***LANDSCAPE ADVISORY COMMITTEE
Meeting Notice and Preliminary Agenda***

Date: Monday, March 25, 2019

***Location: EBMUD Administration Building
375 Eleventh Street, Oakland
Large Training Room, 2nd Floor
(510) 287-0593***

3:30	Welcome	Kristin Bowman
3:40	Announcements and EBMUD Water Supply	Kristin Bowman Charles Bohlig
3:45	Committee Report	TBD
3:50	20% by 2020 and Beyond	Richard Harris
4:50	Discussion	All
5:00	Meeting Adjourned	

**20% Urban Water Use Reduction by 2020
and
Long-Term Water Conservation Framework:
Making Sense of Senate Bills x7-7 and 606, and Assembly Bill 1668**

Richard Harris – EBMUD Manager of Water Conservation

Wondering how the EBMUD community is doing to meet the Water Conservation Act of 2009? California Senate Bill X7-7 requires urban areas to reduce water consumption 20 percent from baseline levels by the year 2020.

At the Monday, March 25, 2019 LAC general membership meeting, Richard Harris, EBMUD Manager of Water Conservation, will review Senate Bill x7-7 and bring us up to speed on how the state and the EBMUD community are doing to reach the 2020 goal. Richard will also present the next water conservation efforts planned for California and EBMUD outlined in Executive Order B-37-16, *Making Water Conservation a California Way of Life*.

Richard, a licensed Civil Engineer, joined EBMUD's Water Conservation Division in 1999 and has been with the District for 29 years. Richard oversees the development and implementation of EBMUD's water conservation master plan to support long-term water supply and demand management goals. Richard is a member of a variety of water conservation professional associations including the Alliance for Water Efficiency, American Water Works Association, and California Water Efficiency Partnership. As a member of the CA Department of Water Resources Urban Advisory Group, Richard participated in the 20x2020 process and is continuing to work with state agencies on the implementation of the Long-Term Water Conservation Framework.

Richard holds a master's degree in Civil Engineering from the University of California at Los Angeles and a bachelor's degree in Business Economics and Environmental Studies from the University of California at Santa Barbara.
