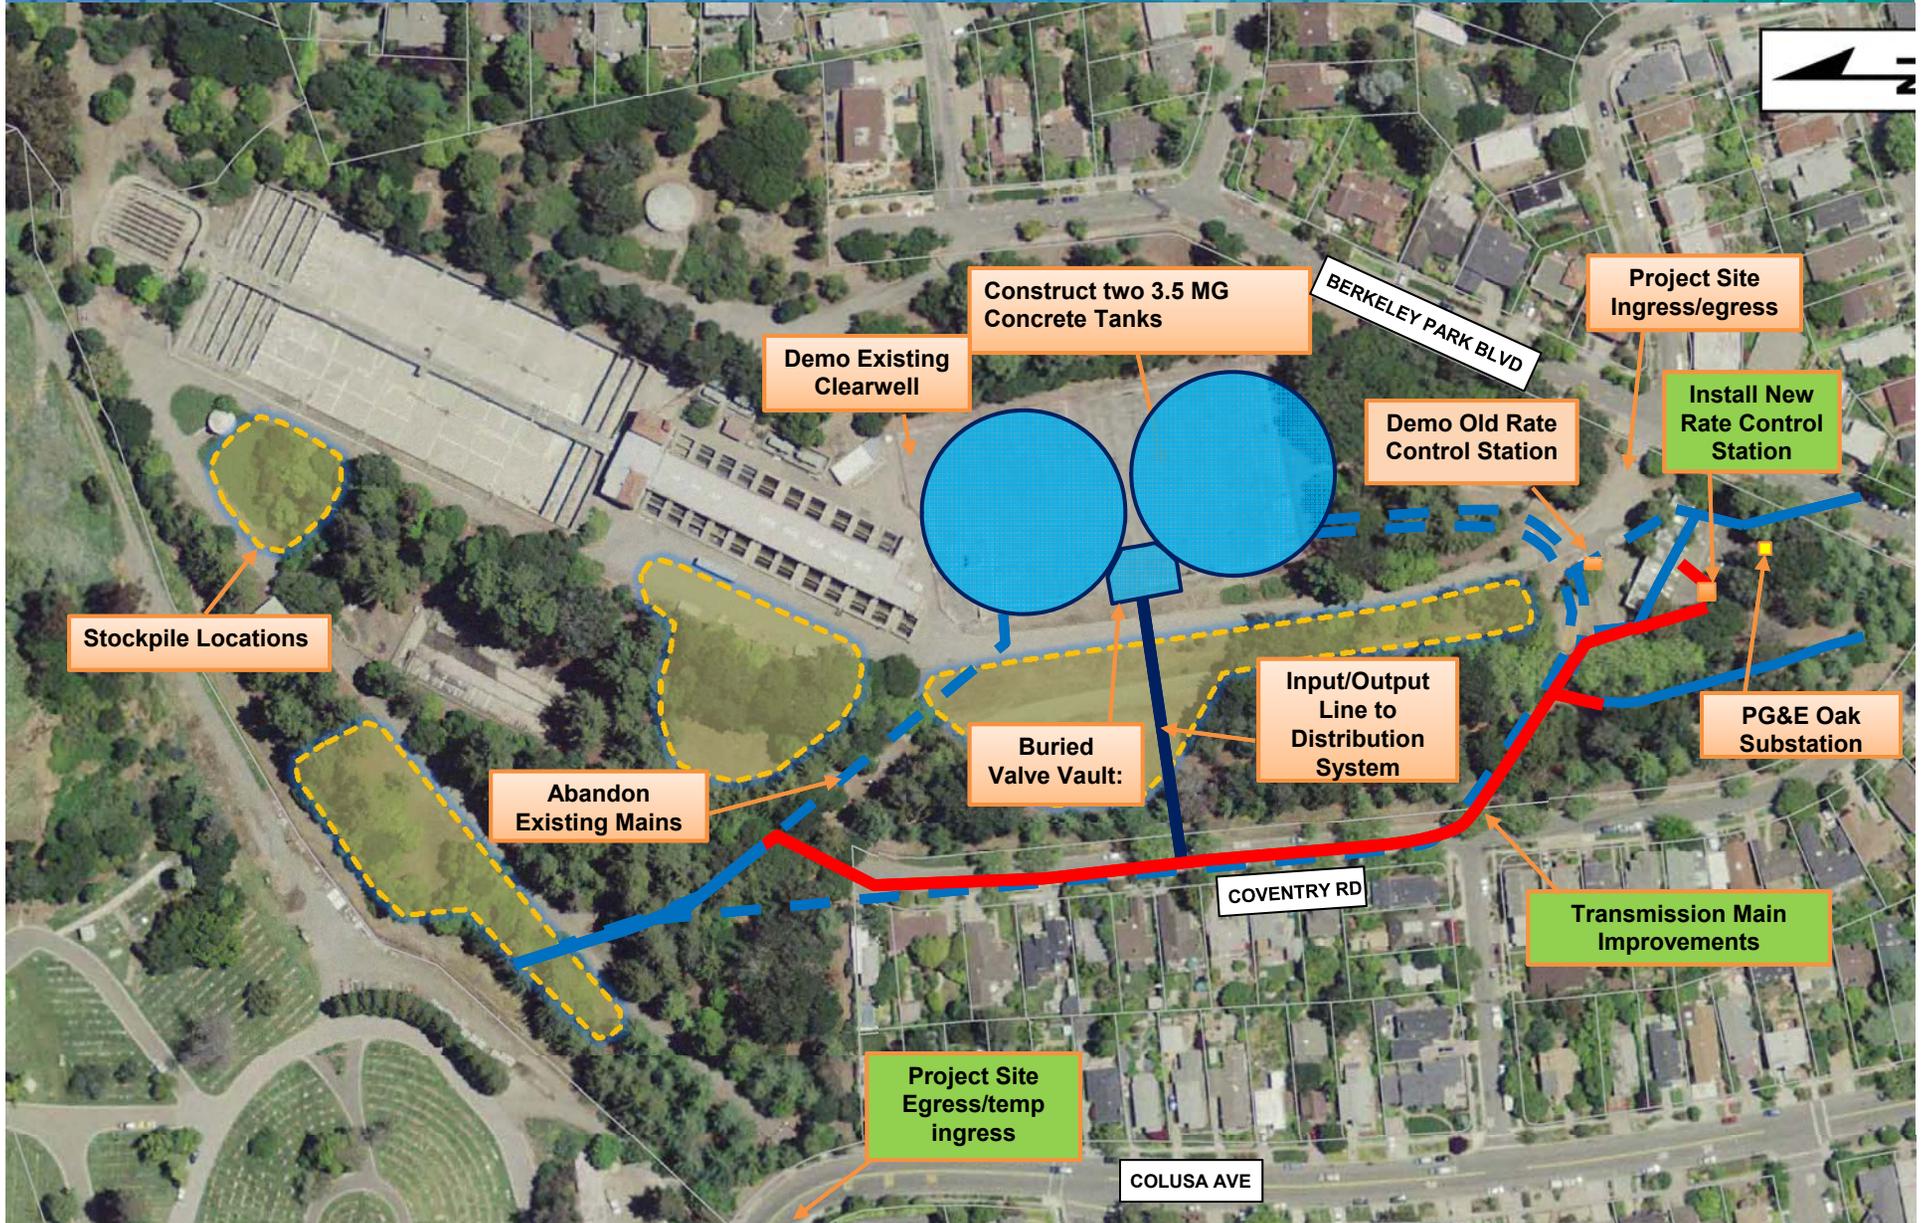

**Build in 1922**

**Last update 1950's**

# San Pablo Clearwell & Rate Control Station Replacement Project

# Current Project Status

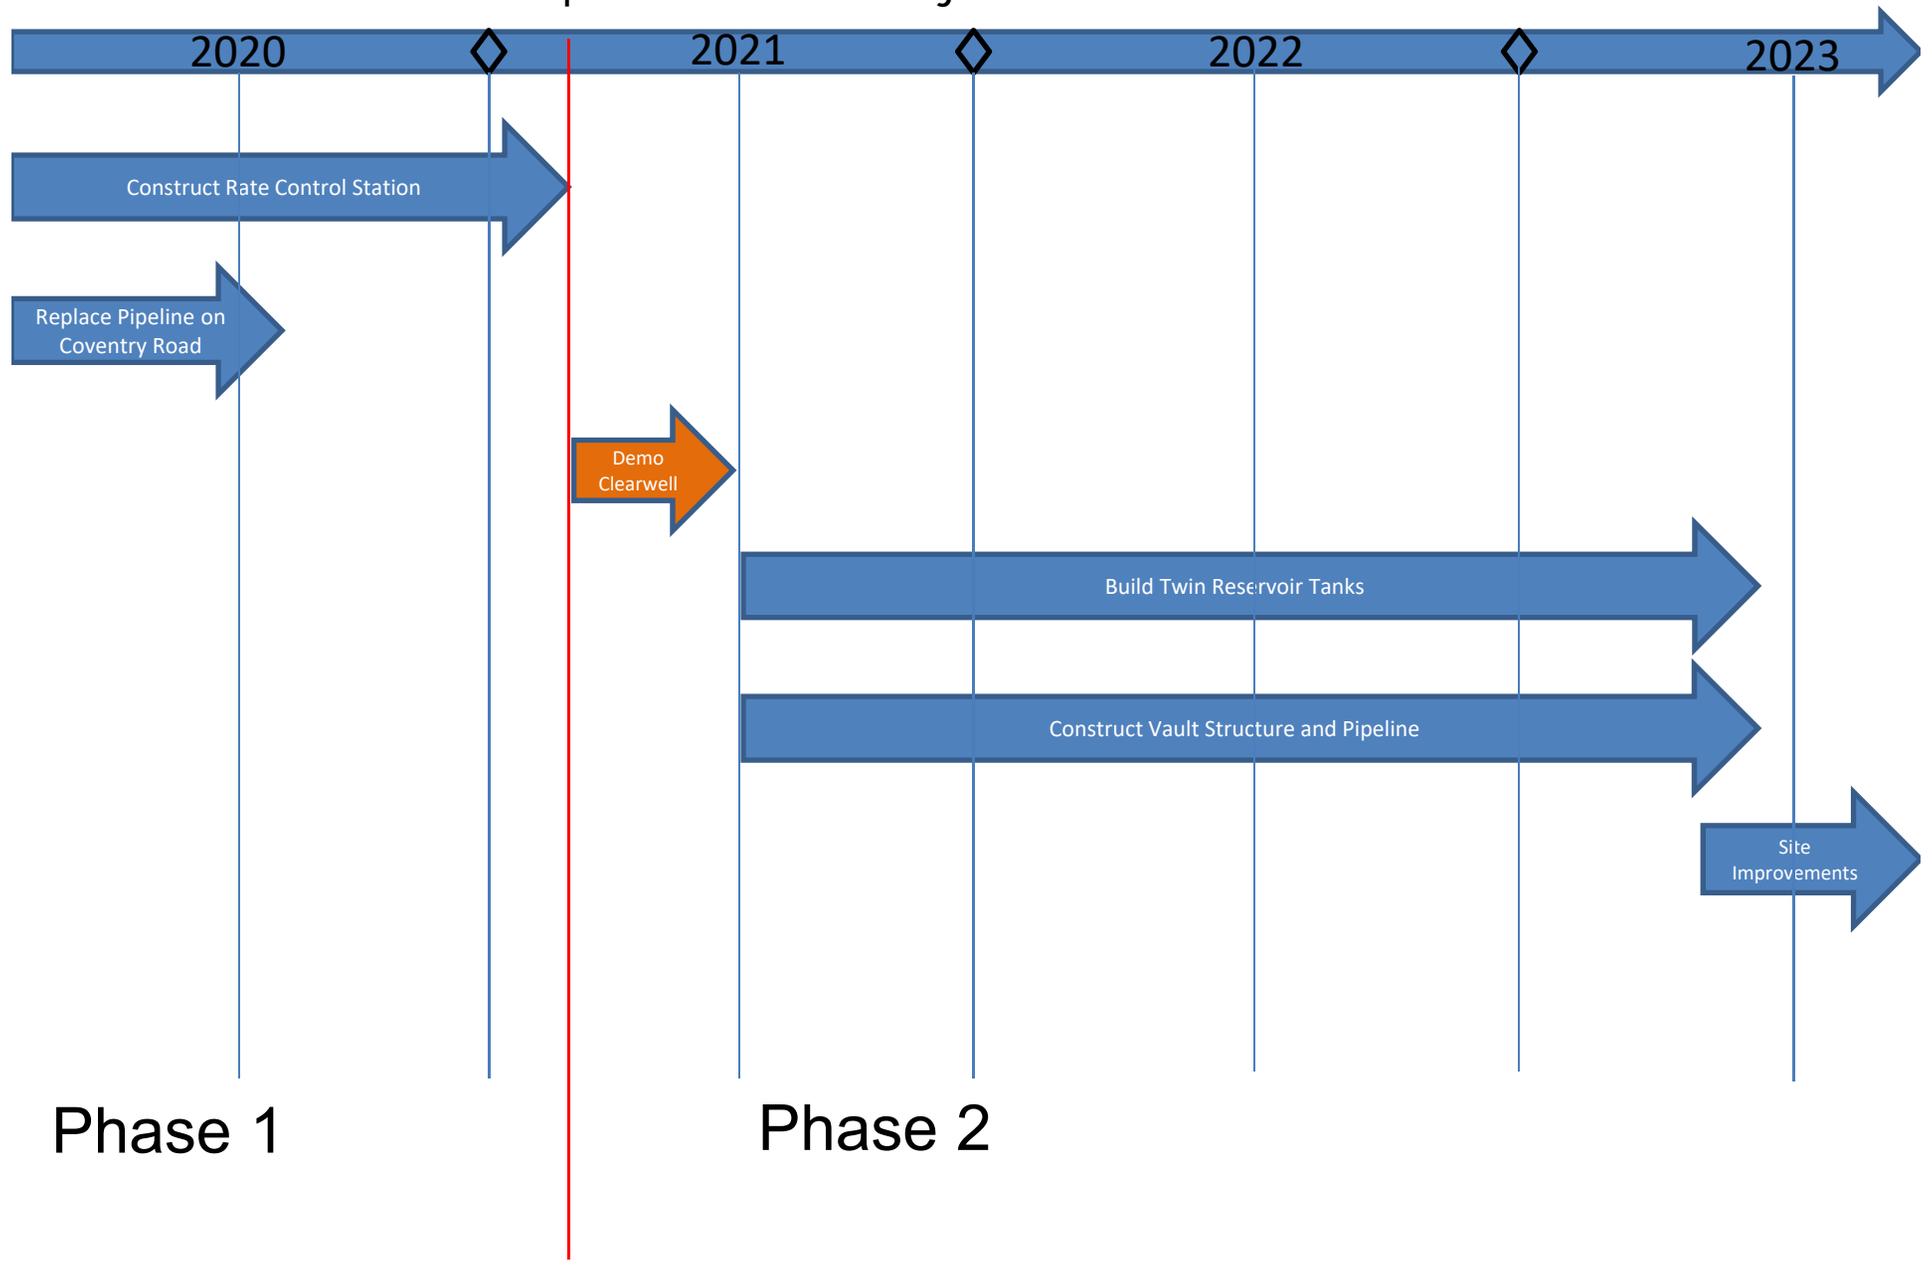

- Continuing Phase 1
  - Rate Control Station (RCS) is being placed in-service. Backfilling around new vault.
  - Preparing for demolition of existing North 30" pipeline and RCS.
  - Completing work on newly installed Switchgear and preparing to switch over power for the Treatment Plant.

# What you can expect in the coming months

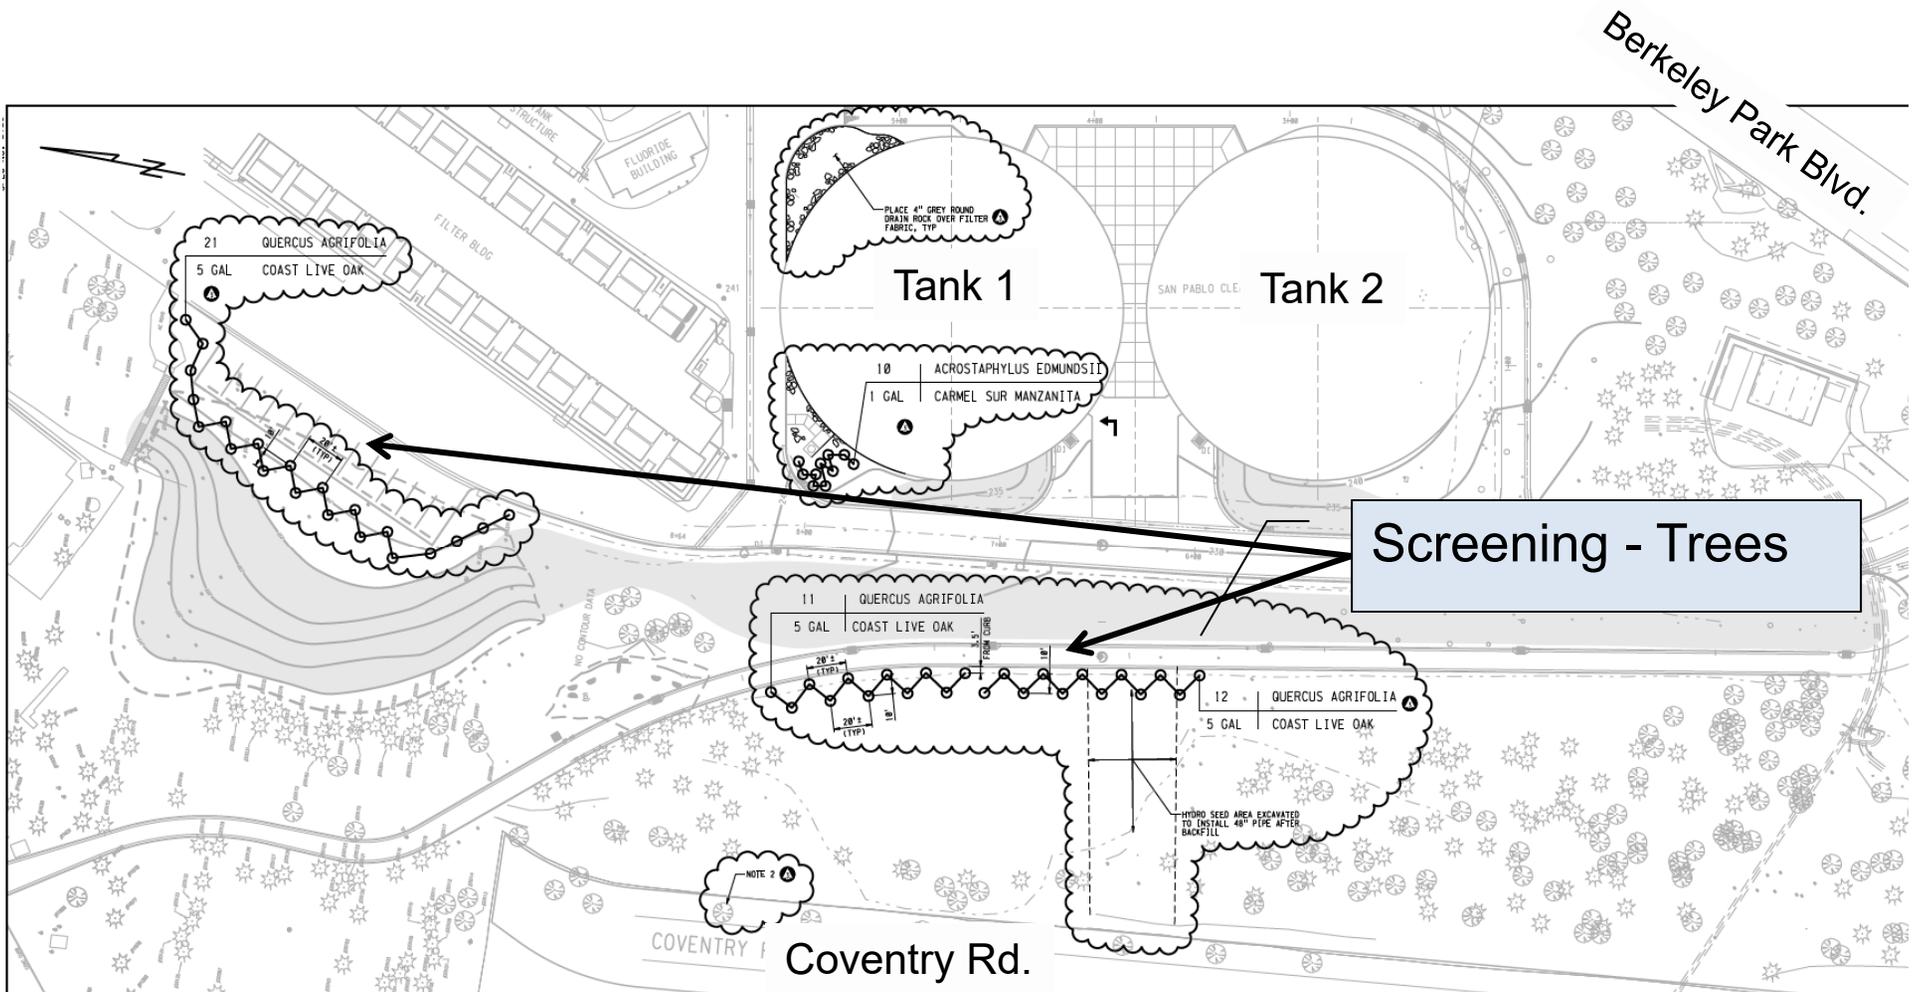

- Phase II
- Demolition of the Clearwell
- Truck traffic throughout the project
- Increased construction noise during working hours during clearwell demolition
- Demolition should last approximately two months beginning in late fall 2020

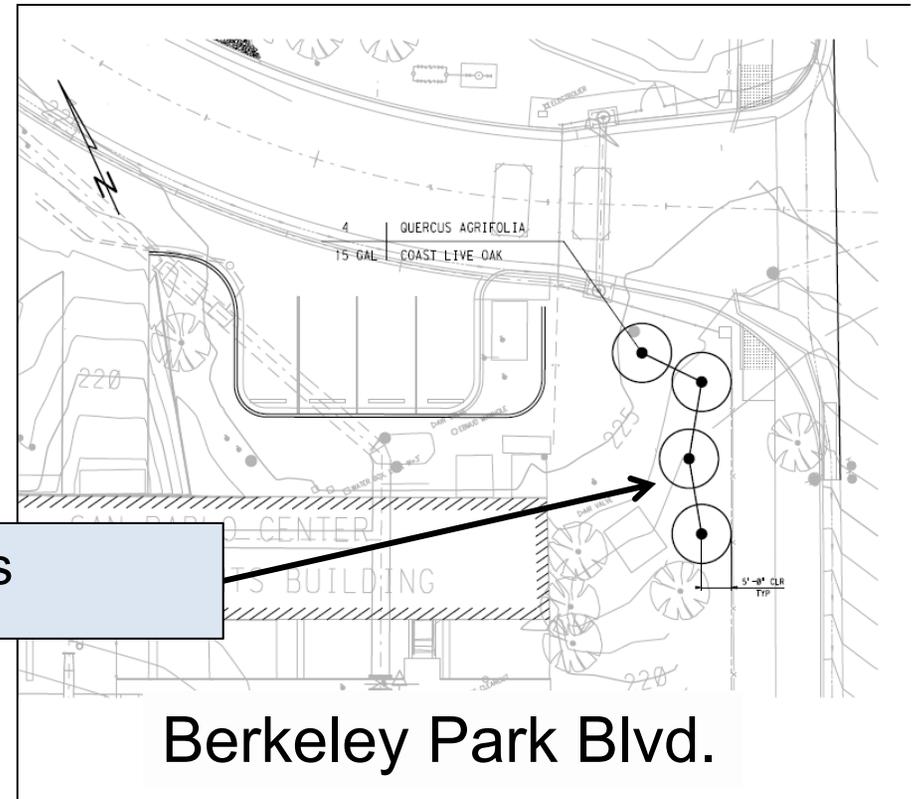

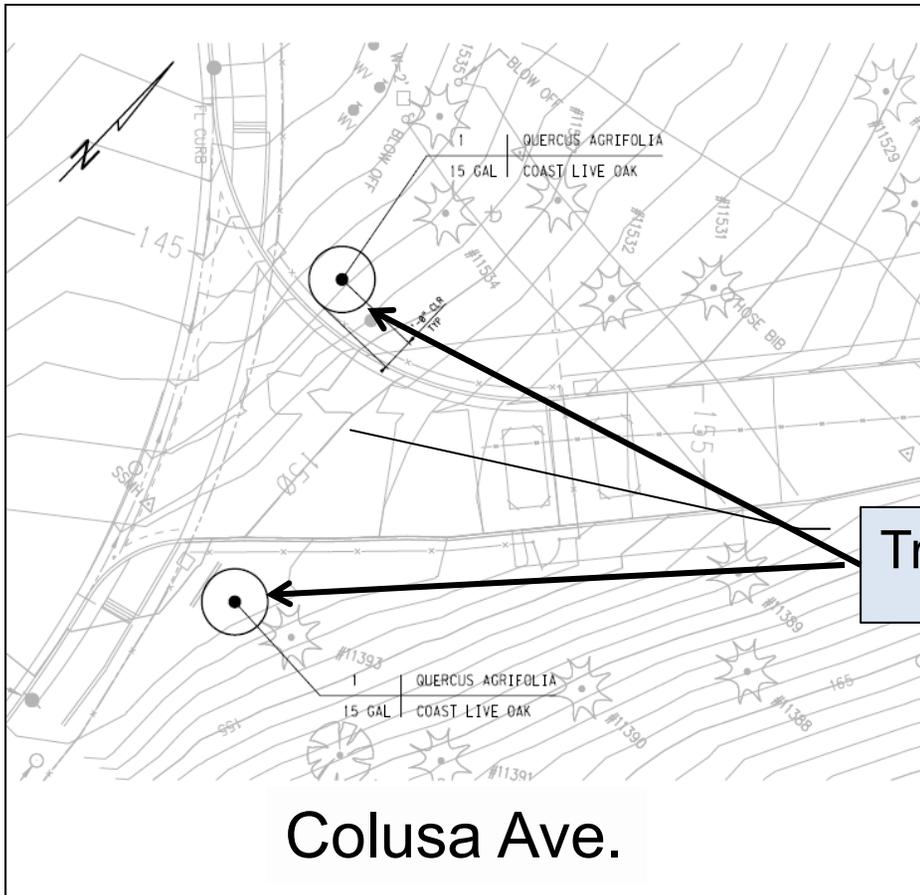

# San Pablo Clearwell & Rate Control Station Replacement Project – Current Timeline

# Future Landscaping

# Future Landscaping

Trees

# Coast Live Oaks

# Architectural Design Feature – PG&E Substation

- No landscaping allowed around PG&E substation
- Construct architectural feature around PG&E substation
- Alternatives being developed by consultant:
  - Enclosure
  - Concrete wall (different textures, finishes, and colors)
  - A berm (building up earth around the facility) with fence
- Alternatives to be posted on Project website for review and comment

# Questions and Design Drafts

## How to submit your questions or comment

- via chat
- Email: [mona.favorite-hill@ebmud.com](mailto:mona.favorite-hill@ebmud.com)

All questions, responses and design drafts will be posted on the project webpage at [ebmud.com/Spclearwell](http://ebmud.com/Spclearwell) by **Friday, June 19, 2020, at 5 pm**
