

## What the Department of Industrial Relations wants you to know for 2017

### Online payroll reporting on hold for select transportation operators

Sole proprietors with no employees operating in the transportation industry will not be required to submit certified payroll records to the Department of Industrial Relations' (DIR) electronic certified payroll reporting system while adjustments to the electronic reporting requirements are implemented. However, transportation companies should maintain payroll records for all work on public works projects since a request for the records can be made at any time. (DIR Newsline No.: 2016-101 Date: November 2, 2016)

### Concrete Delivery Legislation (AB 219)

The definition of public works under the California Prevailing Wage Law now includes the hauling and delivery of ready-mixed concrete to carry out a public works contract. That means that ready-mix firms must register with the DIR and must pay prevailing wages if they are working on a public works project. The rate of pay shall be the current prevailing wage "for the geographical area in which the factory or batching plant is located." Certified payroll records must be submitted within five working days after the employee has been paid, accompanied by a written time record. The time record must be certified by each driver for the performance of job duties. (Section 1720.9 of California Labor Code) AB 219 applies to public works contracts that were advertised for bid or awarded on or after July 1, 2016.

### How to register without a contractor's license

A contractor's state license is not required to register with the DIR or to work on a public works project. Contractors working in a trade that is subject to licensing by the Contractors State License Board (CSLB) will still be subject to CSLB licensing requirements.

Suppliers and other trucking companies will need to provide a Public Utilities Commission license number, U.S. Department of Transportation license number, and any other state or federal license, if one is required for your business. If none of these apply, the supplier can register with DIR by selecting other in the license type menu and entering N/A for not applicable in the license number field.
