

*Winery Waste
Management
Program*

A disposal program designed to keep your mind on making wine.

East Bay Municipal Utility District offers a simple, cost-effective and environmentally friendly 'green' disposal solution. We convert your wine production by-products and process wastewater into energy.

Sending waste from your facility to EBMUD's treatment plant for disposal can save you time and money, and also converts it into an environmentally-friendly beneficial reuse product - energy.

- Promotes beneficial reuse - creating green energy from waste
- Improves irrigation water quality
- Simple and cost-effective
- Disposal costs start at \$0.03/gallon for most winery wastestreams

Planning an expansion? Eliminate the need for a costly upgrade and delay large capital expenditures. Consider hauling your excess process wastewater to EBMUD during those critical months of the crush and barrel seasons.

Concerned with salt buildup in soils? Are TDS concentration and groundwater quality an issue? EBMUD offers an affordable solution for disposal of high-salinity wastestreams.

EBMUD accepts a variety of winery production by-products:

- Wine & Juice Products
- Barrel Wash Water
- Wine Lees
- Process Wastewater Screenings
- Pond Sludge
- Cooling Tower Blowdown
- Water Softener Concentrate
- Ion Exchange Reject
- Boiler Blowdown
- Acid / Caustic Rinse Water

Sustainable Reuse Solutions

EBMUD operates the area's largest environmentally responsible wastewater treatment facility with over 50 years of experience in managing a variety of process waste. We offer a complete disposal program which includes:

- Analytical laboratory services
- Coordination with haulers
- Facility wastestream audits

EBMUD Winery Waste Management Program

- Open 24/7, 365 days
- Convenient location
- Competitive disposal fees
- Green disposal alternative – creating energy from waste

Unsure how to proceed? Call EBMUD's staff today and discover why wineries from the North Coast and Central Valley areas select EBMUD as their waste management disposal solution.
