

Question & Answers  
RFP No. ENVCOMP-21-02, Environmental Sample Analysis Compliance

Question 1:

Are there specific method detection limits that would be required for any particular analysis?

Answer 1:

There are not specific method detection limits required for any particular analysis beyond standard method reporting limits used typically for waste characterization. This is not a contract used for permit compliance analyses that would be typically required for NDPES reporting, or to meet specific low level import criteria to import soil.

Question 2:

What is the incumbent's rate schedule?

Answer 2:

See attached page 2

## EXHIBIT E – PAYMENT TERMS AND PROCEDURES

The table below shows the agreed upon price for laboratory analyses called for in Exhibit A to this Agreement. Prices include all materials, supplies, labor, tools, equipment, and all other expenditures incident to satisfactory completion of the work required by this Agreement. Payment in full at the agreed upon prices will be made only for work completed in accordance with the terms and conditions of this Agreement. The pricing in the table below are confirmed by Enthalpy quotes provided to the District on September 9, 2019 and February 18, 2020.

| <b>Soil and Bulk Material Waste Characterization</b> |                          |                        |
|--|--------------------------|------------------------|
| <b>Analysis</b>                                      | <b>Analytical Method</b> | <b>Cost Per Sample</b> |
| CA Title 22 Metals                                   | EPA Methods 6010B/7471A  | \$ 115.00              |
| TCLP prep  | EPA Method 6010B         | \$ 50.00               |
| STLC (WET) prep                                      | EPA Method 6010B         | \$ 50.00               |
| Individual leachate test per metal                   | EPA Method 6010B         | \$ 15.00               |
| TPH-Diesel + Motor Oil                               | EPA Method 8015 B        | \$ 40.00               |
| Gasoline/BTEX  | EPA Methods 8015B/8021B  | \$ 75.00               |
| Volatile Organic Compounds                           | EPA Method 8260B         | \$ 75.00               |
| Polycyclic aromatic hydrocarbons                     | EPA Method 8270C w/ SIM  | \$ 105.00              |
| Polychlorinated biphenyls                            | Method 8082              | \$ 70.00               |
| <b>Water Waste Characterization</b>                  |                          |                        |
| <b>Analysis</b>                                      | <b>Analytical Method</b> | <b>Cost Per Sample</b> |
| Polychlorinated biphenyls                            | EPA Method 608           | \$ 75.00               |
| Volatile Organic Compounds                           | EPA Method 624           | \$ 80.00               |
| Semivolatile Organic Compounds                       | EPA Method 625           | \$ 165.00              |
| Total Suspended Solids                               | Standard Method 2540     | \$ 25.00               |
| Total Solids   | Standard Method 2540     | \$ 25.00               |
| Conductivity   | Standard Method 2510     | \$ 20.00               |
| Oil and Grease                                       | EPA Method 1664S         | \$ 60.00               |
| Diesel and Motor Oil                                 | EPA Method 8015          | \$ 45.00               |
| Gasoline   | EPA Method 8015          | \$ 45.00               |
| T22 metals   | EPA Method 200.7         | \$ 100.00              |
| WET Filtration                                       | Not Applicable           | \$ 20.00               |
