

Is Your Business WaterSmart?

How do you know if your business is using water efficiently? EBMUD is here to partner with your business to make lasting changes in how your business uses water, while helping cut down on unnecessary utility costs and helping the community by saving precious water during the drought!

EBMUD Makes it Simple

EBMUD offers rebates and services to help businesses save water. Lower your business's water, energy, and landscape maintenance costs by making your business more water efficient.

Our water conservation experts will provide a detailed assessment of your business' water use and provide water efficiency improvement recommendations to help you save water. Our team utilizes a variety of water conservation incentives and services designed to help customize rebate programs to retrofit old equipment with water-efficient technologies, offer free devices to install within your restrooms and kitchens, technical and financial assistance, and upgrades to reduce your outdoor water use in your landscape. The program includes the following:

- **WaterSmart Audits**

We offer free water audits, a first requirement for the business certification program. Our team of experts will survey your business and evaluate fixtures, operational processes, and your indoor and outdoor water use. We also offer education to your staff on simple changes and strategies to save water.

- **Business Certification**

Certification is awarded to individual sites or facilities that complete the WaterSmart Business and Commercial Landscape Certification Criteria requirements. This includes implementation of cost-effective water-saving measures, completing a water use assessment, and provide resources for water-efficient upgrades. Certified businesses will receive recognition from the EBMUD Board of Directors at a board meeting and will be granted approval to display the WaterSmart logo to post on their website and use in their general advertising for a period of three years. EBMUD may also feature WaterSmart businesses in publications on the website.

To participate in the WaterSmart Business Certification Program, please download an application at www.ebmud.com/WaterSmart.

New and Improved EBMUD Website

EBMUD launched a new and improved, mobile friendly website to help meet our customer and vendors needs. You will see a new home page, water supply updates on the drought page, and the new Business Center located in the top tasks bar on the right side of the home page. The Business Center includes the following links:
