7300	Laboratories	246
7542	Automobile Washing and Polishing	323
8060	Hospitals	312
8200	Schools	232
	All Other Business Classification Codes (includes dischargers of only segregated domestic wastes from sanitary conveniences)	321

Permit Accounts^{4,6}

Flow (\$/ccf/mo)	159.07
Chemical Oxygen Demand Filtered (CODF) (\$/lb/mo)	46.88
Total Suspended Solids (TSS) (\$/lb/mo)	63.10

¹ Includes BCC 6514 and 8800.

² Residential fee is calculated as follows:

Flow:	6.7	x	\$159.07	=	\$1,066
CODF:	7.9	x	46.88	=	370
TSS:	11.29	x	63.10	=	<u>712</u>
					\$2,148
					Rounded to
					\$2,150

³ Capacity Fee is based on the anticipated maximum monthly flow contributions multiplied by the average wastewater strength measured or assigned for each classification of customer. The District may review the actual flow and strength within 24 months, once the business is fully established to verify the estimated demand for wastewater capacity. The review may result in the assessment of additional capacity fees if the actual flow and strength exceeds the original estimate.

⁴ For non-residential customers with projected treatment revenues equal to or greater than 0.1% of the total District treatment revenue, the calculated capacity fee will be reduced by a Rate Stabilization Factor of 25%. Projected treatment revenue will be based on permit conditions at the time of application or on average wastewater strength measured for each classification of customer if a permit is not required for discharge. Total District treatment revenue will be based on the budgeted fiscal year amount at the time of application.

⁵A credit may be provided for existing services. Where a new service will replace one or more existing or prior services to a premise where a capacity fee was paid, a credit will be given toward the new capacity fee demand and based on the previous capacity unit paid or if the existing service had not paid a capacity fee but in service since July 1, 1987 then the credit is based on historic use contributions.

⁶ Total fee is a summation of the unit rates for flow, CODF, and TSS times permit conditions at the time of application.
