

SECTION 16
CHARGE FOR RESETTING METER

When service is discontinued for any reason, the District has the right to remove the meter and other equipment.

Where the meter alone has been removed, there will be a charge for resetting a meter as provided for in the Schedule of Rates and Charges. Where the service connection has not been in use for five years or where the meter and service lateral have been removed, the appropriate installation charge shall be paid as provided in the Schedule of Rates and Charges.

An installation charge, as provided in the Schedule of Rates and Charges, will be required when a customer applies for a change in type, change in size, or change in location of an existing service connection.
