PROJECT INFORMATION

1. **TITLE:** Mokelumne Aqueduct No. 1 Bent Replacement Station 2480
2. **LOCATION:** (City, County, and specific location)
Woodward Island (Mokelumne Aqu Sta 2480) West of Middle River, San Joaquin County
3. **DESCRIPTION:** The Project will replace two concrete bents, install four bent support piles, replace a permanent grounding cable and conduit, and improve the access road within EBMUD's right of way.

EXEMPTION FINDING (Check one)

This project is exempt from CEQA because:

1. ☐ Activity is not a project
2. ☐ Activity is Ministerial (Sec.21080(b)(1); Guideline 15268)
3. ☐ Activity is a Declared Emergency (Sec.21080(b)(3); Guideline 15269(a))
4. ☐ Activity is an Emergency Project (Sec.21080(b)(4); Guideline 15269(b)(c))
5. ☒ Activity is Categorically Exempt Under Guideline CCR 15301
6. ☐ Activity is Statutorily Exempt Under Guideline _____
7. ☒ Reasons why project is exempt: The Project is exempt under 15301 because it involves no expansion of the Mokelumne Aqueduct system capacity and entails a repair of any existing public facility. The Project will have no significant environmental effect relative to location, cumulative impact, or significant effects due to unusual circumstances, hazardous waste, or historical resources, pursuant to Section 15300.2 of CEQA Guidelines.

EAST BAY MUNICIPAL UTILITY DISTRICT
MOKELUMNE AQUEDUCT NO. 1 BENT REPLACEMENTS AT STATION 2480
(PROJECT)

Overview and Background

The Project will replace two Mokelumne Aqueduct No. 1 (MOK1) concrete support bents, install new piles for the concrete support bents, replace an existing grounding system conduit and cable, and improve the access road. The Project will ensure MOK1 is properly supported through the above ground portion of the aqueduct. The Project is located on Woodward Island in San Joaquin County on East Bay Municipal Utility (District) owned land.

Project Purpose and Objectives

The Mokelumne Aqueduct system conveys untreated water from Pardee Reservoir to Walnut Creek. MOK1 is an 85 mile long 65-inch diameter coal tar lined and coated steel pipeline installed in 1929. Approximately 10 miles of MOK1 is installed above ground on concrete structural support bents resting on timber piles within the California Delta. The timber piles for two bents on Woodward Island are beginning to fail and the concrete structural support bents are leaning.

This project will replace the failing support with new concrete bents and piles and improve the access road. Also a permanent grounding conduit and cable, attached to one of the existing bents, will be replaced.

Project Location

The Project is located on Woodward Island on District owned land within the Mokelumne Aqueduct right of way in San Joaquin County. Figure 1 shows the project location.

Project Characteristics

Replacing the failing supports with new concrete bents and piles involves the following activities:

1. Improve the access road
Install approximately 2,300 ft of a new access road on the south side of the District owned right of way.
2. Install four new piles
Drill four new concrete support piles.

3. Demolish the two existing MOK1 concrete bents
Demolished the two existing MOK1 concrete bents that are failing and provide temporary support during the demolition phase.
4. Fabricate and install two MOK1 concrete bents
5. Demolish existing grounding cable and conduit and install a new permanent grounding cable and conduit

Permits and Approvals

All of work will be within District owned property or easement. Encroachment permits are not required since there is no work within the public right-of-way. Any necessary permits from the regulatory agencies will be obtained, to complete the Project.

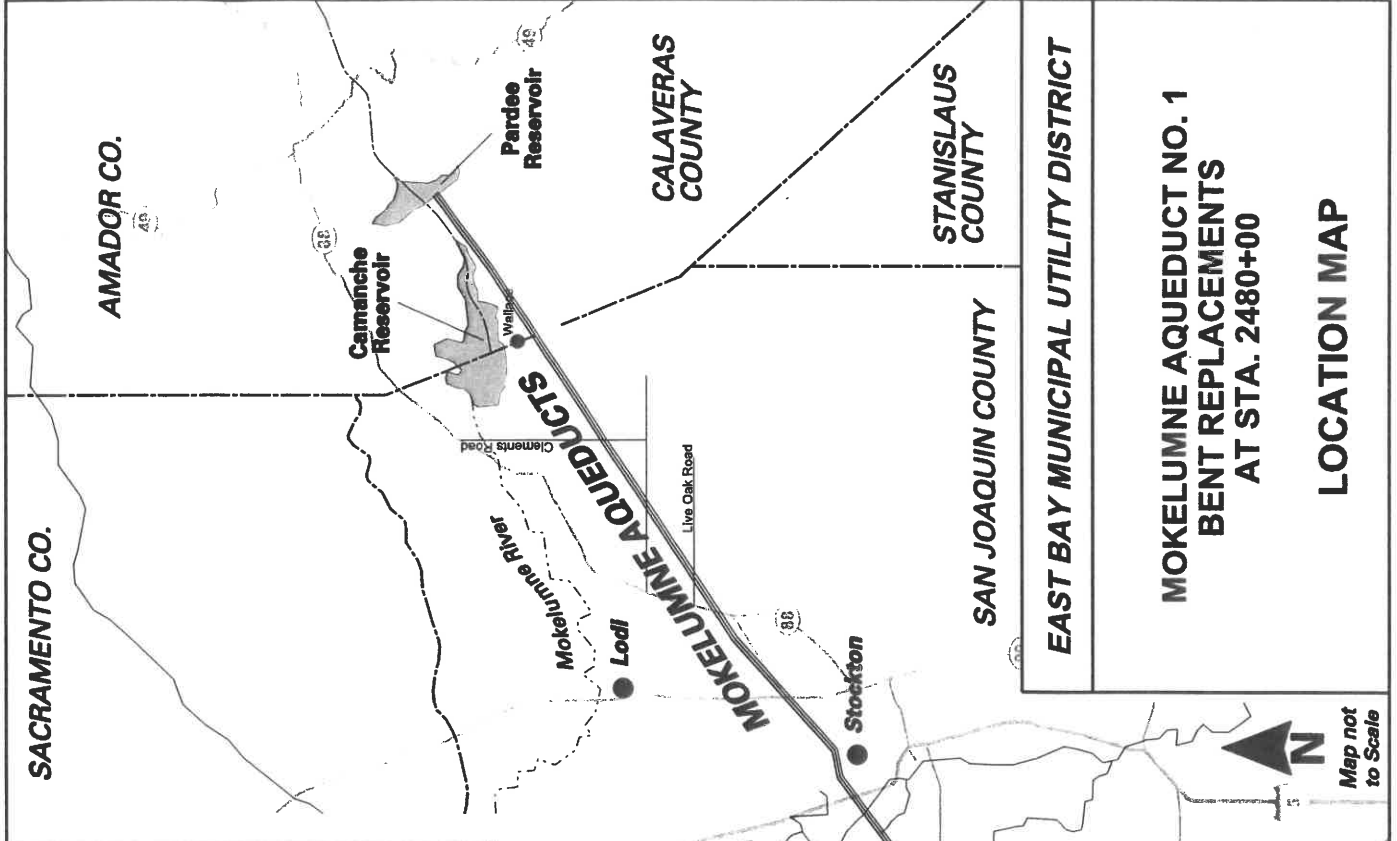

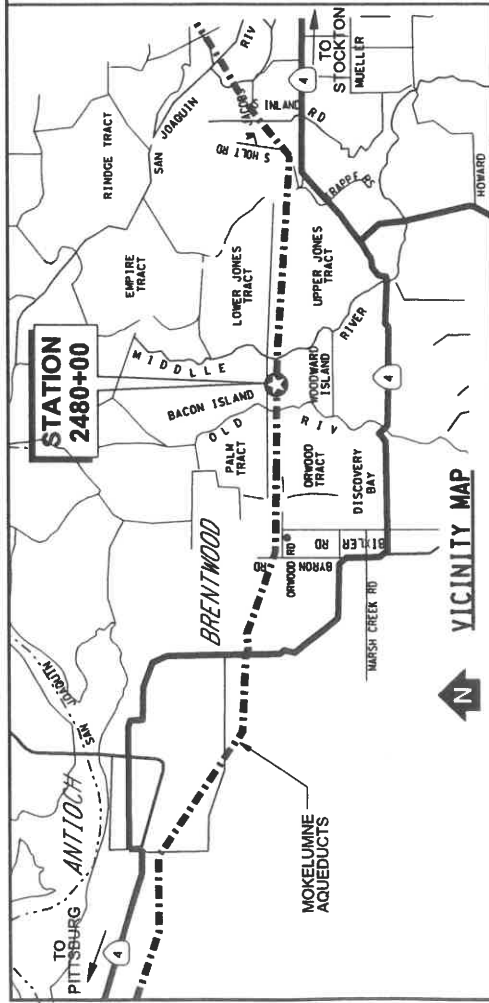

Schedule and Work Hours

The construction is anticipated to start in 2023 or 2024 and last approximately 3 months. Construction activities will be limited to the daytime weekday hours (7:00 a.m. to 7:00 p.m.) to the extent feasible.

District Practices and Procedures

Standard construction environmental and safety practices applicable to all District construction projects have been incorporated into the Project. These standard practices minimize impacts to the public resulting from District construction projects.
