## **EBMUD Water Efficient Landscape Requirements: Overview and Tips for Compliance**

**Paul Modrell - EBMUD Water Conservation Representative**

Designing a new landscape? Are you aware of EBMUD's water efficient landscape requirements?

On Monday, January 28, 2019, EBMUD Water Conservation Representative Paul Modrell will provide an overview of EBMUD's water efficient landscape regulations (referred to as Section 31), introduce the new on-line application and provide tips for a smooth approval process for your new landscape design. Paul also will illustrate the challenges to our future water supply and the importance of outdoor water conservation to preserve this precious resource.

Paul Modrell joined EBMUD two-and-half-years ago. A results-driven environmental scientist and landscape architect, Paul has twenty years of experience in watershed management, environmental planning, habitat restoration, landscape design and managing regulatory programs such as CEQA and MWEL.
